A. INTERNAL RISK FACTORS

Criminal case filed against our promoter director, Mr. Paras S. Savla and Mr. Rupesh K. Savla for commission of offence punishable under Section 420, 467, 468, 471 and 114 of Indian Penal Code and Section 3 and 7 of the Essential Commodities Act, 1955 in the court of 5th Joint Judicial Magistrate, First Class, Ahmedabad (Rural), Navrangpura, Ahmedabad.

Criminal Case No. 1064/2001 was filed against Mr. Paras S. Savla and Mr. Rupesh K. Savla, promoters of our Company, for commission of offence punishable under Section 420, 467, 468, 471, & 114 of Indian Penal Code and Section 3 and 7 of the Essential Commodities Act, 1955 in the court of 5th Joint Judicial Magistrate, First Class, Ahmedabad (Rural), Navrangpura, Ahmedabad at Exh. 228.

The said case was filed against Mr. Paras Savla and Mr. Rupesh Savla, in their capacity as Directors of Yash Organics Ltd., a company having activity of manufacturing of industrial solvent as per the requirement and specifications of the customers. As part of the normal sales activity of Yash Organics Ltd, it had sold industrial solvents to one M/s Raj Chemicals, Agra and the goods were transported by a tanker on January 03, 2000 to Agra. Their tanker was seized on the outskirts of Ahmedabad by the Ahmedabad Rural Police on the presumption that the tanker originally meant for transportation to Agra was being diverted into the Ahmedabad city. On such assumptions the Ahmedabad Rural Police had filed the case against the driver, conductor, tanker owner and against the directors of Yash Organics Ltd.

By its Judgement Order dated June 11, 2004, the Judicial Magistrate has dismissed the complaint and the accused have been exonerated by giving them the benefit of doubt. However, the State Government has preferred an appeal bearing Criminal Appeal No. 1554 of 2004 before the Hon'ble High Court of Gujarat against the acquittal order, which has not yet been posted for admission. In view of this, the ultimate outcome of the criminal proceedings cannot be predicted.

The CIT (Appeals)-V, vide Order dated October 18, 2004 has upheld the disallowance of interest expense of Rs.1,64,070/-, but allowed our company's contention of foreign travel expense of Rs.25,850/- as allowable business expenditure. We have preferred an appeal to the Income Tax Appellate Tribunal for disallowance of Rs.1,64,070/- and the case is pending for hearing against the same authority.

Further, for the Assessment year 2001-02, the Income Tax Assessing Officer has imposed penalty of Rs.64,890 i.e., 100% of tax evaded for the same assesment year. For the Assessment Year 2002-03, the Assessing Officer has assessed a tax liability of Rs.115.76 lacs arising on account of disallowing the contention of our company that the gas compression charges of Rs.252.86 lacs being disputed by ONGC was not part of the income of our company. We had disputed the stand taken by the Income Tax Department and had preferred an appeal vide Appeal No. CIT (A)-V/ACIT Cir 1/39/2004-05, which was awarded in favour of the Income Tax department. We have further preferred an appeal to the Income Tax Appellate Tribunal and the case is pending for hearing against the same authority.
- c. For the Assessment Year 2003-04, the Assessing Officer has assessed a tax liability of Rs.151.44 lacs arising on account of disallowing the contention of our company that the gas compression charges of Rs.239.15 lacs being disputed by ONGC was not part of the income of our company; disallowance of Interest Expense of Rs.31.52 Lacs claimed in the P& L Account; disallowance of Penalty/fine and interest on late payment of TDS aggregating to Rs.17.58 Lacs claimed by our Company and imposition of Interest under Section 234 amounting to Rs.40.92 Lacs.

The equity shares of Adinath Exim Resources Limited (AERL), which is listed on the Bombay Stock Exchange Limited, has been suspended from trading with effect from January 27, 2004 due to non compliance with the provisions of clause 41 being submission of quarterly results for the period ended December 31, 2002 and March 31, 2003. The Additional Commissioner C.E.X, Ahmedabad-II has assessed a penalty of Rs.13,00,000/- which has been later reduced to Rs.2,00,000/- by Commissioner (Appeals) Central Excise, Ahmedabad- III.

Mr. Paras S. Savla was earlier a director on the Board of one Yash Organics Limited ("YOL") which is engaged in manufacture of Industrial Solvent YOL - 18 falling under Chapter No. 27 of the Central Excise Tariff Act, 1985. The Additional Commissioner passed Order-in-Original No. 64/Addl. As on March 31, 2006, there are contingent liabilities of Rs.732.01 lacs not provided for in the books of accounts. This consists of Rs.269.14 lacs disputed tax liability; Rs.163.33 lacs bank guarantee, Rs.179.54 lacs outstanding against letters of credit (net of margin) opened with Banks for capital equipment purchase and Rs.120.00 lacs corporate guarantee given to bank for other company.

Provision for huge penalty for Non-performance or sub-performance in the Sale and Service Contracts entered with ONGC and GACL and termination of the contract is at behest of ONGC/ GACL.

The Service Contracts entered into with ONGC and GACL provide for very high penalty for non-performance/sub-performance, which may potentially wipe of the earnings of our company. We have paid the following penalties over the last 5 years:

(Rs. In Lacs)

Years	2001-02	2002-03	2003-04	2004-05	2005-06
Penalty paid for Contracts executed	31.74	11.93	5.73	3.01	1.51

Further, we do not have any right to terminate the contract before the expiry of its term.

Management Perception

Our Company has been continuously handling such service contracts awarded by ONGC since the last 9 years. The amount of penalty incurred by us during the last two years has reduced and we have been able to meet the performance standards as set out in the service contracts. We are also keeping standby compressors at the site to ensure uninterrupted services.

We derive a significant portion of our revenues from our service contracts entered into with ONGC. The loss of such contracts, or significant reduction in the revenues we receive from ONGC may adversely affect our business and revenues.

DEEP INDUSTRIES LIMITED

Management Perception

The Gas Compression Contract is awarded by ONGC by way of a bidding process and the bid is awarded to the lowest price bidder. These contracts so awarded are normally awarded for a period of 2 years with extension option for further 1 year. The company has been successful in bidding tenders and getting work orders from ONGC since the last 9 years due to its capability in executing contracts. The company has also been successful in getting renewal of work orders.

Oil & Exploration Industry in India is substantially owned and managed by the Government/ Government entities like ONGC, GAIL, etc. A change in Government policy or decision can affect the business of the company.

Management Perception

The recent entry of private players like Cairn Energy, NIKO Resources, Assam Gas Company Ltd., Reliance Industries Limited, etc. in the Oil & Gas Exploration Sector, has widened the market scope of our company, thereby reducing the risk of depending primarily on ONGC for our business operations.

We have not commissioned an independent appraisal for the use of proceeds to be raised through the issue.

The uses of proceeds of the issue have been determined based on our management's internal estimates and no bank or financial institution has appraised the use of proceeds to be raised through this issue. Union Bank of India has been appointed as monitoring agency to monitor the use of the proceeds of the issue. Progress in the use of proceeds from the issue would be reported periodically as is statutorily required by SEBI in India.

We are dependent upon the expertise of our promoters, key management and technical personnel for the future performance of our Company. We may be adversely affected if the Company for any reason is unable to avail of their expertise.

The industry in which we operate has a limited number of players and accordingly expertise is limited to a few persons only. Our Company relies on seasoned and experienced professionals who have extensive background in the natural gas compression and service industry and expertise in sales, procurement, engineering, project management, capital formation and operations of Gas/Air compression equipment, Work over Rigs, Drilling Rigs and associated services. Trained and qualified manpower is most critical as the equipments have to run on a 24 hour basis for the whole year and require to be maintained in excellent condition for running without any interruption. We have a team of professionals who are responsible for the day-to-day operations and drive the business growth. The loss of the services of our senior management or other key personnel could seriously impair our ability to continue to manage and expand our business, which may adversely affect our financial condition. Further, we do not maintain any 'key man' life insurance for our senior members of our management team or other key personnel.

Compression Service is a Capital-intensive business requiring huge capital investment. We may be subject to risk associated with hiring compressors from outside to carry our operation since the same may not be immediately available and cost may be high.

