2. ***The “Muthoot” logo and other combination marks are proposed to be registered in the name of our Promoters. If we are unable to use the trademarks and logos, our results of operations may be adversely affected.***

The brand and trademark “Muthoot”, as also related marks and associated logos (“Muthoot Trademarks”) are currently registered in the name of our Company. We believe that the Muthoot Trademarks are important for our business.

Our Company proposes to register the Muthoot Trademarks jointly in the name of our Promoters through a rectification process or irrevocably grant ownership rights by alternate, legally compliant means. Pursuant to applications filed on September 20, 2010 by our Company and our Promoters before the Trade Marks Registry, Chennai, our Promoters have stated that their father, Late Mr. M. George Muthoot, had adopted and had been using the Muthoot Trademarks since 1939 and that our Promoters had, since the demise of Late Mr. M. George Muthoot, been continuing his business and using the Muthoot Trademarks as its joint proprietors. Our Company has confirmed that our Company has, since incorporation, been using the Muthoot Trademarks as per an implied user permission granted by our Promoters and that the application for registration of the Muthoot Trademarks in the name of our Company was filed through inadvertence. Consequently, an application has been made to Trade Marks Registry, Chennai, to effect a rectification in the Register of Trademarks. Since a rectification process (by application before the Trade Marks Registry, Chennai as mentioned above) is underway, and not an assignment of the Muthoot Trademarks, no independent valuation of the Muthoot Trademarks has been conducted.

It is proposed that consequent to such rectification, the Promoters will grant our Company a non-exclusive licence to use the Muthoot Trademarks for an annual royalty equivalent to 1% of the gross income of our Company, subject to a maximum of 3% of profit before tax (after charging the royalty) and managerial remuneration payable by our Company each financial year. Subject to certain other conditions, it is proposed that this licence would continue until such time that our Promoters, together with the Promoter Group, jointly cease to hold at least 50.01% of the paid-up equity share capital of our Company.

Since the rectification is yet to be effected and consequently, no licence has been granted to us as of date, we cannot assure you that we will be able to obtain a licence to use the Muthoot Trademarks, when registered, from our Promoters on commercially acceptable terms, or at all. In addition, loss of the rights to use the Muthoot Trademarks may affect our reputation, goodwill, business and our results of operations.

3. ***Our business requires substantial capital, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.***

Our liquidity and ongoing profitability are, in large part, dependent upon our timely access to, and the costs associated with, raising capital. Our funding requirements historically have been met from a combination of borrowings such as working capital limits from banks and selling of our loan portfolio to other lenders such as banks, and issuance of commercial paper, non-convertible debentures and equity. Thus, our business depends and will continue to depend on our ability to access diversified low-cost funding sources.

The crisis in the global credit market that began in mid 2007 destabilized the prevailing lending model by banks and financial institutions. These adverse conditions reached unprecedented levels through 2008. The capital and lending markets remained highly volatile and access to liquidity had been significantly reduced. These conditions had resulted in increased borrowing costs and difficulty in accessing debt in a cost-effective manner. In addition, it became more difficult to renew loans and facilities as many potential lenders and counterparties also faced liquidity and capital concerns as a result of the stress in the financial markets. Moreover, we are a “systemically important non-deposit accepting” NBFC, and do not have access to deposits. We are also restricted from inviting interest in our secured non-convertible debentures by advertising to the public.

We also face significant maturities of unsecured debt each year. ₹ 4,087.4 million of our outstanding unsecured debt matures during the current fiscal year ending March 31, 2011. In order to retire these instruments, we either will need to refinance this debt, which could be difficult in the event of case of volatility in the credit markets, or raise equity capital or generate sufficient cash to retire the debt.

4. ***Our financial performance is particularly vulnerable to interest rate risk.***

Over the last several years, the Government of India has substantially deregulated the financial sector. As a result, interest rates are now primarily determined by the market, which has increased the interest rate risk exposure of all banks and financial intermediaries in India, including us.

Our results of operations are substantially dependent upon the level of our net interest margins. Interest rates are sensitive to many factors beyond our control, including the RBI’s monetary policies, domestic and international economic and political conditions and other factors.

Our policy is to attempt to balance the proportion of our interest-earning assets, which bear fixed interest rates, with interest-bearing liabilities. A majority of our liabilities, such as our secured non-convertible debentures, subordinated debt and short term loans carry fixed rates of interest and the remaining are linked to the respective banks’ benchmark prime lending rate/base rate. As of November 30, 2010, 48.16% of our borrowings were at fixed rates of interest, comprising primarily our privately placed secured non-convertible redeemable debentures, which constituted 37.04% of our total indebtedness as of November 30, 2010. However, there can be no assurance that we will be able to adequately manage our interest rate risk in the future and be able to effectively balance the proportion of our fixed rate loan assets and liabilities in the future. Further, despite this balancing, changes in interest rates could affect the interest rates charged on interest-earning assets and the interest rates paid on interest-bearing liabilities in different ways. Thus, our results of operations could be affected by changes in interest rates and the timing of any repricing of our liabilities compared with the re-pricing of our assets.

Furthermore, we are exposed to greater interest rate risk than banks or deposit-taking NBFCs. In a rising interest rate environment, if the yield on our interest-earning assets does not increase at the same time or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline at the same time or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted.

Additional risks arising from increasing interest rates include:

- reductions in the volume of loans as a result of customers inability to service high interest rate payments; and
- reductions in the value of fixed income securities held in our investment portfolio.

There can be no assurance that we will be able to adequately to manage our interest rate risk in the future and, if we are unable to do so, this would have an adverse effect on our net interest margin.

5. ***We may not be able to recover the full loan amount, and the value of the collateral may not be sufficient to cover the outstanding amounts due under defaulted loans.***

We extend loans secured by gold jewellery provided as collateral by the customer. An economic downturn or sharp downward movement in the price of gold could result in a fall in collateral values. In the event of any decrease in the price of gold, customers may not repay their loans and the collateral gold jewellery securing the loans may have decreased significantly in value, resulting in losses which we may not be able to support. Although we use a technology-based risk management system and follow strict internal risk management guidelines on portfolio monitoring, which include periodic assessment of loan to security value on the basis of conservative market price levels, limits on the amount of margin, ageing analysis and pre-determined margin call thresholds, no assurance can be given that if the price of gold decreased significantly, our financial condition and results of operations would not be adversely affected. The impact on our financial position and results of operations of a hypothetical decrease in gold values cannot be reasonably estimated because the market and competitive response to changes in gold values is not pre-determinable.

Additionally, we may not be able to realise the full value of our collateral, due to, among other things, defects in the quality of gold or wastage on melting gold jewellery into gold bars. In the case of a default, we typically sell the gold jewellery collateral through auctions primarily to local jewellers and there can be no assurance that we will be able to sell such gold jewellery provided as collateral at prices sufficient to cover the amounts under default. In addition, failure by our employees to properly appraise the value of the collateral provides us with no recourse against the borrower. Moreover, there may be delays associated with such auction process. A failure to recover the expected value of collateral security could expose us to a potential loss. Any such losses could adversely affect our financial condition and results of operations.

6. ***We face increasing competition in our business which may result in declining margins if we are unable to compete effectively.***

Our principal business is the provision of personal loans to retail customers in India secured by gold jewellery as collateral. Historically, the Gold Loan industry in India has been largely unorganized and dominated by local jewellery pawn shops and money lenders, with very few public sector and old generation private sector banks focusing on this sector. Attractive interest rates relative to risk together with increased demand for access to capital from middle income group, previously availed predominantly by lower income group customers with limited access to other forms of borrowings, have increased our exposure to competition. The demand for Gold Loans has also increased due to relatively lower and affordable interest rates, increased need for urgent borrowing or bridge financing requirements and the need for liquidity for assets held in gold and also due to increased awareness among customers of Gold Loans as a source of quick access to funds.

All of these factors have resulted in us facing increased competition from other lenders in the Gold Loan industry, including commercial banks and other NBFCs. Unlike commercial banks or deposit-taking NBFCs, we do not have access to funding from savings and current deposits of customers. Instead, we are reliant on higher-cost term loans and debentures for our funding requirements, which may reduce our margins compared to competitors. Our ability to compete effectively with commercial banks or deposit-taking NBFCs will depend, to some extent, on our ability to raise low-cost funding in the future. If we are unable to compete effectively with other participants in the Gold Loan industry, our business, future financial performance and the trading price of the Equity Shares may be adversely affected.

Furthermore, as a result of increased competition in the Gold Loan industry, Gold Loans are becoming increasingly standardised and variable interest rate and payment terms and waiver of processing fees are becoming increasingly common in the Gold Loan industry in India. There can be no assurance that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive Gold Loans industry. Increasing competition may have an adverse effect on our net interest margin and other income, and, if we are unable to compete successfully, our market share may decline as the origination of new loans declines.

7. ***We have certain contingent liabilities which may adversely affect our financial condition.***

As per the restated audited financial statements of the Company for period ended November 30, 2010, we had certain contingent liabilities not provided for, amounting to ` 3,623.7 million. The contingent liability amounts disclosed in our audited restated financial statements represent estimates and assumptions of our management based on advice received.

In the event that any of these contingent liabilities materialise, our financial condition may be adversely affected.

8. ***We may not be able to successfully sustain our growth strategy.***

In recent periods, we have experienced substantial growth. Our net profit (as restated) as per the restated audited financial statements of the Company, in fiscals 2008, 2009, 2010 and in the eight months ended November 30, 2010 was ` 630.7 million ` 978.7 million, ` 2,285.2 million and ` 2,914.8 million, respectively. Our gross retail loans outstanding grew year on year by 120.78% to ` 74,381.5 million as of March 31, 2010, and in the eight months ended November 30, 2010, our gross retail loans outstanding increased by 74.82% to ` 130,036.8 million as of November 30, 2010 from ` 74,381.5 million as of March 31, 2010, as per our restated audited financial statements. Our growth strategy includes growing our loan book and expanding the range of products and services offered to our customers and expanding our branch network. There can be no assurance that we will be able to sustain our growth strategy successfully, or continue to achieve or grow the levels of net profit earned in recent years, or that we will be able to expand further or diversify our loan book. Furthermore, there may not be sufficient demand for such products, or they may not generate sufficient revenues relative to the costs associated with offering such products and services. Even if we were able to introduce new products and services successfully, there can be no assurance that we will be able to achieve our intended return on such investments. If we grow our loan book too rapidly or fail to make proper assessments of credit risks associated with borrowers, a higher percentage of our loans may become non-performing, which would have a negative impact on the quality of our assets and our financial condition.

We also face a number of operational risks in executing our growth strategy. We have experienced rapid growth in our Gold Loan business and our branch network also has expanded significantly, and it is entering into new, smaller towns and cities within India as part of our growth strategy. Our rapid growth exposes us to a wide range of increased risks within India, including business risks, such as the possibility that our number of impaired loans may grow faster than anticipated, and operational risks, fraud risks and regulatory and legal risks. Moreover, our ability to sustain our rate of growth depends significantly upon our ability to manage key issues such as selecting and retaining key managerial personnel, maintaining effective risk management policies, continuing to offer products which are relevant to our target base of customers, developing managerial experience to address emerging challenges and ensuring a high standard of customer service. We will need to recruit, train and integrate new employees, as well as provide continuing training to existing employees on internal controls and risk management procedures. Failure to train and integrate employees may increase employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us.

We also plan to expand our Gold Loan business in new geographies outside India. We have limited or no operating experience in these new geographies, and we may encounter difficulties in entering into these new geographies. This will require significant capital investments and commitment of time from our senior management, and there often is limited or no prospect of earnings in the initial years. Moreover, there is no assurance that we will be able to commence operations in accordance with our timelines, if at all, which could result in additional costs and time commitments from our senior management. There also can be no assurance that our management will be able to develop the skills necessary to successfully manage this geographical expansion. Our inability to effectively manage any of the above issues could materially and adversely affect our business and impact our future financial performance.

Furthermore, we are entering new businesses as part of our growth strategy. For example, we recently have entered into the business of distributing pension schemes as part of the New Pension Scheme of Pension Fund Regulatory & Development Authority. For further details, see section titled “History and Certain Corporate Matters” on page 127. We have little or no operating experience with these businesses, and you should consider the risks and difficulties we may encounter by entering into new lines of business. New businesses will require significant capital investments and commitments of time from our senior management, and there often is little or no prospect of earnings in a new business for several years. Moreover, there is no assurance any new business we develop or enter will commence in accordance with our timelines, if at all, which could result in additional costs and time commitments from our senior management. There also can be no assurance that our management will be able to

develop the skills necessary to successfully manage these new business areas. Our inability to effectively manage any of the above issues could materially and adversely affect our business and impact our future financial performance.

9. ***We had negative net cash flows from operating and investing activities in the last three fiscal years and may continue to do so in the future.***

As per our restated audited financial statements, in fiscal 2008, 2009 and 2010, and in the eight months ended November 30, 2010, net cash used in operating activities was ` 2,768.4 million, ` 6,633.5 million, ` 23,866.4 million and ` 41,247.3 million, respectively, while net cash used in investing activities was ` 541.0 and ` 124.4 million, ` 348.3 million and ` 486.9 million, respectively. Our cash flows from operating and investing activities may continue to be negative in the future. This will be primarily on account of borrowing under financing activities for the purpose of lending under operating activities. In addition, our ability to pay dividends or to generate positive cash flows from operating activities in the future will depend upon a number of factors, including our results of operations, earnings, capital requirements and surplus, general financial conditions, contractual restrictions, applicable Indian legal restrictions and other similar factors.

10. ***We may not be in compliance with relevant state money lending laws, which could adversely affect our business***

There is ambiguity on whether or not NBFCs are required to comply with the provisions of state money lending laws that establish ceilings on interest rates. As of September 20, 2009, our Company has been specifically exempted from the provisions of the Money Lenders Act in Karnataka and there is a blanket exemption for all NBFCs in Rajasthan. Further, we have also received show cause notices from certain Government authorities in relation to compliance with relevant money lending statutes in relation to our operations in the states of Gujarat and Kerala. We also carry out operations in other states such as Andhra Pradesh, Tamil Nadu, Madhya Pradesh, and Maharashtra, where there are money lending statutes in operation. In addition, in the event the provisions any state specific regulations are extended to NBFCs in the gold loan business such as our Company, we could have increased costs of compliance and our business and operations could be adversely affected. For further details, see “Outstanding Litigation and other Material Developments” beginning on page 284. There are severe civil and criminal penalties for non-compliance with the relevant money lending statutes. In the event that the government of any state in India requires us to comply with the provisions of their respective state money lending laws, or imposes any penalty against us, our Directors or our officers, including for prior non-compliance, our business, results of operations and financial condition may be adversely affected.

11. ***A major part of our branch network is concentrated in southern India and any disruption or downturn in the economy of the region would adversely affect our operations.***

As of February 28, 2011, 1,753 out of our 2,611 branches are located in the southern states of Tamil Nadu (593 branches), Kerala (607 branches), Andhra Pradesh (316 branches), Karnataka (230 branches) and Union Territory of Pondicherry (7 branches). Any disruption, disturbance or breakdown in the economy of southern India could adversely affect the result of our business and operations. As of November 30, 2010, the southern Indian states of Tamil Nadu, Kerala, Andhra Pradesh, Karnataka and the Union Territory of Pondicherry constituted 75.28% of our total Gold Loan portfolio. Our concentration in southern India exposes us to adverse economic or political circumstances that may arise in that region as compared to other NBFCs and commercial banks that have diversified national presence. If there is a sustained downturn in the economy of south India, our financial position may be adversely affected.

12. ***Our indebtedness and the conditions and restrictions imposed by our financing agreements could restrict our ability to conduct our business and operations in the manner we desire.***

As per our restated audited financial statements, as of November, 2010, we had outstanding debt of ` 90,829.3 million. We may incur additional indebtedness in the future. Our indebtedness could have several important consequences, including but not limited to the following:

- a portion of our cash flow may be used towards repayment of our existing debt, which will reduce the availability of our cash flow to fund our capital adequacy requirements, working capital, capital expenditures, acquisitions and other general corporate requirements;
- our ability to obtain additional financing in the future at reasonable terms may be restricted or our cost of borrowings may increase due to sudden adverse market conditions, including decreased availability of credit or fluctuations in interest rates, particularly because a significant proportion of our financing arrangements are in the form of borrowings from banks.;
- fluctuations in market interest rates may affect the cost of our borrowings, as some of our indebtedness are at variable interest rates;
- there could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements; and
- we may be more vulnerable to economic downturns, may be limited in our ability to withstand competitive pressures and may have reduced flexibility in responding to changing business, regulatory and economic conditions.

Some of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. Specifically, we may require, and may be unable to obtain, lender consents to incur additional debt, issue equity, change our capital structure, declare dividend, increase or modify our capital expenditure plans, undertake any expansion, provide additional guarantees, change our management structure, merge with or acquire other companies, or amend its charter documents, whether or not there is any failure by us to comply with the other terms of such agreements.

Any failure to comply with the requirement to obtain a consent, or other condition or covenant under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may lead to a termination of our credit facilities, acceleration of all amounts due under such facilities and trigger cross default provisions under certain of our other financing agreements, and may adversely affect our ability to conduct our business and operations or implement our business plans.

Moreover, certain of our loans which may be recalled by our lenders at any time. If any of these lenders recall its loans, our cash position, business and operations may be negatively affected.

13. ***Our loan agreements contain restrictive covenants that may affect our business and operations, some of which we are currently in breach of or have breached in the past.***

The loan agreements that we have entered into with certain banks and financial institutions contain restrictive covenants, which among other things require us to obtain prior permission of such banks or financial institutions or to inform them with respect to various activities, including, alteration of our capital structure, changes in management, raising of fresh capital or debt, payment of dividend, undertaking new projects, or undertaking any merger or amalgamation, invest by way of share capital or lend to other companies, undertaking guarantee obligations on behalf of other companies, and creation of further charge on fixed assets. Additionally, certain loan agreements require us to meet and maintain prescribed financial ratios. Further, under these loan agreements during the subsistence of the facility, the lender has a right to appoint a nominee director on our Board from time to time. Furthermore, some of our financing arrangements contain cross default provisions which could automatically trigger defaults under other financing arrangements, in turn magnifying the effect of an individual default. Although we attempt to maintain compliance with our covenants or obtain prospective waivers where possible, we cannot assure you that we will be continuously compliant.

We have breached in the past, and are currently in breach of, certain covenants under these loan agreements and other financing arrangements. For example, with respect to the execution of the Baring Investment Agreement, Kotak Investment Agreement, Matrix Investment Agreement and Wellcome Investment Agreement and the consequent alteration of our capital structure, we did not obtain a prior written permission from certain banks and financial institutions. Although no bank or financial

institution has issued a notice of default to us, if we are held to be in breach of any financial or other covenants contained in any of our financing arrangements, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs, and because of such defaults we may be unable to find additional sources of financing. If any of these events were to occur, it would likely result in a material adverse effect on our financial condition and results of operations or even our ability to continue as a going concern.

14. ***All of the Gold Loans we offer are due within one year of disbursement, and a failure to disburse new loans may result in a reduction of our loan portfolio and a corresponding decrease in our interest income.***

All of the Gold Loans we offer are due within one year of disbursement. The relatively short-term nature of our loans means that our long-term interest income stream is less certain than if a portion of our loans were for a longer term. In addition, our existing customers may not obtain new loans from us upon maturity of their existing loans, particularly if competition increases. The potential instability of our interest income could materially and adversely affect our results of operations and financial position.

15. ***We have entered into assignment agreements to sell certain loans from our outstanding loan portfolio. If such assignment of loans is held to be unenforceable under applicable law, it could have a material adverse effect on our business, financial condition and results of operations.***

From time to time we sell and assign a group of similar loans from our outstanding loan portfolio to financial institutions in return for an upfront fixed consideration. As per our restated audited financial statements, as on November 30, 2010 the outstanding portfolio of assigned loans was ` 32,464.8 million constituting 24.96% of the gross loan portfolio. As a part of such transactions, we provide credit enhancement through fixed deposits with banks or issue corporate guarantees to the purchaser for an amount equal to a negotiated percentage of the value of the loans being assigned. The loan assignment agreements contain certain representations and warranties made by us regarding the assigned loans, which, if breached could result in additional costs and expenses to us. In the event that one or more of the asset assignment agreements entered into by us are held by a court of law or declared by a statute as unenforceable, we may be required to terminate these assignment agreements and may suffer losses. In addition, if such assignments of loans are sought to be regulated, it could adversely affect our ability to raise resources through the loan assignment route. Such events may adversely affect our business, financial condition and results of our operations and our ability to assign our loans.

16. ***Our business could be adversely affected if we are not able to control or reduce the level of non-performing assets in our portfolio.***

We may not be successful in our efforts to improve collections and/or enforce the security interest on the gold collateral on existing as well as future non-performing assets. Moreover, as our loan portfolio matures, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control or reduce our level of non-performing assets, the overall quality of our loan portfolio may deteriorate and our results of operations may be adversely affected. As per our restated audited financial statements, our gross NPAs as of March 31, 2008, 2009 and 2010 and as of November 30, 2010 was ` 92.6 million, ` 161.1 million ` 343.6 million and ` 461.0 million, respectively. For further details on our non-performing assets please refer page 110 to the sub-section titled 'Non-performing Assets'. The following table discloses the quantum of our non-performing assets in the preceding three financial years and for the eight months ended November 30, 2010:

(In ` million except for Net NPAs/Net Retail loans and Gross NPAs/Gross Retail Loans; as per our restated audited financial statements)

The Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007 prescribe the provisioning required in respect of our outstanding loan portfolio. Should the overall credit quality of our loan portfolio deteriorate, the current level of our provisions may not be adequate to cover further increases in the amount of our non-performing assets. Furthermore, although we believe that our total provision will be adequate to cover all known losses in our asset portfolio, our current provisions may not be adequate when compared to the loan portfolios of other financial institutions. Moreover, there also can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of gross non-performing assets or otherwise, or that the percentage of non-performing assets that we will be able to recover will be similar to our past experience of recoveries of non-performing assets. In the event of any further increase in our non-performing asset portfolio, there could be an even greater, adverse impact on our results of operations.

17. ***We face difficulties in carrying out credit risk analyses on our customers, most of whom are individual borrowers***

Unlike several developed economies, a nationwide credit bureau has only recently become operational in India, so there is less financial information available about individuals, particularly our focus customer segment from the low to middle income group who typically have limited access to other financing sources. It is therefore difficult to carry out precise credit risk analyses on our customers. Although we follow certain know-your-customer procedures at the time of sanctioning a loan, we generally rely on the quality of the gold jewellery provided as collateral rather than on a stringent analysis of the credit profile of our customers. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to maintain sufficient credit assessment policies, particularly for individual borrowers, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

18. ***Our customer base comprises mostly individual borrowers, who generally are more likely to be affected by declining economic conditions than large corporate borrowers.***

Individual borrowers generally are less financially resilient than large corporate borrowers, and, as a result, they can be more adversely affected by declining economic conditions. In addition, a significant majority of our customer base belongs to the low to middle income group, who may be more likely to be affected by declining economic conditions than large corporate borrowers.

19. ***Because we handle high volume of cash and gold jewellery in a dispersed network of branches, we are exposed to operational risks, including employee negligence, fraud, petty theft, burglary and embezzlement, which could harm our results of operations and financial position.***

As per our restated audited financial statements, as of November 30, 2010, we held cash balance of ₹ 1,900.0 million and gold jewellery of 97.6 tons. Our business involves carrying out cash and gold jewellery transactions that expose us to the risk of fraud by employees, agents, customers or third parties, theft, burglary, and misappropriation or unauthorised transactions by our employees. Our insurance policies, security systems and measures undertaken to detect and prevent these risks may not be sufficient to prevent or detect such activities in all cases, which may adversely affect our operations and profitability. Further, we may be subject to regulatory or other proceedings in connection with any unauthorised transaction, fraud or misappropriation by our representatives and employees, which could adversely affect our goodwill. The nature and size of the items provided as collateral allow these items to be misplaced or mis-delivered, which may have a negative impact on our operations and result in losses. For example, (i) in 2008 and 2009, we encountered two instances of staff fraud at our Millerganj, Punjab and Sakthikulangara, Kerala branches, where 497 packets of gold (pledged against a loan amount of ₹ 16,127,480) and ₹ 500,000 in cash were stolen by our employees, (ii) in 2009, gold ornaments pledged by two of our customers at our branches at Pettah, Trivandrum, and Thenkassi Old Bus Stand, Tamil Nadu, against loan amounts of ₹ 144,000 and ₹ 27,000, respectively, were reported to be stolen goods and seized by the police, and (iii) in 2009, in two separate cases, 87 grams of spurious gold and 604 grams of spurious gold were pledged, against loan amounts of ₹ 93,500 and ₹ 578,500,

respectively, with our branches at Trichur West Fort, Kerala and Lajpat Nagar, New Delhi, respectively.

The total number of such incidents for the years ended March 31, 2008, March 31, 2009, March 31, 2010, and as at November 30, 2010 from April 01, 2010 are as under:

Type of incident	2007-08	2008-09	2009-10	Eight months ended November 30, 2010
Staff fraud	1	5	3	1
Stolen gold	30	43	48	69
Spurious gold	3	5	6	4

20. ***A decline in our capital adequacy ratio could restrict our future business growth.***

We are required under applicable laws and regulations to maintain a capital adequacy ratio of at least 12% of our risk-weighted assets. As per the revised norms of RBI, from March 31, 2011, we are required to maintain a capital adequacy ratio of at least 15% of our risk-weighted assets. Our capital adequacy ratio was 15.06% as of November 30, 2010, with Tier I capital comprising 10.78%. If we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier I and Tier II capital in order to continue to meet applicable capital adequacy ratios with respect to our business of Gold Loans. There can be no assurance that we will be able to raise adequate additional capital in the future on terms favourable to us, or at all, and this may adversely affect the growth of our business.

21. ***If we fail to maintain effective internal control over financial reporting in the future, the accuracy and timing of our financial reporting may be adversely affected.***

We have taken steps intended to enhance our internal controls commensurate to the size of our business, primarily through the formation of a designated internal audit team with additional technical accounting and financial reporting experience. However, certain matters such as fraud and embezzlement cannot be eliminated entirely given the cash nature of our business. While we expect to remedy any such issues, we cannot assure you that we will be able to do so in a timely manner, which could impair our ability to accurately and timely report our financial position, results of operations or cash flows.

22. ***We may experience difficulties in expanding our business into additional geographical markets in India.***

While the Gold Loans markets in the South Indian States of Kerala Tamil Nadu, Andhra Pradesh and Karnataka remains and is expected to remain our primary strategic focus, we also evaluate attractive growth opportunities in other regions in India and have expanded our operations in the northern, western and eastern states of India. We may not be able to leverage our experience in southern India to expand our operations in other regions, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, customer tastes, behavior and preferences in these cities where we may plan to expand our operations may differ from those in south Indian states of Kerala, Tamil Nadu, Andhra Pradesh and Karnataka and our experience in the States of Kerala, Tamil Nadu, Andhra Pradesh and Karnataka may not be applicable to these geographies. In addition, as we enter new markets and geographical areas, we are likely to compete not only with other large banks and financial institutions in the Gold Loan business, but also the local unorganized or semi-organized lenders, who are more familiar with local conditions, business practices and customs, have stronger relationships with customers and may have a more established brand name.

If we plan to expand our geographical footprint, our business may be exposed to various additional challenges, including obtaining necessary governmental approvals, identifying and collaborating with local business partners with whom we may have no previous working relationship; successfully gauging market conditions in local markets with which we have no previous familiarity; attracting

potential customers in a market in which we do not have significant experience or visibility; being susceptible to local taxation in additional geographical areas of India; and adapting our marketing strategy and operations to different regions of India in which other languages are spoken. Our inability to expand our current operations may adversely affect our business prospects, financial conditions and results of operations.

23. ***System failures or inadequacy and security breaches in computer systems may adversely affect our business.***

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communications services.

If any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security.

24. ***We may not be able to maintain our current levels of profitability due to increased costs or reduced spreads.***

Our business involves a large volume of small-ticket size loans and requires manual operational support. Hence, we require dedicated staff or providing our services. In order to grow our portfolio, our expanded operations will also increase our manpower requirements and push up operational costs. Our growth will also require a relatively higher gross spread, or margin, on the consumer lending products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our consumer lending products were to reduce substantially, which could adversely affect our results of operations.

