Note: Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify financial or other implication of any risks mentioned herein under:

INTERNAL TO THE COMPANY

We have recently entered into an Memorandum of Understanding (MOU) with Ambattur Clothing Limited (ACL) for the acquisition of its undertaking. We have earmarked Rs. 462.6 million out of net proceeds of the issue to finance this proposed acquisition. The acquisition is subject to satisfactory completion of financial and legal due diligence. In the event this proposed acquisition is not completed, we may be subject to financial losses on account of non performance and also on account of an increase in the gestation period in setting up new facilities.

We have recently entered into a Memorandum of Understanding (MOU) with Ambattur Clothing Limited (ACL) on December 02, 2005 for the acquisition of its undertaking engaged in the manufacturing of readymade garments, specialized in the production of all types of trousers (dress pants, casual and denim) and located at MEPZ-SEZ, Chennai. This acquisition will add 2000 machine and production capacity of the factory is 6 million trousers per annum working on a double shift basis. The parties to MoU have agreed that the acquisition will be completed as on April 1, 2006.

In the event that above mentioned acquisition is not completed on account of legal and financial due diligence or otherwise, we will set up two additional factories with 1400 machines for total cost of approximately Rs 300 mn. These factories are expected to commence commercial production only in last quarter of FY 2007. This delay in commercial production will adversely impact cash flow and profitability of our Company.

On completion of the legal and financial due diligence, in terms of the MOU, the parties have agreed to deposit Rs.50 mn each into an escrow account on or before January 31, 2006. In the event of either party not fulfilling its obligations, the defaulting party will have to forfeit the deposit. If the default is on our account, we stand risk of losing Rs. 50 mn deposited in Escrow Account.

The proposed acquisition of the undertaking from Ambattur Clothing Limited will increased our production capacity from 4.5 mn garments per annum to 10.5 million garments per annum. However, we face the risk of not successfully completing the integration of this new acquisition with our existing operations.

We are in the process of acquiring 2000 machine facility from Ambattur Clothing Limited. This acquisition will increase our capacity of garment manufacturing from 4.5 mn pieces to 10.5 mn pieces. There can be no assurance that we will successfully integrate the acquired facility with our own. In addition, acquisitions may involve a number of other risks, including, but not limited to:

- adverse short-term effects on our reported operating results;
- diversion of management's attention;
- unanticipated liabilities or contingencies relating to the acquired facility.

We have made applications for regularising two of our manufacturing units, one located at 72/1, 72/2 Poonamallee By Pass Road, Seenerkuppam village and the other located in 70/2 & 70/3A, Selaiyur Agaram Road, Thiruvanchery, Chennai 600 073 to the Chennai Metropolitan Development Authority (CMDA).

We have made applications to the CMDA for regularisation of our manufacturing unit at 70/2 & 70/3 A, Selaiyur Agaram Road and 72/1, 72/2 Poonamallee By Pass Road, Seenerkuppamvillage, which was transferred from Span Eicher Designs Limited, for which the application was also made by Span Eicher Designs Limited. Refusal by CMDA to grant the regularisation approval for two manufacturing units can adversely affect our business and may also lead to shut down of these two manufacturing units.

We are dependent on a limited number of buyers for our revenues.

Management Perception

We have derived and believe that we will continue to derive a substantial portion of our revenues from a limited number of clients. There are a number of factors, other than our performance, which may not be predictable that could cause the loss of a client. Any significant reduction in demand for our product from our key clients, any requirement to lower the prices offered to these clients or any loss or financial difficulties caused to any of these clients could have a material adverse effect on our business, results of operations, financial condition and cash flow.

Most of the lease deeds that we have entered into for various properties have not been adequately stamped.

Most of the lease deeds that we have entered into with respect to properties that we have leased out from third parties have not been adequately stamped under the Tamil Nadu Stamp Rules, u/s 76A of the Indian Stamp Act 1899. The approximate total amount of liability that our Company will have to bear for duly stamping the lease deeds would arise to Rs. 1,500,000 (Rupees One million five hundred thousand only) excluding nominal costs for penalty and registration charges.

We have made applications to various authorities for renewing our licenses and we have not obtained licenses for our new projects.

We have made application to various statutory authorities for renewal of our existing licenses, which are pending renewal and we have also not obtained licenses for our projects. Any delay or inability to obtain these licenses could cause undue delays or inability in the continuation of our business and the commencement of the projects. Some of our trademarks and copy rights have not been registered.

With the opening up of international markets after removal of quotas, we may face price pressures on our products.

Management Perception

The end of Multi Fibre Agreement (MFA) quota restrictions on textile products has resulted in price competition among suppliers from low cost economies. Our Company could further face pricing pressure as various suppliers who were hitherto restrained by quotas will start competing for the same orders in the international market.