Management Perception

Over a period of 12 years, we have been able to acquire and own a set of 10 compressor packages and have also acquired a work over rig to enable us to expand our operations and move towards our goal to become an integrated service provider to the oil and gas sector. Further, the capital intensive nature of our industry coupled with the technical expertise required acts as an entry barrier for new entrants.

We operate in an industry where the demand for the compression equipment is high and there is a time lag for supply of required equipment from manufacturers/assemblers. Our Company does not have any Supply Agreement with any of the manufacturers of compressors or assembler of compressor packager, whether in India or abroad, for guaranteed and timely supply of the compressors/compressor packager. This may lead to loss of opportunities and may affect our profitability.

Management Perception

We currently own a set of 10 compressor packages. Further, over the years our company has developed good relationships with manufacturers/assemblers of compression equipments, in India and abroad, which ensures uninterrupted and timely supply of compressor equipments as and when required.

We have not entered into any formal agreement with any organisation whether in India or abroad for uninterrupted supply of technical know-how or assistance for our business operations. This could result in loss of business operations due to non-adaptability to changes in technology and standards.

Management Perception

Our promoters and employees have gained considerable experience over the years in the business of gas and air compression. We have employed technically qualified and experienced personnel to operate the equipments. Further, our company has gained technical expertise during our association with Hanover Asia, Inc., USA for the Gas Compressor Equipment Lease and Service Agreement entered for the period 2001-2003. We also provide on the job training to our employees to enable us to provide uninterrupted services.

Our inability to manage growth may lead to loss of opportunities and may hamper our future growth plans

We anticipate rapid growth and expansion in our business, production capacity and scope of operations. We may be subject to growth-related risks including capacity constraints and pressure on internal systems and controls. Our Company's ability to manage growth effectively will require us to continue to implement and improve our operational and financial systems and to expand, train and manage our employee base. The inability of our Company to deal with this growth could have a material adverse impact on our business, operations and prospects. In order to manage our current operations and any future growth effectively, we will need to continue to implement and improve our operational, financial and management information systems and to hire, train, motivate, manage and retain our employees. There can be no assurance that our Company will be able to manage such growth effectively, that our management, personnel or systems will be adequate to support our operations or that we will be able to achieve the increased levels of revenue commensurate with the increased levels of operating expenses associated with this growth.

We face competition for our Services both from domestic and overseas Service Providers. Our inability to effectively compete with them may affect our operations and profitability.

Management Perception

In the domestic scenario there are few players to compete in the market. Internationally, several years of consolidations and mergers in the gas compression industry has resulted in few large companies focusing on higher margin application. Further, there are opportunities in international market for a new entity with experienced management to acquire existing compression asset for redeployment and to compete with existing companies by providing compression management services on more timely and effective basis. Our company expects to mitigate the competition risk by further adding other related services in its area of operations like providing services of work over rig. Our aim is to become an integrated service provider to the oil and gas sector.

The Natural Gas Compression market on rental basis in India is at a nascent stage. Most of the Companies in the Oil & Gas Sector are still carrying out Gas compression activities in house instead of outsourcing it. Any reluctance on the part of these companies to outsource the compression activities may affect our operations and profitability.

Management Perception

There is growing concern among producers of natural gas in India to outsource their compression requirements so as to reduce the capital expenditures on compression equipment and to focus on their core business.

DEEP INDUSTRIES LIMITED

Our Company is a new entrant in the field of work over rigs. As we do not have any prior experience in this field, we may be subject to risks associated with successfully completing contracts, sustaining competition etc.

Management Perception

Our Company has acquired one work over Rig of 100 MT to provide rig services to the oil and gas sector. Since there is a synergy with the existing compression services provided by our company, we expect little difficulty in operating and providing quality services in the rig business. Further, our Company has recently entered into a MoU with PT Indrillco Bakti, Jakarta-13260, Indonesia, for availing technical know-how/collaboration in connection with work over services for 30 to 200 Ton capacity Rigs. We have recently been awarded a contract by ONGC for deployment of the work over Rig for a period of 2 years.

Qualification in the Auditors Report on account of non-booking of disputed income from ONGC for the financial year 2001-02 and 2002-03 by the company

The company has accounted and booked 50% of the hire charges on the Gandhar Project of ONGC Limited due to dispute on non-compliance of conditions in the contract with ONGC. The company has not yet received the disputed income and the chances of receiving the same are remote and hence the same based on conservative accounting policy has not been booked as income in the financial statements.

Our Company has a net negative cash flow from operating activities in the FY 2006 and a net decrease in cash and cash equivalent for the FY 2002 and 2006. The details of the same are given below:

Our Company has bid for 2 Coal Bed Methane Blocks in consortium with Coal Gas Mart LLC, USA and Adinath Exim Resources Limited. As we do not have any prior experience in this field, we may be subject to risks associated with successfully operating the business, sustaining competition, etc.

Our company has bid for 1 Coal Bed Methane block in Andhra Pradesh jointly with Coal Gas Mart LLC, USA and Adinath Exim Resources Limited, Ahmedabad and 1 Coal Bed Methane block in Madhya Pradesh jointly with Coal Gas Mart LLC, USA. The company has recently entered into Memorandum of Understanding with Coal Gas Mart LLC, USA and Adinath Exim Resources Limited towards the same. Coal Gas Mart LLC, has around 5 years of experience as an operator in exploration and production of oil and gas. Our consortium has been short listed for the 2 CBM Blocks bid for by the Directorate General of Hydrocarbons and the same has been forwarded to the petroleum ministry for vetting.

Our Company, along with our joint bidders Coal Gas Mart, LLC, USA and Adinath Exim Resources Limited have also submitted a Minimum Work Program (MWP) to GoI. While submitting the respective bids for the 2 blocks, under which the cost for Phase I (2 years from start of contract) of the exploration activity has been given at Rs.1022 Lacs. The company has the option to exit the contract after the completion of the above referred Phase I. The bidders are required to produce Bank Guarantee equal to 35% of the MWP, which comes to about Rs.358 Lacs for two years. For one year the Bank Guarantee comes to Rs.179 Lacs. Our Company's share out of the total Bank Guarantee is Rs.114 Lacs for one year. The Bank Guarantee is to be provided before each activity in the phase, on the basis of the value of the activity to be completed. Our Company intends to meet the margin of 20% for the Bank Guarantee out of internal accruals.

Foreign Exchange Risks

Exchange rate fluctuations may have an impact on the profitability of our Company as some of our revenues are earned in foreign currency and we do not have a risk management system to hedge the risk of foreign exchange fluctuations.

B. EXTERNAL RISK FACTORS

Change in dynamics of the Natural Gas Industry may impact the business of the Company

The natural gas is now a dynamic, highly competitive business with flexible pricing, an active spot market, and widespread use of short to medium-term contracts. This is causing a fundamental change in the way each of the traditional participants of the industry operates: producers, pipelines, gas utilities, and industrial users. New market participants as the natural gas marketers, who link buyers and sellers of natural gas, have emerged. The change in industry dynamics may adversely affect the operations of our company. Further, the prices of gas and crude oil are high which enables the oil companies to economically explore more gas and crude. Any downfall in the prices of gas may adversely affect the operations of our company. The compression rental rates may fall if gas prices fall resulting in losses, which might hinder our growth.

Any slowdown in the economic growth in India could cause the business to suffer

Indian Economy performed satisfactory during the year 2004-05 with a GDP growth rate of 6.9%. This growth momentum has been very optimistic for the first half of 2005-06 with the GDP growth at around 8.1%. Any slowdown

DEEP INDUSTRIES LIMITED

in the growth of Indian economy or future volatility in global commodity prices, could adversely affect the business of our Company, including future financial performance, shareholders' funds and ability to implement strategy and the price of our equity shares.

Any significant change in the Government's economic liberalization and deregulation policies could disrupt the business and adversely affect the financial performance of our Company

The Government of India has traditionally exercised and continues to exercise a dominant influence over many aspects of the economy. Its economic policies had and could continue to have a significant effect on public & private sector entities, including our Company, on market conditions, prices of Indian securities, including in the future on our Company's Equity Shares. Any significant change in the Government's policies or any political instability in India could adversely affect the business and economic conditions in India and could also adversely affect the business, future financial performance and the price of our Company's Equity Shares.