25. ***Our ability to access capital also depends on our credit ratings.***

The cost and availability of capital is also dependent on our short-term and long-term credit ratings. We have been assigned an “A1+” rating by ICRA for commercial paper and for short-term non-convertible debentures of ₹ 2,000.0 million, and a “P1+” rating by CRISIL for short term debt instruments of ₹ 20,000.0 million. We have been assigned an “AA-/Stable” rating by CRISIL for our ₹ 4,000.0 million non-convertible debentures and our ₹ 1,000.0 million subordinated debt. We have been assigned a long-term rating of “LAA-/Stable” and a short-term rating of “A1+” by ICRA for our ₹ 20,000 million line of credit. Ratings reflect a rating agency’s opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. While our recent credit ratings have been positive, any downgrade of our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, as a result, would negatively affect our business. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements.

26. ***We may be subject to regulations in respect of provisioning for non-performing assets that are less stringent than in some other countries.***

RBI guidelines prescribe the provisioning required in respect of our outstanding loan portfolio. These provisioning requirements may require us to reserve lower amounts than the provisioning requirements applicable to financial institutions and banks in other countries. The provisioning requirements may also require the exercise of subjective judgments of management.

The level of our provisions may not be adequate to cover further increases in the amount of our non-performing assets or a decrease in the value of the underlying gold collateral. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, or if we are required to increase our provisions, this could have an adverse effect on our financial condition, liquidity and results of operations and may require us to raise additional capital. For further details, see “Our Business - Non-performing Assets (NPAs) - Provisioning policy” on page 110 of the RHP, as also in the section “Regulations and Policies in India - Systemically Important ND-NBFCs - Prudential Norms - Provisioning Requirements” on page 118 of the RHP.

27. ***We may have to comply with stricter regulations and guidelines issued by regulatory authorities in India.***

We are regulated principally by and have reporting obligations to the RBI. We are also subject to the corporate, taxation and other laws in effect in India. The regulatory and legal framework governing us differs in certain material respects from that in effect in other countries and may continue to change as India’s economy and commercial and financial markets evolve. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency in India’s Gold Loan industry. Moreover, new regulations may be passed that restrict our ability to do business. For example, regulatory restrictions on securitization may be extended to bilateral assignment transactions, resulting in loss of arbitrage options.

We cannot assure you that we will not be subject to any adverse regulatory action in the future. Further, these regulations are subject to frequent amendments and depend upon government policy. Our present operations may not meet all regulatory requirements or subsequent regulatory amendments. The costs of compliance may be high, which may affect our profitability. If we are unable to comply with any such regulatory requirements, our business and results of operations may be materially and adversely affected.

28. ***Our loan portfolio is not classified as priority sector advances by the RBI.***

The RBI currently mandates domestic commercial banks operating in India to maintain an aggregate 40.0% (32.0% for foreign banks) of their adjusted net bank credit or credit equivalent amount of off-balance sheet exposure, whichever is higher as “priority sector advances”. These include advances to agriculture, small enterprises, exports and similar sectors where the Government seeks to encourage flow of credit for developmental reasons. Banks in India that have traditionally been constrained or unable to meet these requirements organically, have relied on specialised institutions like our Company that are better positioned to or focus on originating such assets through on-lending or purchase of assets or securitised pools to comply with these targets.

As per our restated audited financial statements, our outstanding amount of sold portfolio under bilateral assignments were ` 4,341.0 million, ` 8,130.2 million and ` 20,083.2 million for the years ended March 31, 2008, 2009 and 2010, respectively and ` 32,464.8 million as of November 30, 2010. The entire portfolio sold under bilateral assignments were categorized as a priority sector advance. A recent notification issued by the RBI in February of this year, has stipulated that loans sanctioned to NBFCs for on lending to individuals or other entities against gold jewellery would not be eligible for classification as priority sector advances in the context of priority sector lending guidelines issued by RBI. Accordingly, our ability to raise capital by selling down our gold loan portfolio under bilateral assignments will be hampered in the future and impact our ability to raise funds through loans from banks, which may adversely affect our financial condition and results of operations.

29. ***Our ability to assess, monitor and manage risks inherent in our business differs from the standards of some of our counterparts in India and in some developed countries.***

We are exposed to a variety of risks, including liquidity risk, interest rate risk, credit risk, operational risk and legal risk. The effectiveness of our risk management is limited by the quality and timeliness of available data.

Our hedging strategies and other risk management techniques may not be fully effective in mitigating our risks in all market environments or against all types of risk, including risks that are unidentified or

unanticipated. Some methods of managing risks are based upon observed historical market behaviour. As a result, these methods may not predict future risk exposures, which could be greater than the historical measures indicated. Other risk management methods depend upon an evaluation of information regarding markets, customers or other matters. This information may not in all cases be accurate, complete, up-to-date or properly evaluated. Management of operational, legal or regulatory risk requires, among other things, policies and procedures to properly record and verify a number of transactions and events. Although we have established these policies and procedures, they may not be fully effective. Our future success will depend, in part, on our ability to respond to new technological advances and emerging financing institution and Gold Loan industry standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction-processing systems to customer requirements or emerging market standards.

30. ***Any failure by us to identify, manage, complete and integrate acquisitions, divestitures and other significant transactions successfully could adversely affect our results of operations, business and prospects.***

As part of our business strategy, we may acquire complementary companies or businesses, divest non-core businesses or assets, enter into strategic alliances and joint ventures and make investments to further expand our business. In order to pursue this strategy successfully, we must identify suitable candidates for and successfully complete such transactions, some of which may be large and complex, and manage the integration of acquired companies or employees. We may not fully realize all of the anticipated benefits of any such transaction within the anticipated timeframe or at all. Any increased or unexpected costs, unanticipated delays or failure to achieve contractual obligations could make such transactions less profitable or unprofitable. Managing business combination and investment transactions requires varying levels of management resources, which may divert our attention from other business operations, may result in significant costs and expenses and charges to earnings. The challenges involved in integration include:

- combining product offerings and entering into new markets in which we are not experienced;
- consolidating and maintaining relationships with customers;
- consolidating and rationalizing transaction processes and corporate and IT infrastructure;
- integrating employees and managing employee issues;
- coordinating and combining administrative and other operations and relationships with third parties in accordance with applicable laws and other obligations while maintaining adequate standards, controls and procedures;
- achieving savings from infrastructure integration; and
- managing other business, infrastructure and operational integration issues.

Any such acquisition may also result in earnings dilution, the amortization of goodwill and other intangible assets or other charges to operations, any of which could have a material adverse effect on our business, financial condition or results of operations. These acquisitions may give rise to unforeseen contingent risks or latent liabilities relating to these businesses that may only become apparent after the merger or the acquisition is finalised. Such acquisitions could involve numerous additional risks, including, without limitation, difficulties in the assimilation of the operations, products, services and personnel of any acquired company and could disrupt our ongoing business, distract our management and employees and increase our expenses.

In addition, in order to finance an acquisition, we may be required to make additional borrowings or may issue additional Equity Shares, potentially leading to dilution of existing shareholders.

31. ***In order to be successful, we must attract, retain and motivate key employees, and failure to do so could adversely affect our business.***

In order to be successful, we must attract, train, motivate and retain highly skilled employees, especially branch managers and gold assessment technical personnel. If we cannot hire additional personnel or retain existing qualified personnel, our ability to expand our business will be impaired and our revenue could decline. Hiring and retaining qualified and skilled managers and sales representatives are critical to our future, and competition for experienced employees in the Gold Loan industry can be intense. In addition, we may not be able to hire and retain enough skilled and experienced employees to replace those who leave, or may not be able to re-deploy and retain our employees to keep pace with continuing changes in technology, evolving standards and changing customer preferences. The failure to hire key executives or employees or the loss of executives and key employees could have a significant impact on our operations.

32. ***Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject.***

We maintain insurance cover for our free hold real estate and tangible properties and infrastructure at all owned and leased premises which provides insurance cover against loss or damage by fire, earthquake, lightning, riot, strike, storm, flood, explosion, aircraft damage, rock slide and missile testing. Further we maintain insurance cover for employee fidelity, cash and gold in the office premises and in transit which provides insurance cover against loss or damage by employee theft, burglary, house breaking and hold up. The aggregate insured value covered by the various insurance policies we have subscribed to was ` 227.97 billion as of February 28, 2011. However, the amount of our insurance coverage may be less than the replacement cost of all covered property and may not be sufficient to cover all financial losses that we may suffer should a risk materialise. Further, there are many events that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured. If we were to incur a significant liability for which we were not fully insured, it could have a material adverse effect on our results of operations and financial position.

33. ***Our results of operations could be adversely affected by any disputes with our employees.***

As of February 28, 2011, we employed 15,664 persons in our operations. Currently our employees do not belong to any labour union. We do not engage any long term contract employees. While we believe that we maintain good relationships with our employees, there can be no assurance that we will not experience future disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations.

34. ***Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business.***

NBFCs in India are subject to strict regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as a NBFC with the RBI, we are required to maintain certain statutory and regulatory permits and approvals for our business. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure by us to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

In addition, our branches are required to be registered under the relevant shops and establishments laws of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. Some of our branches have not applied for such registration while other branches still have applications for registration pending. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities. For further details, see "Government and Other Approvals" on page 317.

35. ***We are subject to legal and regulatory risk which may adversely affect our business.***

As a non-deposit taking NBFC, we are subject to a wide variety of financial services laws and regulations and are supervised by a large number of regulatory and enforcement authorities in India, including the RBI. The laws and regulations governing the banking and financial services industry in India have become increasingly complex and cover a wide variety of issues, such as capital adequacy, exposure and other prudential norms, interest rates, liquidity, securitisation, investments, ethical issues, know-your-customer guidelines, money laundering and privacy, with sometimes overlapping enforcement authorities. For instance, a number of states in India have enacted laws to regulate money lending transactions. These state laws establish maximum rates of interest that can be charged by a person lending money. The RBI, however, has not established a ceiling on the rate of interest that can be charged by a NBFC in our sector of operations. Currently, the RBI requires that the board of all NBFCs adopt an interest rate model taking into account relevant factors such as the cost of funds, margin and risk premium. The rate of interest and the approach for gradation of risk and the rationale for charging different rates of interest for different categories of borrowers are required to be disclosed to the borrowers in the application form and expressly communicated in the sanction letter.

Additionally, we are required to make various filings with the RBI, the RoC and other relevant authorities pursuant to the provisions of RBI regulations, Companies Act and other regulations. If we fail to comply with these requirements, or a regulator claims we have not complied, in meeting these requirements, we may be subject to penalties and compounding proceedings. For instance, in the past, we had to approach the Company Law Board for condoning offences and had to pay certain penalties.

In addition, there may be changes in the regulatory system or in the enforcement of the laws and regulations which may require us to restructure our activities and incur additional expenses in complying with such laws and regulations, which could materially and adversely affect our business. Failure to comply with applicable Indian regulations, including unauthorised actions by employees, representatives, agents and third parties, suspected or perceived failures and media reports, and ensuing inquiries or investigations by regulatory and enforcement authorities, could result in regulatory action, including financial penalties and restrictions on or suspension of our business operations.

36. ***Major lapses of control, system failures or calamities could adversely impact our business.***

We are vulnerable to risks arising from the failure of employees to adhere to approved procedures, failures of security system, information system disruptions, communication systems failure and data interception during transmission through external communication channels and networks. Failure to detect these breaches in security may adversely affect our operations.

37. ***Our ability to borrow from various banks may be restricted on account of guidelines issued by the RBI imposing restrictions on banks in relation to their exposure to NBFCs.***

Under RBI Master Circular No. RBI/2010-11/68 DBOD No.Dir.BC.14/13.03.00/ 2010-11 issued on July 1, 2010, the exposure (both lending and investment, including off balance sheet exposures) of a bank to a single NBFC should not exceed 10%, of the bank's capital funds as per its last audited balance sheet. Banks may, however, assume exposures on a single NBFC up to 15%, of their capital funds provided the exposure in excess of 10% is on account of funds on-lent by the NBFC to the infrastructure sector. Further, banks may also consider fixing internal limits for their aggregate exposure to all NBFCs put together.

This limits the exposure that banks may have on NBFCs such as us, which may restrict our ability to borrow from such banks and may increase our cost of borrowing, which could adversely impact our growth, margins and business operations.

38. ***We have entered into certain transactions with related parties.***

We have entered into transactions with several related parties, including our Promoters, Directors and Group Entities. We can give no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions,

individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. The transactions we have entered into and any future transactions with our related parties have involved or could potentially involve conflicts of interest.

39. ***We will continue to be controlled by our Promoters and certain related entities after the completion of the Issue and they will continue to have the ability to exercise significant control over us.***

After the completion of the Issue, our Promoters along with certain related entities will control, directly or indirectly, approximately 80% of our outstanding Equity Shares. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us.

41. ***We have not entered into any definitive agreements to utilise a substantial portion of the net proceeds of the Issue.***

We intend to use the Net Proceeds for the purposes described in the “Objects of the Issue” on page 78 of this Red Herring Prospectus. We currently intend to use the Net Proceeds from the Issue to fund our growth. Our management will have broad discretion to use the Net Proceeds and you will be relying on the judgment of our management regarding the application of these Net Proceeds. Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time. Pending utilization for the purposes described above, we intend to temporarily invest the funds in interest bearing liquid instruments including deposits with banks and investments in liquid (not equity) mutual funds. Such investments would be in accordance with the investment policies approved by our Board from time to time.

42. ***Our business strategy may change in the future and may be different from that which is contained herein.***

In the future, we may decide to diversify into other businesses. We may also explore opportunities for expansion into new geographic markets outside India. We have stated our objectives for raising funds through the Issue and have set forth our strategy for our future business herein. However, depending on prevailing market

45. ***There can be no assurance that the Company will pay dividends to its shareholders in the near future.***

The Company has not paid any dividends since incorporation and there can be no assurance that dividends will be paid in the near future. The declaration and payment of any dividends in the future will be recommended by the Company’s Board of Directors, in its discretion, and will depend on a number of factors, including Indian legal requirements, its earnings, cash generated from operations, capital requirements and overall financial condition.

46. ***We are significantly dependent on our management team and our ability to attract and retain talent.***

We are significantly dependent upon a core management team who oversee the day-to-day operations, strategy and growth of our businesses. Many of the key management personnel have been with us since our inception and have been integral to our development. Our success is largely dependent on the management team who ensure the implementation of our strategy. If one or more members of our core management team were unable or unwilling to continue in their present positions, such persons may be difficult to replace, and our business could be adversely affected.

47. ***Our employees may be the target of theft, burglary and other crimes which may adversely affect our business, operations, and ability to recruit and retain employees.***

We handle large amount of cash and gold jewellery items in our daily operation and are exposed to risks of theft, burglary and other crimes. Our employees may therefore become targets of violence if they are present when these crimes are committed, and may sustain physical and psychological injuries as a result. We may encounter difficulties recruiting and retaining qualified employees due to this risk and our business and operations may be adversely affected.

48. ***Our internal procedures, on which we rely for obtaining information on our customers and loan collateral, may be deficient and result in business losses.***

We rely on our internal procedures for obtaining information on our customers and loan collateral provided. In the event of lapses or deficiencies in our procedures or in their implementation, we may be subject to business or operational risk. For example, in the event that we unknowingly receive stolen goods as collateral from a customer, the goods can be seized by authorities. Once seized by the

authorities, gold items will be stored in court storage facilities without a surety arrangement. No recourse will generally be available to Company in the event of such seizure, except the recovery of the loss from the customer.

49. ***We do not own our branches of operation.***

Except for 14 branch offices, which are owned by us, all our branches are located on leased premises. If any of the owners of these premises does not renew an agreement under which we occupy the premises, or if any of the owners seeks to renew an agreement on terms and conditions unfavorable to us, we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business and results of operations.

50. ***Some of the lease agreements entered into by our Company with respect to our immovable properties may not be duly registered or adequately stamped, which may adversely affect our operations.***

As of February 28, 2011, we had 2,611 branch offices of which 14 branch offices are located on premises owned by us. Of the remaining 2,597 branch offices that are located on leased and/or licensed premises; the lease agreements of 637 of these have been adequately stamped and duly registered. None of the other lease agreements with respect to our immovable properties have been adequately stamped or duly registered. Unless such documents are adequately stamped and duly registered, such documents may be rendered as inadmissible as evidence in a court in India or attract penalty as prescribed under applicable law, which may result in a material adverse effect on the continuance of the operations and business of our Company.

External Risk Factors

Risk Factors Related to India

51. ***Political instability or changes in the Government of India could adversely affect economic conditions in India and consequently our business.***

Our Company is incorporated in India, derive its revenues in India and all of our assets are located in India. Consequently, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, Government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business and the market price and liquidity of the Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and political, economic or other developments in or affecting India. Since 1991, successive governments have pursued policies of economic and financial sector liberalization and deregulation and encouraged infrastructure projects. The new Government, which has come to power in May 2009 has announced policies and taken initiatives that support the economic liberalization program pursued by previous governments. The policies of the new Government may change the rate of economic liberalization, specific laws and policies affecting banks and financial institutions and the Gold Loan industry, foreign investment and other matters affecting investment in the Equity Shares. While the new Government is expected to continue the liberalization of India's economic and financial sectors and deregulation policies, there can be no assurance that such policies will be continued. A significant change in the Government's policies in the future, in particular, those relating to NBFCs and the Gold Loan industry in India, could affect business and economic conditions in India, and could also adversely affect our financial condition and results of operations.

52. ***If communal disturbances or riots erupt in India, or if regional hostilities increase, this would adversely affect the Indian economy, and our business, financial condition and results of operations.***

India has experienced communal disturbances, terrorist attacks and riots during recent years. If such events recur, our operational and marketing activities may be adversely affected, resulting in a decline in our income.

The Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries, including those between India and Pakistan. The hostilities between India and

Pakistan are particularly threatening because both India and Pakistan are nuclear powers. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, such as the recent attacks in Mumbai in November 2008, as well as other acts of violence or war could influence the Indian economy by creating a greater perception that investments in India involve higher degrees of risk. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares. A slow down in economic growth in India could cause our business to suffer.

53. ***A slow down in the economic growth in India could cause our business to suffer.***

We derive all of our revenues from operations in India and consequently, our performance and growth is dependent on the state of the Indian economy. The Annual Policy Statement of the RBI released in April 2010 and amended in July 2010 placed real GDP growth for the fiscal year 2011 at approximately 8.5% as compared to 7.4% in fiscal year 2010 following the downturn precipitated by the global financial crisis. Any slow down in the Indian economy, and in particular in the financing requirements of our customers could adversely affect our business.

54. ***A downgrade of India's sovereign debt rating may adversely affect our ability to raise additional debt financing.***

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy, which are outside our control. Such downgrading could cause a change in interest rates or other commercial terms and could adversely affect our ability to raise additional financing as well as our capital expenditure plans, business and financial performance. A decline in this reserve could impact the valuation of the Indian Rupee and could result in reduced liquidity and higher interest rates, which could adversely affect the availability of financing to us for our future projects.

55. ***A decline in India's foreign exchange reserves may affect liquidity and interest rates in the Indian economy, which could adversely impact our financial condition.***

According to the weekly statistical supplement released by the RBI, India's foreign exchange reserves totalled US\$302,593 million as of March 4, 2011 (*Source: RBI Website*). A decline in India's foreign exchange reserves could impact the valuation of the Rupee and could result in reduced liquidity and higher interest rates which could adversely affect our future financial performance.

56. ***Companies operating in India are subject to a variety of central and state government taxes and surcharges.***

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, value added tax, turnover tax, service tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. For example, a new direct tax code has been introduced in the monsoon session of the Indian Parliament, and is expected to be effective from April 1, 2012. In addition, a new goods and services tax regime is expected to be introduced in fiscal year 2012, and the scope of the service tax is proposed to be enlarged. The statutory corporate income tax in India, which includes a surcharge on the tax and an education cess on the tax and the surcharge, is currently 33.21%. The central or state government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations.

57. ***Our ability to raise foreign capital may be constrained by Indian law.***

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, if at all.

Limitations on raising foreign debt may have an adverse effect on our business, financial condition, and results of operations.

58. ***India is vulnerable to natural disasters that could severely disrupt the normal operation of our business.***

Parts of India are susceptible to tsunamis and earthquakes and other natural disasters. Because all of our branches and offices and employees are located in India, if any of our branches or offices are damaged by a natural disaster, our business could be interrupted or delayed. As a result, a natural disaster in India could adversely affect our results of operations.

59. ***An outbreak of an infectious disease or any other serious public health concerns in Asia or elsewhere could adversely affect our business.***

The outbreak of an infectious disease in Asia or elsewhere or any other serious public health concern, such as swine influenza, could have a negative impact on the global economy, financial markets and business activities worldwide, which could adversely affect our business. Although, we have not been adversely affected by such outbreaks in the past, we can give you no assurance that a future outbreak of an infectious disease among humans or animals or any other serious public health concerns will not have a material adverse effect on our business.

Risks Relating to the Issue

60. ***The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.***

Prior to this Issue, there has been no public market for our Equity Shares. The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Gold Loan industry and the perception in the market about investments in the Gold Loan industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares.

There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

61. ***The market value of investors' investments may fluctuate due to the volatility of the Indian securities markets.***

Indian securities markets are more volatile than the securities markets in certain countries which are members of the OECD. Indian stock exchanges have, in the past, experienced substantial fluctuations in the prices of listed securities. Indian stock exchanges (including the BSE and the NSE) have experienced problems which, if such or similar problems were to continue or recur, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares. These problems have included temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have a negative effect on market sentiment.

62. ***Economic developments and volatility in securities markets in other countries may also cause the price of our Equity Shares to decline.***

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. For instance, the economic downturn in the U.S. and several European countries during a part of calendar year 2007, 2008 and 2009 has adversely affected market prices in the world's securities markets, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

63. ***Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.***

Our Articles of Association, regulations of our Board of Directors and Indian law govern our corporate affairs. Legal principles relating to these matters and the validity of corporate procedures, Directors fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder of our Company than as a shareholder of a corporation in another jurisdiction.

64. ***We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the NBFC and Gold Loan industries contained in this Red Herring Prospectus.***

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy as well as the Gold Loan industry has been based on various publications and reports from agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials, particularly since there is limited publicly available information specific to the Gold Loan industry. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisers and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the section titled "Industry Overview" on page 95. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

65. ***The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.***

We may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, IFRS announced by the Ministry of Corporate Affairs, GoI in January 2010. The convergence of 35 Indian Accounting Standards with IFRS was notified by the Ministry of Corporate Affairs on February 25, 2010. The date of implementing such converged Indian accounting standards has not yet been determined, and will be notified by the Ministry of Corporate Affairs in due course after various tax-related and other issues are resolved.

Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding period in the comparative period. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small

number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements.

66. ***Fluctuations in the exchange rate between the Rupee and the U.S. dollar could have a material adverse effect on the value of the Equity Shares, independent of our operating results.***

The Equity Shares are quoted in Rupees on the BSE and the NSE. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into U.S. dollars for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders. The exchange rate between the Rupee and the U.S. dollar has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

67. ***Any future issuance of Equity Shares by the Company or sales of the Equity Shares by any of its significant shareholders may adversely affect the trading price of the Equity Shares.***

Any future issuance of our Equity Shares by the Company could dilute your shareholding. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may also adversely affect the trading price of our Equity Shares, and could impact our ability to raise capital through an offering of our securities. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber their Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Upon completion of the Issue, 20% of our post-Offer paid-up capital held by certain of our Promoters will be locked up for a period of three years from the date of allotment of Equity Shares in the Issue. For further information relating to such Equity Shares that will be locked up, please see section titled “Capital Structure” on page 63 of this Red Herring Prospectus. All other remaining Equity Shares that are outstanding prior to the Offer will be locked up for a period of one year from the date of allotment of Equity Shares in the Issue.

68. ***There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE and the NSE in a timely manner, or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE and the NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

69. ***A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian law.***

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of the Company, even if a change in control would result in the purchase of your Shares at a premium to the market price or would otherwise be beneficial to you. These provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of the Company. Consequently, even if a potential takeover of the Company would result in the purchase of the Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of Indian takeover regulations.

70. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

71. ***There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

We are subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

72. ***After this Issue, the price of the Equity Shares may be highly volatile.***

The price of the Equity Shares on the Stock Exchanges may fluctuate after this Issue as a result of several factors, including:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. dollar, the Euro and other foreign currencies;
- our profitability and performance;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the Gold Loan or NBFC industry;
- adverse media reports on us or the Indian Gold Loan industry;
- changes in the estimates of our performance or recommendations by financial analysts;
- significant developments in India's economic liberalization and deregulation policies;
- significant developments in India's fiscal and environmental regulations; and
- any other political or economic factors.

73. ***Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and

collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

74. ***Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

The amount of future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements, terms and conditions of our indebtedness and capital expenditures. There can be no assurance that we will be able to pay dividends in the future.

SECTION III: INTRODUCTION

SUMMARY OF BUSINESS

The following summary is to be read in conjunction with the section titled “Risk Factors” on page 10 of this RHP.

Overview

We are the largest gold financing company in India in terms of loan portfolio, according to IMAcS Industry Report (2010 Update). We provide personal and business loans secured by gold jewellery, or Gold Loans, primarily to individuals who possess gold jewellery but could not access formal credit within a reasonable time, or to whom credit may not be available at all, to meet unanticipated or other short-term liquidity requirements. According to the IMAcS Industry Report (2010 Update), as of March 31, 2010 our branch network of 1,605 branches was the largest among gold loan NBFCs in India. Our Gold Loan portfolio as of November 30, 2010 comprised approximately 4.1 million loan accounts in India that we serviced through 2,263 branches across 20 states, the national capital territory of Delhi and four union territories in India. We have since increased our branch network to 2,611 branches as of February 28, 2011, and used our branch network to serve an average of 67,953 customers per day in the month of February 2011. As of February 28, 2011, we employed 15,664 persons in our operations.

We are a “Systemically Important Non-deposit taking NBFC” headquartered in the southern Indian state of Kerala. Our operating history has evolved over a period of 70 years since M George Muthoot (the father of our Promoters) founded a gold loan business in 1939 under the heritage of a trading business established by his father, Ninan Mathai Muthoot, in 1887. Since our formation, we have broadened the scale and geographic scope of our retail lending operations so that, as of March 31, 2010, we were India’s largest provider of Gold Loans. In the years ended March 31, 2008, 2009 and 2010, and in the eight months ended November 30, 2010, revenues from our Gold Loan business constituted 95.97%, 96.71% , 98.08% and 98.50%, respectively, of our total income. In addition to our Gold Loans business, we provide money transfer services through our branches as sub-agents of various registered money transfer agencies, and recently have commenced providing collection agency services. We also operate three windmills in the state of Tamil Nadu.

We issue secured non-convertible debentures called “Muthoot Gold Bonds” on a private placement basis. Proceeds from our issuance of Muthoot Gold Bonds form a significant source of funds for our Gold Loan business. We also rely on bank loans and subordinated debt instruments as our sources of funds. As per our restated audited financial statements, as of November 30, 2010, we had ` 33,644.5 million in outstanding Muthoot Gold Bonds and ` 57,184.7 million in other borrowings. We also raise capital by selling a portion of our loan receivables under bilateral assignment agreements with various banks .

Our customers are typically small businessmen, vendors, traders, farmers and salaried individuals, who for reasons of convenience, accessibility or necessity, avail of our credit facilities by pledging their gold jewellery with us rather than by taking loans from banks and other financial institutions. We provide retail loan products, primarily comprising Gold Loans. We also disburse other loans, including those secured by Muthoot Gold Bonds. Our Gold Loans have a maximum 12 month term. As per our restated audited financial statements, our average disbursed Gold Loan amount outstanding was ` 31,553 per loan account as of November 30, 2010. In the year ended March 31, 2010, our retail loan portfolio earned, on average, 1.67% per month, or 19.94% per annum, and in the eight months ended November 30, 2010 our retail loan portfolio earned, on average, 1.57% per month, or 18.92% per annum.

As per our restated audited financial statements, as of March 31, 2008, 2009 and 2010, and November 30, 2010, our portfolio of outstanding gross Gold Loans under management was ` 21,790.1 million, ` 33,000.7 million and ` 73,417.3 million, and ` 128,977.7 million, respectively, and approximately 30.1 tons, 38.9 tons and 65.5 tons, and 97.6 tons, respectively, of gold jewellery was held by us as security for our Gold Loans. Gross non-performing assets ("NPAs") were at 0.42%, 0.48% and 0.46%, and 0.35% of our gross retail loan portfolio under management as of March 31, 2008, 2009, 2010, and November 30, 2010, respectively.

