## INTERNAL RISK FACTORS

### 1. PROMOTERS ARE FIRST GENERATION ENTREPRENEURS

The company is promoted by first generation entrepreneurs in the food colour, dye intermediates industry

**MANAGEMENT PERCEPTION:** The Promoters Mr Bhagwandas K Patel, Mr Rameshbhai B Patel, Mr Dashrathbhai P Patel & Mr Shashikant P Patel has 15 years of experience each in the field of manufacturing, trading and export of various dye, intermediates and Food Colour Products & Mr Dixit B Patel is having an experience of 3 years in the field of Marketing of Dye Intermediates & Food Colour. Further the Company has also employed a team of professional with several years of relevant experience to look after day to day operation of the Company.

### 2. SUCCESS OF THE COMPANY DEPENDS ON SENIOR MANAGEMENT.

The Company's success on a large scale depends upon its senior management, Directors and key personnel and its ability to attract and retain them.

**MANAGEMENT PERCEPTION:** Our future performance will depend upon the continued services of senior management, Directors and key personnel. Qualified & experienced people are in demand, and in the light of paucity of talented manpower, salary expectations are growing faster than revenue growth & hence retaining key personnel and recruiting fresh talent will be the challenges the company will have to face.

### 3. COMPANY'S BUSINESS IS PRONE TO ACCIDENT.

Improper handling of dangerous materials in our business may result into accidents, which could create significant liabilities that would lower profits of the company. The Company handle explosive and combustible materials. If such materials are handled incorrectly or are subjected to unsuitable conditions then they could harm employees of the company, other persons and the environment and cause damage to our properties.

**MANAGEMENT PERCEPTION:** The Company has employed skill manpower to handle materials and machines, further extensive training is provided in house to handle materials and machines. The units of the Company has been under cover of insurance from any untoward event viz Fire, Earthquake.

### 4. COMPANY'S ENTIRE FACILITIES ARE GEAGROPHICALLY LOCATED IN ONE AREA.

Both the plants of the Company are located in Ankleshwar. As a result if there is any localized social unrest, natural disaster or breakdown of services and utilities, it may affect the business of the company. In addition, continuous addition of industries in and around Ankleshwar without commensurate growth of its infrastructure facilities is putting a pressure on the existing infrastructure at Ankleswar thereby, which may affect the business of the company.

### 5. COMPANY HAS NOT YET PLACED ORDERS FOR THE MACHINERY FOR THE PROPOSED EXPANSION

For the proposed expansion, the Company has received quotation for some of the Machinery and services and for some of the Machinery Quotation has received but the same has been expired, However the company has not place orders for the same and for some of the Machinery and services the Company has not obtained quotation nor placed any orders. For details please refer to the section titled "Objects of the Issue" on page 19 of this Prospectus. Any increase in prices of these machinery and services may adversely affect our estimates of project cost

### 6. THE COMPANY IS EXPOSED TO FOREIGN CURRENCY RISK

The Company is exposed to foreign exchange risk since significant portion of the company's revenues are denominated in U.S. Dollars and other foreign currencies while its costs are denominated in Indian Rupees. Hence the financial performance of the company is vulnerable to fluctuations in the foreign exchange rates.

### 7. TAX BENEFIT

The Government of India has announced the gradual elimination of some of the income tax exemptions that are available to the Indian exporters. Non-availability of these tax exemptions will increase future tax liabilities of the Company and hence pressure on the profits in future.

**MANAGEMENT PERCEPTION:** Policies of Government of India pertaining to exports have been favorable in the past and it is expected that the policies will continue to be beneficial to the export sector. Further both the Units of the company are 100% EOU and Company enjoy tax holiday status till 2008-09. For details refer to the section entitled "Tax Benefits" on page 34 of this Prospectus.

### 8. FURTHER ISSUE OF EQUITY SHARES.

The Company is in the pace of rapid growth and in future the company may require further issue of equity shares to satisfy the capital needs of the company for any further expansion thus any future equity offerings by the Company may lead to dilution of shareholding or may affect the market price of our equity shares

**MANAGEMENT PERCEPTION:** The major part of capital requirements of the proposed expansion is being raised through this IPO and balance through Debt & Internal Cash Accruals. However, the actual amount and timing of future requirements may differ from our estimates due to unforeseen delay or unanticipated expenditure, cost overrun, regulatory changes, technological changes etc., and if company decides to raise additional funds through the incurrence of debt, the interest obligation would increase and may subject to additional covenants, which could limit the company ability to access cash flows from the operations. If we decide to raise additional funds through the issuance of equity, the shareholding of the existing shareholders in the company is likely to be diluted.