Sensitivity to the economy and extraneous factors

Our Company's performance is highly correlated to the performance of the economy and the financial markets. The health of the economy and the financial markets in turn depends on the domestic economic growth, state of the global economy and business and consumer confidence, among other factors. Any event disturbing the dynamic balance of these diverse factors would directly or indirectly affect the performance of our Company.

The price of our Equity Shares may be volatile

The Equity Shares of our Company are currently not listed. The price of our Equity Shares on the Indian Stock Exchanges may fluctuate after listing as a result of several factors including -

The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The Issue Price of our Equity Shares will be based on numerous factors (discussed in the section titled 'Basis of Issue Price' beginning from page no. 23 of this Prospectus) and may not be indicative of the market price for our Equity Shares after the Issue.

The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure the investors that they will be able to resell their Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

 - Speculation in the press or investment community;
 - General market conditions; and
 - Domestic and international economic, legal and regulatory factors unrelated to our performance.

Certain factors beyond the control of our Company like terrorist attacks, civil unrest, droughts, floods, earthquakes, war etc. or any other acts of violence involving India and other countries can adversely affect our Company and financial markets, where the Equity Shares of our Company will be traded.

Certain events that are beyond our control such as the recent tsunami or seismically generated sea waves capable of considerable destruction on December 26, 2004 and terrorist attacks such as the ones that occurred in New York and Washington, D.C. on September 11, 2001 and New Delhi on December 13, 2001. SECTION III – INTRODUCTION

SUMMARY

INDUSTRY

Natural Gas is a mixture of hydrocarbon gases that occurs in porous geological formations beneath the earth's surface along with petroleum deposits, principally methane together with varying quantities of ethane, propane, butane, and other gases, and is used as a fuel and in the manufacture of organic compounds. Natural gas compression is a mechanical process whereby a volume of gas at an existing pressure is compressed to a desired higher pressure. The Natural Gas Compression industry consists of Service Providers in the field of Gas Compression at various stages of gas production from wells, processing and transportation.

Compression Services is required at several intervals of the natural gas production cycle: at the wellhead, at the gathering lines, into and out of gas processing facilities, into and out of storage and throughout the transportation systems. Low pressure or aging natural gas wells require compression for delivery of produced gas into higher pressured gas gathering or pipeline systems. Compressors may also be used in combination with oil and gas production equipment to process and refine oil and gas into more marketable energy sources. In addition, compression services are used for compressing feedstock in refineries and petrochemical plants, and for refrigeration applications in natural gas processing plants. Additionally, compressors are used to re-inject associated gas to lift liquid hydrocarbons and thereby increase the rate of crude oil production from oil and gas wells. Furthermore, compression enables gas to be stored in underground storage reservoirs for subsequent extraction during periods of peak demand. Finally, compressors are used in connection with compressed natural gas vehicle fueling facilities providing an alternative to gasoline.

Traditionally, the compressor equipments were owned by Oil and Natural Gas Producers who carried the compression services themselves. This involved huge investment in the compression equipments with lesser flexibility to use compressor from one oil well/field to another well/field. The advent of rental and contract compression made it possible for oil and natural gas producers, natural gas transporters and processors to improve the efficiency and the financial performance of their operations. Since the compression needs of a well/field change over time, outsourcing of compression equipment enables an oil and gas producer to better match variable compression requirements to the production needs throughout the life of the well/field. Now worldwide, oil and natural gas companies are seeking to streamline their operations and reduce their capital expenditures and other costs.

In India, mainly Deep Industries Limited, John Energy Limited, Shiv-Vani Oil & Exploration Services Limited provide Gas Compression Services. Internationally, the Gas Compression Service market consists of big players like Hanover Asia Inc. (USA) and Universal Compression, USA.

OUR BUSINESS

Our Company provides Air and Gas Compression Services to Oil & Gas Exploration Companies. We provide comprehensive contract compression services, which include operation and maintenance services. We also offer installation services, which for our typical mid-range and smaller horsepower units involve significantly less engineering and cost, than the comprehensive service concept prevalent in the international markets. We also routinely repackage or reconfigure some of our existing fleet to adapt to our customers' needs. We currently compete primarily in the market for transportable natural gas compression units of upto 2400 HP. We also provide transportation services for the transport of liquid. However, we have gradually moved from a liquid transport service provider to compression service providers.

Our Company currently owns a set of 10 compressor packages to execute its services, out of which 2 are currently deployed in USA. Further, 3 compressors have been deployed at ONGC site for executing compression contract. We have a leased facility in Gandhinagar, Gujarat, to undertake refurbishment, repairs and retrofitting of the existing/newly acquired equipment of self and clients.

Our Company has been providing compression services to esteemed clients like ONGC since the last 9 years. Our other clients include GACL, IOC, etc. We have not paid any major contract penalty for any non-performance/sub-performance of contract undertaken, since the last 2 years.

The ultimate aim of our Company is to become an integrated service provider to the Oil & Gas Industry. For this purpose, we have purchased a one 100 Ton Cardwell KB500 Work Over Rig for providing Mobile Work Over Rig services.

DEEP INDUSTRIES LIMITED

Our Company was awarded as a contractor member in good standing by International Association of Drilling Contractors (IADC) and has received ISO 9001-2000 certificate for Quality Management from BVQI (India) Private Limited.

We have joined hands with experienced companies like M/s. Valerus Compression Services, Limited Partnership, ("Valerus") Houston Texas, USA for gas compressors and production equipments to act as Sales Representatives for Valerus in all over Asian Region. We have also entered into a MoU with M/s. PT Indrillco Bakti ("PIB"), Jakarta-13260, Indonesia, under which PIB has agreed to provide technical know-how/collaboration in connection with work over services for 30 to 200 Ton capacity rigs.

Our Management

Our Company is currently managed by the Board of Directors comprising of six directors, out of which two are promoter directors, Mr. Paras S. Savla, Chairman & Managing Director and Mr. Rupesh K. Savla, Managing Director. They are assisted by Mr. Dharen Savla, Executive Director, Mr. Soumendu Saha, General Manager-Gas Compression, Mr. R. K. Mishra, Work Over Rig In-charge and Mr. Jigar Shah, Chief Financial Officer and Compliance Officer. The broad area of their operations is as follows:

Mr. Dharen Savla, Executive Director is in charge of Human Resource and organizes training programmes for implementing jobs for different sites. He is also looking after work over rig activities.

Mr. Soumendu Saha is General Manager-Gas Compression Services and is looking after configuring and designing compressor package according to customer specification.

Mr. R. K. Mishra is Work Over Rig Incharge and is looking after commissioning and operation of work over rigs.

Mr. Jigar Shah is the Chief Financial Officer and Compliance Officer and is looking after finance, tax and audit.

In addition, our Company has three independent directors on our Board, viz. Mr. Probodh Baruah, Mr. Harish G. Bhinde and Mr. Vijay R. Shah.

OUR COMPETITIVE STRENGTH

We face competition from the players in the domestic and international industry. Some of our strengths that differentiate us from our competitors are as under:

- Top management of our Company has several years of experience and expertise in their domain.
- The day-to-day affairs of our Company are looked after by qualified and skilled key personnel with experience, under the supervision of our Managing Directors.
- We currently own 10 compressor sets, which are deployed in the domestic and international market.
- We have compressed more than 340 million cubic metres of natural gas during the last five years.
- We had a Gas Compression Lease & Service Agreement with Hanover Asia, Inc., USA, one of the world's largest Compression Equipment manufacturers, during the period 2001-2003 which enabled us to acquire expertise in the area of gas compression.
- We have a Sales Representation Agreement with Valerus Compression Services Limited Partnership, Houston Texas, USA.
- We have recently entered into an MoU with PT Indrillco Bakti, Jakarta, Indonesia in January 2006, for technical know-how/collaboration and back up support in connection with work over services for 30 to 200 Ton capacity Rigs.
- Our clientele includes ONGC, GACL, IOC, etc. Our company has been successfully providing Gas Compression Services to ONGC since the last 9 years.
- Our Company is moving towards becoming an integrated service provider to the oil and gas sector, and accordingly, we have acquired one 100 Ton Cardwell KB500 Work Over Rig for providing work over services to oil wells.