Our ability to export garment, especially to the European Union and the United States, may be adversely affected by the imposition of, or increase in the rate of, anti-subsidy and anti-dumping duties.

Our current ability to export garments to the EU & USA without imposition of anti-dumping duties gives us an advantage over those of our competitors who are liable to pay anti-dumping duties. Any change in the duty structure that reduces our relative advantage *vis-à-vis* such competitors could result in our exports to the EU & USA, and therefore our revenue, being adversely affected.

Our company entered into Share subscription and Shareholders Agreement with Bennett Coleman & Company Limited.

The Share subscription and Shareholders Agreement between Celebrity Fashions Private Limited and Bennett Coleman & Company Limited and Mr. V. Rajagopal was entered into on January 20, 2005 with the objective of BCCL offering special advertisement rates as support to our Company for our ad campaign and by BCCL accepting equity shares of our Company against its invoice for advertisements in its various publications, over a period of three years (to a maximum until September 30, 2008), where we propose to launch an ad campaign through the print media and other advertisement media for an amount of Rs. 210 million through BCCL, whereby BCCL will provide a 25% discount on its then prevailing card rates.

The Supplementary Agreement between Celebrity Fashions Private Limited and Bennett Coleman & Company Limited and Mr. V. Rajagopal dated September 27, 2005 was entered into, to modify and amend the Share Subscription and Shareholders' Agreement dated January 20, 2005 wherein, the total investment amount of Rs. 210 million was substituted by Rs. 193.1 million (with a discount amounting to Rs. 144.8 million) and the total number of shares that were to be allotted to BCCL was changed from 715,909 (pre-bonus issue) to 658,409 Equity Shares. Further the parties has vide this Supplementary Agreement agreed that BCCL shall pay and subscribe for a total number of 907,728 Equity Shares of the Company (post bonus issue) at a price of Rs. 110 per Equity Shares by paying a bankers cheque. BCCL shall release order for the advertisements to be released in the calendar years 2006 and 2007 for an amount of Rs. 99.85 million and shall pay the advance through a banker's cheque immediately upon receiving the subscription amount from BCCL. The period for advertising was extended from September 30, 2008 to December 31, 2008. Further BCCL shall extend an additional incentive of 7% by way of space banking on the net value of advertisements released and the space banking could be redeemed by our Company at the end of each calendar year of the 3 year agreement. For further details please refer section "History and Other Corporate Matters" on page 68 of this Red Herring Prospectus.

Rights of the Private Equity Investors under the Share Purchase, Subscription and Shareholders agreement entered with Reliance Capital Limited and New Vernon Bharat Limited can adversely affect the interest of other shareholders.

We have entered into a Share Purchase, Subscription and Shareholders' Agreements with the Private Equity Investors. The Agreement provides that, subsequent to the listing of the Equity Shares of our Company on the Stock Exchange certain items of business shall require affirmative vote of each of the Private Equity Investors in any general meeting of our Company and/or the consent of all the nominee director(s) of the Investors or written consent of the Investors, as the case may be, at any meeting of the Board of Directors or Committee thereof as the case may be. For details on rights available to Private Equity Investors refer to section "Main Provisions of Articles of Association of Our Company" on page 160 of this Red Herring Prospectus.

Covenants with lenders may restrict our operations, our capacity to expand, distribute dividends, etc.

Certain covenants in our financing agreements require us to obtain approval from the financial institutions *inter alia* before undertaking new projects or expansion of the existing facilities, making any new investments, issuing new security (debt or equity) including shares being issued in this Issue, making changes to our capital structure, distributing dividends to our shareholders. For details see section titled "Capital Structure" on page 13 of this Red Herring Prospectus.

Our inability to identify evolving fashion trends and create new designs may adversely affect our business.

Our Company is in the business of designing, manufacturing and selling apparels. Any failure on our part to keep updated with the latest trends in the fashion industry may adversely affect the competitiveness and ability to deliver newer products to the target segment.

We may not be fully insured for losses we may incur.

Management Perception

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, the limitations of liability set forth in our contracts may not be enforceable in all instances or may not protect us from liability for damages. In addition, certain liabilities, such as claims by third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. Although we have general liability insurance coverage for certain clients, that coverage may not continue to be available on reasonable terms or be available in sufficient amounts to cover one or more large claims and our insurers may disclaim coverage as to any future claim. Please refer to the section titled "Insurance" on page 61 of this Red Herring Prospectus. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our results of operations, financial condition and cash flows.

We are dependent on few suppliers for our raw material.

We depend on few suppliers for our raw material specially Fabric which is our main raw material input. Any delay on availability of required raw material or any other item of production in appropriate quantity and right quality at the right time may lead to cancellation of orders. Further any delays or non conformance to quality requirements by our suppliers can impact our ability to meet our customer's requirements and thus impact our business continuity in the long term.