As per our restated audited financial statements, in the years ended March 31, 2008, 2009 and 2010, our total income was ` 3,686.4 million, ` 6,204.0 million and ` 10,893.8 million, respectively, demonstrating an annual growth rate of 57.56%, 68.29% and 75.59%, respectively. As per our restated audited financial statements, in

the eight months ended November 30, 2010, our total income was ` 13,016.6 million. As per our restated audited financial statements, our profit after tax in the years ended March 31, 2008, 2009 and 2010 was ` 630.6 million, ` 978.7 million and ` 2,285.2 million, respectively, demonstrating an annual growth rate of 43.8%, 55.2% and 133.5%, respectively. As per our restated audited financial statements, our profit after tax in the eight months ended November 30, 2010 was ` 2,914.8 million. As per our restated audited financial statements, our networth as of March 31, 2008, 2009, 2010, and as of November 30, 2010 was ` 2,131.1 million, ` 3,614.5 million, ` 5,841.9 million and ` 11,314.5 million, respectively.

Competitive Strengths

We believe that the following competitive strengths position us well for continued growth:

Market leading position in the Gold Loan business with a strong presence in under-served rural and semi-urban markets

Gold loans are the core products in our asset portfolio. We believe that our experience, through our Promoters, has enabled us to have a leading position in the Gold Loan business in India. Highlights of our market leading position include the following:

- We are the largest gold financing company in India in terms of loan portfolio, according to IMA CS Industry Report (2010 Update). As per our restated audited financial statements, our loan portfolio as of March 31, 2010 and November 30, 2010 comprised approximately 2.8 million loan accounts and approximately 4.1 million loan accounts, respectively, in India with Gold Loans outstanding of ` 73,417.3 million and ` 128,977.7 million, respectively .
- We have the largest branch network among gold loan NBFCs, according to the IMA CS Industry Report (2010 Update). As of March 31, 2010, we operated 1,605 branches across 19 states, the national capital territory of Delhi and two union territories in India. Our branch network has expanded significantly in recent years from 373 branches as of March 31, 2005 to 2,611 branches as of February 28, 2011, comprising 465 branches in northern India, 1,753 branches in southern India, 297 branches in western India and 96 branches in eastern India covering 20 states , the national capital territory of Delhi and four union territories in India. In the month of February 2011, we served an average of 67,953 customers daily.
- We believe that due to our early entry we have built a recognizable brand in the rural and semi-urban markets of India, particularly in the southern Indian states of Tamil Nadu, Kerala, Andhra Pradesh and Karnataka. As of March 31, 2010 and November 30, 2010, the southern Indian states of Tamil Nadu, Kerala, Andhra Pradesh, Karnataka and the Union Territory of Pondicherry constituted 75.38% and 75.28%, respectively of our total Gold Loan portfolio.
- We have a strong presence in under-served rural and semi-urban markets. A large portion of the rural population has limited access to credit either because of their inability to meet the eligibility requirements of banks and financial institutions because credit is not available in a timely manner, or at all. We have positioned ourselves to provide loans targeted at this market.
- We offer products with varying loan amounts, advance rates (per gram of gold) and interest rates. The principal loan amounts we disburse usually range from ` 2,000.0 to ` 100,000.0 while interest rates on our Gold Loans range between 12.00% to 30.00% per annum.

Strong brand name, track record, management expertise and Promoter support

Our operating history has evolved over a period of 70 years since M George Muthoot (the father of our Promoters) founded a gold loan business in 1939. We believe that the experience, skills and goodwill acquired by our Promoters over these years cannot be easily replicated by competitors. We have a highly experienced and motivated management team that capitalizes on this heritage at both the corporate and operational levels. Our senior management team has extensive experience in the Gold Loan industry and has demonstrated the ability to grow our business through their operational leadership, strategic vision and ability to raise capital. Under the current management team, as per our restated audited financial statements, our retail loan portfolio has grown from ` 22,263.8 million as of March 31, 2008 to ` 74,381.5 million as of March 31, 2010 and ` 130,036.8 million as of November 30, 2010 . Our business is also well supported by our high net-worth Promoters, who are members of the Muthoot family. We believe that our track record, management expertise and Promoter

support have established a strong brand name for us in the markets we serve. A strong brand name has contributed to our ability to earn the trust of individuals who entrust us with their gold jewellery, and will be a key in allowing us to expand our growth and consolidate this fragmented industry across India.

High-quality customer service and short response time

We adhere to a strict set of market survey and location guidelines when selecting branch sites to ensure that our branches are set up close to our customers. We believe that our customers appreciate this convenience, as well as extended operating hours that we typically offer, which are often more compatible with our customers' work schedules. We provide our customers a clean, attractive and secure environment to transact their business with us. In addition to the physical environment, it is equally important to have professional and attentive staff at both the branch level and at our centralized customer support centers. Each of our branches across India is staffed with persons who possess local knowledge and understanding of customers' needs and who are adequately trained to appraise collateral and disburse loans within a few minutes. Although disbursement time may vary depending on the loan ticket size and the number of items pledged, we can generally disburse an average loan ticket size of ₹ 20,000.0 within five minutes from the time the gold is tendered to the appraiser. Furthermore, since our loans are all over-collateralized by gold jewellery, there are minimal documentary and credit assessment requirements, thereby shortening our turnaround time. We believe our high quality customer service and short response time are significant competitive strengths that differentiate our services and products from those provided by commercial banks.

Strong capital raising ability

We have a track record of successfully raising capital from various sources. We regularly issue secured redeemable non-convertible debentures to retail investors on a private placement basis as a means to access capital for our Gold Loan business. We have also issued equity shares in three tranches to institutional investors. For further information, please refer to the sections titled "History and Certain Corporate Matters" and "Capital Structure" on pages 127 and 63, respectively. As per our restated audited financial statements, as of March 31, 2008, 2009 and 2010, and as of November 30, 2010, our outstanding gross Muthoot Gold Bonds portfolio was ₹ 12,403.3 million, ₹ 19,019.8 million, ₹ 27,192.5 million, and ₹ 33,644.5 million, respectively. We have diversified our resource pool by supplementing our proceeds from the issuance of Muthoot Gold Bonds with borrowings from banks and other financial institutions. As per our restated audited financial statements, as of March 31, 2008, 2009, 2010 and November 30, 2010, our outstanding borrowings from banks were ₹ 5,884.9 million, ₹ 11,067.6 million, ₹ 21,278.7 million and ₹ 47,085.44 million, respectively. We also raise capital by selling our receivables under bilateral assignments to banks. As per our restated audited financial statements, our outstanding amount of sold portfolio under bilateral assignments were ₹ 4,341.0 million, ₹ 8,130.2 million, ₹ 20,083.2 million and ₹ 32,464.8 million as of March 31, 2008, 2009, 2010 and November 30, 2010, respectively. We have been assigned an "A1+" rating by ICRA for commercial paper and for short-term non-convertible debentures of ₹ 2,000.0 million, and a "P1+" rating by CRISIL for short term debt instruments of ₹ 20,000.0 million. We have been assigned an "AA-/Stable" rating by CRISIL for our ₹ 4,000.0 million non-convertible debentures and our ₹ 1,000.0 million subordinated debt. We have been assigned a long-term rating of "LAA-/Stable" and a short-term rating of "A1+" by ICRA for our ₹ 20,000 million line of credit.

In-house training capabilities to meet our branch expansion requirements

Our ability to timely appraise the quality of the gold jewellery collateral is critical to the business. We do not engage third parties to assess the collateral for our Gold Loans, but instead employ in-house staff for this purpose. Assessing gold jewellery quickly is a specialized skill that requires assessing jewellery for gold content and quality manually without damaging the jewellery. We have two staff training colleges, one each in Cochin and in New Delhi, and three regional training centers located in Chennai, Hyderabad and Bangalore. We use our staff training colleges and regional training centers to train new employees in appraisal skills, customer relations and communication skills. We believe that our in-house training has built up a talent pool that enables us to staff new branches with qualified and skilled personnel as we seek to grow our branch network. Our in-house training capabilities also enable us to improve the skill sets of our existing personnel.

Our Strategy

Our business strategy is designed to capitalize on our competitive strengths and enhance our leading market position. Key elements of our strategy include:

Expand branch network and visibility to maintain our market leadership position

We intend to continue to grow our loan portfolio by expanding our network through the addition of new branches. In order to optimize our expansion, we carefully assess potential markets by analyzing demographic, competitive and regulatory factors, site selection and availability, and growth potential. We have a long-standing presence in southern India, and are among the first organized Gold Loan providers in northern and western India. Our strategy for branch expansion includes further strengthening our market leading position in southern Indian states by providing higher accessibility to customers as well as leveraging our expertise and presence in southern India to enhance our presence in other regions of India, particularly in northern India, where we intend to open branches in most states. We have added 620 branches in the last fiscal year and 1,006 branches between April 1, 2010 and February 28, 2011, and expect this growth trend to continue in the future. At the core of our branch expansion strategy, we expect to penetrate new markets and expand our customer base to include customers who otherwise would rely on the unorganized sector. Moreover, our ethics, values and goodwill, which have established our strong brand, will continue to be important factors in our expansion. In addition to increasing the visibility of our brand by sponsoring events and publicity, we will continue to build trust among our customers and enhance our brand with quality services and safety and security of our customers' collateral.

Target new customer segments

The market for our loan products was traditionally confined to lower and middle income groups, who viewed Gold Loans as an option of the last resort in case of emergency. We intend to undertake sustained marketing efforts to diminish the stigma attached to pledging gold jewellery in India. We plan to work to position Gold Loans as a "lifestyle product" and expand our customer base to include upper-middle income and upper income groups. We intend to emphasize our Gold Loan products' key advantages of expediency and minimal documentation, and alter the image of Gold Loans from an option of the last resort to an option of convenience.

Access low-cost and diversified sources of funds

We source our funds for our Gold Loan business primarily from the proceeds of private placements of debentures in India and from secured and unsecured credit facilities from banks and other financial institutions. We have been assigned a long-term rating of "LAA-/Stable" and a short-term rating of "A1+" by ICRA for our ₹ 20,000 million line of credit. We intend to increase our efforts to access low-cost funds through rated debt instruments. In this regard, we have been assigned an "A1+" rating by ICRA for commercial paper and for short-term non-convertible debentures of ₹ 2,000.0 million, and a "P1+" rating by CRISIL for short term debt instruments of ₹ 20,000 million. We have been assigned an "AA-/Stable" rating by CRISIL for our ₹ 4,000.0 million non-convertible debentures and our ₹ 1,000.0 million subordinated debt. In addition, we intend to expand our program of selling a portion of our receivables under various bilateral assignment agreements with financial institutions. We may also consider the possibility of concluding rated securitization transactions in the future. We intend to increase the levels of our capital adequacy ratios in excess of regulatory requirements and strengthen our balance sheet with a view to have access to other sources of low-cost funds. Furthermore, we also intend to seek strong investments in our Company as another source of funding to expand our business.

Strengthen our operating processes and risk management systems

Risk management forms an integral part of our business as we are exposed to various risks relating to the Gold Loan business. The objective of our risk management systems is to measure and monitor the various risks we are subject to and to implement policies and procedures to address such risks. We intend to continue to improve our operating processes and risk management systems that will further enhance our ability to manage the risks inherent to our business. For example, we have commenced installing offsite surveillance cameras in our branches, and intend to implement this across our branch network. As of February 28, 2011, we had installed surveillance cameras in 800 branches across India.

Book Building Process

Book building refers to the collection of Bids from investors within the Price Band, on the basis of the Red Herring Prospectus. The Issue Price will be determined by the Company in consultation with the Book Running Lead Managers and the Co-Book Running Lead Manager, after the Bid/Issue Closing Date. The principal parties involved in the Book Building Process are:

1. our Company;
2. the BRLMs;
3. the CBRLM;
4. the Syndicate Members;
5. the Registrar to the Issue;
6. the Escrow Collection Banks; and
7. the SCSBs.

This Issue is being made for less than 25% of the post-Issue capital pursuant to Rule 19(2)(b)(ii) of the SCRR, read with Regulation 41(1) of the SEBI ICDR Regulations. The Company is eligible for the Issue in accordance with Regulation 26(1) of the SEBI ICDR Regulations. Further, this Issue is being made through the Book Building Process wherein not more than 50% of the Issue shall be available for allocation to QIBs on a proportionate basis out of which 5% of the QIB Portion (excluding the Anchor Investor Portion) shall be available for allocation on a proportionate basis to Mutual Funds only, and the remainder shall be available for allocation on a proportionate basis to all QIBs, including Mutual Funds, subject to valid Bids being received at or above the Issue Price. Further, not less than 15% of the Issue will be available for allocation on a proportionate basis to Non-Institutional Bidders and not less than 35% of the Issue will be available for allocation on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price. Our Company may allocate up to 30% of the QIB Portion to the Anchor Investors on a discretionary basis. One third of the Anchor Investor Portion shall be reserved for allocation to domestic Mutual Funds, subject to valid bids being received from domestic Mutual Funds at or above the Anchor Investor Issue Price. In the event of under-subscription or non-Allotment in the Anchor Investor Portion, the balance Equity Shares shall be added to the Net QIB Portion. For further details, see section titled "Issue Procedure" on page 339.

The Book Building Process is subject to change. Investors are advised to make their own judgment about investment through this process prior to making a Bid or Application in the Issue. Please see section titled to the section titled "Terms of the Issue" on page 331 for more details. QIBs are not allowed to withdraw their Bid(s) after the Bid/Issue Closing Date. For further details, see the section titled 'Issue Structure' on page 335. We will comply with SEBI ICDR Regulations and any other ancillary directions issued by SEBI for this Issue. In this regard, the Company has appointed the BRLMs to manage the Issue and procure subscription to the Issue.

Steps to be taken by the Bidders for making a Bid or application in this Issue:

- Check eligibility for making a Bid. For further details, see the section titled "Issue Procedure" on page 339. Specific attention of ASBA Bidders is invited to the section titled "Issue Procedure – Issue Procedure for ASBA Bidders" on page 367;
- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form or the ASBA Form, as the case may be;

- Ensure that the Bid cum Application Form or ASBA Form is duly completed as per the instructions given in the Red Herring Prospectus and in the respective forms;
- Except for Bids on behalf of the Central or the State Government and the officials appointed by the courts, for Bids of all values, ensure that you have mentioned your PAN in the Bid cum Application Form or ASBA Form (see the section titled “Issue Procedure” on page 339). However, Bidders residing in the State of Sikkim are exempted from the mandatory requirement of PAN. The exemption is subject to the Depository Participants verifying the veracity of the claim of the Bidders, that they are residents of Sikkim, by collecting sufficient documentary evidence in support of their address;
- Ensure the correctness of your Demographic Details (as defined in the section titled “Issue Procedure – Bidder’s PAN, Depository Account and Bank Account Details” on page 354), given in the Bid cum Application Form or ASBA Form, with the details recorded with your Depository Participant;
- Bids by ASBA Bidders will only have to be submitted to the SCSBs at the Designated Branches. ASBA Bidders should ensure that their bank accounts have adequate credit balance at the time of submission to the SCSB to ensure that their ASBA Bid is not rejected; and
- Bids by QIBs (except ASBA Bidders) must be submitted to the BRLMs, the CBRLM and/or their affiliates.

Illustration of Book Building Process and the Price Discovery Process

(Investors should note that the following is solely for the purpose of illustration and is not specific to this Issue. Further, Anchor Investor Bids do not form part of the Book Building Process.)

Bidders can bid at any price within the Price Band. For instance, assuming a Price Band of ₹ 20 to ₹ 24 per share, an issue size of 3,000 Equity Shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the Issue Period. The illustrative book as shown below indicates the demand for the shares of the issuer company at various prices and is collated from bids from various investors.

Bid Quantity	Bid Price (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1,000	23.00	1,500	50.00%
1,500	22.00	3,000	100.00%
2,000	21.00	5,000	166.67%
2,500	20.00	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., ₹ 22 in the above example. Our Company in consultation with the BRLMs and the CBRLM, will finalise the issue price at or below such cut-off, i.e., at or below ₹ 22. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Withdrawal of the Issue

Our Company in consultation with the BRLMs and the CBRLM, reserve the right not to proceed with the Issue at any time after the Bid/Issue Opening Date, but before the Board meeting for the allotment, without assigning any reasons therefor, in accordance with SEBI ICDR Regulations. However, if our Company withdraws from the Issue after the Bid/Issue Closing Date, it shall issue a public notice that shall include reasons for such withdrawal, within two days of the closure of the Bid/Issue Closing Date. The public notice shall be issued in the same newspapers where the pre-Issue advertisements had appeared and our Company shall also promptly inform the Stock Exchanges. If our Company withdraws the Issue after the Bid/Issue Closing Date and thereafter determines that it will proceed with an initial public offering of its Equity Shares, it shall file a fresh Draft Red Herring Prospectus for observations with SEBI.

In terms of the SEBI ICDR Regulations, QIBs are not permitted to withdraw their Bids after the QIB Bid/Issue Closing Date.

The Issue is also subject to obtaining final approval of the Prospectus after it is filed with the RoC. Notwithstanding the foregoing, subsequent to Allotment, the Issue is also subject to obtaining the final listing and trading approvals of the Stock Exchanges, which our Company shall apply for only after Allotment.

- general corporate purposes.

In addition, our Company expects to receive the benefits of listing of the Equity Shares on the Stock Exchanges.

Means of Finance

The details of the proceeds of the Issue are summarized below:

Particular	Estimated Amount (₹ in million) *
Gross proceeds to be raised through the Issue ("Issue Proceeds")	₹ 100
Issue related expenses of our Company	₹ 10
Net proceeds of the Issue after deducting the Issue related expenses of our Company ("Net Proceeds") *	₹ 90

* Will be incorporated after finalization of the Issue Price

Utilization of Net Proceeds

Our Company intends to utilize ₹ 90 million from the Net Proceeds towards augmenting our capital base to meet future capital requirements to provide for funding of loans to our customers. As per the Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007, every NBFC-ND-SI is presently required to maintain a minimum capital ratio consisting of Tier I Capital and Tier II Capital of not less than 12% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items. Such minimum capital ratio has been increased to 15% effective March 31, 2011. The RBI has prescribed risk weights for various on balance sheet and off-balance sheet items ranging presently from 0% to 100%. Equity share capital and securities premium are treated as Tier I Capital. Correspondingly, post the Issue and upon increasing its Tier I Capital, our Company will be able to create more risk weighted assets, predominantly consisting of its loan portfolio. To illustrate, raising additional Tier I Capital of ₹ 100 crores will enable our Company to add a maximum of ₹ 833.33 crores of aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items. In other words, our Company can increase its business (which comprises predominantly of lending) to such a level such that after applying risk weights, the Capital Adequacy Ratio shall not be less than 12% before March 31, 2011 and not less than 15% thereafter.

As per the Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007 Tier II Capital shall not exceed Tier I Capital. On increase in equity share capital and securities premium, Tier I Capital increases and the Company's ability to raise Tier II Capital also correspondingly increases and thereby enhances Company's ability to create more risk weighted assets.

General Corporate Purposes

The Net Proceeds will be first utilized towards the objects mentioned above. Overview of the Indian Economy

India is the fifth largest economy in the world after the European Union, the United States, China and Japan with an estimated GDP of approximately US\$3.56 trillion in 2009, on a purchasing power parity ("PPP") basis, (Source: CIA World Factbook). India is also one of the fastest growing economies in the world. According to the Central Statistical Organization, India's GDP grew at a rate of 7.4% in fiscal 2010.

According to India Brand Equity Foundation, India is one of the largest bullion markets in the world. India is also the largest consumer of gold jewellery in the world (approximately 20% of global gold consumption), and the largest importer of gold in the world. Gold imports were approximately 739 tonnes in fiscal 2010. (Source: IBEF, <http://www.ibef.org/industry/gemsjewellery.aspx>)

Overview of the Indian Consumer Credit Market

The consumer credit market in India has undergone a significant transformation over the last decade and experienced rapid growth due to consumer credit becoming cheaper, more widely available and increasingly a more acceptable avenue of funding for consumers. The consumer credit market has developed in India due to the following factors:

- increased focus by banks and financial institutions on consumer credit resulting in a market shift towards regulated lenders from unregulated moneylenders/financiers;
- increasing trend of Indian consumers to acquire assets such as cars, goods and houses on credit;
- fast emerging middle class and growing number of households in our target segment;
- improved terms of credit as interest rates in India fall in line with global interest rates;
- legislative changes that offer greater protection to lenders against fraud and potential default increasing the incentive to lend;
- growth in assignment and securitisation arrangements for consumer loans has enabled non deposit based entities to access wholesale funding and compete solely on their ability to originate, underwrite and service consumer loans.

Credit availability, affordability and consumer confidence are the key drivers for consumer loan growth.

A variety of financial intermediaries in the public and private sectors participate in India's consumer lending sector, including the following:

- commercial banks;
- long-term lending institutions;
- NBFCs, including housing finance companies;
- other specialized financial institutions and state-level financial institutions; and
- lenders in the unorganized sector.

Commercial Banks

As of March 31, 2008, there were 166 scheduled commercial banks ("SCBs"), (including regional rural banks ("RRBs") in India (*Source: RBI, Quarterly Statistics on Deposits and Credit of Scheduled Commercial Banks, December 2009*). The number of banked centres served by SCBs was 34,731 of which 28,021 were single office centres and 64 centres had 100 or more bank offices (*Source: RBI publication, Highlights as on April 19, 2010 <http://www.rbi.org.in/scripts/PublicationsView.aspx?id=12260>*). Scheduled commercial banks are banks that are listed in a schedule to the Reserve Bank of India Act, 1934, and may be further categorised as public sector banks, private sector banks and foreign banks.

Non-Banking Finance Companies

A non-banking finance company ("NBFC") is a company registered under the Companies Act, 1956 and is engaged in the business of loans and advances, acquisition of shares/stock/bonds/debentures/securities issued by Government or local authority or other securities of like marketable nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of agriculture activity, industrial activity, sale/purchase/construction of immovable property. A non-banking institution which is a company and which has its principal business of receiving deposits under any scheme or arrangement or any other manner, or lending in any manner is also a non-banking financial company (Residuary non-banking company). It is mandatory that every NBFC should be registered with RBI to commence or carry on any business of non-banking financial institution as defined in clause (a) of Section 45 I of the RBI Act, 1934. All NBFCs are not entitled to accept public deposits. Only those NBFCs holding a valid Certificate of Registration with authorisation to accept Public Deposits can accept/hold public deposits. NBFCs authorised to accept/hold public deposits besides having minimum stipulated net owned fund should also comply with the directions such as investing part of the funds in liquid assets, maintain reserves, rating etc. issued by the Bank (*Source: RBI, FAQ_NBFC <http://www.rbi.org.in/scripts/FAQView.aspx?Id=71>*). As of June, 2009 there were 12,740 NBFCs in India, mostly in the private sector (*Source: RBI Press Release dated October, 2009*).

Gold Finance Industry in India

India is one of the largest markets for gold and as of fiscal 2010, accounts for approximately 10% of the total world gold stock with an annual demand of approximately 700 tonnes (*Source: IMAcS Industry Report (2010 Update)*). Several gold based financial products have been made available to retail consumers in the Indian market from time to time with a view to bring the gold holdings to the core financial market.

Lending against gold has been one of the most popular instruments based on gold, and it works well with the Indian rural population, which typically views gold as an important savings instrument that is liquid and can be into converted into cash instantly to meet their urgent cash requirements. Moreover, traditionally gold owners in southern India are more open than elsewhere in the country to accept and exercise the option of pledging gold to borrow money (*Source: IMAcS Industry Report 2009*).

The following chart illustrates gold demand trends in India

Source: IMaCS Industry Report (2010 Update)

Indian consumers have an affinity for gold that emanates from various social and cultural factors. Furthermore, the low level of financial inclusion and poor access to financial products and services make gold a safe and attractive investment proposition. In an effort to tap the market for gold related investment and services, companies in the financial sector have launched several products such as gold coins and bars, exchange traded gold funds and lending against gold. Gold Loans in India, have largely been concentrated in southern India, which holds the largest proportion of India's gold portfolio, and is typically more open to borrowing against gold as compared to consumers in the northern and western regions of India (*Source: IMaCS Industry Report 2009*).

Gold Loans have emerged as key gold based financial products, and in the year ended March 31, 2010, the organized Gold Loans market in India was estimated at between ` 350 billion and ` 400 billion with a CAGR of approximately 40% during fiscal 2002 to fiscal 2010. Notwithstanding the above, the organized Gold Loans portfolio accounted for merely 1.2% of the value of total gold stock in India. The Gold Loans market is significantly under-penetrated and is expected to continue growing at the rate of 35-40% in the future. (*Source: IMaCS Industry Report (2010 Update)*).

Gold Demand in India

- **Demand is relatively price in-elastic:** Demand for gold has not been adversely impacted by rising prices. Despite increases in gold prices from ` 15,026 to ` 51,150 per ounce during the period from 2002 to 2009, the demand for gold has risen from 580 tonnes in 2002 to 620 tonnes in 2009 (*Source: IMaCS Industry Report (2010 Update)*).
- **South India constitutes the largest market for gold:** Southern India has been the largest market accounting for approximately 40% of the gold demand, followed by the western region at approximately 25%, the northern region at 20-25%, and the eastern region at approximately 10-15% of India's annual gold demand. (*Source: IMaCS Industry Report 2009*).
- **Demand is further concentrated in rural pockets of India:** Rural India is estimated to hold around 65% of total gold stock as this section of the population views gold as a secure and easily accessible savings vehicle along with its consumption purpose (*Source: IMaCS Industry Report 2009*).

In addition to a growing organized Gold Loans market in India, there is a large long-operated, unorganised Gold Loans market which includes numerous pawnbrokers, money lenders and cooperative societies, operating primarily in rural areas of India, and providing loans against jewellery to families at interest rates in excess of 30%. These operators have a strong understanding of the local customer base and offer an advantage of immediate liquidity to customers in need, without requiring elaborate formalities and documentation.

Trend of market size of Gold Loans demand and gold stock value

Source: IMaCS Industry Report (2010 Update)

The southern region of India accounts for 85-90% of the Gold Loans market in India. Recently, large specialized NBFCs such as Muthoot Finance and Manappuram Finance have started expanding their businesses in northern and western India, and it is expected that there will be a gradual increase in the acceptability of Gold Loans product in these regions due to the concentrated marketing efforts of large NBFCs (Source: IMaCS Industry Report 2009).

Drivers of Growth in Gold Loans Market in India

- i. **Regulatory incentives to lenders:** The prescribed risk weight on Gold Loans has been approximately 50% for commercial banks, further reducing the associated capital costs (Source: IMaCS Industry Report 2009).
- ii. **Policy focus:** The Government of India views Gold Loans as an effective means to meet the potential micro-finance demand in India. In fiscal 2007, the Government of the state of Tamil Nadu set a jewellery loans target of ₹ 60 billion (75% of the total loan disbursement target) for co-operatives in Tamil Nadu (Source: IMaCS Industry Report 2009).
- iii. **Increasing interest of the lenders in the segment:** Considering the recent rise in default rates (expected to vary from 8-10% in fiscal 2009) in personal loans, banks have started focusing on the Gold Loans segment because it offers attractive returns (although lower than personal loans) with very low levels of defaults. Several private sector banks have started participating in the segment by getting into bilateral sale agreements with NBFCs that specialize in Gold Loan. A few private sector banks have also initiated efforts to tap into such segments (Source: IMaCS Industry Report 2009).
- iv. **High levels of indebtedness:** The National Sample Survey Organisation (NSSO) 2003 survey on situational assessment of farmers' indebtedness in the country has estimated that 60.4% of rural households in India were farmer households, out of which 48.6% were indebted. The incidence of indebtedness was highest in the state of Andhra Pradesh (82%) followed by Tamil Nadu (74.5%), Punjab (65.4%), Kerala (64.4%), Karnataka (61.6%) and Maharashtra (54.8 %) (Source: IMaCS Industry Report 2009).
- v. **Changing customer attitudes and preferences:** Indian customers have demonstrated a change in their traditionally debt-averse psychology, promoting the creation of assets through growth in financial liabilities which has been reflected in an annual growth of more than 30-35% in retail credit between fiscal 2002 and fiscal 2009. (Source: IMaCS Industry Report 2009).