# DYNEMIC PRODUCTS LIMITED

---

## 9. FLUCTUATIONS IN THE RATE OF DIVIDEND DECLARED IN THE LAST FIVE YEARS.

Even though the profitability of the company has increased during the last 5 years, the company had declared & paid dividend in three of the last 5 years only

**MANAGEMENT PERCEPTION:** The Company has decided to plough back its profit for expansion of company's infrastructure & growth and at the same time the company has issued bonus shares in 2004 for enhancing the share of equity shareholders in the Company.

## 10. DELAY IN PROJECT IMPLEMENTATION WILL LEAD TO COST OVERRUN.

**MANAGEMENT PERCEPTION:** The management of the company is keen to implement the project in time and has planned that no delay will be caused during the project implementation, which shall result into timely completion of the project and avoidance of cost overrun.

## 11. TITLE FOR RESIDENTIAL PROPERTIES

Title of certain residential Buildings purchased specifically to provide accommodation to employees of the Company is in the name of the employees.

**MANAGEMENT PERCEPTION:** Since there were restrictions under Local Laws like Co-operative Society Act, the company was not in the position to acquire the title of property in the name of company from Co-Operative Society; however, the company has in its possession the Shares Certificate, Possession Letter and Allotment Letter. Further, from the point of view of more security, Company has obtained necessary affidavits and other documents in its interest, even though the value of Property is insignificant in the total Block of Fixed Assets .

## 12. CONSOLIDATED RESULTS NOT GIVEN

Company has a Subsidiary named Dynamic USA INC as on 31<sup>st</sup> August 2005, However the Company has not given the consolidated results for the period 31<sup>st</sup> August 2005.

**MANAGEMENT PERCEPTION:** Dynamic USA INC has been incorporated on 09/06/2005, as on date there is no operational activity in the concern and hence Consolidated results has not been given

## 13. DISRUPTION IN SUPPLY OF POWER

The power required at both the units at Ankleshwar is sourced from GEB. The company has entered into a contract with GEB for the supply of 300 KVA of electricity for its Unit I and 67 KVA of electricity for its Unit II. Thus any delay in supply of additional power from GEB may affect the operation of the company.

**MANAGEMENT PERCEPTION:** Company at present has 1 DG set with a capacity of 125 KVA at Unit I, which can provide 42% of the electricity for its Unit No 1. The Company has entered into contract with GEB for the supply of 300 KVA for Unit II for the proposed expansion and the company is also planning to install one D.G. Set for Unit II with capacity of 125 KVA out of the proceeds of the present issue.

## 14. COMPANY IS SUBJECT TO RESTRICTIVE COVENANTS IN CERTAIN LONG-TERM DEBT FACILITIES PROVIDED BY LENDERS.

The covenants in borrowings from banks, among other things, require the Company to obtain their approval in respect of issuing new securities (debt or equity), effecting mergers, consolidations, declaring dividends at any time while the company is in default in payment of interest and principal amount. For details, please refer to page no. 20 of this Prospectus.

**MANAGEMENT PERCEPTION:** Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance.

## 15. FUNDING OF EXPANSION PROJECT

The expansion is funded substantially from the funds raised through the present IPO and any delay in coming out with IPO will adversely impact the project of the Company and in turn its profitability.

#### 16. THE PROJECT HAS NOT BEEN APPRAISED BY ANY BANK OR FINANCIAL INSTITUTIONS

### 1. INDUSTRY OVERVIEW

#### INTRODUCTION

#### FOOD COLOUR IN HISTORY

Color in one form or another, has been added to our foods from ancient time. Initially few of the Natural Colors were available; the same were derived from Plants, Animals and Mineral sources. The developing Food Industry had available a vast array of Synthetic Food Colors in the late 1800's which led to colors being added for decoration of food and unfortunately to disguise low quality foodstuffs. As the beginning of 20<sup>th</sup> century the chemically synthesized colors, which were available, were derived from Aniline, a petroleum product, originally which were called 'coal tar' dyes (colors), since the materials for the same were obtained from bituminous coal. Synthetic colour when compared with natural colour, has an advantage of being easier to produce, less expensive and economical. Also they could be blended easily without imparting unwanted flavors to the foods and has a benefit of providing greater extent of shades & hues.