Our cost plus contracts may expose us to additional risks, many of which are beyond our control, which could reduce our profitability.

We enter into cost plus contracts with some of our clients, which may subject us to the risk that our expenses with respect to a particular client engagement could be higher than we estimated at the time of entering into the contract. If we fail to anticipate our costs when entering a cost plus contract, our margins could be reduced and our results of operations may be adversely affected.

Our proposed manufacturing facility are being setup as 100% EOUs / SEZ which will have certain tax benefits, which may not be available in the future.

We are setting up Irungattukottai Apparel park factory as a 100% EOU, which qualifies for Income Tax benefit U/S 10 B of the Income Tax Act, 1961, which may not be available after April 01, 2009. Proposed Acquisition is in SEZ shall be entitled for Income Tax benefit U/S 10 AA of the Income Tax Act 1961. The loss or unavailability of these benefits in future would increase our income tax obligations and have a material adverse effect on our after tax profits and cash flow.

We do not have long-term contracts with our buyers

Purchases by our customers are mainly through purchase orders on an annual basis or on a fixed delivery basis. We do not have any long term contracts with any of our customers and there is no assured guarantee that our present customers will continue to procure orders from us. Any loss of our major customers arising out of competition or from cheaper sources can lead to a reduced margins and our results of operations may be affected.

Our buyers prescribe various standards which we are required to comply with and they conduct regular audits to check customer regulatory compliance.

Most of our exports are to customers in the United States of America and United Kingdom, where they have strict environmental, manufacturing, employee and other legislations which govern their sourcing of equipments from third world countries. Any non-compliance on our behalf with respect to such customer requirements and dissatisfaction by customers during their audit checks can lead to loss of customers and thus result in losses and affect our future results of operation.

All our stores present and proposed are not on ownership basis but taken on contractual agreement basis which are in the nature of leave and license agreements or lease. Any deficiency in the title/ownership rights/development rights of the owners leading to disputes may impede the operation of our stores.

All our stores are presently on lease or leave and license from third parties. Any deficiency in title of such third parties may lead to legal implications which can result in us having to vacate the premises or increase our cost of operation thus affecting our profits

We may face risks associated with potential acquisitions, investments, strategic partnerships or other ventures, including whether we can identify opportunities, complete the transactions and integration of the target companies into our business.

Management Perception

Our proposed growth strategy involves entering into strategic partnerships with other garment manufactures with presence in different product category i.e Outer Wear and Women's Wear ,where we are currently under-represented and, evaluating on a case-by-case basis potential acquisition targets that offer an opportunity to grow our business and/or expand our capabilities or geographical reach. We may also have discussions with certain companies regarding our acquiring, investing in or partnering with their businesses, products, services or technologies. We may not be able to identify and fully evaluate a suitable acquisition, investment or strategic partnership, which may place us at a disadvantage if our competitors are able to grow their market share through acquisitions. If we do identify suitable candidates, we may not be able to complete those transactions on commercially acceptable terms or at all, or such acquisitions may result in the incurrence of indebtedness or the issuance of additional equity securities. If we acquire another company, we could have difficulty in integrating that company's personnel, products, operations and technology. In addition, the key personnel of the acquired company may decide not to work for us and its key clients may decide to terminate their agreements with us or reduce the volume of their purchases. These difficulties could disrupt our ongoing business, distract our management and employees and adversely affect our results of operations. For more details, please refer to the section titled "Objects of the Issue" beginning on page 20 of this Red Herring Prospectus.

Our inability to effectively manage our rapid infrastructure and personnel growth could have a material adverse effect on our business, results of operations and financial condition.

Since we commenced commercial operations in 1989, we have experienced rapid growth and significantly expanded our operations. We presently have eight production facilities in Chennai, aggregating 4283 machines. In addition, we propose to acquire a trouser manufacturing facility and set up one facility for manufacturing tops , aggregating 2235 machines in Chennai. As of September 30, 2005, we have engaged 5002 employees and expect to aggregate over 12500 employees by the end of March 2007. Our inability to manage such rapid expansion effectively or to ensure the continued adequacy of our current systems could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our success depends largely on our senior management and our ability to attract and retain our key personnel.

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition. We do not maintain 'key man' life insurance for our Promoters, senior members of our management team or other key personnel.

We may continue to be controlled by our Promoters following this Issue and our other shareholders may not be able to affect the outcome of shareholding voting.

After the completion of this Issue, our Promoters will collectively hold approximately 42.25% of the outstanding Equity Shares. Consequently, our Promoters may exercise substantial control over us and inter alia may have the power to elect our Directors and/or determine the outcome of proposals for corporate action requiring approval of our Board of Directors or shareholders, such as lending and investment policies, revenue budgets, capital expenditure, dividend policy and strategic acquisitions/joint ventures. Although, our Promoters currently collectively hold 7,581,600 Equity Shares, they are restricted from transferring certain shares for a period of three years and the remaining shares for a period of one year, in accordance with the SEBI DIP Guidelines.