Economics of the gold finance industry in India

NBFCs and banks operate with different underlying objectives in the Gold Loans segment which has been reflected in the margins and profitability for different category of lenders. NBFCs view Gold Loans as their primary business and have invested significantly in building their service offerings and typically command premium yields and attractive profitability. Historically banks viewed Gold Loans for agriculture as a safer means to meet their priority lending targets which typically offer low returns with high defaults. However, recent changes in regulatory norms have precluded gold loans from being classified under the agriculture sector, thereby making such loans ineligible to meet banks' priority lending targets. Despite this banks usually are unable to offer the level of flexibility and rapid disbursements as compared to the specialised NBFCs.

Competition

The Gold Loans market has been dominated by SCBs focused on southern India, and NBFCs with market shares of approximately 58% and 32%, respectively in fiscal 2010, while the remaining market share has been held by small co-operative banks. In addition, there has been a rapid expansion in the market Gold Loans between fiscal 2002 and fiscal 2010 (Source: IMaCS Industry Report (2010 Update)).

NBFCs offer flexibility, quick disbursement and an informal environment to their customers in return for a premium on the rates of interest offered. The loan-to-value ratio for 22 carat jewellery piece typically varies from 55-65% by banks while it varies from 70-80% by NBFCs, which may be further adjusted subject to the purity of gold. Further, the interest rates charged by the banks vary from 8-10% in case of loans for agricultural purposes and approximately 12-13% on loans for non-agricultural purposes while NBFCs charge interest rates between 22% and 26% (Source: IMaCS Industry Report 2009). However, recent changes in regulatory norms have precluded gold loans from being classified under the agriculture sector, thereby increasing the cost of funds of gold loan companies, including our Company.

Role of NBFC's in the competitive landscape of the gold finance industry in India

A typical Gold Loan customer expects high loan-to-value ratios, easy access, low levels of documentation and formalities, quick approval and disbursement of loans, lockers to ensure safety of their pledged gold and a team of expert valuers. Specialized NBFCs have created a niche in the Gold Loans capabilities by meeting these requirements of the typical Gold Loan customers, who require Gold Loans primarily to meet their urgent cash requirements (Source: IMAcS Industry Report 2009).

NBFCs specializing in Gold Loans continue to perform strongly in the Gold Loans market and the overall statistics demonstrate that the relative share of traditional gold finance NBFCs in the market has not changed significantly over the last three years. In fiscal 2010, the Gold Loans market was largely concentrated between two categories of lenders: south India based SCBs and NBFCs specializing in Gold Loans which held approximately 58% and 32%, respectively, of the total market. The rest of the Gold Loans portfolio was held by several small co-operative banks. (Source: IMAcS Industry Report 2009).

Outlook of the Gold Loans Market in India

Based on the assessment of the emerging dynamics and competitive landscape, the Gold Loans market is expected to grow at between 35% and 40% over the next three years. Moreover, as the market is currently under-penetrated, it is expected that the Gold Loans market will offer enough opportunities for portfolio expansion and retain attractive margins for all existing specialised NBFCs, banks and new entrants (*Source: IMaCS Industry Report 2009*).

The branch expansion and marketing initiatives of various specialized NBFCs are anticipated to give a strong boost to the acceptability of Gold Loans and lead to further growth in the Gold Loans market.

Expected Threats to Specialised NBFCs

Key areas of strength of Specialised NBFCs

Source: IMaCS Industry Report 2009

In addition, it is anticipated that the large public sector banks in southern India will continue to be amongst the leading lenders, but considering the various regulatory and operational processes, it would be challenging for the banks to match the flexible service regime of the specialised NBFCs (*Source: IMaCS Industry Report 2009*).

New NBFC entrants in the market are currently in a cautious preparatory mode to enter the Gold Loans market but it will take some time for these NBFCs to emerge as formidable competitors to specialized existing NBFCs. This is because it will take time for these new NBFCs to build the requisite focus, infrastructure (valuers, lockers, etc.) and branch network (*Source: IMaCS Industry Report 2009*).

Specialized NBFCs are expected to continue to hold their share of the Gold Loans market with their ability to provide superior and niche servicing capabilities to their exiting and future customers. The following factors will be crucial in contributing to the continued growth of specialized NBFCs:

- ability to maintain their strong hold in the southern India markets in terms of reach and customer services;
- strengthening brand image in the target customer segments with a special emphasis on markets beyond the southern region in India;
- developing related products such as education loans and offering fee based services such as money transfers or financial products distribution; and
- capturing a strong market position in other regions of India, including in the northern and western regions (*Source: IMaCS Industry Report 2009*).

OUR BUSINESS

Overview

We are the largest gold financing company in India in terms of loan portfolio, according to IMaCS Industry Report (2010 Update). We provide personal and business loans secured by gold jewellery, or Gold Loans, primarily to individuals who possess gold jewellery but could not access formal credit within a reasonable time, or to whom credit may not be available at all, to meet unanticipated or other short-term liquidity requirements. According to the IMaCS Industry Report (2010 Update), as of March 31, 2010 our branch network was the largest among gold loan NBFCs in India. Our Gold Loan portfolio as of November 30, 2010 comprised approximately 4.1 million loan accounts in India that we serviced through 2,263 branches across 20 states, the national capital territory of Delhi and four union territories in India. We have since increased our branch network to 2,611 branches as of February 28, 2011, and used our branch network to serve an average of 67,953 customers per day in the month of February 2011. As of February 28, 2011, we employed 15,664 persons in our operations.

We are a “Systemically Important Non-deposit taking NBFC” headquartered in the southern Indian state of Kerala. Our operating history has evolved over a period of 70 years since M George Muthoot (the father of our Promoters) founded a gold loan business in 1939 under the heritage of a trading business established by his father, Ninan Mathai Muthoot, in 1887. Since our formation, we have broadened the scale and geographic scope of our retail lending operations so that, as of March 31, 2010, we were India’s largest provider of Gold Loans. In the years ended March 31, 2008, 2009 and 2010, and in the eight months ended November 30, 2010, revenues from our Gold Loan business constituted 95.97%, 96.71% , 98.08% and 98.50%, respectively, of our total income. In addition to our Gold Loans business, we provide money transfer services through our branches as sub-agents of various registered money transfer agencies, and recently have commenced providing collection agency services. We also operate three windmills in the state of Tamil Nadu.

We issue secured non-convertible debentures called “Muthoot Gold Bonds” on a private placement basis. Proceeds from our issuance of Muthoot Gold Bonds form a significant source of funds for our Gold Loan business. We also rely on bank loans and subordinated debt instruments as our sources of funds. As per our restated audited financial statements, as of November 30, 2010, we had ` 33,644.5 million in outstanding Muthoot Gold Bonds and ` 57,184.7 million in other borrowings. We also raise capital by selling a portion of our loan receivables under bilateral assignment agreements with various banks .

Our customers are typically small businessmen, vendors, traders, farmers and salaried individuals, who for reasons of convenience, accessibility or necessity, avail of our credit facilities by pledging their gold jewellery with us rather than by taking loans from banks and other financial institutions. We provide retail loan products, primarily comprising Gold Loans. We also disburse other loans, including those secured by Muthoot Gold Bonds. Our Gold Loans have a maximum 12 month term. As per our restated audited financial statements, our average disbursed Gold Loan amount outstanding was ` 31,553 per loan account as of November 30, 2010. In the year ended March 31, 2010, our retail loan portfolio earned, on average, 1.67% per month, or 19.94% per annum, and in the eight months ended November 30, 2010 our retail loan portfolio earned, on average, 1.57% per month, or 18.92% per annum.

Gross non-performing assets ("NPAs") were at 0.42%, 0.48% and 0.46%, and 0.35% of our gross retail loan portfolio under management as of March 31, 2008, 2009, 2010, and November 30, 2010, respectively.

As per our restated audited financial statements, in the years ended March 31, 2008, 2009 and 2010, our total income was ` 3,686.4 million, ` 6,204.0 million and ` 10,893.8 million, respectively, demonstrating an annual growth rate of 57.56%, 68.29% and 75.59%, respectively. As per our restated audited financial statements, in the eight months ended November 30, 2010, our total income was ` 13,016.6 million. As per our restated audited financial statements, our profit after tax in the years ended March 31, 2008, 2009 and 2010 was ` 630.6 million, ` 978.7 million and ` 2,285.2 million, respectively, demonstrating an annual growth rate of 43.8%, 55.2% and 133.5%, respectively. networth as of March 31, 2008, 2009, 2010, and as of November 30, 2010 was ` 2,131.1 million, ` 3,614.5 million, ` 5,841.9 million and ` 11,314.5 million, respectively.

Competitive Strengths

We believe that the following competitive strengths position us well for continued growth:

Market leading position in the Gold Loan business with a strong presence in under-served rural and semi-urban markets

Gold loans are the core products in our asset portfolio. We believe that our experience, through our Promoters, has enabled us to have a leading position in the Gold Loan business in India. Highlights of our market leading position include the following:

- We are the largest gold financing company in India in terms of loan portfolio, according to IMaCS Industry Report (2010 Update). As per our restated audited financial statements, our loan portfolio as of March 31, 2010 and November 30, 2010 comprised approximately 2.8 million loan accounts and approximately 4.1 million loan accounts, respectively, in India with Gold Loans outstanding of ` 73,417.3 million and ` 128,977.7 million, respectively .
- We have the largest branch network among gold loan NBFCs, according to the IMaCS Industry Report (2010 Update). As of March 31, 2010, we operated 1,605 branches across 19 states, the national capital territory of Delhi and two union territories in India, and in the month of February 2011. Our branch network has expanded significantly in recent years from 373 branches as of March 31, 2005 to 2,611 branches as of February 28, 2011, comprising 465 branches in northern India, 1,753 branches in southern India, 297 branches in western India and 96 branches in eastern India covering 20 states , the national capital territory of Delhi and four union territories in India. In the month of February 2011 , we served an average of 67,953 customers daily.
- We believe that due to our early entry we have built a recognizable brand in the rural and semi-urban markets of India, particularly in the southern Indian states of Tamil Nadu, Kerala, Andhra Pradesh and Karnataka. As of March 31, 2010 and November 30, 2010, the southern Indian states of Tamil Nadu, Kerala, Andhra Pradesh, Karnataka and the Union Territory of Pondicherry constituted 75.38% and 75.28%, respectively of our total Gold Loan portfolio.
- We have a strong presence in under-served rural and semi-urban markets. A large portion of the rural population has limited access to credit either because of their inability to meet the eligibility requirements of banks and financial institutions because credit is not available in a timely manner, or at all. We have positioned ourselves to provide loans targeted at this market.
- We offer products with varying loan amounts, advance rates (per gram of gold) and interest rates. The principal loan amounts we disburse usually range from ` 2,000.0 to ` 100,000.0 while interest rates on our Gold Loans range between 12.00% to 30.00% per annum.

Strong brand name, track record, management expertise and Promoter support

Our operating history has evolved over a period of 70 years since M George Muthoot (the father of our Promoters) founded a gold loan business in 1939. We believe that the experience, skills and goodwill acquired by our Promoters over these years cannot be easily replicated by competitors. We have a highly experienced and motivated management team that capitalizes on this heritage at both the corporate and operational levels. Our senior management team has extensive experience in the Gold Loan industry and has demonstrated the ability to grow our business through their operational leadership, strategic vision and ability to raise capital. Under the current management team, as per our restated audited financial statements, our retail loan portfolio has grown from ` 22,263.8 million as of March 31, 2008 to ` 74,381.5 million as of March 31, 2010 and ` 130,036.8 million as of November 30, 2010 . Our business is also well supported by our high net-worth Promoters, who are members of the Muthoot family. We believe that our track record, management expertise and Promoter support have established a strong brand name for us in the markets we serve. A strong brand name has contributed to our ability to earn the trust of individuals who entrust us with their gold jewellery, and will be a key in allowing us to expand our growth and consolidate this fragmented industry across India.

High-quality customer service and short response time

We adhere to a strict set of market survey and location guidelines when selecting branch sites to ensure that our branches are set up close to our customers. We believe that our customers appreciate this convenience, as well as extended operating hours that we typically offer, which are often more compatible with our customers' work schedules. We provide our customers a clean, attractive and secure environment to transact their business with us. In addition to the physical environment, it is equally important to have professional and attentive staff at both the branch level and at our centralized customer support centers. Each of our branches across India is staffed with persons who possess local knowledge and understanding of customers' needs and who are adequately trained to appraise collateral and disburse loans within a few minutes. Although disbursement time may vary depending on the loan ticket size and the number of items pledged, we can generally disburse an average loan ticket size of ₹ 20,000.0 within five minutes from the time the gold is tendered to the appraiser. Furthermore, since our loans are all over-collateralized by gold jewellery, there are minimal documentary and credit assessment requirements, thereby shortening our turnaround time. We believe our high quality customer service and short response time are significant competitive strengths that differentiate our services and products from those provided by commercial banks.

Strong capital raising ability

We have a track record of successfully raising capital from various sources. We regularly issue secured redeemable non-convertible debentures to retail investors on a private placement basis as a means to access capital for our Gold Loan business. We have also issued equity shares in three tranches to institutional investors. For further information, please refer to the sections titled "History and Certain Corporate Matters" and "Capital Structure" on pages 127 and 63, respectively. As per our restated audited financial statements, as of March 31, 2008, 2009 and 2010, and as of November 30, 2010, our outstanding gross Muthoot Gold Bonds portfolio was ₹ 12,403.3 million, ₹ 19,019.8 million, ₹ 27,192.5 million, and ₹ 33,644.5 million, respectively. We have diversified our resource pool by supplementing our proceeds from the issuance of Muthoot Gold Bonds with borrowings from banks and other financial institutions. As per our restated audited financial statements, as of March 31, 2008, 2009, 2010 and November 30, 2010, our outstanding borrowings from banks were ₹ 5,884.9 million, ₹ 11,067.6 million, ₹ 21,278.7 million and ₹ 47,085.44 million, respectively. We also raise capital by selling our receivables under bilateral assignments to banks. As per our restated audited financial statements, our outstanding amount of sold portfolio under bilateral assignments were ₹ 4,341.0 million, ₹ 8,130.2 million, ₹ 20,083.2 million and ₹ 32,464.8 million as of March 31, 2008, 2009, 2010 and November 30, 2010, respectively. We have been assigned an "A1+" rating by ICRA for commercial paper and for short-term non-convertible debentures of ₹ 2,000.0 million, and a "P1+" rating by CRISIL for short term debt instruments of ₹ 20,000.0 million. We have been assigned an "AA-/Stable" rating by CRISIL for our ₹ 4,000.0 million non-convertible debentures and our ₹ 1,000.0 million subordinated debt. We have been assigned a long-term rating of "LAA-/Stable" and a short-term rating of "A1+" by ICRA for our ₹ 20,000 million line of credit.

In-house training capabilities to meet our branch expansion requirements

Our ability to timely appraise the quality of the gold jewellery collateral is critical to the business. We do not engage third parties to assess the collateral for our Gold Loans, but instead employ in-house staff for this purpose. Assessing gold jewellery quickly is a specialized skill that requires assessing jewellery for gold content and quality manually without damaging the jewellery. We have two staff training colleges, one each in Cochin and in New Delhi, and three regional training centers located in Chennai, Hyderabad and Bangalore. We use our staff training colleges and regional training centers to train new employees in appraisal skills, customer relations and communication skills. We believe that our in-house training has built up a talent pool that enables us to staff new branches with qualified and skilled personnel as we seek to grow our branch network. Our in-house training capabilities also enable us to improve the skill sets of our existing personnel.

Our Strategy

Our business strategy is designed to capitalize on our competitive strengths and enhance our leading market position. Key elements of our strategy include:

Expand branch network and visibility to maintain our market leadership position

We intend to continue to grow our loan portfolio by expanding our network through the addition of new branches. In order to optimize our expansion, we carefully assess potential markets by analyzing demographic, competitive and regulatory factors, site selection and availability, and growth potential. We have a long-standing presence in southern India, and are among the first organized Gold Loan providers in northern and western India. Our strategy for branch expansion includes further strengthening our market leading position in southern Indian states by providing higher accessibility to customers as well as leveraging our expertise and presence in southern India to enhance our presence in other regions of India, particularly in northern India, where we intend to open branches in most states. We have added 620 branches in the last fiscal year and 1,006 branches between April 1, 2010 and February 28, 2011, and expect this growth trend to continue in the future. At the core of our branch expansion strategy, we expect to penetrate new markets and expand our customer base to include customers who otherwise would rely on the unorganized sector. Moreover, our ethics, values and goodwill, which have established our strong brand, will continue to be important factors in our expansion. In addition to increasing the visibility of our brand by sponsoring events and publicity, we will continue to build trust among our customers and enhance our brand with quality services and safety and security of our customers' collateral.

Target new customer segments

The market for our loan products was traditionally confined to lower and middle income groups, who viewed Gold Loans as an option of the last resort in case of emergency. We intend to undertake sustained marketing efforts to diminish the stigma attached to pledging gold jewellery in India. We plan to work to position Gold Loans as a "lifestyle product" and expand our customer base to include upper-middle income and upper income groups. We intend to emphasize our Gold Loan products' key advantages of expediency and minimal documentation, and alter the image of Gold Loans from an option of the last resort to an option of convenience.

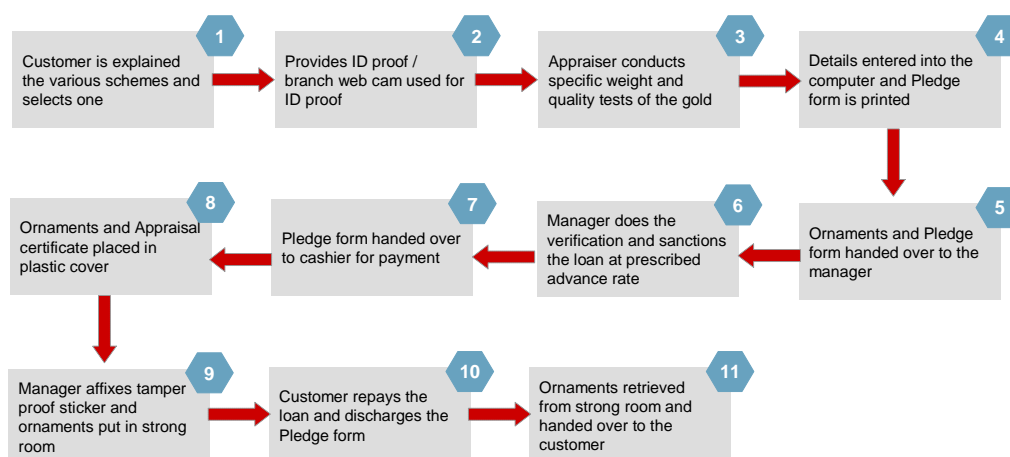

Access low-cost and diversified sources of funds

We source our funds for our Gold Loan business primarily from the proceeds of private placements of debentures in India and from secured and unsecured credit facilities from banks and other financial institutions. We have been assigned a long-term rating of "LAA-/Stable" and a short-term rating of "A1+" by ICRA for our ` 20,000 million line of credit. We intend to increase our efforts to access low-cost funds through rated debt instruments. In this regard, we have been assigned an "A1+" rating by ICRA for commercial paper and for short-term non-convertible debentures of ` 2,000.0 million, and a "P1+" rating by CRISIL for short term debt instruments of ` 20,000 million. We also intend to raise long-term institutional funding through long-term debt instruments. We have been assigned an "AA-/Stable" rating by CRISIL for our ` 4,000.0 million non-convertible debentures and our ` 1,000.0 million subordinated debt. In addition, we intend to expand our program of selling a portion of our receivables under various bilateral assignment agreements with financial institutions. We may also consider the possibility of concluding rated securitization transactions in the future. We intend to increase the levels of our capital adequacy ratios in excess of regulatory requirements and strengthen our balance sheet with a view to have access to other sources of low-cost funds. Furthermore, we also intend to seek strong investments in our Company as another source of funding to expand our business.

Strengthen our operating processes and risk management systems

Risk management forms an integral part of our business as we are exposed to various risks relating to the Gold Loan business. The objective of our risk management systems is to measure and monitor the various risks we are subject to and to implement policies and procedures to address such risks. We intend to continue to improve our operating processes and risk management systems that will further enhance our ability to manage the risks inherent to our business. For example, we have commenced installing offsite surveillance cameras in our branches, and intend to implement this across our branch network. As of February 28, 2011, we had installed surveillance cameras in 800 branches across India.

Gold Loan Business

Our core business is disbursement of Gold Loans, which are typically small ticket loans collateralized by gold jewellery. As per our restated audited financial statements, as of March 31, 2010 and November 30, 2010, we had approximately 2.8 million and approximately 4.1 million loan accounts, respectively, representing an aggregate principal balance of ` 73,417.3 million and ` 128,977.7 million, respectively. In the year ended March 31, 2010, our retail loan portfolio earned, on average, 1.67% per month, or 19.94% per annum, and in the eight months ended November 30, 2010 our retail loan portfolio earned, on average, 1.57% per month, or 18.92% per annum. In the years ended March 31, 2008, 2009 and 2010, and in the eight months ended November 30, 2010, income from interest earned on our Gold Loans constituted 95.97%, 96.71% and 98.08%, and 98.50%, respectively, of our total income.

Loan disbursement process

The principal form of collateral accepted by us is gold jewellery. The amount that we finance against the security of gold jewellery is typically based on a fixed rate per gram of gold content in the jewellery. We value the gold jewellery brought by our Gold Loan customers based on our centralized policies and guidelines. We generally lend between 60.0% and 90% of the price fixed internally for per gram of gold, which is generally lower than the market price of gold at that time. Within this range, the actual loan amount varies according to the type of jewellery pledged. While jewellery can be appraised based on a variety of factors, such as total weight, weight of gold content, production cost, style, brand and value of any gemstones, we appraise the jewellery collateral solely based on the weight of its gold content. Our Gold Loans are therefore well collateralized because the actual value of the collateral in all cases will be higher than our appraised value.

The amount we lend against an item and the total value of the collaterals we hold fluctuates according to the gold prices. However, an increase in gold price will not result automatically in an increase in our Gold Loan portfolio unless the per gram rate are revised by our corporate office. Similarly, since adequate margins are kept at the time of disbursement of loan, a decrease in the price of gold has little impact on our interest income. However, a sustained decrease in the market price of gold can cause a decrease in the size of our loan portfolio and our interest income.

We rely on the disposition of collateral to recover the principal amount of an overdue Gold Loan and the interest due thereon. We also have recourse against the customer for the loan. Since the disbursement of loans is primarily based on the value of collateral, the customer's creditworthiness is not a factor in the loan decision. However, we comply with 'know your customer' norms adopted by the Board and require proof of identification. We also photograph customers with web-cameras installed in our branches.

All our Gold Loans have terms of 12 months. However, customers may redeem the loan at any time, and our Gold Loans are generally redeemed between 90 and 180 days. Interest is paid only when the principal is repaid. In the event that a loan is not repaid on time and after providing due notice to the customer, the unredeemed collateral is disposed of on behalf of the customer in satisfaction of the principal and all interest charges. In general, a collateral is disposed of only when the recoverable amount is equal to or more than the realizable value of the collateral.

Loan appraisal process

Our Gold Loan approval process is generally linked with the appraisal of gold jewellery that serves as collateral, which takes only a few minutes. Each of our branches is staffed with persons who have been trained and have experience in appraising the gold content of jewellery. The appraisal process begins with weighing the jewellery using calibrated weighing machines. Jewellery is then subject to prescribed primary tests for the quality of gold, including stone tests and acid tests, followed by additional tests, if required, such as salt tests, sound tests, weight tests, pointed scratching tests, flexibility tests, color tests, smell tests, usability tests, magnifying glass tests and finishing tests. Once the jewellery passes these tests, loans are disbursed based on the rates per gram of gold approved by the corporate office, with small levels of discretion given to the branch manager. Although disbursement time may vary depending on the loan ticket size and the number of items pledged, we can generally disburse an average loan ticket size of ₹ 20,000.0 in five minutes from the time the gold is tendered to the appraiser. While our customers are provided the option to accept loan disbursements in cash or by cheque, almost all of our customers prefer disbursements in cash.

At the time of disbursement, an undertaking is signed by the customer. It states the name and address of the Company's relevant branch office and the customer, a detailed description of the gold jewellery provided as collateral, the amount of the loan, the interest rate, the date of the loan, and other terms and conditions.

Where the responsibility for compliance with applicable law relating to loan appraisal and disbursement lies with the Company, the Company is in compliance with the Income Tax Act and other related provisions.

Post-disbursement process

Custody of gold collateral

The pledged gold jewellery are separately packed by staff of the branch, and then placed in a polythene pouch with the relevant documents on the loan and the customer and stored in the safe or strong room of the branch.

The safes and strong rooms in which the gold jewellery is kept are built per industry standards and practices. The strong rooms are vaults with reinforced concrete cement structures. Currently, almost all of our branches are using strong rooms.

Inventory control

The pledged gold jewellery packed in pouches is identified by loan details marked on the cover. Tamper proof stickers are affixed on the jewellery packets to ensure inventory control. Additional stickers are used to seal packets by persons examining packages subsequently, including our internal auditors

Branch security and safety measures

Ensuring the safety and security of the branch premises is vital to our business since our cash reserves and gold inventory are stored in each branch. Our branch security measures mainly comprise the following:

Burglar alarms: Burglar alarms are installed in all branches .

Security guards: Security guards are deployed in branches where management perceived there to be heightened security risks.

Release of the pledge

We monitor our loan accounts and recovery of dues on an ongoing basis. Once a loan is fully repaid, the pledged gold jewellery is returned to the customer. When a customer does not repay a loan on or before its maturity, we initiate the recovery process and dispose of the collateral to satisfy the amount owed to us, including both the principal and the accrued interests. Before starting the recovery process, we inform the customer through registered letters or legal notices.

When a loan is repaid, we give the customer an option to pledge the security again and obtain another loan. The procedure of re-pledging entails the same procedure as that of a pledge and is accompanied by the same mode of

documentation that a pledge entails. If the loan is not repaid when the loan falls due, we are able to sell the gold collateral in satisfaction of the amount due to us.

We also reserve the right to sell the collateral even before a loan becomes past due in the event the market value of the underlying collateral is less than amounts outstanding on the loan.

Other Business Initiatives

Money transfer services

We provide fee based services including money transfer and foreign exchange services. As per our restated audited financial statements, in the years ended March 31, 2008, 2009, 2010 and in the eight months ended November 30, 2010, our money transfer services business generated ` 51.1 million, ` 62.9 million, ` 64.1 million, and ` 39.9 million, respectively, or 1.39%, 1.01% and 0.59%, and 0.31% respectively, of our total income. We act as sub-agents to Indian representatives and enter into representation agreements for inward money transfer remittance. Under these agreements, we are entitled to receive a commission for the services provided depending on the number of transactions or the amount of money transferred and the location from which the money is transferred to us. In terms of applicable law governing the provision of money transfer services in India, as a sub-agent, the Company is not required to obtain any regulatory approvals for engaging in such business.

Collection services

We recently commenced providing collection agency services to clients. We act as collection agents by receiving money for and on behalf of our clients who issue invoices to their customers for goods sold or service rendered. We receive commissions for each invoice for which remittance by a customer is made and money is collected by us. We commenced our collection services business in the current fiscal, and accordingly have not generated any revenues in prior financial years. As per our restated audited financial statements, in the eight months ended November 30, 2010, we generated ` 1.1 million from our collection services business.

Wind mills business

We operate three windmills of 1.25 MW each in the southern Indian state of Tamil Nadu. As per our restated audited financial statements, in the years ended March 31, 2008, 2009, 2010 and for the eight months ended November 30, 2010, income from our wind mills was ` 17.4 million, ` 22.1 million, ` 25.1 million and ` 21.4 million, respectively, or 0.47%, 0.36%, 0.23% and 0.16% , respectively, of total income.