The Industry Average P/E stands at 11.2. The P/E of the nearest comparable listed companies viz. Shiv-Vani Oil & Gas Exploration Services Limited and Aban Loyd Chiles is 19.2 and 40.5 respectively. Thus, the P/E multiple of Deep Industries Ltd. is comparable to the industry average and less than the nearest comparables.

The pre-issue book value of the shares as on March 31, 2006 is Rs.22.30 per share.

Minimum Return on Net Worth required, after the issue, to maintain pre-issue EPS (as on 31/03/2006) of Rs.2.64 is 8.79%. The company has generated a Return on Net Worth of 9.23% for the year ended March 31, 2006.

Taking into account the above qualitative and quantitative parameters, the Lead and Co-Lead Managers believes that the Issue Price of Rs. 36 per Equity Share is justified.

SECTION IV – ABOUT OUR COMPANY

INDUSTRY OVERVIEW

The information presented in this Section has been extracted from various publicly available documents and sources, including officially prepared from the Government and its various ministries and has not been prepared or independently verified by the Issuer or the LMs.

NATURAL GAS COMPRESSION INDUSTRY

Natural Gas

Natural Gas is a mixture of hydrocarbon gases that occurs in porous geological formations beneath the earth's surface along with petroleum deposits, principally methane together with varying quantities of ethane, propane, butane, and other gases, and is used as a fuel and in the manufacture of organic compounds.

Natural Gas Compression is a mechanical process whereby a volume of gas at an existing pressure is compressed to a desired higher pressure. The Natural Gas Compression industry consists of Service Providers in the field of Gas Compression at various stages of gas production from wells, processing and transportation.

Need for Gas Compression

Natural Gas Compressors are used in various applications in order to boost the pressure of the gas such as:

Wellhead Compression: During the life of an Oil Well or Gas Well, as more and more oil & gas is produced, the natural reservoir pressure typically declines. When the natural reservoir pressure declines below the line pressure of the gas gathering or pipeline system (used to transport the gas to market), gas stops flowing naturally into the pipeline. Compression equipment is applied in both field and gathering systems to boost the well's pressure levels allowing gas to be brought to market.

Gas Gathering: When there are numerous wells in the near vicinity and the pressure is not sufficient for them to naturally flow and reach its destination, compression is used to gather the gas from different wells into Gas Gathering Stations and then transport it to its destination.

Gas Storage Facilities: Since Gas requires large spaces for storage, when at low pressure, Compression is done to increase the pressure of Gas so that it can fit into smaller spaces.

Gas Processing: Compression is required to build the pressure of gas so that it can be processed in the plant.

Pipeline Booster Stations: When gas is transported over a long distance, there is a drop in pressure in the course of the transportation. Compression is required to boost the pressure back again to enable it to travel further.

Injection: Compression is used in gas storage projects to inject gas into underground reservoirs during off-peak seasons for withdrawal later during periods of high demand. Further, in secondary oil recovery operations, compression is used to inject natural gas into wells to maintain reservoir pressure.

Gas Lift: When the reservoir pressure decreases in the Oil & Gas Wells and oil does not flow up naturally to the top on its own, Compression is used to re-inject natural gas down producing oil wells to help lift liquids to the surface, known as gas lift operations.

Summarizing the above applications, typically, compression is required at several intervals of the natural gas production cycle: at the wellhead, at the gathering lines, into and out of gas processing facilities, into and out of storage and throughout the transportation systems. In addition to such wellhead and gas field gathering activities, natural gas compressors are used in a number of other applications, most of which are intended to enhance the productivity of oil and gas wells, gas transportation lines and processing plants.

Compressors are used to increase the efficiency of a low capacity gas field by providing a central compression point from which the gas can be removed and injected into a pipeline for transmission to facilities for further processing. As gas is transported through a pipeline, compression equipment is applied to allow the gas to continue to flow in the pipeline to its destination. Additionally, compressors are used to re-inject associated gas to lift liquid hydrocarbons and thereby increase the rate of crude oil production from oil and gas wells. Furthermore, compression enables gas to be stored in

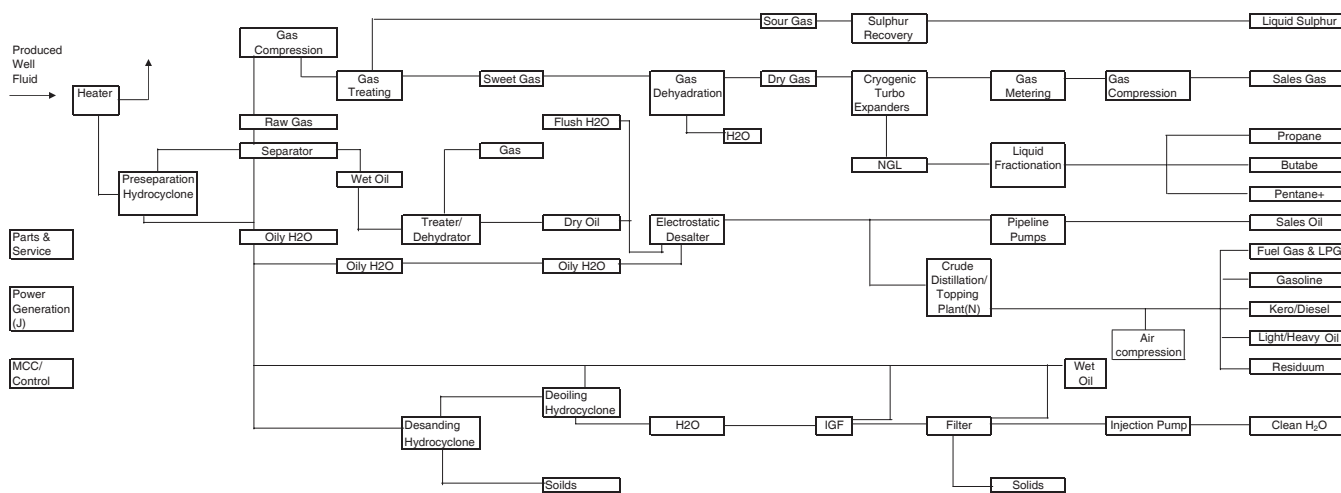

underground storage reservoirs for subsequent extraction during periods of peak demand. Finally, compressors are often used in combination with oil and gas production and processing equipment to process and refine oil and gas into higher value added and more marketable energy sources, as well as used in connection with compressed natural gas vehicle fuelling facilities providing an alternative to gasoline.

Natural Gas Compression Process

1. Gas enters the Compressor skid
2. Goes through the inlet separator where excess / free water/ foreign material is removed
3. Goes into first stage compressor cylinder and is compressed
4. When compressed, temperature increases,
5. Gas goes to cooler for cooling
6. When cooled, liquid is formed
7. Goes to separator to separate liquid
8. Steps 3 to 7 are repeated till desired pressure is achieved.

INDUSTRY OUTLOOK

The most fundamental force driving the demand for gas compression and production and processing equipment is the growing global consumption of natural gas. As more gas is consumed, the demand for compression and production and processing equipment increases. The following have contributed to the rise in growth opportunities in the Natural Gas Sector:

- Increased worldwide Natural Gas consumption, particularly due to rising worldwide energy demand and preference of natural gas as the “fuel of the future” because it provides the best mix of environmental soundness, economy and availability of any energy source
- Increasing use of natural gas as a fuel source in Oil Field power generation
- Implementation of international environmental and conservation laws prohibiting the flaring of natural gas, which increases the need for gathering systems
- Continued aging of the worldwide natural gas reserve base and the attendant decline of wellhead pressures

The Indian and global industry has been witnessing rise in Natural Gas consumption over the years resulting in increase in production by the producers to match the demand.

Natural Gas Consumption in India

Energy needs in India are catered mainly by coal, oil, natural gas, hydropower, nuclear power and wind power in that order. The contribution by natural gas is only 8% of total energy requirement in India, as against around 24% at global levels. Nevertheless, with more gas finds in India, and with LNG gaining greater acceptance, the share of natural gas in India's energy consumption is set to scale up significantly in the medium to long term.