Our business is dependent on our manufacturing facilities. The loss of or shutdown of operations at any of our manufacturing facilities may have a material adverse effect on our business, financial condition and results of operations.

Our principal manufacturing facilities at Chennai are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes, lock-outs continued availability of services of our external contractors, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. We carry out planned shutdowns of our plants for maintenance.

Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

The market price of the Equity Shares may be adversely affected by any additional issuances of equity or sales of a large number of the Equity Shares by our Promoters.

There is a risk that we may be required to finance our growth or strengthen our balance sheet through additional equity offerings. Any future issuance of Equity Shares, whether through the exercise of options or otherwise, will dilute the position of existing shareholders and could adversely affect the market price of the Equity Shares. We have adopted an Employee Stock Option Scheme as a means to reward and motivate our employees. As on December 12, 2005, 150,000 options have been granted, being 0.84% of our post-Issue equity share capital. None of the options granted have been exercised till date. In addition, sales of a large number of Equity Shares by the Promoters or our other shareholders after the expiry of the lock-in periods could adversely affect the market price of the Equity Shares. For further details on the Equity Shares locked in, please refer to the section titled "History and Other Corporate Matters" beginning on page 68 of this Red Herring Prospectus.

We do not have a track record for consistent payment of dividends on Equity Shares.

We have not declared or paid any cash dividends on the Equity shares since inception except for the financial year 2004-05. The future payment of dividend, if any would be based on the then available distributable profits and the recommendations of our Board of Directors.

Foreign Currency Risk

Approximately 80% of revenue is from export of apparels. Since our buyers compare our product with that of our competitor in USD denominated rate, appreciation of India Rupee vis-à-vis USD would weaken our competitive position.

Further, for the expansion project we are proposing to import 86.50% of the machinery which would have foreign currency price fluctuation.

We face significant competition from a number of sources.

The market for textiles is intensely competitive. Important factors in our industry affecting competition in our industry include reliability, product quality, technology, price and scope and quality of services and training offered to our employees and customer satisfaction. Some of our key competitors in the industry are listed in the section titled “Our Business” on page 49 of this Red Herring Prospectus.

Most of our facilities are geographically located in one area.

We are a Chennai based company with all our factories and offices based in and around Chennai. As a result, if there is any localised social unrest, natural disaster or breakdown of services and utilities in Chennai, it may affect our business adversely.

Legal

There are legal and regulatory proceedings that have been initiated against us, which if determined against us can have a material adverse impact on us.

Metropolitan Trading Company Vs. Celebrity Fashions Private Limited

Metropolitan Trading Company, a partnership firm has filed a civil suit against us in the High Court of Calcutta for alleged infringement of copyright of their registered design of the ‘three hole button’ which our Company has used for the manufacturing of shirts. The Petitioners in this case have prayed for temporary injunctions restraining us from further infringement, further manufacturing or using these buttons in our articles in our shirts or other materials which are manufactured by us and also our sales and revenues from selling materials or shirts using these buttons.

Risks in relation to our new projects

We are expanding our capacity without client agreements in place to utilise this capacity.

We are setting up one new factory and acquiring a trouser manufacturing plant with a total capacity of 2235 machines. We do not have client contracts in place to utilise this expanded capacity. The existing clients of the trouser manufacturing plant may not want to continue to do business with us. If we are unsuccessful in increasing the demand for our product to match our increased capacity, our expenses will increase as a percentage of our revenues, which may have an adverse effect on our results of operations and cash flows.

The project has not been appraised by any Bank/Financial Institution.

We have estimated our total fund requirement internally and the project has not been appraised by any Bank/Financial Institution. Deployment of funds towards the project is also at our discretion and is not subject to monitoring by any independent agency.

We have not placed orders or entered into agreements for substantial portions of our planned investments from the net proceeds of the issue.

We are yet to place orders for some of the equipments/machinery for Rs. 42.24 mn constituting 78.81% of the estimated cost of the machinery. For some machineries, we are yet to receive quotations and the cost estimates are based on management estimates. Please refer to the section titled "Objects of the Issue" beginning on page 20 of this Red Herring Prospectus for details of proposed capital expenditure on plant & machinery. Pending any use of the proceeds of the Issue we intend to invest the funds in liquid instruments. We intend to rely on our internal systems and controls to monitor the use of such proceeds.

EXTERNAL TO THE COMPANY

There may be changes in the regulatory framework that could adversely affect us.

The statutory and regulatory framework for the Indian fashion industry may see changes in the next few years. We presently do not know what the nature or extent of the changes will be and cannot assure you that such changes will not have an adverse impact on our financial condition and results of operations. For a discussion on the regulatory framework of the textile industry in India, see the section titled 'Regulations and Policies' on page 66 of this Red Herring Prospectus.