Branch Network and Customer Service

As of February 28, 2011, we had 2,611 branches located in 20 states, the national capital territory of Delhi and four union territories in India. The distribution of branches across India by region as of March 31, 2008, 2009 and 2010 and as of February 28, 2011 is as set out in the following table:

	As of March 31,			As of February 28,,	
	2008	2009	2010	2011	
Northern India	56	100	266	465	
Southern India	602	796	1,119	1,753	
Western India	41	71	166	297	
Eastern India	8	18	54	96	
Total Branches	707	985	1,605	2,611	

A diagrammatic representation of the branch network across India, as of February 28 , 2011 is as set out below:

In addition to our branches, we have more than 900 customer relation executives in charge of carrying out customer loyalty programs and a Customer Relations Department which provides support over the phone servicing the needs of our customers.

Marketing, Sales and Customer Care

Our marketing and sales efforts centers around promoting our brand and positioning Gold Loans as a “lifestyle product.” In promoting our brand, our campaigns focus on the concept of “gold power” to differentiate our products from other financial institutions and stress the convenience, accessibility and expediency of Gold Loans. We also work to position Gold Loans as a “lifestyle product” because the market for Gold Loans was traditionally confined to lower and middle income groups, who viewed such loans as an option of the last resort in case of emergency. We have implemented aggressive marketing strategies to diminish the stigma attached to pledging gold jewellery. Furthermore, we target our efforts at small businessmen, vendors, traders and farmers, who may require credit on a regular basis.

Our sales and marketing efforts are led by a team of 30 managers who guide the marketing and sales efforts of their respective regions and who are supported by more than 249 marketing executives and more than 900 customer relation executives. Marketing executives make personal visits and direct their sales efforts at high net-worth clients. Customer relation executives are responsible for product promotion and telemarketing. In addition, we carry out advertising campaigns with TV ads, print ads and road roadshows to increase the visibility of our brand and our Gold Loans products.

Future Expansion

We have expanded by establishing new locations, and our business strategy is to continue expanding our lending business within our existing geographic markets and into other markets that meet our risk/reward considerations. We have added 620 branches in the last fiscal year and 1,006 branches between April 1, 2010 and February 28, 2011. Our Board believes that such expansion will continue to provide economies of scale in supervision, administration and marketing by decreasing the overall average cost of such functions per branch. By concentrating on multiple lending units in regional and local markets, we seek to expand market penetration, enhance brand recognition and reinforce marketing programs.

A new branch can be ready for business within four to six weeks. The construction of a new location involves construction of secured counters and installation of strong rooms or safe and security systems. Our branches are generally established on leased premises, thus requiring a lower set-up cost. The set-up cost required for furnishing the premises and purchasing equipment generally ranges between ` 0.5 million to ` 1.0 million. As per our restated audited financial statements, the average set-up cost per location was ` 0.65 million for the eight months ended November 30, 2010.

Non-performing Assets (NPAs)

Based on the existing RBI guidelines for asset classification, details of the classification of our gross NPAs as of March 31, 2008, 2009, 2010 and as of November 30, 2010 are set forth below:

(` in million ; as per our restated audited financial statements)

Asset Type	As of March 31,			As of November 30
	2008	2009	2010	2010
Sub-standard ¹	92.6	161.01	324.6	437.3
Doubtful ²	-	-	18.9	23.8
Loss ³	-	-	-	-
Gross NPA	92.6	161.1	343.6	461.0

1. Sub-standard assets are assets which have been classified as an NPA for a period of 18 months or less, or where the terms of the agreement regarding interest and/or principal have been renegotiated or rescheduled or restructured after commencement of operations until the expiry of one year of satisfactory performance under the renegotiated or rescheduled or restructured terms.

2. Doubtful assets are assets which have been classified as an NPA for a period exceeding 18 months.

3. Loss assets mean (a) assets which have been identified as a loss asset by us or our internal or external auditor or by the RBI to the extent that they are not written-off by us; and (b) assets which are adversely affected by a potential threat of non-recoverability due to either erosion in the value of security or non-availability of security, or due to any fraudulent act or omission on the part of the customer.

Provisioning policy

Our provisioning in respect of our NPA accounts is in accordance with the norms prescribed by the RBI, with emphasis on the realizable value of the security and the period of overdue payments.

Statutory provisions are required to be made in respect of sub-standard, doubtful and loss assets as per RBI directives. Set out below is a brief description of applicable RBI guidelines on provisioning and write-offs for loans, advances and other credit facilities including bills purchased and discounted:

Sub-standard assets: A general provision of 10.0% of the total outstanding assets is required to be made.

Doubtful assets: 100.0% provision to the extent to which the advance is not covered by the realizable value of the security to which the NBFC has a valid recourse is required to be made. The realizable value is to be estimated on a realistic basis. In addition to the foregoing, depending upon the period for which the asset has remained doubtful, provision is required to be made as follows:

- if the asset has been considered doubtful for up to one year, provision to the extent of 20.0% of the secured portion is required to be made;
- if the asset has been considered doubtful for one to three years, provision to the extent of 30.0% of the secured portion is required to be made; and
- if the asset has been considered doubtful for more than three years, provision to the extent of 50.0% of the secured portion is required to be made.

Loss assets: The entire asset is required to be written off. If the assets are permitted to remain in the books for any reason, 100.0% of the outstanding assets should be provided for.

In a notification on January 17, 2011, the RBI introduced a general provision of 0.25% on outstanding standard assets.

For further information on RBI guidelines on provisioning and write-offs, please refer the section titled “Regulations and Policies” on page 117.

No specific provisions in respect of our NPAs were made as at March 31, 2010 and at November 30, 2010. However, as per our restated audited financial statements, we have written-off ` 6.2 million and ` 2.9 million as of March 31, 2010 and November 30, 2010, respectively. As per the provisioning norms prescribed by RBI, as per our restated audited financial statements, as of March 31, 2010 and November 30, 2010, we have made a total provision of ` 37.1 million and ` 50.1 million, which constituted 10.8% and 10.9% of our NPAs. Capital Adequacy Ratio

We are subject to the capital adequacy requirements of the RBI. With effect from April 1, 2010, RBI has increased the minimum capital adequacy ratio to 12.0% and to 15.0% from March 31, 2011. We maintain a capital adequacy ratio above the minimum levels prescribed by the RBI and had a capital adequacy ratio of 12.56%, 16.30% and 14.79%, and 15.06% as of March 31, 2008, 2009, 2010, and November 30, 2010, respectively.

Treasury Operations

Our treasury department undertakes liquidity management by seeking to maintain an optimum level of liquidity and monitors cash and bank balances. The objective is to ensure the sufficient cash reserves at all our branches while at the same time avoid holding cash in excess of what may be required in the ordinary course. Since almost all disbursements are made in cash, we maintain an average of ` 0.5 million in cash across our branches. Each regional office has the primary responsibility for directing branches within the region to move surplus funds to deficit branches. If there is a surplus of funds in the region as a whole, such surpluses are deposited in cash credit/overdraft accounts at the corporate level. Deficits at a region level are managed by cash transfers from our treasury department. We monitor cash and balances on daily basis using our management information systems, and have arrangements with various banks for the transfer of bank balances between locations. Cost of movement of cash also is taken into consideration while deciding optimum cash levels in each location. We use a real time gross settlement ("RTGS") facility if the remitting and receiving banks are different, or through internal transfer if both the branches belong to the same bank.

Risk Management

Risk management forms an integral element of our business strategy. As a lending institution, we are exposed to various risks that are related to our gold lending business and operating environment. Our objective in our risk management processes is to appreciate, measure and monitor the various risks we are subject to and to follow the policies and procedures to address these risks. The major types of risk we face are credit risk, operational risk, liquidity risk and market risk (which includes interest rate risk).

Collateral risk

Collateral risk arises from the decline in the value of the gold collateral due to fluctuation in gold prices. This risk is in part mitigated by the 10% to 40% margin we build in to our rate per gram used to calculate the loan amount. Furthermore, we could further reduce this risk because the price of gold jewellery is higher given the production costs, design cost and the gemstones associated with making the item, but we appraise the collateral and fund loans solely based on the weight of its gold content. In addition, the sentimental value of the gold jewellery to the customers may induce repayment and redemption of the collateral even if the value of the collateral falls below the value of the repayment amount.

Credit risk

Credit risk is the possibility of loss due to the failure of any counterparty to abide by the terms and conditions of any financial contract with us. We aim to reduce credit risk through a rigorous loan approval and collateral appraisal process, as well as a strong NPA monitoring and collection strategy. This risk is diminished because the gold jewellery used as a collateral for our loans can be readily liquidated, and there is only a remote possibility of recovering less than the amounts due to us.

Operational risk

Operational risk is broadly defined as the risk of direct or indirect loss due to the failure of systems, people or processes, or due to external events.

We have instituted a series of checks and balances, including an operating manual, and both internal and external audit reviews. Although we disburse loans in very short periods of time, we have clearly defined appraisal methods as well as 'know your customer' compliance procedures in place to mitigate operational risks. Any loss on account of failure by employees to comply with defined appraisal mechanism is recovered out of their variable incentive. We also have detailed guidelines on movement of cash or gold. We have also introduced centralized software which automates inter-branch transactions, enabling branches to be monitored centrally and thus reducing the risk of un-reconciled entries. In addition, we are in the process of installing surveillance cameras across our various branches, and subscribe insurance covers employee theft or fraud and burglary. Our internal audit department and our centralized monitoring systems assist in the management of operational risk.

Market risk

Market risk refers to potential losses arising from the movement in market values of interest rates in our business. The objective of market risk management is to avoid excessive exposure of our earnings and equity to loss and to reduce our exposure to the volatility inherent in financial instruments. The majority of our borrowings, and all the loans and advances we make, are at fixed rates of interest. Our interest rate risk is therefore minimal at present.

Liquidity risk

Liquidity risk is the risk of being unable to raise necessary funds from the market to meet operational and debt servicing requirements. The purpose of liquidity management is to ensure sufficient cash flow to meet all financial commitments and to capitalize on opportunities for business expansion. An Asset and Liabilities Committee ("ALCO") meeting is held regularly to review the liquidity position based on historic data. In addition, we also track the potential impact of prepayment of loans at a realistic estimate of our near to medium-term liquidity position. We have developed and implemented comprehensive policies and procedures to identify, monitor and manage liquidity risks. The nature of our business is such that our source of funds (proceeds from the issue of debentures of term loans) has longer maturities than the loans and advances we make, resulting in low liquidity risk in our operations.

Business cycle risk

Business cycle risk is the risk associated with the seasonal or cyclical nature of a business. As our customers include both individuals and business and our loan products are used by customers in various industries, trade cycles have limited impact on our business. Furthermore, the geographic spread of our branches will allow us to mitigate the cyclical pressures in the economic development of different regions.

NPA Recovery

Our credit department assigns interest collection targets for each branch, reviews performance against targets, makes visits to the branches, and advises on timely corrective measures and repossession action. We also have procedures in place to penalize branches for loans overdue beyond three months. We maintain strict control over recovery procedures followed in our various branches by linking employee compensation to the performance of the branch (loans disbursed, NPA levels, etc.,) in which the employee is working. Once repossession is advised by our credit department, we conduct public auctions of the jewellery collateral after serving requisite legal notices.

The following table sets forth information relating to recovery from NPA accounts, written-off accounts and other overdue accounts for the last three years ended March 31, 2008, 2009, 2010 and for the eight months ended November 30, 2010:

(` in million ; as per our restated audited financial statements)

Recoveries From	Year ended March 31,			Eight months ended
	2008	2009	2010	November, 30
NPA, overdue and written off accounts	221.2	521.2	911.9	343.1

Funding Sources

We have depended on term loans from banks and issuance of redeemable non-convertible debentures as the primary sources of our funding. The following table sets forth the principal components of our secured loans as of the periods indicated:

(` in million ; as per our restated audited financial statements)

Secured loans	As of March 31			As of November 30, 2010
	2008	2009	2010	
Redeemable non-convertible debentures	12,403.3	19,019.8	27,192.5	33,644.5
Term loans from banks	385.0	468.0	451.0	442.1
Cash credit from banks including working capital demand loans	5,499.9	10,599.6	17,827.7	46,243.3
Collateralised Borrowing and Lending Obligation from Banks	112.0	-	-	-
Total	18,400.2	30,087.5	45,471.2	80,330.0

We have developed stable long-term relationships with our lenders, and established a track record of timely servicing our debts.

Since our inception, we have relied on the proceeds of secured non-convertible debentures called “Muthoot Gold Bonds” placed through our branches. These debentures are issued on a private placement basis and are subscribed by retail investors.

We also raise capital by selling our receivables under bilateral assignment agreements with banks. As per our restated audited financial statements, as of March 31, 2008, 2009 and 2010, and November 30, 2010, the outstanding amount of capital raised from selling our receivables were ` 4,341.0 million, ` 8,130.2 million and ` 20,083.2 million, and ` 32,464.8 million, respectively. We have been assigned an “A1+” rating by ICRA for commercial paper and for short-term non-convertible debentures of ` 2,000.0 million, and a “P1+” rating by CRISIL for short term debt instruments of ` 20,000.0 million. Further, CRISIL has assigned “AA-/Stable” to our ` 4,000.0 million non-convertible debentures and to our ` 1,000.0 million subordinated debt. Further, ICRA has assigned a long term rating of “LAA-/Stable” and a short term rating of “A1+” to our ` 20,000 million line of credit.

We also raise capital by issuing shares from time to time, particularly to various institutional investors.

Asset and Liability Management

ALCO monitors and manages our asset and liability mix. Most of our liabilities are short-to-medium-term and assets are short-term. We may in the future decide to pursue loan products with longer term maturities. We have a structural liquidity management system which measures our liquidity positions on an ongoing basis and also scrutinizes the reasons behind liquidity requirements evolving under different assumptions. For measuring net funding requirements, we prepare regular maturity gap analyses and use a maturity ladder to calculate the cumulative surplus or deficit of funds at selected maturity dates. Based on this analysis we re-price its assets and liabilities.

Technology

We use information technology as a strategic tool for our business operations to improve our overall productivity and efficiency. We believe that through our information systems currently in place, we are able to manage our nationwide operations efficiently, market effectively to our target customers, and effectively monitor and control risks. We believe that this system has improved customer service by reducing transaction time and has allowed us to manage loan-collection efforts better and to comply with regulatory record-keeping and reporting requirements.

As of February 28, 2011, all our branches are computerised. Our business does not require a real time connection to a central server since a customer must necessarily return to the same branch to redeem the gold jewellery collateral. At the close of each working day, all our branches send records of transactions to a central server through file transfer protocols for branch data to be consolidated. In the case of inter-branch reconciliation, branches connect to our central server from time to time, and relevant data is transferred between the branches. At the branch level, we have automated systems to backup data in all client machines in the branch. In addition, we back-up our central database.

Security

The security threats we face can be broadly classified as external and internal threats. The principal security risks to our operations are robbery (external threat) and employee theft or fraud (internal threat). We have

extensive security and surveillance systems and dedicated security personnel to counter external security threats. To mitigate internal threats, we undertake careful pre-employment screening, including obtaining references before appointment. We also have installed management information systems to minimize the scope for employee theft or fraud. We also have started installing offsite surveillance cameras across our branches, which will be connected to a centrally located database and allow the corporate office to remotely monitor the branches.

To protect against robbery, all branch employees work behind wooden, glass and steel counters, and the back office, strong-room and computer areas are locked and closed to customers. Each branch's security measures include strong rooms with concrete walls, strong room door made of iron bars, burglary alarm systems, controlled entry to teller areas, and the tracking of employee movement in and out of secured areas. While we provide around the clock armed security guards for risk prone branches, the majority of our branches do not require security guards as the gold jewellery are stored securely in strong rooms.

Since we handle high volumes of cash and gold jewellery at our locations, daily monitoring, spot audits and immediate responses to irregularities are critical to our operations. We have an internal auditing program that includes unannounced branch audits and cash counts at randomly selected branches. We have an internal audit team of 603 persons who conduct audits on branches either weekly or fortnightly or monthly depending on the size of the branch.

Competition

Although the business of making loans secured by gold is a time-honored industry (unorganized pawn-broking shops being the main participants), the Gold Loan industry in India remains very fragmented. Our Board believes that we can achieve economies of scale and increased operating efficiencies by increasing the number of branches under operation and utilizing modern point-of-sale systems and proven operating methods. We operate in largely un-tapped markets in various regions in India where banks operate actively in the Gold Loan business. We compete with pawnshops and financial institutions, such as consumer finance companies. Other lenders may lend money on an unsecured basis, at interest rates that may be lower than our service charges and on other terms that may be more favorable than ours. We believe that the primary elements of competition are the quality of customer service and relationship management, branch location and the ability to loan competitive amounts at competitive rates. In addition, we believe the ability to compete effectively will be based increasingly on strong general management, regional market focus, automated management information systems and access to capital.

Our main competition is from Manappuram General Finance & Leasing Limited, various Kerala based banks, including Federal Bank, South Indian Bank and Catholic Syrian Bank, and from other Gold Loan NBFCs, including deposit accepting NBFCs.

Insurance Coverage

We maintain insurance coverage on all our assets located at our head office and on all our movable assets in branch premises owned by us against fire, earthquake and related perils. We also maintain insurance against burglaries at our head office and at our branches, and against loss by riots, strikes or terrorist activities, cash in transit and employee theft. We maintain special contingency insurance covering gold in transit, gold in branches and cash in transit against burglary. Our insurance policies are generally annual policies that we renew regularly.

Employees

As of February 28, 2011 we employed 15,664 persons in our operations. Our employee strength has grown to its present size from 2,999 persons as of March 31, 2008, 5,979 persons as of March 31, 2009 and 9,745 persons as of March 31, 2010. None of our employees is represented by a labor union, and we believe that our relations with our employees are good.

Remuneration to our employees comprises a fixed component as well as variable pay. Variable pay consists of direct incentives and shared incentives. Our direct and shared incentives are linked to performance targets being achieved by employees and branches. We have an annual performance appraisal system for all employees. Annual increments are awarded only for employees who meet minimum performance standards in their job.

Training

Our ability to timely appraise the quality of the gold jewellery collateral is critical to the business, and requires us to employ persons possessing specialized skill sets in our various branches. We provide extensive training to our branch employees through training programs that are tailored to appraising the gold content in gold jewellery. A new employee is introduced to the business through an orientation program and through training programs covering job-appropriate topics. The experienced branch employee receives additional training and an introduction to the fundamentals of management to acquire the skills necessary to move into management positions within the organization. Manager training involves a program that includes additional management principles and more extensive training in topics such as income maximization, business development, staff motivation, customer relations and cost efficiency. We have two staff training colleges, one each in Cochin and in New Delhi, and three regional training centers located in Chennai, Hyderabad and in Bangalore, and we are in the process of establishing staff training colleges at our other regional locations.

Our registered and corporate office is located in Ernakulam, Kerala, and is owned by us. We have acquired land in New Delhi, where we are constructing an office building to serve as an administrative base for our operations in the northern states of India. Except for 14 branch offices, which are owned by us, all our other branch offices are located at premises leased or licensed to us. We also own 22 guest houses all across India for use by our employees. We also hold 13 other properties used for various purposes by the Company.

REGULATIONS AND POLICIES IN INDIA

The following description is a summary of certain sector specific laws and regulations in India, which are applicable to the Company. The information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice.

The Company is a systemically important NBFC which does not accept public deposits. As such, our business activities are regulated by RBI regulations applicable to non-public deposit accepting NBFCs (“**ND-NBFC**”). The Company also carries out the business of wind power generation at certain locations in India.

Following are the significant regulations that affect our operations:

I. NBFC regulations

The Reserve Bank of India Act

The RBI regulates and supervises activities of NBFCs. Chapter III B of the Reserve Bank of India Act of 1934 (“**RBI Act**”) empowers the RBI to regulate and supervise the activities of all NBFCs in India. The RBI Act defines an NBFC under Section 45-I (f)

- (i) “a financial institution which is a company;
- (ii) a non-banking institution which is a company and which has as its principal business the receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner;
- (iii) such other non-banking institution or class of such institutions as the RBI may, with the previous approval of the Central Government and by notification in the Official Gazette, specify.”

Section 45-I(c) of the RBI Act, further defines “financial institution” to mean any non-banking institution which, among other things, carries on the business or part of its business of making loans or advances.

The RBI has clarified through a press release (Ref. No. 1998-99/ 1269) dated April 08, 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide its principal business. The company will be treated as an NBFC if (a) its financial assets are more than 50 per cent of its total assets (netted off by intangible assets); and (b) income from financial assets should be more than 50 per cent of the gross income. Both these tests are required to be satisfied as the determinant factor for principal business of a company.

The RBI Act mandates that no NBFC, which comes into existence after the commencement of the Reserve Bank of India (Amendment) Act shall commence or carry on the business of a nonbanking financial institution without obtaining a certificate of registration. Furthermore, such an NBFC must also have a net owned fund of ` 2,500,000 or such other amount not exceeding ` 20,000,000.

Under Section 45 – IC of the RBI Act, every NBFC must create a reserve fund and transfer thereto a sum not less than 20 per cent of its net profit every year, as disclosed in the profit and loss account and before any dividend is declared. Such a fund is to be created by every NBFC irrespective of whether it is a ND-NBFC or not. Further, no appropriation can be made from the fund for any purpose by the NBFC except for the purposes specified by the RBI from time to time and every such appropriation shall be reported to the RBI within 21 days from the date of such appropriation.

Systemically Important ND-NBFCs

All ND-NBFCs with an asset size of ₹ 1000,000,000 or more as per the last audited balance sheet will be considered as a systemically important ND-NBFC. RBI by a notification dated June 04, 2009 has clarified that once an NBFC reaches an asset size of ₹ 1000,000,000, or above, it shall come under the regulatory requirement for systemically important ND-NBFC, despite not having such assets on the date of the last balance sheet.

All systemically important NBFCs are required to maintain a minimum Capital to Risk-Weighted Assets Ratio (“**CRAR**”) of 10%. Further the CRAR should not be less than 12% by March 31, 2010 and 15% by March 31, 2011.

Exposure Norms

In order to ensure better risk management and avoidance of concentration of credit risks, the RBI has, in terms of the Prudential Norms, prescribed credit exposure limits for financial institutions in respect of their lending to single/ group borrowers. Credit exposure to a single borrower shall not exceed 15% of the owned funds of the systemically important ND-NBFC, while the credit exposure to a single group of borrowers shall not exceed 25% of the owned funds of the systemically important ND-NBFC. Further, the systemically important ND-NBFC may not invest in the shares of another company exceeding 15% of its owned funds, and in the shares of a single group of companies exceeding 25% of its owned funds. However, this prescribed ceiling shall not be applicable on a NBFC-ND-SI for investments in the equity capital of an insurance company to the extent specifically permitted by the RBI. - (i) Standard assets;
- (ii) Sub-standard assets;
- (iii) Doubtful assets; and
- (iv) Loss assets.

Further, such class of assets would not be entitled to be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for such upgradation.

The Prudential norms also specifically prohibit NBFCs from lending against its own shares.

KYC Guidelines

The RBI has extended the Know Your Customer (“**KYC**”) guidelines to NBFCs and advised all NBFCs to adopt the same with suitable modifications depending upon the activity undertaken by them and ensure that a proper policy framework of anti-money laundering measures is put in place. The KYC policies are required to have certain key elements, including, customer acceptance policy, customer identification procedures, monitoring of transactions and risk management, diligence of client accounts opened by professional intermediaries, customer due diligence and diligence of accounts of politically exposed persons, adherence to KYC guidelines and the exercise of due diligence by persons authorised by the NBFC, including its brokers and agents.

The RBI has issued guidelines vide a circular dated bearing number DBOD No. FSD. BC.46/24.01.028/2006-07 dated December 12, 2006 relating to the financial regulation of systemically important NBFC-NDs and the relationship of banks with such institutions. In particular, these guidelines prohibit banks from lending to NBFCs for the financing of certain activities, such as (i) bill discounting or rediscounting, except where such discounting arises from the sale of commercial vehicles and two wheelers or three wheelers, subject to certain conditions; (ii) unsecured loans or corporate deposits by NBFCs to any company; (iii) investments by NBFCs both of current and long term nature, in any company; (iv) further lending to individuals for the purpose of subscribing to an initial public offer.

Norms for excessive interest rates

In addition to the aforesaid instruction, the RBI has issued a Master Circular on Fair Practices Code dated July 01, 2010 for regulating the rates of interest charged by the NBFCs. These circulars stipulate that the board of each NBFC is required to adopt an interest rate model taking into account the various relevant factors including cost of funds, margin and risk premium. The rate of interest and the approach for gradation of risk and the rationale for charging different rates of interest for different categories of borrowers are required to be disclosed to the borrowers in the application form and expressly communicated in the sanction letter. Further, this is also required to be made available on the NBFCs website or published in newspapers and is required to be updated in the event of any change therein. Further, the rate of

interest would have to be an annualized rate so that the borrower is aware of the exact rates that would be charged to the account.

Supervisory Framework

In order to ensure adherence to the regulatory framework by systemically important ND-NBFCs, the RBI has directed such NBFCs to put in place a system for submission of an annual statement of capital funds, and risk asset ratio etc. as at the end of March every year, in a prescribed format. This return is to be submitted electronically within a period of three months from the close of every financial year. Further, a NBFC is required to submit a certificate from its statutory auditor that it is engaged in the business of non-banking financial institution requiring to hold a certificate of registration under the RBI Act. This certificate is required to be submitted within one month of the date of finalization of the balance sheet and in any other case not later than December 30 of that particular year. Asset Liability Management

The RBI has prescribed the Guidelines for Asset Liability Management (“**ALM**”) System in relation to NBFCs (“**ALM Guidelines**”) that are applicable to all NBFCs through a Master Circular on Miscellaneous Instructions to All Non-Banking Financial Companies dated July 1, 2010. As per this Master Circular, the NBFCs (engaged in and classified as equipment leasing, hire purchase finance, loan, investment and residuary non-banking companies) meeting certain criteria, including, an asset base of ` 1,000 million, irrespective of whether they are accepting / holding public deposits or not, are required to put in place an ALM system. The ALM system rests on the functioning of ALM information systems within the NBFC, ALM organization including an Asset Liability Committee (“**ALCO**”) and ALM support groups, and the ALM process including liquidity risk management, management of marketing risk, funding and capital planning, profit planning and growth projection, and forecasting/ preparation of contingency plans. It has been provided that the management committee of the board of directors or any other specific committee constituted by the board of directors should oversee the implementation of the system and review its functioning periodically. The ALM Guidelines mainly address liquidity and interest rate risks. In case of structural liquidity, the negative gap (i.e. where outflows exceed inflows) in the 1 to 30/ 31 days time-bucket should not exceed the prudential limit of 15% of outflows of each time-bucket and the cumulative gap of up to one year should not exceed 15% of the cumulative cash outflows of up to one year. In case these limits are exceeded, the measures proposed for bringing the gaps within the limit should be shown by a footnote in the relevant statement.

Anti Money Laundering

The RBI has issued a Master Circular dated July 1, 2010 to ensure that a proper policy frame work for the Prevention of Money Laundering Act, 2002 (“**PMLA**”) is put into place. The PMLA seeks to prevent money laundering and provides for confiscation of property derived from, or involved in money laundering and for other matters connected therewith or incidental thereto. It extends to all banking companies, financial institutions, including NBFCs and intermediaries. Pursuant to the provisions of PMLA and the RBI guidelines, all NBFCs are advised to appoint a principal officer for internal reporting of suspicious transactions and cash transactions and to maintain a system of proper record (i) for all cash transactions of value of more than ` 1 million; (ii) all series of cash transactions integrally connected to each other which have been valued below ` 1 million where such series of transactions have taken place within one month and the aggregate value of such transaction exceeds ` 1 million. Further, all NBFCs are required to take appropriate steps to evolve a system for proper maintenance and preservation of account information in a manner that allows data to be retrieved easily and quickly whenever required or when requested by the competent authorities. Further, NBFCs are also required to maintain for at least ten years from the date of transaction between the NBFCs and the client, all necessary records of transactions, both domestic or international, which will permit reconstruction of individual transactions (including the amounts and types of currency involved if any) so as to provide, if necessary, evidence for prosecution of persons involved in criminal activity.

Additionally, NBFCs should ensure that records pertaining to the identification of their customers and their address are obtained while opening the account and during the course of business relationship, and that the same are properly preserved for at least ten years after the business relationship is ended. The identification records and transaction data is to be made available to the competent authorities upon request.