Natural gas is a preferred fuel in most of the industries as it is the cheapest relative to other crude based products and at the same more cleaner and environmental friendly as well. Natural gas consumption has increased at 6.3% CAGR in the past 10 years in India. The demand for natural gas is far exceeding the availability and it is expected to remain so for the next two decades as the new gas finds and LNG imports plus expected natural gas import from Iran will not be sufficient to cater fully to India's growing natural gas needs.

More than 70% of demand for natural gas comes from power and fertilizer sectors in India. Other major industries using natural gas are sponge iron, petrochemicals, automobile fuel etc. New power plants are coming with natural gas as fuel and fertilizer plants using naphtha is also expected to switch to natural gas over a period of time as naphtha has become very expensive in recent years, but the main concern is availability of natural gas and its price.

Indian consumption of natural gas has risen faster than any other fuel in recent years. Its demand is estimated around 150 million metric standard cubic metres per day (mmscmd) whereas the supply is around 80 mmscmd only. Hence, there lies a gap of 70 mmscmd at present. Reliance Industries Limited is expected to commence production from 2006-07 and the estimated figure is 40 mmscmd. But by 2006-07, the demand for natural gas in India is expected to scale up to around 230 mmscmd thereby leaving a big gap again. By 2025 the expected demand is around 390 mmscmd of natural gas and as a result demand is expected to outpace supply for a very long time.

Natural gas can provide a clean fuel and at a lower cost compared to crude oil based fuels. The cost of natural gas is not even half the price of crude oil based fuels at present. With price of crude oil breaching \$55 per barrel twice in the last six months, it is imperative that alternative to crude oil has to be explored seriously and natural gas is the most suitable option in this regard.

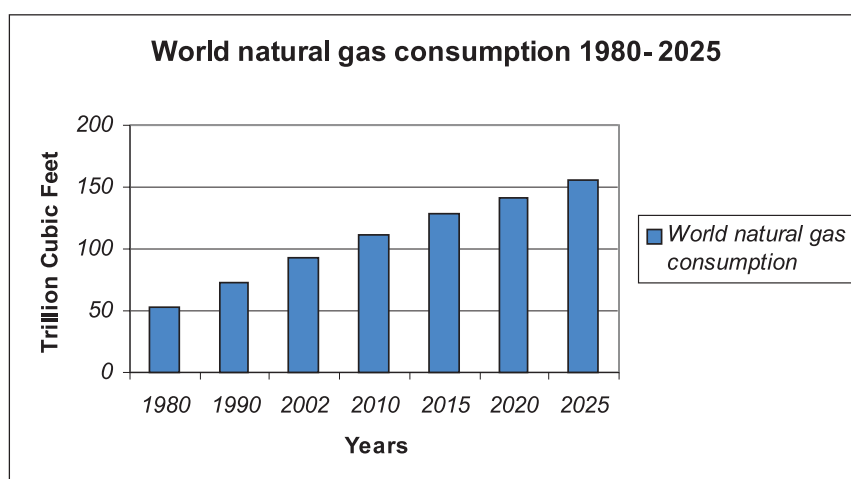

The share of natural gas in the country's energy consumption is set to scale up significantly from around 7% at present to about 20% by 2025. India plans to import LNG from Iran, Turkmenistan and Myanmar to partly satisfy the surging demand. With more gas finds, LNG imports set to increase natural gas availability, they will still not be able to cater to the growing domestic requirements. But with slow but purposeful move away from administered pricing regime, atleast in respect of new gas finds, the natural gas industry is posed for significant scaling up of revenues and profitability.

Natural Gas Compression Worldwide

Natural Gas is projected to be the fastest growing component of world primary energy consumption in the *International Energy Outlook 2005 (IEO2005)*. Consumption of natural gas worldwide increases in the forecast by an average of 2.3 percent annually from 2002 to 2025, compared with projected annual growth rates of 1.9 percent for oil consumption and 2.0 percent for coal consumption. From 2002 to 2025, consumption of natural gas is projected to increase by almost 70 percent, from 92 trillion cubic feet to 156 trillion cubic feet, and its share of total energy consumption on a Btu basis is projected to grow from 23 percent to 25 percent. The electric power sector accounts for almost one-half of the total incremental growth in worldwide natural gas demand over the forecast period.

 Data after 2002: EIA Systems for the analysis of Global Energy Markets, 2005

On a regional basis, the largest increases in natural gas consumption worldwide are projected for the transitional economies of Eastern Europe and the former Soviet Union (EE/FSU) and for emerging Asia. Natural gas use in the EE/FSU expands by 63 percent over the projection period; and in emerging Asia, gas use is expected to nearly triple from 2002 to 2025. In the mature market economies, where natural gas markets are more established, consumption of natural gas is projected to increase by a more modest annual average of 1.6 percent from 2002 to 2025, with the largest incremental growth in the mature market economies projected for North America, at 11 trillion cubic feet.

DEEP INDUSTRIES LIMITED

The emerging economies are also expected to show the strongest growth in natural gas production, with a projected average increase of 4.1 percent per year from 2002 to 2025 in the reference case. In contrast, natural gas production in the transitional economies is projected to grow at an average annual rate of 2.3 percent, and production in the mature market economies is expected to increase by an average of only 0.6 percent per year from 2002 to 2025.

Source: Data upto 2002: EIA, International Energy Annual, 2002 DOE/EIA-0219 (2002), website: eia.doe.gov/iea
Data after 2002: EIA Systems for the analysis of Global Energy Markets, 2005

The disparity between the increase projected for natural gas consumption in the mature market economies and the much smaller increase projected for their gas production points to an increasing dependence on the transitional and emerging market economies for gas supplies. In 2002, the mature market economies accounted for 42 percent of the world's total natural gas production and 50 percent of the world's natural gas consumption; in 2025, they are projected to account for only 29 percent of production and 43 percent of consumption. As a result, the mature market economies are expected to rely on imports of natural gas from other parts of the world to meet almost one-third of their natural gas consumption in 2025, up from 15 percent in 2002.

Projections: EIA, Systems for the Analysis of Global Energy Markets, 2005

This shows that the world and mainly the U.S. market, for both the purchase and rental of natural gas compression equipment, is expected to continue to improve due to the increased demand for natural gas, the continued aging of the natural gas reserve base and the attendant decline of wellhead pressures, the discovery of new reserves and the continuing interest in outsourcing compression by independent producers.

Outsourcing Services of Gas Compression

Gas producers, transporters and processors historically owned and maintained most of the compression equipment used in their operations. Changing well and pipeline pressures and conditions over the life of a well often required producers to reconfigure or change their compressor units to optimize the well production or pipeline efficiency. Due to the technical nature of the equipment, a dedicated local parts inventory, a diversified fleet of natural gas compressors and a highly trained staff of field service personnel are necessary to perform such functions in the most economic manner. These requirements have resulted in diversion of time, energy and resources from their core business activities of Oil & Gas production. The advent of rental and contract compression made it possible for oil and natural gas producers, natural gas transporters and processors to improve the efficiency and financial performance of their operations. Outsourcing contract compression equipment offers customers/producers the following advantages:

- The ability to efficiently meet their changing compression needs over time while limiting their capital investments in compression equipment;
- Access to the compression service provider's specialized personnel and technical skills, including engineers, field service and maintenance employees, which generally leads to improved run-times and production rates; and
- Overall reduction in their compression costs through the reduction or elimination of capital investment in equipment, spare parts inventory and other expenditures associated with owning and maintaining compressor units.

Outsourcing of compression equipment enables an oil and gas producer to better match variable compression requirements to the production needs throughout the life of the well. Further, outsourcing typically provides the customer more timely and technically proficient service and maintenance, which often reduces operating cost. Worldwide, oil and natural gas companies are seeking to streamline their operations and reduce their capital expenditures and other costs and outsourcing the compression activities.

Competition in the Gas Compression Service Sector

The compression market on rental basis in India is at a nascent stage and the Oil & Gas producers in India are now intending to outsource their compression requirements so as to focus on their core business. Domestically, John Energy Limited and Shiv-Vani Oil & Exploration Services Limited provide Gas compression services. However, they are focusing their efforts more on rig business. Currently, there are not many players in the domestic market who have the capability and experience in compression service industry. Further new players would require time and money to understand and execute compression contracts effectively and thus there will be time lag for competition to come into play in a major way in an industry where sub-performance/non-performance of contract attract heavy penalty.