Political, economic and social developments in India could adversely affect our business.

All our facilities and other assets are located in India and most of our officers and Directors are resident in India. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other developments in or affecting India.

India has also witnessed civil disturbances in recent years. While these civil disturbances did not directly affect our operations, it is possible that future civil unrest as well as other adverse social, economic and political events in India could have an adverse impact on us.

You will not receive the Equity Shares you purchase in this Issue until several days after you pay for them, which will subject you to market risk.

The Equity Shares you purchase in this Issue will not be credited to your demat account with depository participants until approximately 15 working days from the Bid/ Issue Closing Date. Further, there can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence, within the time periods specified above.

An active market for the Equity Shares may not develop, which may cause the price of the Equity Shares to fall and may limit your ability to sell the Equity Shares.

The Equity Shares are new issues of securities for which there is currently no trading market. Applications have been made to the BSE and NSE for the Equity Shares to be admitted to trading on the BSE and NSE. No assurance can be given that an active trading market for the Equity Shares will develop or as to the liquidity or sustainability of any such market, the ability of holders of the Equity Shares to sell their Equity Shares or the price at which shareholders will be able to sell their Equity Shares. If an active market for the Equity Shares fails to develop or be sustained, the trading price of the Equity Shares could fall. If an active trading market were to develop, the Equity Shares could trade at prices that may be lower than their initial offering price.

The market value of the Equity Shares may fluctuate due to the volatility of the securities markets.

The securities markets are volatile and stock exchanges have in the past, experienced substantial fluctuations in the prices of listed securities. The stock exchanges have experienced problems, which, if these were to continue or recur, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares. These problems have included broker defaults and settlement delays. In addition, the governing bodies of the various Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on the market sentiment.

Shareholders will bear the risk of fluctuation in the price of Equity Shares.

The market price of the Equity Shares may be affected by fluctuations in the share markets and it is impossible to predict whether the price of the Equity Shares will rise or fall. Trading prices of the Equity Shares will be influenced by, among other things, our financial position, the results of operations and political, economic, financial and other factors.

Future issues or sales of our Equity Shares may significantly affect the trading price of our Equity Shares.

Future issue of Equity Shares /convertible instruments by us or the disposal of Equity Shares by any of the major shareholders or the perception that such issues or sales may occur may significantly affect trading price of our Equity Shares. Other than the lock-in of pre-issue capital as prescribed under SEBI Guidelines, none of our shareholders except BCCL are subject to any lock-up arrangements restricting their ability to issue Equity Shares or the Shareholders' ability to dispose of their Equity Shares, and there can be no assurance that any shareholder will not dispose of, encumber, or pledge, its shares.

We had launched the “Indian Terrain” Brand in 2000 with the dual objective of tapping the huge opportunity in branded apparels for Indian Men and to de-risk our business model in exports in the quota free regime. We have built a natural hedge within our Company to weather any risk arising out of the Chinese domination of the global textile space. Our Indian Terrain brand has since grown at CAGR 90.73% and contributed 19.89% of total FY 2005 income .

Strong Customer Base

We continuously have received repeat orders from all our customers and have not lost a single customer since inception. This customer trust has been built on the foundation of our commitment to quality, providing end to end solution from design to delivery and good human resource practices. Our relationships with key customers span over the last 7-10 years. Our top five customers have remained with us and have consistently increased their business requirement. Sales to the top five customers have increased at a CAGR of 34.21% from Rs 422.08 mn in 2002-03 to Rs 760.28 mn in 2004-05.

Our Strategy

Expansion of Business

We intend to expand, strengthen and consolidate our current position in the domestic and global market. We propose to expand our product range and increase product reach in the Indian branded apparel market and the international outsourced garment business.

Expansion of Product range

In the past we have been concentrating on export of shirts on account of quota restrictions. With the removal of quota restrictions, we propose to expand our product portfolio to men’s trousers /bottoms, outer wear / jackets and women’s wear. Similarly in domestic market our product portfolio currently include only ready-to-wear men’s garments. We intend to expand our product offering to include women’s western / office wear and knit wear.

Enhance our Customer Reach

We intend to set up marketing office in New York to cater to wider client base through quick response to customer requirement. We plan to build a chain of twenty five own Indian Terrain Brand outlets, twenty of which will set up from part of the Issue proceeds. We will also increase our customer reach by partnering with the expansion plans of National Store Chains.

Maintain Our Focus on Long-term Relationships

We expect to maintain our focus on client relationships. We believe that there are significant business opportunities for additional growth with our existing clients as we diversify our product portfolio and build upon these existing relationships.. This strategy increases our in-depth client specific knowledge to provide them end to end solution of their requirement and develop closer relationships with our clients.