II. Power generation regulations

The Ministry of New and Renewable Energy (“MNRE”) regulations

The MNRE is the Central Government ministry with the mandate for formulating schemes and policies for the research, development, commercialisation and deployment of renewable energy systems/devices for various applications in rural, urban, industrial and commercial sector. The MNRE has issued a number of guidelines and schemes on power generation through renewable sources, including a ‘Special Programme on Small Wind Energy and Hybrid Systems’. In order to ensure quality of wind farm projects and equipments, the MNRE introduced the “Revised Guidelines for wind power projects” (“**MNRE Guidelines**”) on June 13, 1996 for the benefit of state electricity boards, manufacturers, developers and end-users of energy to ensure proper and orderly growth of the wind power sector. The MNRE Guidelines are periodically updated and issued. The MNRE Guidelines among other things makes provision for proper planning, siting, selection of quality equipment, implementation and performance monitoring of wind power projects. The MNRE Guidelines lay down guidelines for the planned development and implementation of wind power projects.

The MNRE Guidelines set out the conditions that are required to be met for establishing wind farms and manufacturing and supplying equipment for wind power projects. These conditions include submission of detailed project reports, approval of sites for wind power installations, type certification by independent testing and certification agencies (either the Centre of Wind Energy Technology, Chennai or the International certification agency). Further, all installations are to be carried out only on sites that are approved for wind power projects by the MNRE. The MNRE Guidelines stipulate that a no objection certificate will be issued only after analysing the wind data to ensure adequate availability of wind at the specific site. Also, no approval will be granted for a wind power project which involves the installation of used wind turbines imported into India.

The Indian Renewable Energy Development Agency Limited (“IREDA”)

The IREDA is a public limited government company under the administrative control of the MNRE and is engaged in encouraging the production of energy through renewable sources. In this respect, the IREDA offers financial support to specific projects and schemes for generating electricity, and promotes the energy conservation through by improving the efficiency of systems, processes and resources engaged in energy production and distribution. In particular, the IREDA offers scheme and incentives for the promotion of wind based energy production.

Electricity Act, 2003

Under the Electricity Act, 2003, which repealed all the earlier enactments pertaining to this sector, the activity of generation of wind power does not require any license or permission. Persons engaged in the generation of electricity from wind power are required to register the project being undertaken with State Nodal Agency and obtain permission for inter-grid connectivity from the utility. The government has also announced National Electricity Policy in 2005 to guide the development of the electricity sector in India.

The electricity generated from the wind power project can be used for captive consumption, sale to utility or for transaction under open access as per the prevailing state policy as well as regulatory orders, if any. Various states have announced administrative policies relating to wheeling, banking and buy-back of power.

Further, the Electricity Act, 2003 also mandates that all regulatory commissions should procure certain percentage of power generation from renewable energy sources by all distribution companies. As far as the tariff and wheeling charges are concerned, it is stipulated that they should be decided by respective regulatory commissions as provided under the Electricity Regulatory Commissions Act, 1998.

The regulations governing operation of wind electricity generators in Tamil Nadu are applicable to our Company. Under the policy formulated by the Government of Tamil Nadu, our Company is required to sell all the power generated to the Tamil Nadu Electricity Board, as a fixed price of ₹ 2.70 per unit of power. Further, a 5% wheeling and transmission charge is applicable, should the Company opt to take the assistance of the Tamil Nadu Electricity Board for wheeling. The policy permits the Company to bank all the power generated by the wind-mills. However, a 5% banking charge is applicable on all power banked by the Company on a bi-monthly basis.

Electricity Regulatory Commissions

Electricity Act retains the two-level regulatory system for the power sector. At the central level, the Central Electricity Regulatory Commission (“**CERC**”) is responsible for regulating tariff of generating stations owned by the central government, or those involved in generating or supplying in more than one states, and regulating inter-state transmission of electricity. The State Electricity Regulatory Commissions (“**SERCs**”) on the other hand regulate intra-state transmission and supply of electricity within the jurisdiction of each state. CERC and the SERCs are guided by the National Electricity Policy, 2005, Tariff Policy, 2006 and the National Electricity Plan while discharging their functions under Electricity Act. The Electricity Regulatory Commissions are also guided by any direction given by the central government for CERC or the state government for the SERC pertaining to any policy involving public interest. The decision of the government is final and non-challengeable with respect to the question that whether directions pertain to policy involving public interest or not. The commissions have been entrusted with a variety of functions including determining tariff, granting licensees, settling disputes between the generating companies and the licensees. The Electricity Regulatory Commissions are a quasi-judicial authority with powers of a civil court and an appeal against the orders of the Commissions lie to the Appellate Tribunal.

The CERC has recently notified the CERC (Terms and Conditions for Recognition and Issuance of Renewable Energy Certificate for Renewable Energy Generation) Regulations on January, 14, 2010 to the promotion of power generation through renewable sources of energy. In this respect, these regulations contemplate two categories of certificates, solar and non-solar certificate. The CERC has designated the National Load Dispatch Center to issue registration certificates and undertakes to provide for the floor price (minimum) and forbearance price (maximum) for non-solar certificates.

Kyoto Protocol and Carbon Credits

The Kyoto Protocol is a protocol to the International Framework Convention on Climate Change with the objective of reducing greenhouse gases (“**GHG**”) that cause climate change. The Kyoto Protocol was entered into force on February 16, 2005. India ratified the Kyoto Protocol on August 22, 2006. The Kyoto Protocol defines legally binding targets and timetables for reducing the GHG emissions of industrialised countries that ratified the Kyoto Protocol. Governments have been separated into developed nations (who have accepted GHG emission reduction obligations) and developing nations (who have no GHG emission reduction obligations). The protocol includes “flexible mechanisms” which allow developed nations to meet their GHG emission limitation by purchasing GHG emission reductions from elsewhere. These can be bought either from financial exchanges, from projects which reduce emissions in developing nations under the CDM, the Joint Implementation scheme or from developed nations with excess allowances. Typical emission certificates are:

- Certified Emission Reduction (CER);
- Emission Reduction Unit (ERU); and
- Voluntary or Verified Emission Reductions (VER).

CERs and ERUs are certificates generated from emission reduction projects, under the CDM for projects implemented in developing countries, and under Joint Implementation (“**JI**”) for projects implemented in developed countries, respectively. These mechanisms are introduced within the Kyoto

Protocol. For projects which cannot be implemented as CDM or JI, but still fulfil the required standards, VERs can be generated. VERs, however, cannot be used for compliance under the Kyoto Protocol.

III. Foreign Investment Regulations

Foreign direct investment (including foreign institutional investment, investments by non-resident Indians, persons of Indian origin and overseas corporate bodies) (“**FDI**”) in an Indian company is governed by the provisions of the Foreign Exchange Management Act, 1999 (“**FEMA**”) read with the Consolidated Foreign Direct Investment Policy effective from April 01, 2010 (“**FDI Policy**”) issued by the Department of Industrial Promotion and Policy, Ministry of Commerce, Government of India (“**DIPP**”). FDI is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the approval route, depending upon the sector in which FDI is sought to be made. Under the automatic route, no prior Government approval is required for the issue of securities by Indian companies/ acquisition of securities of Indian companies, subject to the sectoral caps and other prescribed conditions. Investors are required to file the required documentation with the RBI within 30 days of such issue/ acquisition of securities. However, if the foreign investor has any previous joint venture/ tie-up or a technology transfer/ trademark agreement in the “same field” in India, prior approval from the FIPB is required even if that activity falls under the automatic route, except as otherwise provided.

Under the approval route, prior approval from the FIPB or RBI is required. FDI for the items/activities that cannot be brought in under the automatic route may be brought in through the approval route. Approvals are accorded on the recommendation of the FIPB, which is chaired by the Secretary, DIPP, with the Union Finance Secretary, Commerce Secretary and other key Secretaries of the Government of India as its members.

As per the sector specific guidelines of the Government of India, the following are the relevant norms applicable for FDI in NBFCs:

Trade Marks Act

The Trade Marks Act, 1999 (the “**Trademark Act**”) governs the statutory protection of trademarks in India. In India, trademarks enjoy protection under both statutory and common law. Indian trademarks law permits the registration of trademarks for goods and services. Certification trademarks and collective marks are also registerable under the Trademark Act.

An application for trademark registration may be made by any person claiming to be the proprietor of a trademark and can be made on the basis of either current use or intention to use a trademark in the future. The registration of certain types of trade marks are absolutely prohibited, including trademarks that are not distinctive and which indicate the kind or quality of the goods.

Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for ten years unless cancelled. If not renewed after ten years, the mark lapses and the registration for such mark has to be obtained afresh.

While both registered and unregistered trademarks are protected under Indian law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. Registered trademarks may be protected by means of an action for infringement, whereas unregistered trademarks may only be protected by means of the common law remedy of passing off. In case of the latter, the plaintiff must, prior to proving passing off, first prove that he is the owner of the trademark concerned. In contrast, the owner of a registered trademark is *prima facie* regarded as the owner of the mark by virtue of the registration obtained.

The following discussion of our financial condition and results of operations should be read in conjunction with our restated financial statements as of and for the years ended March 31, 2006, 2007, 2008, 2009 and 2010, and as of and for the eight months ended November 30, 2010, prepared in accordance with the Companies Act, Indian GAAP and the SEBI ICDR Regulations, including the schedules, annexures and notes thereto and the reports thereon, included in the section "Financial Information" beginning on page 184 of this RHP. Unless otherwise stated, the financial information used in this section is derived from the restated financial statements of the Company.

Indian GAAP differs in certain material respects from U.S. GAAP and IFRS. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this RHP, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. Accordingly, the degree to which the Indian GAAP financial statements included in this RHP will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices.

This discussion contains forward-looking statements and reflects our current views with respect to future events and financial performance. Actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors such as those set forth in the section "Risk Factors" on page 10 of this RHP.

Overview

We are the largest gold financing company in India in terms of loan portfolio, according to IMAcS Industry Report (2010 Update). We provide personal and business loans secured by gold jewellery, or Gold Loans, primarily to individuals who possess gold jewellery but could not access formal credit within a reasonable time, or to whom credit may not be available at all, to meet unanticipated or other short-term liquidity requirements. According to the IMAcS Industry Report (2010 Update), as of March 31, 2010 our branch network was the largest among gold loan NBFCs in India. Our Gold Loan portfolio as of November 30, 2010 comprised approximately 4.1 million loan accounts in India that we serviced through 2,263 branches across 20 states, the national capital territory of Delhi and four union territories in India. We have since increased our branch network to 2,611 branches as of February 28, 2011 and used our branch network to serve an average of 67,953 customers per day in the month of February 2011. As of February 28, 2011, we employed 15,664 persons in our operations.

In the years ended March 31, 2008, 2009 and 2010, and in the eight months ended November 30, 2010, revenues from our Gold Loan business constituted 95.97%, 96.71% and 98.08%, and 98.50%, respectively, of our total income. In addition to our Gold Loans business, we provide money transfer services through our branches as sub-agents of various registered money transfer agencies, and recently have commenced providing collection agency services. We also operate three windmills in the state of Tamil Nadu.

We issue secured non-convertible debentures called "Muthoot Gold Bonds" on a private placement basis. Proceeds from our issuance of Muthoot Gold Bonds form a significant source of funds for our Gold Loan business. We also rely on bank loans and subordinated debt instruments as our sources of funds. As per our restated audited financial statements, as of November 30, 2010, we had ₹ 33,644.5 million in outstanding Muthoot Gold Bonds and ₹ 57,184.7 million in other borrowings. We also raise capital by selling a portion of our loan receivables under bilateral assignment agreements with various banks.

We provide retail loan products, primarily comprising Gold Loans. We also disburse other loans, including those secured by Muthoot Gold Bonds. Our Gold Loans have a maximum 12 month term. As per our restated audited financial statements, our average disbursed Gold Loan amount outstanding was ₹ 31,553 per loan account as of November 30, 2010. In the year ended March 31, 2010, our retail loan portfolio earned, on average, 1.67% per month, or 19.94% per annum, and in the eight months ended November 30, 2010 our retail loan portfolio earned, on average, 1.57% per month, or 18.92% per annum.

As per our restated audited financial statements, as of March 31, 2008, 2009 and 2010, and as of November 30, 2010, our portfolio of outstanding gross Gold Loans under management was ₹ 21,790.1 million, ₹ 33,000.7 million and ₹ 73,417.3 million, ₹ 128,977.7 million, respectively, and approximately 30.1 tons, 38.9 tons, 65.5

tons, and 97.6 tons, respectively, of gold jewellery was held by us as security for our Gold Loans . Gross non-performing assets ("NPAs") were at 0.42%, 0.48%, 0.46%, and 0.35% of our gross retail loan portfolio under management as of March 31, 2008, 2009 and 2010, and as of November 30, 2010, respectively.

As per our restated audited financial statements, in the years ended March 31, 2008, 2009 and 2010, our total income was ` 3,686.4 million, ` 6,204.0 million and ` 10,893.8 million, respectively, demonstrating an annual growth rate of 57.56%, 68.29% and 75.59%, respectively. As per our restated audited financial statements, in the eight months ended November 30, 2010, our total income was ` 13,016.6 million. As per our restated audited financial statements, our profit after tax in the years ended March 31, 2008, 2009 and 2010 was ` 630.6 million, ` 978.7 million and ` 2,285.2 million, respectively, demonstrating an annual growth rate of 43.8%, 55.2% and 133.5%, respectively. As per our restated audited financial statements, our profit after tax in the eight months ended November 30, 2010 was ` 2,914.8 million. As per our restated audited financial statements, our networth as of March 31, 2008, 2009, 2010, and as of November 30, 2010 was ` 2,131.1 million, ` 3,614.5 million, ` 5,841.9 million and ` 11,314.5 million, respectively.

Factors Affecting Results of Operations

Volatility in interest rates

Our results of operations are substantially dependent upon the level of our net interest margins. In the year ended March 31, 2008, 2009 and 2010 and in the eight months ended November 30, 2010, our interest income represented 97.10%, 97.72% and 98.91%, and 99.05%, respectively, of our total income. Interest rates are sensitive to many factors beyond our control, including the RBI's monetary policies, domestic and international economic and political conditions and other factors. Our policy is to attempt to balance the proportion of our interest-earning assets (which earn fixed rates of interest) with our interest-bearing liabilities. As of November 30, 2010, 48.16% of our borrowings were at fixed rates of interest, comprising primarily our privately placed secured non-convertible redeemable debentures, which constituted 37.04% of our total indebtedness as of November 30, 2010. Our remaining loans are at floating rates of interest, particularly our borrowings from banks. Notwithstanding our attempts to balance our interest rate risk, changes in interest rates could affect the interest rates charged on interest-earning assets and the interest rates paid on interest-bearing liabilities in various ways. Our results of operations therefore can be affected by changes in interest rates and mismatches in re-pricing our liabilities and our assets.

In a rising interest rate environment, if the yield on our interest-earning assets does not increase at the same time or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline at the same time or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted. However, on account of the generally short-term nature of our loan portfolio, in a rising interest rate scenario, loans in our portfolio can be revised upwards in a relatively short period of time. However, in a falling interest rate scenario, since the average ticket size of our loans is small (approximately ` 31,553 as at November, 2010, as per our restated audited financial statements), we have observed that our loan portfolio is price inelastic, and that we are able to retain the higher interest rate even though the corresponding cost of funds has come down.

Access to funds and availability of funds at low-cost

Our results of operation significantly depend on our ability to access low-cost funds for our gold loans and advances. As a "systemically important non-deposit accepting" NBFC we do not have access to savings and current deposits, and our liquidity and ongoing profitability are, in large part, dependent upon our timely access to, and the costs associated with, raising funds including capital. Our funding requirements historically have been met from a combination of borrowings, term loan and cash credit from banks, sale of our loans to banks, and issuance of commercial paper, non-convertible debentures and equity.

The crisis in the global credit markets that began in mid-2007 destabilized the prevailing lending model by banks and financial institutions. These adverse conditions reached unprecedented levels through 2008 and have continued in recent months. The capital and lending markets remained highly volatile and access to liquidity was significantly reduced. These conditions have resulted in increased borrowing costs. In addition, it could become more difficult to renew loans and facilities as many potential lenders and counterparties also were facing liquidity and capital concerns as a result of the stress in the financial markets. We were not significantly affected by the crisis, and achieved 53.40%, 51.33% and 120.78%, and 74.82% growth in the size of our gross retail loan portfolio for the years ended March 31, 2008, 2009 and 2010, and for the eight months ended

November 30, 2010, respectively. The growth in our loan portfolio was funded by the issuance of secured non-convertible redeemable debentures (representing a year on year growth of 40.43%, 53.35% and 42.97% for the years ended March 31, 2008, 2009 and 2010, respectively) and borrowings from banks (representing a year on year growth of 37.33%, 88.07% and 92.26% for the years ended March 31, 2008, 2009 and 2010, respectively). However, our borrowing cost increased in line with the general increase in interest rates.

In addition to the general economic factors and availability of funds, our cost of borrowing is also dependent on changes in our credit ratings and various performance or financial ratios, including those relating to capital adequacy and capital leverage. With the growth of our operations we have had to increasingly access the debt markets and commercial borrowings and we have generally benefited from competitive interest rates. We have been able to offer competitive interest rates for our loans due to our relatively low cost of funds. An increase in our cost of funds may reduce spreads earned on our loan products. Furthermore, competition from banks and other NBFCs continues to increase in rural and semi-urban India, and as a result there could be further downward pressure on our gross spread.

Changes in gold prices

Our earnings and financial position may be affected by changes in gold prices and the resulting impact on gold loans. A significant and sudden, sustained decline in the price of gold would negatively impact the value of gold jewellery that we retain as collateral for our gold loans.

A fall in gold prices to such an extent such that the replacement cost of the jewellery is significantly lower than the loan amount repayable including interest, can lead to the borrower defaulting on the loan and abandoning the jewellery collateral, thereby increasing the level of NPAs in our portfolio. Recovery of amounts through liquidation of collateral may result in inadequate recovery of dues or the principal amount. While management believes that some customers would be reluctant to abandon their jewellery because of their sentimental attachment to their jewellery, there can be no assurance that customers will not default and abandon their jewellery in the event of sustained declines in the value of gold. However, according to the terms of the gold loans we disburse, we reserve the right to sell the jewellery before the loans come due in the event of a fall in the value of the collateral. In the event amounts recovered from such sales are lower than the loan amount outstanding, we reserve the right to recover the difference from the customer.

Furthermore, a decline in gold prices could affect the growth of our loan portfolio because customers may be unable or unwilling to provide the additional collateral required to receive loan amounts that they otherwise would have received if the price of gold (and the value of the collateral) not declined.

A temporary decline in gold prices is less likely to affect repayment on a loan because we do not lend to the full extent of the value of the collateral. We only lend amounts equal to a predetermined percentage of the gold content in the collateral jewellery at the then prevailing price of the gold. Moreover, in determining the value of the collateral we do not calculate aspects apart from the gold content that add to value to the collateral, such as making charges, designer stones, brand cost. This acts as an additional margin on the loan amounts we disburse.

Given the nature of our business, the impact of a hypothetical decrease or increase in gold prices on our financial position and results of operations cannot be reasonably estimated.

Regulatory policies for NBFCs

Being a financial intermediary, our operations are regulated by the RBI. We are presently required by the RBI to maintain a minimum capital adequacy of 12%, which will be further increased to 15% from March 31, 2011 onwards. In addition, the RBI also requires us to transfer 20% of our annual profits to a reserve fund. The RBI also requires us to make provisions in respect of NPAs. Any changes in the regulatory framework affecting NBFCs including the provisioning for NPAs or capital adequacy requirements could adversely affect our profitability and consequently our net worth. Any additional requirements, for example in relation to sale of loan portfolio, raising funds through Secured Redeemable Non-Convertible Debentures or lending restrictions imposed on banks' lending to NBFCs or restrictions on opening of branches could adversely affect our growth.

The RBI has set targets and sub-targets for domestic and foreign banks operating in India to lend to certain designated priority sectors that impact large sections of the population, weaker sections and sectors that are employment-intensive such as agriculture, and small enterprises. The target for total priority sector loans for domestic banks is 40.00% of their adjusted net bank credit and 32.00% for foreign banks. Since we operate

predominantly in rural and semi-urban areas, a portion of our lending historically met the priority sector requirements of RBI. Investments by banks in securitized assets, representing loans to various categories of priority sector, outright purchases of any loan asset eligible to be categorised under priority sector, and investments by banks in Inter Bank Participation Certificates (IBPCs), on a risk sharing basis, were different avenues by which banks can meet these priority sector lending targets. A recent notification issued by the RBI in February of this year, has stipulated that loans provided by NBFCs against gold jewellery for agriculture purposes (which is one of the categories of a priority sector advance under priority sector lending guidelines issued by RBI) would not be treated as priority sector loans/advances. Thus our loan portfolio is no longer classified as a priority sector advance by the RBI. This RBI notification therefore increases our cost of funds, which will adversely affect our results of operations going forward.

Any other changes in regulatory policies could also affect our ability to borrow at comparatively lower rate of interest.

Competition

We provide personal and business loans secured by gold jewellery, or Gold Loans, primarily to individuals who possess gold jewellery but could not access formal credit within a reasonable time, or to whom credit may not be available at all, to meet unanticipated or other short-term liquidity requirements. Historically, the gold loan sector in India has been largely unorganized and dominated by local jewellery pawn shops and money lenders. Attractive interest rates relative to risk, and increased demand for access to capital from middle income group have increased our exposure to competition. The demand for gold loans has also increased due to increased need for urgent borrowing or bridge financing requirements, relatively lower and affordable interest rates, the need for liquidity for assets held in gold, and also due to increased awareness among customers of gold loans as a source of quick access to funds.

All of these factors have resulted in us facing increased competition from other lenders in the gold loan sector, including commercial banks and other NBFCs. Unlike commercial banks, we do not have access to funding from savings and current deposits of customers. Instead, we are reliant on higher-cost term loans and debentures for our funding requirements, which may reduce our margins compared to competitors. Our ability to compete effectively with commercial banks will depend, to some extent, on our ability to raise low-cost funding in the future.

Ability to control operating costs

Our operating costs are relatively high compared to other participants in the financial services sector. This is because we deal in large volumes of low ticket size loans. As per our restated audited financial statements, for the years ended March 31, 2008, 2009 and 2010, and for the eight months ended November 30, 2010, our operating costs were ` 795.6 million, ` 1,404.9 million and ` 2,359.8 million, and ` 2,546.9 million, respectively. In the eight months ended November 30, 2010, employee, rental and advertising costs formed approximately 51.3% , 13.0% and 13.8%, respectively, of our operating costs. A general increase in employee compensation levels caused by inflation and higher costs of living can adversely affect our operating costs. Rental levels can also significantly increase because we are rapidly scaling up our business by opening new branches in India. Similarly, we may be required to incur significant expenses on advertising our products as part of our growth strategy. Our ability to manage these operating costs is a significant factor affecting our future results of operations.

Change in customer behaviour

India is the largest consumer of gold jewellery in the world. Any change in customer behaviour such that people lose affinity to their gold jewellery can result in a situation where borrowers abandon jewellery and default in their gold loans. There can also be a reduction in our loan portfolio levels if Indian consumers do not purchase gold jewellery as a result of changing behavioural patterns, and therefore do not avail our gold loans. We believe that the gold loan business model in India is driven by the affinity of Indian consumers for gold jewellery. Therefore, in the event our target customers lose their personal attachment to gold jewellery, our results of operation would be adversely affected. On the other hand, we believe that a change to the prevailing taboo on using family jewels as collateral for cash advances will positively affect our business and results of operations.

Increasing the network and reach

We have rapidly grown our revenues in recent years because we have significantly grown our network of branches. According to the IMACS Industry Report (2010 update), as of March 31, 2010 our branch network was the largest among gold loan NBFCs in India. We have since increased our branch network to 2,611 branches as of February 28, 2011 and used our branch network to serve an average of 67,953 customers per day in the month of February 2011. We have used our increasing branch network to grow our Gold Loan portfolio from approximately 1.5 million loan accounts as of March 31, 2008 to 1.8 million loan accounts as of March 31, 2009, approximately 2.8 million loan accounts as of March 31, 2010 and approximately 4.1 million loan accounts as of November 30, 2010. Our business model is inherently dependent on our ability to expand our network to grow our revenues and profitability in the future.

Critical Accounting Policies

A summary of the significant accounting policies applied in the preparation of our financial statements is set out in the notes to the financial statements included on page 191 of this RHP. The financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting and in accordance with the provisions of the Companies Act, 1956 and the accounting principles generally accepted in India and comply with the accounting standards prescribed in the Companies (Accounting Standards) Rules, 2006 issued by the Central Government, in consultation with the National Advisory Committee on Accounting Standards, to the extent applicable. We also follow prudential norms for income recognition, asset classification and provisioning for non-performing assets as prescribed by Reserve Bank of India's Non-Banking Financial (Non-deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Direction 2007.

The preparation of the financial statements requires use of estimates and assumptions that affect the reported amount of assets and liabilities as at the balance sheet date, reported amount of income and expenses during the reporting period and disclosure of contingent liabilities as at that date. The estimates and assumptions used in these financial statements are based upon the management evaluation of the relevant facts and circumstances as of the date of the financial statements. Management believes that these estimates and assumptions used are prudent and reasonable. Future results may vary from these estimates. By their nature, these estimates are subject to a degree of uncertainty. These judgments are based on our historical experience, terms of gold loan agreements, and our observance of trends in the industry, information provided by our clients and information available from other third party sources, as appropriate. There can be no assurance that our judgments will prove correct or that actual results reported in future periods will not differ from our expectations reflected in our accounting treatment of certain items. Any revision to accounting estimates is recognized prospectively in current and future periods.

While all aspects of our financial statements should be read and understood in assessing our current and expected financial condition and results of operations, we believe that the following critical accounting policies warrant particular attention.

Revenue recognition

Revenues are recognized and expenses are accounted on an accrual basis with necessary provisions for all known liabilities and losses. Income on non-performing assets accrues and is recognized only when it is realized.

Sell down of Receivables under bilateral assignment

Income and expense under bilateral assignment of receivables accrue over the life of the related receivables assigned. Interest income and expenses on the above are accounted on gross basis.

Taxes on income

Income Tax expenses comprises of current tax and deferred tax (asset or liability). Current tax is the amount of tax payable on the taxable income for the year and determined in accordance with the provisions of the Income Tax Act 1961. Deferred tax is recognized, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

Investments

Investments intended to be held for not more than a year are classified as current investments. All other investments are classified as long-term investments. Current investments are carried at lower of cost or market value/realizable value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognise a decline, other than temporary, in the value of the investments.

Provisions, contingent liabilities and contingent assets

Provisions are recognized only when the Company has present or legal or constructive obligations as a result of past events, for which it is probable that an outflow of economic benefit will be required to settle the transaction and a reliable estimate can be made for the amount of the obligation.

Contingent liability is disclosed for (i) possible obligations which will be confirmed only by future events not wholly within the control of the Company or (ii) present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent assets are not recognised in the financial statements since this may result in the recognition of income that may never be realised.

Debenture redemption reserve

We have not created any debenture redemption reserve since we are a non-banking finance company that has issued debentures on a private placement basis.

Provision for non performing assets

Income and Expenditure Overview

Income

Interest income

We derive substantially all of our operating revenues from interest received on the gold loans we advance. We also earn interest income from loans other than gold loans, interest from deposits with banks, and interest income on gold loan receivables sold under bilateral assignment.

Other income

Other income consist of income from wind mill power generation, sub-agency fees for operating payment centres for inward foreign remittances, rental income, profit from sale of fixed assets, collection agency fees and service charges on gold loans.

Expenditure

Our expenses consist of interest expenses, administrative expenses, depreciation and directors' remuneration.

Interest expenses

We incur significant interest expenses since borrowings constitute our primarily source of funds for our gold loan business. We incur interest expenses on our secured non-convertible debentures, borrowings from banks and financial institutions as well as on other borrowings.

Administrative expenses

Our administrative and other expenses largely consist of expenses related to employee cost, rent expenses for our various branch offices, advertisement expenditure, bank charges, repairs and maintenance, audit and inspection expenses, printing and stationery, travelling and conveyance, electricity charges and postage and telephone charges. We also incur some expenses in provisioning for non-performing assets ("NPAs"), and in write-off of bad debts.