#### INDIAN FOOD COLOUR INDUSTRY

The Colour Production industry aims to meet food and drink manufacturers by providing a full range of colours to suit all application within Current Legislation

#### THE MAJOR APPLICATION OF FOOD COLOURS ARE AS FOLLOWS:

- Soft Drinks
- Cosmetic
- Pharmaceutical Industries
- Confectionery
- Processed Food Products
- Dairy Products
- Bakery Products
- Alcoholic Drinks
- Meat Products

#### TYPE OF FOOD COLOURS USED IN THE INDUSTRY

The Type of Colours used in the Industry are natural, nature identical, Caramel and synthetic Colour.

Nature Food Colours are those which are synthesized by a Controlled chemical process, but as the name suggest, are otherwise identical to compounds found in nature

Caramel Colours is manufactured through the controlled heating of a carbohydrate with water and sometimes with an extra chemical which confers additional properties on the final product-

Synthetic colour is those, which are not found in nature, but are manufactured by a controlled synthetic process

#### INDIAN FOOD INDUSTRY

India is the worlds second largest Producer of Food next to China, and the potential of being the biggest with the Food and agriculture sector. However it accounts for less than 1.5% of International Food Trade. This indicates vast scope for both investors and exporters. Food exports stood at US \$ 5.8 billion whereas the world total was \$438 billion. The Indian Food Industry sales turnover was Rs 140,000 Corore (1 Crore = 10 million) annually as at the start of the year 2000. The Industry has the highest number of plants approved by the US FOOD and Drug Administration (FDA) outside the USA.

Indian Food Processing Industry can be further sub decided into various food processing sectors such as grain processing, meat processing, poultry & egg processing, milk & milk products, fish processing, fruit & vegetable processing, consumer food industries. The position in respect of each of the sector is as follows:

The question of providing financial assistance under the Plan Scheme for setting up/modernization in the grain/rice/pulses/ flour milling sector was being reviewed. It was felt that priority should be given to processing and enhancing shelf life of perishable items so as to reduce wastage and encourage value addition in that sector. Considering that rice/pulses/ flour are consumed in the processed form only and primary processing in these sectors adds little to shelf life, wastage control and value addition, it was decided to discontinue assistance to this sector from the financial year 2004-05. Priority was given to fruit and vegetables, dairy, meat and poultry, fish, bakery, confectionary and consumer goods.

Organized dairy industry accounts for less than 15% of the milk produced in India. The rest of the milk is either consumed at farm level, or is sold as fresh, non-pasteurised milk through unorganised channel. The share of organised industry is expected to rise rapidly-especially in the urban regions. India, with its status as the largest milk producer in the world, is on the verge of assuming an important position in the global dairy industry. Many international dairy companies are viewing India with an eye to tapping its vast growing market for dairy products. The rise in the market for dairy products is likely to witness the fastest growth at over 20-30% per annum.

With its long coast line of over 8000 kms., 50600 sq. kms. of continental shelf area and 2.2 million sq. km. of Exclusive Economic Zone, India is endowed with rich fishery resources.

Export of marine products from India at present is about \$ 1.3 billion. Indian marine products are exported to over 64 countries. Japan is by far the most important market for our marine products in terms of value followed by USA, South East Asia and European Union. India is ranked 17th among the marine products exporting countries in the world.

The export of fisheries products during the next 5 years i.e. from 2001-2002 could be increased US\$ 3 to 4 billion with intensive efforts.

As a result of withdrawal of excise duty on Fruits & Vegetable Products in the Union Budget of 2001, the installed capacity and growth of this sector has been increasing steadily. The growth in terms of production during 2003 is approximately 4% compared to 2002.

To boost up fruit & Vegetable processing sector MFPI is extending financial assistance in the form of Granting- aid for setting up new units, modernization and upgradation of existing units.

Consumer food industry includes pasta, breads, cakes, pastries, rusks, buns, rolls, noodles, corn flakes, rice flakes, ready to eat and ready to cook products, cocoa products, biscuits, soft drinks, beer, alcoholic beverages (non-molasses based), mineral and packaged water. Bread and biscuits constitute the largest segment of consumer foods. Their production is about 3.70 million tons per year. Manufacturing of bread is reserved for SSI sector. Out of the total production of bread, 40% is produced in the organized sector and the remaining 60% in the unorganised sector. Similarly, production of biscuits in the organized sector is about 11.50 lakh tons and quantity of biscuits produced in the unorganised sector is about 3.80 lakh tons. According to available information, production of flakes is around 14,000 tons. ### SOFT DRINKS

The Soft Beverage Industry accounts for a significant volume of food Colour sold. This is based on the fact that coloured drinks are more appealing and they enhance the consumer perception of flavour, fruit content and overall quality. All categories of colours are used viz Synthetic, natural, identical, natural and caramel colours (for cola).