Continue to invest in infrastructure

We believe that we have managed growth on the back of our own infrastructure, which ensured quality and timely delivery. We will continue to invest in infrastructure, including human resources, to meet our growing needs. We plan to maintain the quality of our human resources and to continuously upgrade and benchmark our HR practices. We also plan to further strengthen IT support by installing software called Fast React authored by a professional in garments in UK.

Strengthening our brands

We intend to invest in developing and enhancing recognition of our brands, through brand building efforts, communication and promotional initiatives such as advertisements in print media, hoardings, televisions organizing events, participation in industry events, public relations and investor relations efforts. We have entered into a long term agreement with Bennett, Coleman & Co. Limited to use space in their publications to enhance the visibility of our brands and strengthen our recognition in the Indian garment industry.

Pursue Strategic Relationships and Acquisitions

Over and above our organic growth strategies, we propose to enhance our capabilities through strategic investments/joint ventures in the areas that are related to our key strengths, are synergistic and in our assessment, have manageable integration risks, in order to expand our existing client base, increase our horizontal skill-sets and to provide scalability of our product offerings.

Book Building Process

Book Building refers to the process of collection of bids from investors, on the basis of this Red Herring Prospectus including the Price Band. This Issue Price is fixed after the Bid/Issue Closing Date. The principal parties involved in the Book Building Process are:

- (1) Our Company;
- (2) Book Running Lead Manager and Syndicate Member who is an intermediary registered with SEBI or registered as broker with BSE/NSE and eligible to act as underwriter, in this case being IL&FS Investsmart Limited;
- (3) Registrars to the Issue, in this case being Intime Spectrum Registry Limited.

SEBI, through its guidelines, has permitted an Issue of securities to the public through the 100% Book Building Process, wherein up to 50% of the Net Issue shall be allocated on a proportionate basis to Qualified Institutional Buyers (QIBs), of which

5% shall be reserved for Mutual Funds. Further, at least 15% of the Net Issue shall be available for allocation on a proportionate basis to Non Institutional Bidders and at least 35% of the Net Issue shall be available for allocation on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price. Our Company will comply with these guidelines for this Issue. In this regard, our Company has appointed the BRLM to procure subscriptions to the Issue.

The process of book building, under SEBI Guidelines, is relatively new and the investors are advised to make their own judgment about investment through this process prior to making a Bid in the Issue.

QIBs are not allowed to withdraw their Bid after the Bid/ Issue Closing Date. For details see the section titled "Terms of the Issue" on page 139 in this Red Herring Prospectus.

Steps to be taken by the Bidders for bidding:

- Check whether he/ she is eligible for bidding;
- Bidder necessarily needs to have a demat account;
- Ensure that the Bid cum Application Form is duly completed as per instructions given in this Red Herring Prospectus and in the Bid cum Application Form; and
- Ensure that the Bid cum Application Form is accompanied by the Permanent Account Number or by Form 60 or Form 61 as may be applicable together with necessary documents providing proof of address. Bidders are specifically requested not to submit their General Index Register number instead of the Permanent Account Number as the Bid is liable to be rejected.

Illustration of Book Building and Price Discovery Process *(Investors should note that the following is solely for the purpose of illustration and is not specific to this Issue)*

Bidders can bid at any price within the price band. For instance, assuming a price band of Rs. 20 to Rs. 24 per share, issue size of 1,800 equity shares and receipt of five bids from bidders details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the website of the BSE (www.bseindia.com) and NSE (www.nseindia.com) during the bidding period. The illustrative book as shown below shows the demand for the shares of our Company at various prices and is collated from bids from various investors.

Number of equity shares Bid for	Bid Price (Rs.)	Cumulative equity shares Bid for	Subscription
500	24	500	16.67%
1000	23	1500	50.00%
1500	22	3000	166.67%
2000	21	5000	277.78%
2500	20	7500	416.67%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired quantum of shares is the price at which the book cuts off i.e., Rs. 22 in the above example. The issuer, in consultation with the BRLM will finalise the issue price at or below such cut off price i.e. at or below Rs. 22. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in respective category.

The process of Book Building under SEBI Guidelines is relatively new and investors are advised to make their own judgment about investment through this process prior to making a Bid or Application in the Issue. Pursuant to the recent amendments to SEBI Guidelines, QIBs are not allowed to withdraw their Bids after Bid/ Issue Closing Date.

OBJECTS OF THE ISSUE

OBJECTS OF THE ISSUE

We believe that there exist strong opportunities for growth in the global textile industry in a quota free regime and the branded apparel domestic market (for details on the opportunities see section titled "Industry"). To take advantage of the opportunities and with a view to improve the margins through value addition, we propose to acquire a trouser manufacturing facility and are planning an expansion in our garment manufacturing capacity (hereinafter referred to as "expansion plan"). We are also expanding our reach in the branded apparel segment by setting up additional own stores. The objects of the Issue is to raise capital for part financing the above described expansion plan. We believe that the listing of our shares will provide liquidity to our existing investors and also enhance our Company's visibility and brand value.