Internationally, Hanover Company Inc., USA and Universal Compression, USA are the major companies in the Gas Compression business.

The ability of our Company to design tailor made compressor package for flexible use by the customers would provide the competitive edge to the company to cater to the international market.

DEEP INDUSTRIES LIMITED

BUSINESS OVERVIEW

OUR BUSINESS

Our Company was incorporated in the year 1991 with the registered office at Ahmedabad, primarily for providing value added, dedicated and professional services to the Oil & Gas clients in India. After 9 years of compression services to the domestic oil and gas exploration companies, including Oil & Natural Gas Corporation Limited (ONGC), GACL and others, we are now expanding our operations to the international market, viz., United States of America, Middle East and Asian countries.

Our Activities

We provide Air and Gas Compression Services to Oil & Gas Exploration Companies. We currently compete primarily in the market for transportable natural gas compression units of up to 2400 HP. We also provide transportation services for transport of liquid. However, we have gradually moved from a liquid transport service provider to compression service providers. The current primary activity of our company includes providing compression services to our clients as is reflected below in the revenue break up for the last 5 years given below:

We are in the business of providing comprehensive contract Air & Gas compression services, which include operation and maintenance services. When providing full contract compression service, we work closely with a customer's field service personnel so that the compressor can be adjusted to efficiently match changing characteristics of the gas produced. We provide maintenance services on substantially all of our fleet units. Maintenance services include the scheduled preventive maintenance, repair and general up-keep of compressor equipment. We also offer installation services, which for our typical mid-range and smaller horsepower units involve significantly less engineering and cost than the comprehensive service concept prevalent in the international markets. We also routinely repackage or reconfigure some of our existing fleet to adapt to our customers' needs.

We generally operate the large horsepower compressors under comprehensive compression services contracts and include the operations fee as part of the contract compression rate. Large horsepower units are more complex and, by operating the equipment ourselves, we reduce maintenance and overhaul expenses. Our field compression equipment is maintained in accordance with daily, weekly, monthly and annual maintenance schedules. These maintenance procedures are updated as technology changes and as our operations group develops new techniques and procedures. In addition, because our field technicians provide maintenance on substantially all of our contract compression equipment, they are familiar with the condition of our equipment and can readily identify potential problems. In our experience, these procedures maximize equipment life and unit availability and minimize avoidable downtime. Generally, each of our units undergoes a major overhaul once every six to eight years. A major overhaul involves the rebuilding of the unit to materially extend its economic useful life or to enhance the unit's ability to fulfill broader or different contract compression applications.

We believe that our fabrication and after market service businesses provide us with opportunities to cross-sell our contract compression services. We have standard contracts for rates and terms on the compressors in our fleet. Through negotiations, these rates and contracts may be modified. Optional items such as oil, antifreeze, freight, insurance and other items may be either itemized or included in the basic monthly contract compression rate. Initial period of contract for Gas Compression are usually 2 years with extension of one years, with some projects committed for as long as five years. At the end of the initial term, contract compression services can continue at the option of the customer on a month-to-month basis or the compressor may be returned or replaced with a different compressor.

Our Company was awarded as a contractor member in good standing by International Association of Drilling Contractors (IADC) and has received ISO 9001-2000 certificate for Quality Management from BVQI (India) Private Limited.

Our achievement is mainly due to our experienced professionals who have extensive background in the natural gas compression and service industry and expertise in sales, procurement, engineering, project management, capital formation and operations of Gas/Air compression equipment, Work over Rigs, Drilling Rigs and other associated services. Our work force is around 71 personnels who have vast and diversified experience in the field of technical, logistics, administration, etc. which enable us in operating our compressors, rigs and maintenance facilities as per International oil field standards. The experience gained over years of servicing to the Oil & Gas Sector enables us to design and configure compressor packages with flexible capacity options to meet multiple requirements of our clients.

We have leased a facility in Gandhinagar, to undertake refurbishment, repairs and retrofitting of the existing/newly acquired equipment of own self or the clients. Our company also builds compressor packages on outsource basis in India. We intend to package or supply new technology and environment friendly CNG, Process gas compressors and associated equipment for CNG plants in India.

We have joined hands with experienced companies like M/s Valerus Compression Services Limited, Partnership, Houston Texas for Gas Compressors and production equipments to act as Sales Representatives for Valerus in all over Asian Region. We have recently, in January 2006, entered into a MoU with PT Indrillco Bakti, Jakarta-13260, Indonesia, for providing of technical know-how/collaboration in connection with work over services for 30 to 200 Ton capacity Rigs. Further, we are in process of joining hands with reputed suppliers/manufacturers of oil and gas equipment to further strengthen our service activities to the Oil & Gas Sector.

OUR MISSION

Our goal is to provide full service and offering "Total Solutions" for the Oil & Gas handling needs of the energy industry. MARKETING & SELLING ARRANGEMENTS

In the domestic market, our Company primarily gets business from ONGC. The contract is awarded by ONGC through a tender process in which bid is invited and contract is awarded to the lowest bidder. However, with the recent opening of the Oil & Gas Sector for the private sector, our company can directly approach the clients.

Further, in the international market, our company has developed good business relationships with M/s Valerus Compression Services Limited Partnership, a Texas, USA based Partnership firm with whom the company already has Gas Compression Equipment Operation Lease Agreement for giving on operating lease 3 Compressor Packages for a period of 5 years which guarantees a minimum operation lease rent of USD3500 per month for each unit. The Company deploys its compressors in the USA market through Valerus since Valerus is an established player in the USA market and currently it is difficult for the company to directly enter the USA market and place its own personnel overseas to carry out contracts directly. Thus, the Company has entered into a Gas Compression Equipment Lease Agreement with Valerus under which the Company gives compressors on lease basis to Valerus who further deploys these compressors in the USA market.

OTHER BUSINESS

Recent Initiative

The Government of India, as part of its policy of inviting private participation in the Oil & Gas exploration sector, had invited bids for 10 blocks of Coal Bed Methane (CBM), located across India, for Gas Exploration activities. The bidding process involves submission of bid, technical evaluation of the bidder (which takes around 2-3 months), successful satisfaction of other parameters and finally issue of formal Letter of Intent (LOI). Once the LOI is issued, the company enters into a formal contract with Gol and can start exploration activities. The exploration activities is divided into different phases with option to the company to quit the contract after the end of each phase.

The CBM bidding was open till June 30, 2006 wherein around 54 bidders including all major oil and gas exploration companies, either individually or under a consortium, have made their bids for these CBM blocks. Our Company, which is already owning compression equipments and rigs, essential for gas exploration, has found ample opportunities in bidding for these blocks. Accordingly, the company has bid for 1 CBM block in Andhra Pradesh jointly with Coal Gas Mart LLC, USA and Adinath Exim Resources Limited, Ahmedabad and 1 CBM block in Madhya Pradesh jointly with Coal Gas Mart LLC, USA. The company has recently entered into Memorandum of Understanding with Coal Gas Mart LLC, USA and Adinath Exim Resources Limited towards the same. Our consortium has been short listed for the 2 CBM Blocks bid for by the Directorate General of Hydrocarbons and the same has been forwarded to the petroleum ministry for vetting.

Our Company, along with our joint bidders Coal Gas Mart, USA and Adinath Exim Resources Limited have also submitted a Minimum Work Program (MWP) to Gol. While submitting the respective bids for the 2 blocks, under which the cost for Phase I (2 years from start of contract) of the exploration activity has been given at Rs.1022 Lacs. The company has the option to exit the contract after the completion of the above referred Phase I. The bidders are required to produce Bank Guarantee equal to 35% of the MWP, which comes to about Rs.358 Lacs for two years. For one year the Bank Guarantee comes to Rs.179 Lacs. Our Company's share out of the total Bank Guarantee is Rs.114 Lacs for one year. The Bank Guarantee is to be provided before each activity in the phase, on the basis of the value of the activity to be completed. Our Company intends to meet the margin of 20% for the Bank Guarantee out of internal accruals.

Qualifications in the Auditors Report and Changes in the Significant Accounting Policies during the preceding five years.