The aerated soft drinks industry in India comprises over 100 plants across all States. It provides direct and indirect industry related employment to over 125,000 employees. It has attracted one of the highest foreign direct investments in the country amounting to around Rs.4700 crore. It contributes over Rs.1200 crore annually by way of excise duty, sales tax and related taxes. It has strong forward and backward linkages with over Rs.1000 crores relating to glass, plastic, refrigeration, sugar and transportation industry. Total export earnings are over Rs.700 crore per annum. Presently there are more than 7000,000 outlets in the country.

The soft drinks constitute the 3rd largest packaged foods regularly consumed after packed tea and packed biscuits. The estimated production of soft drinks has registered a gradual increase as follows:

India is the third largest market for alcoholic beverages in the world. The demand for spirits and beer is estimated to be around 373 million cases. There are 12 joint venture companies having a licensed capacity of 33919 Kilo-litres per annum for production of grain based alcoholic beverages.

Wine industry India has made a beginning to establish itself as a quality conscious industry. The demand per annum for wine in the domestic market is estimated to be around 6 million bottles (750 ml). Against this, the estimated annual production of wine by the domestic industry is over 2.4 million bottles. The market is estimated to grow at around 25 % per annum in the next five years.

The wine industry in India provides considerable opportunities for value addition and employment generation in the agro-processing sector. It offers:

- a) Possibilities for value addition to grapes/fruits, which could be cultivated on a large scale as a measure of agri diversification offering higher incomes to farmers
- b) Opportunities for employment generation
- c) Possibilities of weaning people away from hard liquor &
- d) Opportunities for increased domestic production to counter large imports of wine

## EXPORTS

MFPI has been encouraging the new processing capacities for agro-food products through its various policy initiatives and Plan schemes providing financial incentives for setting up of new units and modernization of existing units. It is conscious of the fact that the tremendous potential for manufacturing of processed food products should be harnessed not only to meet the domestic demand but also to take advantage of the export potential that is available in the international market. The export of processed food items for the last five years has been as under:

In the case of other processed food items there has been a marginal decline in exports during 2002-03 due to fluctuation in market.

## INVESTMENTS

According to the Reserve Bank of India, the actual inflow of foreign investment in this sector till 31/3/2004 is over Rs. 3269 crores.

## FUTURE OF THE FOOD INDUSTRY

## **FACTORS PROVIDING THE GROWTH OF INDIAN FOOD INDUSTRY**

### **GOVERNMENT POLICIES**

The liberal policies and other developmental measures taken by the Government have brightened the future of the Industry. The production base is being enlarged, modern methods of cultivation are being adopted thereby improving the productivity and cutting the per unit cost. To some extent cold chain is being provided, which will help in retaining quality, freshness and reduce post-harvest losses. With the new hybrid varieties being added the production season is also being extended.

These developments has result in the greater availability of quality raw materials to the industry thus resulting in better capacity utilisation and producing a wider range of products and of international quality. The quality is now the watchword for success.

### **ENTRY OF MULTI NATIONAL IN INDIAN FOOD INDUSTRY**

The multinationals now entering the food industry have an international marketing network and have their brand loyalties all over the world. This will enable the Indian products reaching all over the world in the form and packing required.

With the rise in the per capita income particularly of the middle class and a drastic change in the food habits has lead to an increased domestic consumption of processed foodstuffs.

The major advantage for India is smaller overheads and lower labour costs and hence it can compete by entering in the international market with lower product price.

### **DYE INTERMEDIATES**

#### **DOMESTIC PRODUCTION OF DYES AND INTERMEDIATES**

- b) Vidhi Dyestuff Mfg. Co. Ltd., Mumbai
- c) Neelikon Food Dyes & Chemicals Ltd., Mumbai
- d) Asim Food Products Pvt Ltd, Mumbai
- e) Ajanta Chemical Industries, Delhi

**Apart from the aforesaid, the Company is one of the active player, but as the Dye Intermediates and food colour Industry is unorganized, the quantitative data in respect of said industry is not available.**

## OPPORTUNITY FOR FOOD COLOUR INDUSTRY

The Colour Production industry aims to meet food and Drink manufacturers need by providing a full range of colours to suit all application in Soft Drinks, Confectionary, processed food Products, Dairy Products, Bakery Products, Alcoholic Drinks, Meat Products.

With a rise of per capita income of the middle class and drastic changes in the food habits has lead to increase in domestic consumption of food processing industry and with a entry of multinational in Food Industry having a manufactured based in India, there is a huge opportunity for a food colour industry to grow with a growth of Food Industry.

The overall colour market is forecast to grow in line with technological and sociological changes that will lead to an overall increase in processed food industry.