Our assessment of fund requirement and deployment is based on internal management estimates and have not been appraised by any bank or financial institution or any independent organisation. Our capital expenditure plans are subject to a number of variables, including possible cost overruns; construction/development delays or defects; receipt of critical governmental approvals including availability of working capital finance on acceptable terms; and changes in management's views of the desirability of current plans, among others. In case of any variations in the actual utilization of funds earmarked for the above activities, the difference, if any, may be adjusted against the availability / requirement of funds in the areas identified as part of the expansion plan and/or increased fund deployment for a particular activity, the shortfall, if any, may be met with by surplus funds, if any available in the other areas and/or our Company's internal accrual, and/or the term loans/working capital loans that may be availed from the banks. The balance proceeds of the Issue in addition to the abovementioned requirements, if any, will be used for general corporate purposes including but not restricted to repayment of loans.

The main objects clause and objects incidental or ancillary to the main objects clause of our Memorandum of Association enables us to undertake the existing activities and the activities for which the funds are being raised, through the Issue.

	Total	[●]

Expansion of exclusive Indian Terrain stores

We propose to open 20 exclusive Indian Terrain Stores in the next three years. The total cost of setting up these stores is estimated at Rs. 93.40 mn.

Year Ending	Number of Stores	Location**	Area (Sq. ft.)
March 31, 2006	3	Chennai, Bangalore & Coimbatore.	4,500
March 31, 2007	8	Mumbai, Delhi, Cochin, Ahmedabad, Calcutta, Hyderabad, Bangalore & Nagpur.	12,000
March 31, 2008	9	Lucknow, Chandigarh, Calcutta, Delhi, Mumbai, Surat & Chennai.	13,500
TOTAL			30,000

** We have entered into agreements for only three properties.

Setting up additional stores will enable us to expand our reach, display our entire product portfolio and help us position our brand so as to serve additional customers in existing and new geographies, and help us with our growth plans.

We intend to enter into definitive long term lease, leave and licence, conducting and any other arrangement with the property owners for all the planned new stores. We have already entered into contractual agreement for three of our planned stores and have paid them a rent deposit of Rs 2.47 Million as on October 6, 2005. We are yet to identify the property for 17 locations.

We do not own any of our current stores premises and do not plan to own any of the planned new stores premises. As the stores will be acquired under leave and license, long term lease or under any arrangement, deposits will be payable by us on entering into the commercial agreement with the property owner. We estimate that we shall require paying deposits of Rs 40.00 mn for acquiring the planned new stores.

We estimate an additional fund requirement over and above the store deposit for the planned new stores at Rs 53.40 mn. Additional capital expenditure requirement include electricals, lighting, air conditioning, interiors, furnitures, fixtures, false ceiling, flooring, signages and other establishment related expenses. We enter into contracts with vendors for the supply of the same a few months before we expect to launch the store. We do not envisage any difficulty in sourcing these equipments and services as these are standard equipments available at short notice.

SECTION IV: ABOUT US

INDUSTRY

INTRODUCTION

Textiles and clothing sector is the largest employer after agriculture and its importance in India's economy is recognised for its contribution to industrial production and export earnings. With the phasing out of the Multi Fibre Arrangement (MFA) by 2005 and the removal of Quantitative Restrictions (QR) and scheduled dismantling of tariff barriers by the end of 2004, the industry will be required to achieve a competitive strength for its survival in the global environment. India accounts for 3.30% of the world trade in textiles and garments and the phasing of MFA and QRs will result in new opportunities emerging for the Indian textile industry.

The global textile trade in 2003 was USD 395 billion, recording a growth of 11.57% over the previous year. Of the total textile trade, global exports of textile accounted for USD 169 billion and garments accounted for USD 226 billion. At USD 395 billion, global textile trade contributes 5.4% of the total international trade. The industry is highly fragmented in terms of geography and size. [Source: WTO International Trade Statistics Book-2004]

The textile and the garment industry is labour-intensive and it offers entry-level jobs for unskilled labour in developed as well as developing countries. Job creation in the sector has been particularly strong for women in poor countries, who previously had no income opportunities other than the household or the informal sector. Moreover, it is a sector where relatively modern technology can be adopted even in poor countries at relatively low investment costs. Because of labour intensive nature of the textile industry, in the last fifty years the industry has shifted its base several times and concentrated to those countries, which offered most competitive labour cost structure.