Provision for Taxation

Provision for Taxation comprises current taxes, fringe benefit tax and deferred tax charges or credits. Current tax is calculated in accordance with the applicable laws. For details, please refer the section titled "Statement of Tax Benefits" on page 83 of this RHP. Fringe benefit tax refers to the tax imposed on us as an employer on benefits which accrue to our employees other than on salary and wages. Deferred tax reflects the impact of current year timing difference between taxable income and accounting income for the year and reversal of timing differences of earlier years.

LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of cash are from operations, borrowings under our credit facilities and the issuance of our common stock and secured debentures. We anticipate that our primary uses of cash will be to provide working capital, finance capital expenditures, meet debt service requirements, fund our gold loans and advances, and finance branch expansion.

We have constantly strived to diversify our sources of capital. We have been able to fund the growth of our operations and loan portfolio through equity issuances, debt securities both retail and institutional, loans with various maturities raised from banks and other entities and the assignment of loans.

As per our restated audited financial statements, in the eight months ended November 30, 2010 and in the year ended March 31, 2010, we had raised ` 134,611.2 million and ` 78,733.9 million, respectively, from these sources, and as of November 30, 2010 and as of March 31, 2010, we had cash available for use in our operations of ` 1,925.1 million and ` 4,702.5 million, respectively. We currently deploy into cash credit facilities and also invest our surplus cash reserves in short term deposits. Based upon our current level of expenditures, we believe our current working capital, together with cash flows from operating activities and the proceeds from the offerings contemplated herein, will be adequate to meet our anticipated cash requirements for capital expenditures and working capital for at least the next 12 months. We regularly monitor our funding levels to ensure we are able to satisfy the requirements for loan disbursements and maturity of our liabilities. We maintain diverse sources of funding and adequate available working capital limits to facilitate flexibility in meeting our liquidity requirements. Liquidity is provided principally by short term and long term borrowings from banks and other entities, sales of equity securities and debentures, retained earnings and proceeds from assignments of loans. All our loan agreements and debentures contain a number of covenants including financial covenants. In addition, some loans contain provisions which allow the lender, at its discretion to call for repayment of the loan at short notice and/or require us to prepay on a *pari passu* basis if any other loan is being repaid. Such covenants, if acted upon, may have an impact on our liquidity.

Quantitative and Qualitative Disclosure about Market Risk

The following discussion about our market risk disclosures involves forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements. We are exposed to market risk

related to changes in interest rates and gold values. We also are exposed to regulatory risk in relation to our gold loan products and services. We do not use derivative financial instruments.

Interest Rate Risk

Management's objective is to minimize the cost of borrowing through an appropriate mix of fixed and floating rate debt. If prevailing interest rates were to increase 100 basis points over the rates at November 30, 2010, and the variable rate of borrowings outstanding remained constant, our interest expense would increase by ` 981.0 million, and net profit after taxes would decrease by ` 648.2 million in the eight months ended November 30, 2010, as per our restated audited financial statements.

Liquidity risk

Liquidity risk arises from the absence of liquid resources, when funding loans, and repaying borrowings. This could be due to a decline in the expected collection, or our inability to raise adequate resources at an appropriate price. This risk is minimized through a mix of strategies, including the maintenance of back up bank credit lines and following a forward-looking borrowing programme based on projected loans and maturing obligations. We also monitor liquidity risk through our asset liability management function with the help of liquidity gap reports. This involves the categorization of all assets and liabilities in different maturity profiles, and evaluating them for any mismatches in any particular maturities, especially in the short-term. The asset liability management policy is based on RBI guidelines and ALCO guidelines and establishes the maximum allowed mismatches in the various maturities. To manage short term funding arrangements we depend upon unutilised working capital limits and commercial paper placements. We are also required to submit Asset Liability Management Return on half yearly basis to RBI. The following table sets out a summary of our asset liability maturity profile (statement of structural liquidity) as of November 30, 2010:

Regulatory Risk

The passage of new laws and regulations or changes in existing laws and regulations could have a negative impact on our gold lending activities. Our lending is subject to extensive regulation and licensing requirements by the Reserve Bank of India, India's central bank. The passage of additional local, state, or central legislation or any events of non-compliance could materially, adversely impact our results of operations and financial condition.

Known Trends or Uncertainties

Other than as described in this RHP, particularly in the sections "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 10 and 263, respectively, to our knowledge, there are no trends or uncertainties that have or had or are expected to have a material adverse impact on our income from continuing operations.

Seasonality of Business

We do not believe our business to be seasonal.

Future Relationship between Costs and Income

Other than as described elsewhere in this section “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*”, and in the section “*Risk Factors*” on page 263 and 10, to our knowledge, there are no known factors which will have a material adverse impact on our operations and finances.

Significant Dependence on a Single or Few Customers

We do not believe our business to be dependent on a single or few customers.

Related Party Transactions

For details on related party transactions, please refer to the statement of related party transactions contained in Annexure XVIII to our restated financial statements.

Competitive Conditions

We operate in highly competitive markets. Attractive interest rates relative to risk together with increased demand for access to capital from middle income group, previously availed predominantly by lower income group customers with limited access to other forms of borrowings, have increased our exposure to competition. The demand for gold loans has also increased due to relatively lower and affordable interest rates, increased need for urgent borrowing or bridge financing requirements and the need for liquidity for assets held in gold and also due to increased awareness among customers of gold loans as a source of quick access to funds. All of these factors have resulted in us facing increased competition from other lenders in the gold loan sector, including commercial banks and other NBFCs. Unlike commercial banks, we do not have access to funding from savings and current deposits of customers. Instead, we are reliant on higher-cost term loans and debentures for our funding requirements, which may reduce our margins compared to competitors. Our ability to compete effectively with commercial banks will depend, to some extent, on our ability to raise low-cost funding in the future. If we are unable to compete effectively with other participants in the gold loan sector, our business, future financial performance may be adversely affected. Intense competition is expected to continue in these markets, presenting us with significant challenges in our ability to maintain strong growth rates and acceptable profit margins. For further details regarding our competitive conditions and our competitors, see the sections “*Risk Factors*” and “*Our Business*” on pages 10 and 102, respectively.

Recent Accounting Pronouncements

There are no recent accounting pronouncements that are expected to impact our accounting policies or the manner of our financial reporting. However, the Institute of Chartered Accountants of India has announced a road map for the adoption of, and convergence of Indian GAAP with, IFRS, pursuant to which all public companies in India, such as us, will be required to prepare their annual and interim financial statements under IFRS beginning with financial year commencing April 1, 2011. Because there is significant lack of clarity on the adoption of and convergence with IFRS and there is not yet a significant body of established practice on which to draw in forming judgments regarding its implementation and application, we have not determined with any degree of certainty the impact that such adoption will have on our financial reporting.

Significant developments after November 30, 2010 that may affect our future results of operations

Since November 30, 2010, the RBI has issued two notifications that affect our future results of operations.

1. The RBI has set targets and sub-targets for domestic and foreign banks operating in India to lend to certain designated priority sectors that impact large sections of the population, weaker sections and sectors that are employment-intensive such as agriculture, and small enterprises. The target for total priority sector loans for domestic banks is 40.00% of their adjusted net bank credit and 32.00% for foreign banks. Since we operate predominantly in rural and semi-urban areas, a portion of our lending historically met the priority sector requirements of RBI. Investments by banks in securitized assets, representing loans to various categories of priority sector, outright purchases of any loan asset eligible

to be categorised under priority sector, and investments by banks in Inter Bank Participation Certificates (IBPCs), on a risk sharing basis, were different avenues by which banks can meet these priority sector lending targets. A recent notification issued by the RBI in February of this year, has stipulated that loans provided by NBFCs against gold jewellery for agriculture purposes (which is one of the categories of a priority sector advance under priority sector lending guidelines issued by RBI) would not be treated as priority sector loans/advances. Thus our loan portfolio is no longer classified as a priority sector advance by the RBI. This RBI notification therefore increases our cost of funds, which will adversely affect our results of operations going forward.

2. The RBI in its circular dated January 17, 2011 introduced provisioning for standard assets to create a financial buffer to protect NBFCs from the effects of economic downturns. Accordingly, NBFCs are required to make a general provision at 0.25% of the outstanding standard assets. This provisioning need not be netted from gross advances but shown separately as 'Contingent Provisions against Standard Assets' in the balance sheet. The general provisions on standard assets can be categorized as Tier II capital up to a maximum of 1.25% of total risk-weighted assets (taken together with other general provisions or loss reserves).

Except as stated above and elsewhere in this RHP, to our knowledge there is no development subsequent to November 30, 2010 which materially and adversely affect or are likely to affect, the operations or profitability of our Company, or the value of our assets or our ability to pay our material liabilities within the next twelve months.

93. By a letter dated September 09, 2010, the Superintendent of Central Excise and Service Tax, Service Tax D Range, Central Excise Bhavan, Kaloor, Cochin, forwarded copies of three audit enquiries raised by the Comptroller and Auditors General's audit party regarding three instances of alleged non payment of service tax for the period from 2007-08 to 2009-10 and required the Company to pay service tax as per the audit enquiry. The first audit enquiry regarding alleged non payment of service tax in respect of services received abroad, states that the Company has paid an amount of ` 9,800,000 to Muthoot Marketing Services Private Limited, Karama, Dubai and ` 6,557,239 to Muthoot Global Transfers Private Limited, London, United Kingdom, in foreign currency as business promotion expenses and as per Rule 4 of the Taxation services (Provided from outside India and received in India) Rule, 2006, the Company as service recipient, is liable to pay service tax amounting to ` 1,812,516. The second audit enquiry regarding non payment of interest on CENVAT credit reversed, states that the Company has reversed CENVAT credit mistakenly availed by the Company but has not paid interest on the reversal of the CENVAT credit wrongly availed and that an amount of ` 881,728 is due as interest towards the reversal of the CENVAT credit wrongly availed by the Company. The third audit enquiry states that the Company has not paid any service tax in relation to the bilateral assignment transactions of loan receivables with ICICI Bank for the years 2007-08 to 2009-10 for a total transaction amount of ` 736,321,815 and recommends that the matter may be enquired in detail by the department. The Company has replied to the letter dated September 09, 2010 on October 26, 2010 and in relation to the first audit enquiry contends that the Company has not received any services in India and that payments are made for services received outside India and Section 66(A) of the Finance Act and Rule 4 of the Taxation of Services (Provided from outside India and received in India) Rules 2006, only provides for payment of service tax for services rendered from outside India but received in India. In relation to the second audit enquiry the Company contends that the Company has paid interest on the CENVAT credit wrongly availed on May 29, 2009 itself on discovering the error in not paying the interest amount and a total amount of ` 810,552 has been paid as interest on May 29, 2009. In relation to the third audit enquiry, the Company contends that there exists no service provider service receiver relationship between the Company and ICICI Bank and that the transaction is a pure financial transaction of future receivables securitizations. The difference in the amount between the principal and amount received on receivables securitization realised by the Company represents the interest component and the same is exempted from levy of service tax. The Company further contends that there is a separate agreement for collection agent services between the Company and ICICI Bank where the Company pays service tax on the service rendered by the Company under the category of Business Auxiliary Services. The Company has also obtained a legal opinion on the applicability of service tax to securitization transactions from B. Venugopal, Advocate and has enclosed the opinion

with the response of the Company to the Superintendent of Central Excise and Service Tax. There has been no further development in the matter.

The lease had expired on March 31, 2010 and the Company intimated Remavathy for renewal of the lease for a further term with an enhancement of 10% of the rent payable. However Remavathy has claimed an amount of ` 15 per square feet of the leased premises for the renewal of the lease. The Company claims that the Company repeatedly demanded

OTHER INSTRUCTIONS

Joint Bids in case of Individuals

Bids may be made in single or joint names (not more than three). In the case of joint Bids, all refund payments will be made in favour of the Bidder whose name appears first in the Bid cum Application Form/ASBA Form or Revision Form/ASBA Revision Form. All communications will be addressed to the First Bidder and will be dispatched to his or her address as per the Demographic Details received from the Depository.

Multiple Bids

A Bidder should submit only one Bid (and not more than one) for the total number of Equity Shares required. In this regard, all Bids will be checked for common PAN as per Depository records and all such bids will be treated as multiple bids and are liable to be rejected.

In case of a Mutual Fund, a separate Bid can be made in respect of each scheme of the Mutual Fund registered with SEBI and such Bids in respect of more than one scheme of the Mutual Fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made. Bids by QIBs under the Anchor Investor Portion and QIB Portion (excluding Anchor Investor Portion) will not be considered as multiple Bids.

After submitting a bid using an ASBA Form either in physical or electronic mode, where such ASBA Bid has been submitted to the SCSBs and uploaded with the Stock Exchanges, an ASBA Bidder cannot Bid, either in physical or electronic mode, whether on another ASBA Form, to either the same or another Designated Branch of the SCSB, or on a Bid cum Application Form. Submission of a second Bid in such manner will be deemed a multiple Bid and would be rejected either before entering the Bid into the electronic Bidding system or at any point of time prior to the allocation or Allotment of Equity Shares in the Issue. However, ASBA Bidders may revise their Bids through the Revision Form, the procedure for which is described in "Issue Procedure – Build Up of the Book and Revision of Bids".

More than one ASBA Bidder may Bid for Equity Shares using the same ASBA Account, provided that the SCSBs will not accept a total of more than five ASBA Forms with respect to any single ASBA Account.

Duplicate copies of ASBA Forms downloaded and printed from the website of the Stock Exchanges bearing the same application number are liable to be rejected.

The procedures which would be followed by the Registrar to the Issue to detect multiple Bids are provided below.

- All Bids will be checked for common PAN as per the records of Depository. For Bidders other than Mutual Funds and FII sub-accounts, Bids bearing the same PAN will be treated as multiple Bids and will be rejected.
- For Bids from Mutual Funds and FII sub-accounts, which were submitted under the same PAN, as well as Bids on behalf of the Central or State Government, an official liquidator or receiver appointed by a court and residents of Sikkim, for whom the submission of PAN is not mandatory, the Bids were scrutinised for DP ID and Beneficiary Account Numbers. In case such Bids bore the same DP ID and Beneficiary Account Numbers, these were treated as multiple Bids and were rejected.

Permanent Account Number or PAN

Except for Bids by or on behalf of the Central or State Government, residents of Sikkim and the officials appointed by the courts, the Bidders, or in the case of a Bid in joint names, each of the Bidders, should mention his/her PAN allotted under the I.T. Act. In accordance with the SEBI ICDR Regulations, the PAN would be the sole identification number for participants transacting in the securities market, irrespective of the amount of transaction. The exemption to residents of Sikkim is subject to the Depository Participants verifying the veracity of the claim of the investors that they are residents of Sikkim by collecting sufficient documentary evidence in support of their claims. At the time of ascertaining the validity of these Bids, the Registrar will check under the Depository records for the appropriate description under the PAN field and whether the PAN has been enabled.

Any Bid cum Application Form or ASBA Form without the PAN is liable to be rejected. It is to be specifically noted that Bidders should not submit the GIR number instead of the PAN, as the Bid is liable to be rejected on this ground.

If that number is lower than 0.5, it will be rounded off to the lower whole number. Allotment to all Bidders in such categories shall be arrived at after such rounding off.
- (e) In all Bids where the proportionate Allotment is less than • Equity Shares per Bidder, the Allotment shall be made as follows:
 - Each successful Bidder shall be Allotted a minimum of • Equity Shares; and
 - The successful Bidders out of the total Bidders for a portion shall be determined by the drawing of lots in a manner such that the total number of Equity Shares Allotted in that category is as far as possible equal to the number of Equity Shares calculated in accordance with (c) above; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that portion, the remaining Equity Shares available for Allotment shall be first adjusted against any other category, where the Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of GoI and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

By way of Circular No. 53 dated December 17, 2003, the RBI has permitted FIIs to subscribe to shares of an Indian company in a public offer without the prior approval of the RBI, so long as the price of the equity shares to be issued is not less than the price at which the equity shares are issued to residents.

Transfers of equity shares previously required the prior approval of the FIPB. However, vide a RBI circular dated October 4, 2004 issued by the RBI, the transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (FDI) Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 1997 (ii) the non-resident shareholding is within the sectoral limits under the FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the US Securities Act of 1933 (the “**Securities Act**”) or any state securities laws in the United States and may not be offered or sold within the United States or to, or for the account or benefit of, “U.S. persons” (as defined in Regulation S under the Securities Act), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. Accordingly, the Equity Shares are only being offered and sold (i) in the United States to “qualified institutional buyers”, as defined in Rule 144A of the Securities Act in transactions exempt from the registration requirements of the Securities Act, and (ii) outside the United States to certain persons in offshore transactions in compliance with Regulation S under the Securities Act.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Bidders. Our Company, the BRLMs and the CBRLM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Red Herring Prospectus. Bidders are advised to make their independent investigations and ensure that the number of Equity Shares Bid for do not exceed the applicable limits under laws or regulations.

ANNEX 1: IPO GRADING REPORT – ICRA LIMITED

ICRA has assigned an ‘IPO Grade 4’, indicating above-average fundamentals to the proposed Initial Public Offering of Muthoot Finance Limited (MFL). ICRA assigns an IPO grading on a scale of IPO Grade 5 through IPO Grade 1, with Grade 5 indicating ‘strong fundamentals’ and Grade 1 indicating ‘poor fundamentals’. Muthoot Finance Limited (MFL) proposes to launch an Initial Public Offering (IPO) through an issue of 5.15 crore equity shares with a face value ₹ 10 with a premium that will be determined through a book-building process. The offers will constitute 13.85% of the fully diluted, post-issue, paid-up equity share capital of the company. Following the IPO, the shareholding of the promoters of the company will reduce from 93% to 80.12%. The offer would be made through the 100% book-building route. Of the net offer, 50% is reserved for Qualified Institutional Buyers (QIBs) while 15% and 35%, respectively, are reserved for non-institutional investors and retail investors. Post the IPO, the shares will be listed on the National Stock Exchange (NSE) and the Bombay Stock Exchange (BSE). The objective of the offer is to augment the capital base of MFL in order to support its capital requirements arising out of anticipated growth in assets and for also compliance with regulatory capital adequacy requirements.

The above-average fundamental grading factors in the high growth prospects of MFL in the niche loan against gold ornament segment, wherein the scope for expansion is significant in view of the large holdings of gold ornaments by households and relative under-penetrated market. MFL is well-positioned to leverage the robust growth potential in the segment on the back of its strong market knowledge; well-established systems and processes and good track record in scaling up operations while maintaining a tight control on asset quality and sustaining good profitability. The company has expanded its branch network from 551 branches to 1605 branches over the last three years ending March 31, 2010, resulting in a portfolio CAGR of 73%. During the same period, credit losses on gold loans have been minimal. In FY 2010, credit losses were at ₹ 0.67 crore or less than 0.01% of average managed advances, thus supporting a healthy return on equity (RoE) of 48%. Strong growth in portfolio has been facilitated by investments towards expansion of branch network in traditional loan against gold ornaments geographies, that is, southern India as well as the relatively under-tapped new geographies in northern India. MFL’s large and geographically spread branch network (numbering 2038 in September 2010) and its ability to provide a higher level of service viz.a.viz banks with respect to quicker disbursement , turnaround time and higher advance rates per gram (Loan to value ratios) are competitive factors in its favor. At the same time, MFL is exposed to adverse movements in gold prices and operational risks associated with the gold loan segment. Nevertheless, MFL has strong and established risk management, internal audit, monitoring and surveillance systems to mitigate any risks; and has been able to maintain good control over operations and asset quality while growing at a robust pace. Nevertheless, the company operates a mono-line business model and is, therefore, exposed to concentration risks. MFL enjoys good financial flexibility and raises funds at relatively competitive rates from banks and institutional investors. MFL enjoys the high credit ratings of LAA- and A1+ from ICRA, which support its ability to raise funds at competitive rates. Furthermore, the strong franchise and the group’s long track record in Kerala enable MFL to tap retail funding sources (accounting for about 33% of total funding in September 2010). Roll over rates on retail borrowings have historically been high, thus supporting the liquidity profile of the company. With the augmentation of the company’s capital base through its proposed IPO, MFL should be in a position to leverage the same to expand its portfolio. As on December 2010, the capital adequacy of MFL was at 15.19% (Tier 1 of 10.69%). The company raises subordinate debt (which classifies as Tier 2 capital, subject to a maximum of 50% of Tier I capital) placed primarily to its retail investors. MFL currently has limited headroom to raise additional Tier 2 capital in the form of subordinate debt but has headroom (of ₹ 590 Crore) to raise Tier 2 capital in the form of preference shares to meet its regulatory capital adequacy requirements of 15% (with effect from March 2011). ICRA expects fresh equity mobilised through the proposed IPO to create additional headroom for MFL to raise Tier 2 capital, thereby expanding its capacity to lend. The company enjoys a strong earnings profile (PAT/ Avg. Net worth of 48.90% and PAT/ Avg. Managed Assets of 3.76% in September 2010) on the back of its healthy gross interest spreads and low credit costs. ICRA has also taken note of the RBI notification of February 2011, which removes the eligibility of gold loans sourced by NBFCs from classification as agriculture advances. Consequently, the incremental cost of funding to MFL from banks could increase, as the existing bank borrowings availed under the agriculture classification get converted to higher-cost (by around 100-150 bps) non-agriculture limits. Nevertheless, ICRA expects the company’s access to banking credit to remain healthy and facilitate portfolio growth. As on December 31, 2010, around 37% of the total assets of MFL were funded out of banking limits (including assignment portfolios) classified as agriculture lending. As a result, the incremental net interest margins could come down to the extent of around 50 bps. Nevertheless, ICRA expects interest margins of the company to remain healthy, which along with improving operating efficiencies should enable MFL to maintain a healthy earnings profile and returns to shareholders.

However, the company remains exposed to an event risk- 'Kerala Money Lender's Act' (KML), which empowers the state government to regulate lending rates of money lenders operating in the state and requires money lenders to register branches with the state authorities apart from other things. The matter is subjudice at the Supreme Court. Any adverse ruling in this case could impact the growth prospects of the company in the state of Kerala, which accounts for around 16% of its portfolio as on September 30, 2010. However, the impact on asset quality may not be significant as the company can auction the pledged gold ornaments.

As on September 30, 2010 MFL's credit portfolio was ` 11,550 crore out of which 99% was in the form of loans against gold and the balance in loans against Non Convertible Debentures issued by MFL. The company's branch network is spread across 21 states and four union territories. Gold loans traditionally have been prominent in South India as a means to raise immediate short term funding by pledging of household gold ornaments. Average ticket sizes in the segment are low at ~` 30,580 for MFL in Sep-10. While the gold loans have a contractual maturity of 12 months these are pre-closed and an estimated 75% of the portfolio is re-paid within 4 months. Given the popularity of the product in South India 75% of the company's portfolio and 69% of branches in Sep-10 were in the South. MFL however has over the past few years focussed on expanding outside the south and the share of portfolio of the company from these states has increased to 25% in Sep-10 against 16% in Mar-07. Going forward the company is expected to continue to expand the scale of its operations by leveraging its existing branches and also by increasing its geographic penetration.

Although the company is a non-deposit accepting NBFC, it does accept retail debentures (not considered as public deposits), which accounted for close to 33% of the company's total funding as on September 30, 2010.

As on December 31, 2010, the promoters of MFL held a 93% stake in the company. The promoters diluted their stake from 100%, following issue of fresh shares to the extent of 6% of their shareholding during H1, 2011 to private equity investors- Matrix Partners, Baring India Private Equity, Kotak India Private Equity, Kotak Investment Advisors Limited and the Wellcome Trust Limited. Subsequently the promoters sold 1% of their shareholding to the Wellcome Trust Limited. As on December 31, 2010, the company had a capital adequacy of 15.19% and a Tier 1 Capital of 10.69%. MFL for the financial year ended March 31, 2010 reported a PAT of ` 227.6 Crore on a managed asset base of ` 8451 Crore as compared to a PAT of ` 97.7 Crore on a managed asset base of ` 4578 Crore during the previous financial year. During the half year ended September 30, 2010, MFL registered a 167% y-o-y growth in PAT to ` 198 Crore as compared with ` 74 Crore during the corresponding period in the previous financial year.

Strengths

- Strong franchise and leading market position of the company in the niche gold loan segment in the southern Indian States of Kerala, Tamil Nadu, Andhra Pradesh and Karnataka
- Large branch network and focus on increasing penetration in new geographies to support the company in tapping the growth potential arising on account of large holdings of gold ornaments by Indian households
- Good appraisal and market knowledge, collection and risk management systems have enabled the company to maintain robust pace of expansion while maintaining good control over operations
- Demonstrated ability to generate good risk adjusted returns (PAT/ Net worth of 48.9%); although this could come down with decline in leveraging level (currently 10.46 times⁴) following the public offering of the company; over the medium term, MFL should be in a position to maintain good return on net worth
- Good financial flexibility to grow portfolio with access to funding through banks and institutional investors; MFL enjoys high credit ratings (of LAA- and A1+ by ICRA), which should enable it to raise funding at competitive rates. Furthermore, the company enjoys access to funding through retail sources on account of healthy franchise in southern India
- Comfortable liquidity position with a well-matched, asset-liability position

Challenges

- Mono-line business model resulting in limited revenue diversification; fee income accounts for only 0.83% of the total income of the company
- Business model exposed to adverse movement of gold prices and a marginal borrower profile; however, the company has been able to mitigate the risks so far through active monitoring of the portfolio and through auctioning of ornaments of overdue contracts
- Higher operational risks associated with the large volume of transactions involving cash and gold jewellery; these risks, however, are partly mitigated by MFL's good internal control and audit functions
- Portfolio interest spreads of MFL could get impacted as competitive pressures from banks and other NBFCs increases. Furthermore interest spreads could also be impacted with an increase in bank funding costs (estimated at 100-150 bp) following RBI's notification which removed agriculture classification for Gold Loans originated by NBFCs; however the overall interest spreads of MFL are expected to remain at healthy levels, which along with improving operating efficiencies should enable MFL to maintain a healthy earnings profile and shareholder returns.
- The company is exposed to regulatory risks with respect to state government statutes on money lending activities. Any adverse regulatory rulings would impact growth prospects of the company

Grading Rationale

The above-average fundamental 'IPO Grade 4' factors in the high growth prospects of MFL in the niche loan against gold ornament segment, wherein the scope for expansion is significant in view of the large holdings of gold ornaments by households and relative under-penetrated market. MFL is well-positioned to leverage the robust growth potential in the segment on the back of its strong market knowledge; well-established systems and processes and good track record in scaling up operations while maintaining a tight control on asset quality and sustaining good profitability. The company has expanded its branch network from 551 branches to 1605 branches over the last three years ending March 31, 2010, resulting in a portfolio CAGR of 73%. During the same period, credit losses on gold loans have been minimal. In FY 2010, credit losses were at Rs. 0.67 crore or less than 0.01% of average managed advances, thus supporting a healthy return on equity (RoE) of 48%. Strong growth in portfolio has been facilitated by investments towards expansion of branch network in traditional loan against gold ornaments geographies, that is, southern India as well as the relatively under-tapped new geographies in northern India. MFL's large and geographically spread branch network (numbering 2038 in September 2010) and its ability to provide a higher level of service viz.a.viz banks with respect to quicker disbursement , turnaround time and higher advance rates per gram (Loan to value ratios) are competitive factors in its favor. At the same time, MFL is exposed to adverse movements in gold prices and operational risks associated with the gold loan segment. Nevertheless, MFL has strong and established risk management, internal audit, monitoring and surveillance systems to mitigate any risks; and has been able to maintain good control over operations and asset quality while growing at a robust pace. Nevertheless, the company operates a mono-line business model and is, therefore, exposed to concentration risks. MFL enjoys good financial flexibility and raises funds at relatively competitive rates from banks and institutional investors. MFL enjoys the high credit

ratings of LAA- and A1+ from ICRA, which support its ability to raise funds at competitive rates. Furthermore, the strong franchise and the group's long track record in Kerala enable MFL to tap retail funding sources (accounting for about 33% of total funding in September 2010). Roll over rates on retail borrowings have historically been high, thus supporting the liquidity profile of the company. With the augmentation of the company's capital base through its proposed IPO, MFL should be in a position to leverage the same to expand its portfolio. As on December 2010, the capital adequacy of MFL was at 15.19% (Tier 1 of 10.69%). The company raises subordinate debt (which classifies as Tier 2 capital, subject to a maximum of 50% of Tier 1 capital) placed primarily to its retail investors. MFL currently has limited headroom to raise additional Tier 2 capital in the form of subordinate debt but has headroom (of Rs. 590 Crore) to raise Tier 2 capital in the form of preference shares to meet its regulatory capital adequacy requirements of 15% (with effect from March 2011). ICRA expects fresh equity mobilised through the proposed IPO to create additional headroom for MFL to raise Tier 2 capital, thereby expanding its capacity to lend. The company enjoys a strong earnings profile (PAT/ Avg. Net worth of 48.90% and PAT/ Avg. Managed Assets of 3.76% in September 2010) on the back of its healthy gross interest spreads and low credit costs. ICRA has also taken note of the RBI notification of February 2011, which removes the eligibility of gold loans sourced by NBFCs from classification as agriculture advances. Consequently, the incremental cost of funding to MFL from banks could increase, as the existing bank borrowings availed under the agriculture classification get converted to higher-cost (by around 100-150 bps) non-agriculture limits. Nevertheless, ICRA expects the company's access to banking credit to remain healthy and facilitate portfolio growth. As on December 31, 2010, around 37% of the total assets of MFL were funded out of banking limits (including assignment portfolios) classified as agriculture lending. As a result, the incremental net interest margins could come down to the extent of around 50 bps. Nevertheless, ICRA expects interest margins of the company to remain healthy, which along with improving operating efficiencies should enable MFL to maintain a healthy earnings profile and returns to shareholders.