Financial Year 2004-05

Qualification on account of change in accounting policy of providing depreciation on fixed assets by the company.

In audited accounts up to the year ended March 31, 2004, the company had been accounting for depreciation on fixed assets based on the Written Down Value (WDV) Method. During the year 2004-05 the company has revised its accounting policy of providing depreciation from written down value method to the Straight Line Method (SLM) on all assets except tankers and shed and office building. The change in the above accounting policy has resulted in a surplus of Rs.3,10,38,526/- and a tax debt of Rs.98,53,038/- on account of deferred tax relating to the previous years. Consequently, the net profit of the current year is higher by Rs.2,11,85,488/-. Had the company followed the Written Down Value basis of depreciation accounting, the charge for the year would have been higher by Rs.53,54,736/- and the deferred tax charge would have been lower by Rs.18,02,404/-.

Notes to Adjustments carried out in Restated Financial Statements

The effect of change in the depreciation method from WDV Method to SLM for the period prior to FY 2001-02 has been adjusted in the opening Reserves and Surplus, Accumulated Depreciation and Deferred Tax Liability in the Restated Balance Sheet as appearing in Annexure II of this report. The same is reflected by an increase of Rs. 161.66 lacs in the Reserves and Surplus, increase of Rs. 82.02 lacs in the Deferred Tax Liability and a cumulative decrease of Rs.243.68 lacs in the Accumulated Depreciation resulting in increase in the Net Fixed Assets.

To make the depreciation figure comparable with the depreciation of FY 2004-05, the method for providing depreciation has been changed from Written Down Value Method to Straight Line Method for the financial year ending March 2002 to March 2004 in the Restated Profit and Loss Account as appearing in Annexure I of this report.

On change of method of providing depreciation, financial figures of Depreciation, Profit Before Tax, Provision of Deferred Tax, Net Profit After Tax, Balance of Profit & Loss Account and Net Block of Fixed Assets has been changed respectively for the F.Y. 2001-02 to 2003-04. CHANGES IN ACCOUNTING POLICIES IN THE LAST THREE YEARS

Financial Year 2004-05

Qualification on account of change in accounting policy of providing depreciation on fixed assets by the company.

In audited accounts up to the year ended March 31, 2004, the company had been accounting for depreciation on fixed assets based on the Written Down Value (WDV) Method. During the year 2004-05 the company has revised its accounting policy of providing depreciation from written down value method to the Straight Line Method (SLM) on all assets except tankers and shed and office building. The change in the above accounting policy has resulted in a surplus of Rs.3,10,38,526/- and a tax debt of Rs.98,53,038/- on account of deferred tax relating to the previous years. Consequently, the net profit of the current year is higher by Rs.2,11,85,488/-. You should also read the section titled "Risk Factors" beginning on page vii of this Prospectus, which discusses a number of factors and contingencies that could impact our financial condition and results of operations. The following discussion relates to our Company on a standalone basis, and, unless otherwise stated, is based on our restated financial statements, which have been prepared in accordance with Indian GAAP, the accounting standards and other applicable provisions of the Companies Act, 1956, and the SEBI guidelines. Our fiscal year ends on March 31 of each year so all references to a particular fiscal year are to the twelve months ended March 31 of that year.

OVERVIEW OF THE BUSINESS OF OUR COMPANY

We provide Air and Gas Compression Services to Oil & Gas Exploration Companies. We currently compete primarily in the market for transportable natural gas compression units of up to 2400 HP. We have a fleet of 10 Compressors packages to carry out the services. We provide comprehensive contract compression services, which include operation and maintenance services through our domestic and international fleet. When providing full contract compression service, we work closely with the customer's field service personnel so that the compressor can be adjusted to efficiently match changing characteristics of the gas produced. We provide maintenance services on substantially all of our fleet units. Maintenance services include the scheduled preventive maintenance, repair and general up-keep of compressor equipments. We also offer installation services, which for our typical mid-range and smaller horsepower units involve significantly less engineering and cost than the comprehensive service concept prevalent in the international markets. We also routinely repackage or reconfigure some of our existing fleet to adapt to our customers' needs.

We generally operate the large horsepower compressors under comprehensive compression services contracts and include the operations fee as a part of the contract compression rate. Large horsepower units are more complex and, by operating the equipment ourselves, we reduce maintenance and overhaul expenses. Our field compression equipment is maintained in accordance with daily, weekly, monthly and annual maintenance schedules. These maintenance procedures are updated as technology changes and as our operations group develops new techniques and procedures. In addition, because our field technicians provide maintenance on substantially all of our contract compression equipment, they are familiar with the condition of our equipment and can readily identify potential problems. In our experience, these procedures maximize equipment life and unit availability and minimize avoidable downtime. Generally, each of our units undergoes a major overhaul once every six to eight years. A major overhaul involves the rebuilding of the unit to materially extend its economic useful life or to enhance the unit's ability to fulfill broader or different contract compression applications.

We believe that our fabrication and after market service businesses provides us with opportunities to cross-sell our contract compression services. We have standard contracts for rates and terms on the compressors in our fleet. Through negotiations, these rates and contracts may be modified. Optional items such as oil, antifreeze, freight, insurance and other items may be either itemized or included in the basic monthly contract compression rate. Initial period of contract for Gas Compression are usually 2 years with extension of one years, with some projects committed for as long as five years. At the end of the initial term, contract compression services can continue at the option of the customer on a month-to-month basis or the compressor may be returned or replaced with a different compressor.

Our Company was awarded as a contractor member in good standing by International Association of Drilling Contractors (IADC) and has received ISO 9001-2000 certificate for Quality Management from BVQI (India) Private Limited.

Our achievement is mainly due to our experienced professionals who have extensive backgrounds in the natural gas compression and service Industry and expertise in sales, procurement, engineering, project management, capital formation and operations of Gas/Air compression equipment, Work over Rigs, Drilling Rigs and associated services. Our work force is about 70 personnel who have vast and diversified experience in the field of technical, logistics, administration, etc., which enable us in operating our compressors, rigs and maintenance facilities as per International oil field standards.

We have leased a facility in Gandhinagar to undertake refurbishment, repairs and retrofitting of the existing/newly acquired equipments of the clients or our equipments. Our company also builds compressor packages on outsource basis in India.

DEEP INDUSTRIES LIMITED

We intend to package or supply new technology and environment friendly CNG, Process gas compressors and associated equipment for CNG plants in India.

We have joined hands with experienced company like Valerus for Gas Compressors and production equipments to act as Sales Representatives for Valerus in the Asian Region. Further, we have recently entered into a MoU with PT Indrillco Bakti, Jakarta-13260, Indonesia, for availing technical know-how/ collaboration in connection with work over services for 30 to 200 Ton capacity Rigs.

FACTORS AFFECTING OUR RESULTS OF OPERATION

Our financial condition and results of operation are affected by numerous factors including the following:

General Economic and Business Conditions

The performance of our Company is dependent upon national and global growth as the company provides services in both the domestic as well as global industry.

India's GDP growth rate of 8.4% in 2005-06, one of the highest in the world, has been marked by continuous economic reforms, deregulation of the economy, a healthy capital market, robust industrial and agricultural growth as well as increased foreign investments in the country. Further, the revival of USA and global economies has further strengthened the country's and the company's prospects.

The advent of globalization and benefits to Oil & Gas Producers from outsourcing compression services has created opportunities for the company. Apart from providing compression services to domestic clients like ONGC, we have also been able to make foray in the USA Gas Compression service market.

Global Industry Outlook:

The share of natural gas in the country's energy consumption is set to scale up significantly from around 7% at present to about 20% by 2025. India plans to import LNG from Iran, Turkmenistan and Myanmar to partly satisfy the surging demand. With more gas finds, LNG imports set to increase natural gas availability, they will still not be able to cater to the growing domestic requirements. But with slow but purposeful move away from administered pricing regime, atleast in respect of new gas finds, the natural gas industry is poised for significant scaling up of revenues and profitability.

From 2002 to 2025, consumption of natural gas is projected to increase from 92 trillion cubic feet to 156 trillion cubic feet, and its share of total energy consumption on a Btu basis is projected to grow from 23 percent to 25 percent. The electric power sector accounts for almost one-half of the total incremental growth in worldwide natural gas demand over the forecast period.