The aim of colour manufacturers, whether the colour is synthetic, nature identical or naturally derived is to constantly suport and train the food Industry in the correct selection and application of colour. The addition of colour is often thought of as "last on the list" in the development process. Time pressures an ingredient rationalization often mean that the most suitable colour is not used, which can cause problems in the future, both in manufacturing, lack of consumer appel and potential new product failure. Colour suppliers will continue to mirror the flavour industry by offering bespoke formulations and preblends with a comprehensive technical advice and sample service.

## MANUFACTURING PROCESS

### ❖ EXISTING PLANT

#### 1. DYE INTERMEDIATES: -

The production process undertaken to produce Intermediates (Pyrazolones) are as under.

- **Sulphonation:**

Appropriate amine require for Pyrazolone such as Aniline, 2:5 DCA etc are reacted with Sulphuric acid, or Oleum & get respective Sulphonated product.

- **Diazotization:**

Above Sulphonated product is diazotized it with sodium nitrite in Acidic media.

- **Reduction:**

Diazo mass is reduced with corresponding reducing media & make it reduce.

- **Hydrolysis:**

Reduced mass is heated & hydrolysed with required acid.

- **Ester Preparation:**

Take required ester; combine it with two ester in the presence of Alkali Metal & use as Alkali Metal salt ester.

- **Condensation:**

Take required Hydrazine derivatives & condensed it with alkali metal ester or ester depending on the requirement of particular Pyrazolone.

- **Esterification & Saponification:**

Above condensed ester is reacted with alkaline media as per the requirement. On heating saponified product is evolved

- **Isolation:**

Above Saponified product is clarified & calculated quantity of acid is added isolating material

- **Centrifuge:**

Isolated mass is centrifuge for removal of water.

- **Drying:**

Centrifuged wet cake is dried in spin flash or tray drier.

- **Packing:**

The Wet Cake or Dry Powder is packed in the HDPE Bag with LDPE Liners

#### 2. FOOD COLORS (PRIMARY): -

The Primary Food Colors are basically Synthetic Organic Dyes, which are manufactured by various chemical reactions.

- **Diazotization Reaction :**

Diazotization reaction is carried out in a reactor with specific Raw Material for each particular product maintaining temperature & pH at certain required level.

- **Coupling Reaction :**

Coupling Reaction is carried with diazotized mass where key process; parameters are continuously monitored and controlled to achieve a better quality product.

- **Isolation Reaction :**

The coupled mass is filtered off to remove impurities with suitable filter media. The filtrate received is isolated by addition of salt.

- **Filtration:**

The isolated mass is filtered through Filter Press. The filtered mass is collected & is sent for centrifuging. After centrifugation the wet cake is collected & sent for drying.

- **Drying:**

We have the state of art drying system. Drying is done by different type of drying system like SFD/Spray Drier/Tray Dryer. The centrifuged mass is dried and pulverized with ACM.

- **Packing:**

The dried product received is then packed in the HDPE Drum with LDPE plastic Liner inside & is stored in the Warehouse.

### 3. **LAKE COLORS:**

Lake Colors are produced by laking of Primary Food Colors.

- **Laking Process:**

Calculated quantity of Primary Food Color & water are taken in a reactor & solution is prepared. This solution is then acidified using appropriate acid & then laking is carried out using Aluminum Chloride.

- **Isolation:**

The laked solution prepared is then isolated by adjusting the pH of solution to required Alkaline level.

- **Filtration:**

The isolated mass is filtered through Filter Press. The filtered mass is collected & sent to centrifuge. After centrifugation the mass is collected & sent for drying.

- **Drying:**

Drying is done by different kind of drying systems like SFD/Spray Drier/Tray Dryer

The centrifuged mass is dried and Dried Powder (product) is received.

- **Packing:**

The dried product received is then packed in the HDPE Drum with LDPE plastic Liner inside & is stored in the Warehouse.

- **PROPOSED PLANT:**

1. Ethyl acetate

During mfg. of Carboxy Pyrazolone there is a one stream which generates solvent as by product, & is recovered by different technology & recovered solvent is reacted with acetic acid & converted to ethyl acetate, which is one of the main key raw material.

2. 1,4 phenyl hydrazine sulphonic acid & glauber salt

During mfg. of Pyrazolone there is an Intermediate stage namely hydrazine derivative. During filtration process it goes in to waste water in considerable qty. Which can be recovered by concentration effect by evaporating in with the different stages & crystallizing in different stages. During crystallization process we can recover Glauber Salt & after certain stages we can recover 1,4 PHPS & which can be use in the mfg. of Pyrazolone.