Promoters and Management

MFL is closely held by the promoters and family members of the Muthoot family. As on December 31, 2010, the promoters owned a 93% stake in the company; this stake would come down to 80.12%, following MFL's IPO. The promoter's family has been engaged in the gold loan business since 1939 and has strong knowledge, experience and understanding of the market.

The Managing Director of the company, Mr. George Alexander Muthoot, is closely involved in the operations of the company and has strong knowledge and understanding of the market. Under the current Managing Director, MFL registered a strong portfolio and managed a geographic expansion. The Executive Director of MFL, Mr. Padmakumar joined the company in March 2005 after retiring as the Chairman and Managing Director of Federal Bank. Mr. Padmakumar has 36 years of experience in commercial banking.

Corporate Governance

The Board of Directors of MFL currently has 8 Directors (including 4 independent directors and 4 promoter directors) and is in compliance with the requirements of Clause 49 of the Listing Agreement, that is, (i) not less than 50% constituted by non-executive Directors and (ii) at least 50% constituted by Independent Directors. The Chairman of the Board is Mr. M.G. George Muthoot, who is from the promoter's family. Independent directors include Mr. George Joseph (former Chairman and Managing Director of Syndicate Bank) and Mr. K. John Mathew (Retd. Judge of the Kerala High Court).

The Board of Directors of the company meets once a quarter for review of performance and to consider any other business related matters.

Compliance and Litigation

Accounting Policy: The financial statements of MFL are prepared on accrual basis, following the historical cost convention in accordance with the generally accepted accounting principles.

Litigation: There are 32 civil proceedings and 15 consumer complaints filed against MFL. These cases are pending before various forums in respect of approx. Rs. 9 lakhs. Such proceedings primarily pertain to customers seeking permanent injunction against MFL from disposing pledged ornaments against overdue loans availed by them.

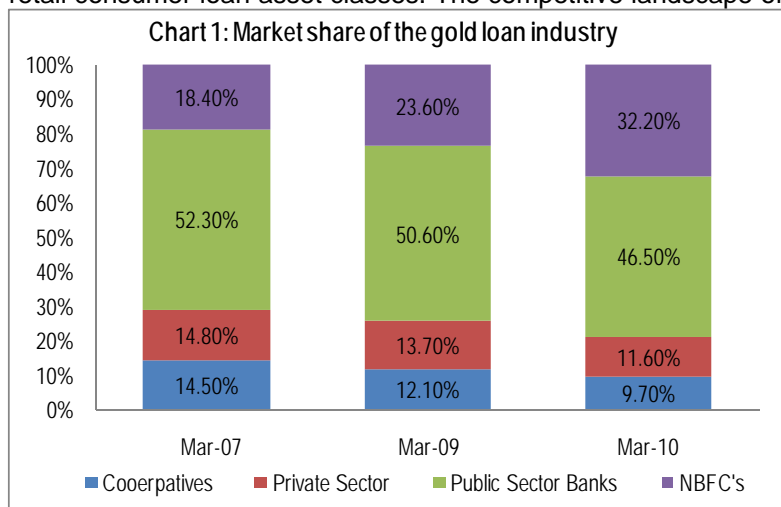

MFL has been issued show cause notices from the Government Authorities of Kerala and Gujarat in relation to compliance with relevant money lending statutes issued by the respective State governments. Please refer to Page 7 for more information on the same.

Business and Competitive Position

MFL has an established track record in the niche Gold loan segment, and has a gold loan portfolio of Rs. 11,550 crore as on September 30 2010. The Muthoot Group enjoys strong market knowledge and a good franchise in southern India on the back of significant experience of the promoters of the Group since 1939. The growth of the company is also aided by the fact that gold loans are commonly a accepted form of financing amongst households in southern India. The gold loan asset class is characterised by small ticket size loans (average ticket size of around Rs. 30,600 for MFL) secured typically against gold ornaments. While the contractual tenure of the loan contract is 12 months, the loan tenure is typically around 3-4 months.

Strong growth prospects buoyed by large household gold holdings and specialisation of NBFCs in the segment

The participants in the organised gold loan market include public/private sector Banks, NBFCs and co-operatives as compared to other retail consumer loan asset classes. The competitive landscape of the gold loan segment is relatively fragmented on account of the specialised nature of business and underwriting skills required and the voluminous nature of transactions on account of smaller ticket sizes. Based on IMaCs report, the share of NBFCs in the gold loan segment has been steadily increasing from ~18% in Mar-07 to ~32% in Mar-10, while the share of public sector banks declined from ~52% to ~46% and private sector banks from ~15% to ~12%. NBFCs have gained market share during this

period as they leveraged their specialized knowledge of the segment while adopting a focused growth approach targeting semi-urban regions, where customers typically have lower access to financing. Furthermore NBFCs through quicker turn-around time; higher product flexibility and higher advance rate per gram (higher Loan to Value Ratios) have been able to register strong portfolio growth over the past few years.

As per IMaCs industry report the growth in the gold loan market size has been significant over the past few years- registering a three-year CAGR of ~43% for the period ended March 31, 2010 to around Rs. 35,000-Rs. 40,000 crore. During this period, growth in NBFCs was much higher at 72% while the portfolio of MFL grew at a three-year CAGR of 73%. Going forward future market size growth prospects are expected to remain significant. The private gold holdings of Indian households are significant- as per the world gold council, the stock of gold holdings (net of central bank gold stock) is around 17,500 tons⁵, against which the market value would as of March 2010 be around Rs. 27,40,000 crore. This translates into a market penetration of only 1.3%, which leaves substantial scope for future expansion.

Competitive positioning of MFL supported by its strong franchise in southern India as well as a large and geographically diversified branch network

As on September 30, 2010, the credit portfolio of MFL stood at Rs. 11,550 Crore out of which 99% was in the form of loans against gold and the balance in the form of loans against MFL's own Non-Convertible Debentures. The Muthoot Group has been engaged in the gold loan segment since 1939 and enjoys a strong franchise particularly in the four southern Indian States (of Kerala, Karnataka, Andhra Pradesh and Karnataka), where gold loans are an accepted form of financing. MFL has expanded its portfolio at a three-year CAGR of 73% on the back of its strong franchise and increasing popularity of the product within and outside South India

The strong pace of expansion of the portfolio of MFL has been supported over the past few years by a robust augmentation of its branch network to 2038 branches in September 2010 from 707 branches in March 2008. MFL has the largest branch network amongst the NBFCs operating in the gold loan space. The company has taken concerted efforts to increase its penetration in the four southern India and also expand its presence in new geographies in northern and western India. As on September 30, 2010, MFL had a branch presence in 25 states across the country and has been able to diversify its geographic spread with the proportion of advances and branches outside South India increasing to 25% and 31%, respectively, in September 2010 from 18% and 9%, respectively, in March 2008. Strong and widespread branch network puts MFL in a good position to tap the huge growth potential in the gold loan segment.

Strong market knowledge, good appraisal and risk management systems have supported MFL in managing growth

The gold loan business is inherently safe as compared to other financing businesses as the security (gold ornament) pledged is in possession with the financier. However, the product is exposed to the risk of a sharp and sustained decline in the price of gold, leading to decrease in the value of the security and the risk of incorrect assessment of gold purity at the branch level. While MFL does lend at incremental LTVs ranging from 60-90% (average LTV of around 70%), it has put in place the following mitigants and processes so as to maintain good control over operations while pursuing robust expansion in the scale of its operations.

a) Tracking of the Value of Contracts and Auctioning Policy

The company's track record of collections in the gold loan segment has been good, and has been supported by good portfolio monitoring systems; borrower's sentimental attachment towards the pledged gold ornaments and rising gold prices. The company monitors the market value of the outstanding security against each of its contracts; and has the option to auction gold ornaments in case borrowers fail to repay their loans. The following are the details of auctions of the company:

Table 4: Auctioning of gold ornaments by MFL

As can be seen from the above table, MFL auctioned loan contracts with principal outstanding aggregating to around 2.8% of its portfolio. MFL has not incurred any loss on auction of gold ornaments during this period. Furthermore, on account of the above reasons, the overall delinquency of the portfolio of MFL has remained at manageable levels.

b) Internal Audit

The internal audit team of the company consists of 500 members and is spread out in different locations. The company conducts regular audits of branches to check the efficacy of the gold assessment quality of the branches and other operational processes of the branches.

c) *Insurance and Surveillance*

MFL is exposed to operational risks, as its transactions mainly involve gold jewellery and cash. MFL maintains its gold ornaments in strong rooms that are insured against fire, theft and employees frauds. The company is also in the process of rolling out the installation of CCTV across its branch network in order to reduce the risk of theft.

Applicability of State Government regulations could affect the growth prospects of MFL

MFL has been issued show cause notices from the Government Authorities of Kerala and Gujarat in relation to compliance with relevant money lending statutes issued by the respective State governments. In the case of the State of Kerala, Kerala Money Lender's Act (KML), apart from other things, empowers the State Government to regulate lending rates of money lenders operating in the State and requires money lenders to register their branches with the State authorities. Issue of applicability of the KML Act to NBFCs (including MFL) is sub-judice at the Supreme Court and any ruling that requires NBFCs to comply with the KML Act could have an adverse impact on the earnings and growth prospects of the company in the State of Kerala, which accounted for around 16% of its portfolio as on September 30, 2010. Nevertheless, the impact on asset quality may not be significant, as the company can auction the gold ornaments.

MFL has been able to leverage the strong demand for gold loans and grow its portfolio on account of its healthy access to funding. MFL enjoys strong banking relationships availing credit and assignment sanction limits from 19 banks, aggregating to Rs. 8000 crore. The company also enjoys high credit ratings of LAA- and A1+, which supports its ability to raise funds at relatively competitive rates.

Furthermore, MFL enjoys a strong franchise in Kerala and is, therefore, able to raise funding through retail debentures/ NCDs, which account for 33% of total funding for MFL. The roll over rates of retail NCDs have historically been fairly high, which bring stability to the funding profile of the company.

Impact of RBI's notification removing agriculture classification from Gold Loans sourced by NBFCs

The Reserve Bank of India (RBI), through its notification dated February 2, 2011, has clarified that banks can no longer consider loan against gold sourced by NBFCs as agricultural advances. Furthermore, banks are no longer permitted to treat investments in securitised pools and portfolios purchased through assignment of 'loan against gold jewellery receivables' originated by NBFCs as agriculture advances. MFL has in the past been raising a part of its bank funding at competitive rates,

as such loans were being considered under agriculture lending classification. However as a consequence of this notification incremental cost of funding to MFL from banks could increase, as existing bank borrowings availed under the agriculture classification get converted to higher costing (by around 100-150 bps) non agriculture borrowings. Nevertheless, ICRA expects the company's access to banking credit to remain healthy and thus facilitate portfolio growth. As of December 2010, around 37% of the total assets of MFL were funded out of banking limits (including assignment portfolios) classified as agriculture lending; as a result, incremental net interest margins could come down to the extent of around 50 bps. Nevertheless, ICRA expects the earnings profile and returns to shareholders of MFL to remain at healthy levels on the back of improving operating efficiencies.

Impact of RBI's draft guidelines on securitization transactions

In June 2010, the Reserve Bank of India (RBI) came out with draft guidelines with respect to minimum holding period required for securitised portfolios. Under these proposed guidelines, issuers would be required to hold loans (with contractual maturity of upto 24 months and with a bullet repayment) for a minimum period of 12 months before becoming eligible to be securitised.

While Gold loan offered by MFL have a contractual maturity of 12 months and have a bullet repayment schedule, MFL has so far availed funding through bilateral assignments (instead of through securitization), which currently do not come under the purview of this draft guideline and RBI's earlier regulations with respect to securitization transactions. However if the final guidelines were to apply to MFL's gold loan assignment transactions, its access to funding through this source would be restricted. As on September 30, 2010 around 23% of MFL's total funding was through the assignment route. In such a case company however should be in a position to tap funding through traditional lines of credit from banks although these may be at a higher cost higher than assignment funding. ICRA however expects MFL to continue to maintain good profitability in such a scenario.

Healthy capitalisation and headroom to augment Tier 2 provides scope to maintain capitalisation levels while improving shareholder returns

MFL has a good track record of raising capital to meet regulatory capital requirements while pursuing a robust portfolio expansion. In H1 2011 the company raised Rs. 256 Crore through issue of fresh equity to private equity investors. With the augmentation of the company's capital base through its proposed IPO, MFL should be in a position to leverage the same to expand its portfolio while meeting regulatory capital adequacy requirements over the medium term. As of December 2010, the capital adequacy of MFL was at 15.19% (Tier 1 of 10.69%). The company raises subordinate debt (which classifies as Tier 2 capital, subject to a maximum of 50% of Tier I capital) placed primarily to its retail investors. While MFL now has a limited headroom to raise additional Tier 2 capital in the form of subordinate debt, it has headroom (of Rs. 590 Crore) to raise Tier 2 capital in the form of preference shares to meet its regulatory capital adequacy requirements of 15% (with effect from March 2011). ICRA expects fresh equity mobilised through the proposed IPO to create additional headroom for MFL to raise Tier 2 capital, and thereby expand its capacity to lend.

Mono-line business model results in limited revenue diversification

MFL has a mono-line business model focussed almost entirely on the gold loan segment and has limited revenue diversification. MFL is, therefore, exposed to concentration risks because its revenue profile is almost entirely dependent on interest income with limited income through fee-based sources. MFL acts as a payment agent for several companies towards foreign inward remittance for personal purposes under the Money Transfer Service Scheme (MTSS) and has been appointed as a distributor for the New Pension Scheme (NPS). However, its overall contribution from such sources is limited. ICRA takes into account the fact that fee income accounted for only 0.83% of the total income or 0.14% of average managed assets of MFL in H1, FY 2011.

- The return on net worth (RoNW) of MFL is very healthy at 48.90% as of September 2010 on the back of good profitability of MFL and its ability to maintain regulatory capitalisation by raising Tier 2 debt. While the return on equity (RoE) of MFL would come down post the IPO, ICRA expects MFL to be able to maintain its return on net worth at around 35% over the medium term.
- The yield on advances of MFL declined in H1, FY 2011, as the company launched a low IRR scheme during the period with the intention of increasing its customer base. As a result, the lending spreads of the company declined to 8.47% in September 2010 from 8.74% in March 2010. However, disbursements under this scheme have been brought down incrementally since H2, FY 2011 and the company is expected to expand in higher yielding schemes. However, ICRA expects incremental interest spreads of MFL to come down, following the notification of the RBI which clarifies that banks can no longer consider their exposures backed by gold loans originated by NBFCs as agricultural advances. As a result, the incremental cost of banking funding of MFL is expected to increase by 100-150 basis points (bps). Nevertheless, in light of the high credit ratings (of LAA- and A1+ assigned by ICRA), MFL is expected to be able to raise funding at relatively competitive rates from institutional investors and banks. While competitive pressures in the gold loan segment are likely to increase over the medium term, ICRA expects the lending spreads of MFL to remain at healthy levels.
- MFL added 620 and 433 branches, respectively, in FY 2010 and H1, FY 2011. However, the operating expenses of the company as percent of AMA declined to 4.10% in March 2010 and further to 3.64% in September 2010 from 4.43% in March 2009, as it has been able to increase its portfolio per branch to Rs. 5.69 Crore in September 2010 from around Rs. 3.42 Crore in March 2009. ICRA expects MFL to continue to benefit from cost efficiencies, as it leverages its branch network further.

- The provisions & write-offs of MFL have been insignificant in the past because of rising gold prices, good appraisal, collections and risk management systems.

In FY 2010 ended March 31 2010, MFL reported a profit after tax (PAT) of Rs. 227.6 Crore on a managed asset base of Rs. 8451 Crore as compared to a PAT of Rs. 97.7 Crore on a managed asset base of Rs. 4578 Crore in FY 2009. During the half-year ended September 30,2010, MFL registered a 167% y-o-y growth in PAT to Rs. 198 Crore as compared with Rs. 74 Crore during the corresponding period in the previous financial year.

ANNEX 2: IPO GRADING REPORT – CRISIL LIMITED

[APPENDED OVERLEAF]

Muthoot Finance Limited

CRISIL IPO Grade 4/5 (Above average)

March 09, 2011

Grading summary

CRISIL has assigned a CRISIL IPO grade of '**4/5**' (pronounced "four on five") to the proposed IPO of Muthoot Finance Ltd (Muthoot Finance). This grade indicates that the fundamentals of the IPO are **above average** relative to other listed equity securities in India. However, this grade is not an opinion on whether the issue price is appropriate in relation to the issue fundamentals. The grade is not a recommendation to buy, sell or hold the graded instrument, its future market price or suitability for a particular investor.

The assigned grade reflects Muthoot Finance's leadership position in the gold financing business in terms of assets under management (AUM) backed by a wide branch distribution network. The company enjoys a strong brand name especially in South India. A highly under-penetrated domestic market for loans against gold ornaments (LAG) and increasing market share of organised players augur well for Muthoot Finance. The promoters of the company have decades of experience in the industry and have shown the ability to manage aggressive expansion and growth in AUM. Additionally, Muthoot Finance's first-mover advantage in the non-southern regions of India will support its growth plans over the medium term. The company has shown the ability to maintain strong underwriting norms with a comfortable loan to value ratio (LTV). Further, emotional attachment of the customer to household ornaments has resulted in strong asset quality. The company has implemented robust operational systems and processes resulting in quick disbursement of loans, giving it a competitive edge over banks.

However, the grade is moderated by the company's dependence on a single line of business and concentration of business in southern India (~75% of AUM in FY10). Also, competition is expected to increase with the entrance of many players, which is expected to lower yields. A sharp drop in gold prices and restrictive measures by regulators may pose challenges and remain the key monitorables for the industry.

Muthoot Finance reported gross AUM of Rs 74 bn and PAT of Rs 2.3 bn on a total income of Rs 11 bn in FY10. The average yield on the AUMs during the same period was 19.9%. In FY10, while asset quality remained strong with gross NPA of only 0.46%, the capitalisation level was comfortable with a capital adequacy ratio of 14.8%.

It is primarily in the business of lending against household used gold jewellery to individuals. Muthoot Finance's operating history has evolved over a period of 70 years since Mr M George Muthoot (the father of the present promoters) founded a gold loan business in 1939 under the heritage of a trading business (under partnership firm) established by his father, Ninan Mathai Muthoot in 1887. In 2001, it received the NBFC licence from the RBI.

Detailed Grading Rationale

A. Business Prospects

- Under-penetration in domestic LAG industry indicates huge untapped potential***

The annual consumption of gold in India estimated at 65 tonnes in 1982 increased to ~700 tonnes in FY10, out of which 80% is for jewellery fabrication (source: Bureau of Indian Standards). India accounts for ~10% of the global gold stock. The overall gold pledged in India accounts for hardly 4.7%; 75% is pledged with local moneylenders and pawnbrokers who constitute the unorganised market. Fast growth recorded by organised players increased their market share to more than 25% in FY10. Huge untapped potential of loan against gold (LAG) along with a high share of unorganised players augur well for the organised LAG industry in India.

The strong growth in the organised LAG industry is supported by increasing inflation, secular bull run in gold prices (appreciated 268% during FY02-10) and an increase in the number of branches.

- Early-mover advantage, established track record and strong brand name***

Muthoot Finance has been in the gold loan financing business for nearly seven decades. An early entry in this business, not only in South India but also in other regions, has helped the company develop a strong brand image, wide distribution network (1,605 branches as of FY10) and AUM. The promoters' rich experience in the LAG business coupled with their execution capabilities enabled the company to scale up its operations significantly in recent years - AUM has grown at a four-year CAGR of 74% to Rs 74 bn in FY10.

- Niche and largest player in gold financing***

Muthoot Finance has emerged as the largest player in the niche business of gold financing, both in terms of AUM and distribution network. The company has grown its market share by 9 percentage points during FY07-FY10 (relatively largest increase, where other players have even lost market share) on account of its recognisable brand name, particularly in South India. Its growth was on the back of offering innovative schemes to cater to the needs of various customers.

- Strong systems and processes, quick disbursement**

Over the years, Muthoot Finance has developed specialised credit processes to appraise loans against gold, assess gold purity and monitor loans. The management has instilled strong processes and systems, and hired experienced personnel who understand the gold loan business because although a vast proportion of the processes are automated, faster and efficient distribution of loan depends on human assessment of gold. It employs in-house staff to appraise the gold and every employee acts as an appraiser which entails quick disbursement of loans. All branches are audited either weekly or monthly, and quality of gold pledged is verified randomly for fraud and negligence by employees. The end-to-end process from appraisal to disbursement is completed swiftly, which provides an edge over banks. The internal systems and processes have minimised the number of frauds and errors by employees.

- Strong asset quality; NPA around 0.46%**

Muthoot Finance has maintained strong asset quality supported by its comfortable loan-to-value (LTV) ratio at origination, robust systems and processes, and the highly secured nature of the LAG business. Strong underwriting standards have resulted in very low gross non-performing assets (NPA) of 0.46% for the company. Sentiment attached to the household ornament also support low NPA. Also, the ultimate losses have been lower; it has incurred credit losses lower than Rs 30 mn over the past seven years, out of cumulative disbursement of more than Rs 590 bn. Gold loan is provided on the basis of weight of the gold ornaments excluding cost of studded stones and making charges for the ornament which further lowers the LTV of the loan. Such factors along with sentiment attached to ornaments discourage customers from defaulting.

- Enjoys diverse resource profile**

Muthoot Finance has access to a diversified resource profile. As of FY10, it had a total debt outstanding of Rs 52 bn. Its established track record helps to mobilise funds from retail investors by issuing non convertible debentures (NCD) through its branches offering interest rates of 11-11.5%. As of FY10, NCD contributed 51% to its reported total borrowing.

- Growing and managing branch network outside the South**

Muthoot Finance is aggressively expanding its footprint outside the South, especially in northern and western India where it sees strong business opportunities. Over the past two-three years, its branch concentration in the southern market has reduced from 85% to around 70% in FY10. Overall, AUM per branch is slightly lower in the North. However, the same is expected to improve as awareness about LAG increases.

- Dependence on single line of business; concentration in southern India**

Muthoot Finance derives 98% of revenues from the gold loan business. Also, it is expected to remain concentrated in South India, which accounts for 75% of AUM for the short to medium term despite aggressive growth plans in the northern and western states.

- Intensifying competition to lower gold loan yields, thereby putting margin pressure**

With low entry barriers in the LAG industry, many players have entered this segment. With competition heating up in the LAG industry, CRISIL Equities expects the gold loan yields to reduce, especially of NBFC players, who charge relatively high interest rates compared to banks. This will result in pressure on NBFCs' net interest margins, thereby impacting their profitability.

- Sharp downside in gold prices a key monitorable**

A significant rise in gold prices along with the increase in loan requirement by customers has boosted Muthoot Finance's AUM. Any sharp fall in gold prices could pose challenges. However, Muthoot Finance has a comfortable LTV ratio in line with other gold financing NBFCs ranging from 70-80%, which helps it to combat the downside in gold prices. Also, the shorter tenure of gold loans (usually ranging from three to six months) offers flexibility of resetting the LTVs.

The maximum three-month and six-month downside risk based on the past 38 years' gold price movement is only 10% and 20% respectively, which provides a cushion based on the LTVs (70-80%). Our study based on the historical gold movement concludes that the probability of gold prices falling for more than 10% for the continuous three-month and six-month period is only 2% and 4%, respectively.

- Regulatory hitches can be a bottleneck**

The impact of the State Money Lenders Act for NBFCs, the decision on which is awaited from the Supreme Court, could not only adversely affect Muthoot Finance's lending rates but also increase its operational expenditure, given the requirements (under the act) of registering all establishments with state authorities and complying with state regulations. The decision of the Supreme Court regarding this issue remains a sensitive factor for the company. In addition, extension of regulatory restrictions on securitization to bilateral direct assignments being adopted by the company can be a hurdle. Also, any cap on interest rates can adversely affect the company's performance. We believe that RBI's recent directive for removal of priority sector lending (PSL) benefit available to commercial banks, under agriculture classification, for gold loans to (and assignment portfolios from) gold loan companies would adversely affect the company leading to an increase in borrowing cost and a moderation in return ratios.

- Potential risk of brand dilution**

Although Muthoot Finance is a strongly entrenched brand name in gold loan financing, the use of the moniker 'Muthoot' by other gold loan financiers, like Muthoot Fincorp, could create some confusion in the market and pose a risk for Muthoot Finance. However, both these companies, till date have been able to maintain their distinct brand identities.

B. Financial Performance

Muthoot Finance's AUM increased at a CAGR of 74% from Rs 8 bn in FY06 to Rs 74 bn in FY10 driven by a rise in pledged gold and a significant spurt in gold prices.

On the back of growth in AUM, interest income increased at a CAGR of 66% from Rs 1.4 bn in FY06 to Rs 10.8 bn in FY10. Profit after tax (PAT) improved from Rs 271 mn to Rs 2,276 mn in FY10. The adjusted EPS and adjusted book value of the company increased at a CAGR of 53% and 43% respectively over FY06-10. Gross NPAs have been contained to less than 0.5% in the past three years.

Muthoot Finance enjoys a strong capital to risk adjusted ratio (CRAR) of 15% which is in excess of the RBI's requirement of 12%. The company frequently sells its portfolio under bilateral direct assignments which also helps it keep its capital ratio strong. In 2010, the company raised Rs 2.5 bn from private equity players, which will help it shore up capital base and fund its growth.

C. Management Capabilities and Corporate Governance

- ***Strong capability of promoters***

Muthoot Finance is largely a promoter-driven company where the promoters belong to the same family. The current management is headed by third generation entrepreneurs. Several decades of experience of the promoters in the gold loan financing business, coupled with the company's strong processes and systems, has enabled it to scale up its operations significantly with AUM growing at a CAGR of 74% during FY06-10 and distribution network growing to 1,605 branches in FY10. Aged between 55-60 years, the promoters are fast approaching retirement. Hence, succession, especially from within the family, would be a key monitorable.

- ***Strong internal processes and systems***

Loan against gold is largely a process-driven industry. Employees mostly deal with gold and cash. The management has built in a robust internal system and processes by virtue of their years of experience in the loan against gold business. The focus has minimised number of frauds and errors by employees over the years.

- ***Fairly experienced second line of management***

The top management team is well supported by the second line of management who possess adequate qualifications and experience. Mr. K P Padmakumar, who is an executive director in the company, has more than 35 years of experience in the banking industry and is associated with the company for the past five years. Mr. K. R. Bijimon (chief general manager) has been with company since its inception.

- ***Experienced and reputed independent directors***

Muthoot Finance's board consists of eight members- four of them are the promoters and the rest are independent directors, as per the minimum requirements stipulated in the Securities and Exchange Board of India's (SEBI's) listing guidelines. The independent directors are professionals and industrialists with in-depth experience and knowledge. Out of the four independent directors, two have been associated with the company for three years while two have been appointed in July 2010.

- ***Compensation level of key management personnel is low***

The compensation level disclosed for key management personnel (KMP) appears low which can result in attrition. However, most of the senior people in the management have been associated with the company for a long time thereby minimising this risk.