Domestic Scenario:

Government initiatives in upstream activities (particularly under the NELP) have begun to yield results with the gas discoveries in the Krishna-Godavari basin and off the coast of Orissa. This is an important step towards improving the country's energy security, Oil majors are not only bidding for blocks under the NELP but also investing in buying equity stakes for India in oilfields abroad and taking corrective measures to improve recovery from the existing fields within the country. These steps are essentially focused on improving the country's oil reserve base and enhancing production levels. With the increased production of oil and gas in the coming years, the demand for Company's services is slated to go up substantially.

Demand

The demand for our Company's services is primarily from the Oil and Gas sector. The demand for consumption of Natural Gas will have an effect on the demand for the services of our company. Further, the prospects and earnings growth of the customers and industries we serve will have an impact on our ability to generate revenues.

Competition

In India, currently, the Gas Compression Services Sector is at a nascent stage and the Oil & Gas producers in India are now intending to outsource their compression requirements so as to focus on their core business. Domestically, John Energy Limited and Shiv-Vani Oil & Exploration Services Limited provide Gas compression services. However, they are focusing their efforts more on rig business. Currently, there are not many players in the domestic market who have the

capability and experience in compression service industry. Further new players would require time and money to understand and execute compression contracts effectively and thus there will be time lag for competition to come into play in a major way in an industry where sub-performance/non-performance of contract attract heavy penalty.

Internationally, Hanover Company Inc., USA and Universal Compression are the major companies in the Gas Compression business.

The ability of the Company to design tailor made compressor package for flexible use by the customers would provide the competitive edge to our company to cater to the international market.

Other Factors

Success of our Company is highly dependent on diligently meeting all the obligations under the Contract executed with the Clients. Any contravention, sub-performance/ Non-performance etc. results into high penalties, which may affect the profitability of our Company. Thus, proper monitoring of execution of Contracts, maintaining standby machines and critical component inventory, at the site of the Client becomes important.

Results of Operations

Sales

The Company derives its income primarily as contract charges for providing compression services to Oil and Gas sector. The Contracts are generally for 2 years with an extension clause of 1 year. The contracts generate a steady flow of income through out the contract period. The contracts are awarded by way of a tender process, to the lowest bidder. Apart from contract charges, the revenues for the year ended 31st March 2006, also contains lease income from deployment of 2 compressor packages in USA through Valerus Compression Services Limited Partnership, a Texas, USA based Partnership firm with whom the company has a Gas Compression Equipment Operation Lease Agreement. The company has also acquired a 100MT work over Rig during the year, which is slated to be deployed in short time. The company has already received LOI from ONGC for deployment for the RIG at its Rajamundry, Andhra Pradesh. This will enable the Company to move towards its aim of becoming an integrated service provider.

Except as stated in this Prospectus, there are no subsequent developments after the date of the Auditor's report, which we believe are expected to have material impact on the consolidated reserves, profits, earnings per share or book value of our Company.

DEEP INDUSTRIES LIMITED

impact on the profitability or operations of our Company, other than the changes in the government policies, changes and such other changes, which are in usual course of business.

Significant Economic / Regulatory Changes

Significant reduction in price of oil and natural gas may affect the operations of the company due to reduction in output by gas exploration companies by closing smaller / uneconomic wells thereby reducing the number of wells for which the company's services are required. However this is a hypothetical situation at present.

Known Trends or Uncertainties

Apart from the risks as disclosed under the heading "Risk Factor" in this Prospectus, there are no other known trends or uncertainties that have or are expected to have a material adverse impact on sales, revenue, or income from continuing operations.

Future Relationship between Cost and Income

There is no future relationship between cost and income that will have a material adverse impact on the operations and finances of our Company.

New Products or Business Segment

We have not announced any new products or business segments.

Seasonality of Business

Our Company's business is not seasonal.

Over dependence on Single Supplier/Customer

Our Company has ongoing contracts with ONGC, IOC and GACL. Though, our Company is generating substantial income from contracts with ONGC, we are not entirely dependent on ONGC.

Competitive Conditions

The compression market on rental basis in India is at a nascent stage and the Oil & Gas producers in India are now intending to outsource their compression requirements so as to focus on their core business. Domestically, John Energy Limited and Shiv-Vani Oil & Exploration Services Limited provide Gas compression services. However, they are focusing their efforts more on rig business. Currently, there are not many players in the domestic market who have the capability and experience in compression service industry. Further new players would require time and money to understand and execute compression contracts effectively and thus there will be time lag for competition to come into play in a major way in an industry where sub-performance/non-performance of contract attract heavy penalty.

Internationally, Hanover Asia Inc., U.S.A and Universal Compression are the major companies in the Gas Compression business.

The ability of our Company to design tailor made compressor package for flexible use by the customers would provide the competitive edge to the company to cater to the international market.

Restrictions On Foreign Ownerships Of Indian Equity Shares

Foreign investment in Indian securities is regulated through the industrial policy of the Government of India, or the Industrial Policy and FEMA. While the Industrial Policy prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy of the Government of India, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment.

As per current foreign investment policies, foreign investment is allowed up to 100% in companies in the infrastructure sector. The government bodies responsible for granting foreign investment approvals are the FIPB and the RBI. Under

DEEP INDUSTRIES LIMITED

present regulations, the maximum permissible FII investment in the Company is restricted to 24% of its total issued capital. This can be raised to 100% by adoption of a special resolution by the Company's shareholders. RBI, vide its circular A.P.(DIR Series) Circular No. 53 dated December 17, 2003, permitted FIIs to subscribe to shares of an Indian company in the public issue without prior approval of RBI, so long as the price of equity shares to be issued is not less than the price at which the equity shares are issued to residents. The transfer of Equity Shares to NRIs, FIIs, Foreign Venture Capital Investors registered with SEBI and Multilateral and Bilateral Development Financial Institutions shall be subject to the conditions as may be prescribed by the Government of India or RBI while granting such approvals.

Investment by Non-Resident Indians

A variety of special facilities for making investments in India in shares of Indian Companies is available to individuals of Indian nationality or origin residing outside India ("NRIs"). These facilities permit NRIs to make portfolio investments in shares and other securities of Indian companies on a basis not generally available to other foreign investors.

Under the portfolio investment scheme, NRIs are permitted to purchase and sell equity shares of the company through a registered broker on the stock exchanges. NRIs collectively should not own more than 10% of the postissue paid up capital of the company. However, this limit may be increased to 24% if the shareholders of the company pass a special resolution to that effect. No single NRI may own more than 5% of the post- issue paid up capital of the Company. NRI investment in foreign exchange is now fully repatriable whereas investments made in Indian Rupees through rupee accounts remains non-repatriable.

Investment by Foreign Institutional Investors

Foreign Institutional Investors ("FIIs") including institutions such as pension funds, investment trusts, asset management companies, nominee companies, institutional portfolio managers can invest in all the securities traded on the primary and secondary markets in India. FIIs are required to obtain an initial registration from the SEBI and a general permission from the RBI to engage in transactions regulated under FEMA. FIIs must also comply with the provisions of the SEBI (Foreign Institutional Investors) Regulations, 1995, as amended from time to time. The initial registration and the RBI's general permission together enable the registered FII to buy (subject to the ownership restrictions discussed below) and sell freely securities issued by Indian companies, to realise capital gains or investments made through the initial amount invested in India, to subscribe or renounce rights issues for shares, to appoint a domestic custodian for custody of investments held and to repatriate the capital, capital gains, dividends, income received by way of interest and any compensation received towards sale or renunciation of rights issues of shares.

Ownership restrictions of FIIs

Under the portfolio investment scheme, the overall issue of equity shares to FIIs on a repatriation basis should not exceed 24% of post-issue paid-up capital of the company. However, the limit of 24% can be raised upto the permitted sectoral cap for that company after approval of the board of directors and shareholders of the company. The issue of equity shares to a single FII should not exceed 10% of the post-issue paid-up capital of the Company. In respect of an FII investing in equity shares of a company on behalf of its sub-accounts, the investment on behalf of each subaccount shall not exceed 10% of the total issued capital of that company.