At the same time, the textile and garment industry has high-value added segments where design, research and development (R&D) are important competitive factors. The high end of the fashion industry uses human capital intensively in design and marketing. The same applies to market segments such as sportswear where both design and material technology are important. Finally, R&D is important in industrial textiles where, again, material technology is an important competitive factor. Developed countries such as USA and the EU have started downsizing capacities in view of their higher cost of manufacturing compared to countries such as India, Pakistan, China and Indonesia. The relocation is also on account of environmental concerns.

Textiles and clothing are closely related both technologically and in terms of trade policy. Textiles provide the major input to the clothing industry, creating vertical linkages between the two. International trade in the two sectors is regulated by the Agreement on Textiles and Clothing (ATC) at the multilateral level, while bilateral and regional trade agreements typically link the two sectors through rules of origin accompanying preferential market access.

With the implementation of ATC all trade barriers both tax and non-tax imposed by the developed countries on imports from developing countries has come to an end with effect from January 1, 2005 giving way for free trade regime in global textile trade. This has opened the way for the most competitive developing countries to develop stronger clusters of textiles. Developing countries having both downstream and upstream facilities in textiles may be able to prosper in the new competitive environment.

The textile industry occupies a unique position in the Indian economy. It provides one of the most basic needs of people. It has a unique position as a self-reliant industry, from the production of raw materials to the delivery of finished products, with substantial value-additions at each stage. It contributes significantly to the country's economy. Currently, it adds about 14 % to the industrial production and about 4 % to the GDP. The textile industry is the second largest provider of employment in India after agriculture providing direct employment to about 35 million people. Due to its close linkage with agriculture it also has immense potential for employment generation, particularly in the rural and remote areas of the country and currently provides indirect employment to around 50 million people. With total exports of textile and garments of around USD13 billion for FY 2003-04, India accounts for around 3.30% of the world trade in textile and garments and contributes to about 21% of the gross export earnings of the country. Therefore, growth and development of this industry has a significant bearing on the overall development of the Indian economy. [Source: Annual Report 2004-05 of Ministry of Textiles, GoI]

Textile industry in India had historically been fragmented. Although the development of textile sector was earlier taking place in terms of general policies, in recognition of the importance of this sector, for the first time a separate policy statement was made in 1985 for development of Indian textile industry. Further, in 2000 a comprehensive textile policy was formulated for developing a globally competitive textile industry in India through modernization and consolidation for taking up the challenges arising of end of quota regime in the industry. Vision 2010 for textiles formulated by GoI aims to increase India's share in world's textile trade from around 3.30% (around USD13 billion) in 2003 to 8% by achieving export turnover of USD 50 billion by 2010. It also envisages growth in domestic textile trade from the current USD 25 billion to USD 55 billion by that period. [Source: Textile Policy, 2000 of Ministry of Textiles, GoI]

REMOVAL OF QUOTAS IN 2005

Protection of the textile and clothing sector has a long history in United States and Europe. In the 1950s, Japan; Hong Kong, China; India and Pakistan agreed to voluntary export restraints for cotton textile products to the United States. In 1962 a Long Term Agreement Regarding International Trade in Cotton Textiles (LTA) was signed under the auspices of the GATT (replacing a 1-year short-term agreement). The LTA was renegotiated several times until it was replaced by the MFA, which extended restrictions on trade to wool and man-made fibres in addition to cotton.

Since 1947, when the General Agreements on Tariff and Trade (GATT) was first signed, an increasing proportion of international trade was regulated by international agreements, designed to ensure countries could erect or maintain barriers to international trade only under mutually agreed terms.

Apparels/readymade garments were not included in GATT provisions. In 1974, the Multi-Fibre Agreement (MFA) was signed, without reference to GATT, essentially ratifying countries' right to impose quotas on textiles and apparel/readymade garment imports from each other. This was intended to be a temporary measure allowing developed countries time to restructure their apparel/readymade garments and textile industries before opening them up to competition from developing countries.

In practice, the MFA was frequently renewed. In 1994, GATT signatories signed the Agreement on Textiles and Clothing (ATC), committing to phasing out MFA and replacing it by the general systems for agreeing trade barriers and disputes that the GATT had laid down. Almost simultaneously, the GATT was replaced by the World Trade Organization (WTO).

The most important underlying principles of the ATC are:

- That quotas would be phased out to an agreed timetable
- There would be no extension date
- The ATC would be binding only on trade between WTO member states.

Accordingly, quota restrictions have been removed with effect from January 1, 2005. This removal of world trade quota restrictions is expected to bring a change in the global apparel trade. Productivity, labour costs, quality and creativity will determine which countries will eventually emerge as winners.

A discussion paper, The Global Textile and Clothing Industry post the Agreement on Textiles and Clothing by Hildegunn Kyvik Nordås (WTO) estimates the likely changes in trade flows in apparel with the removal of quotas in 2005, which is likely to change the market shares of various countries in international trade as given below:

THE STRUCTURE OF THE TEXTILE AND CLOTHING SECTOR

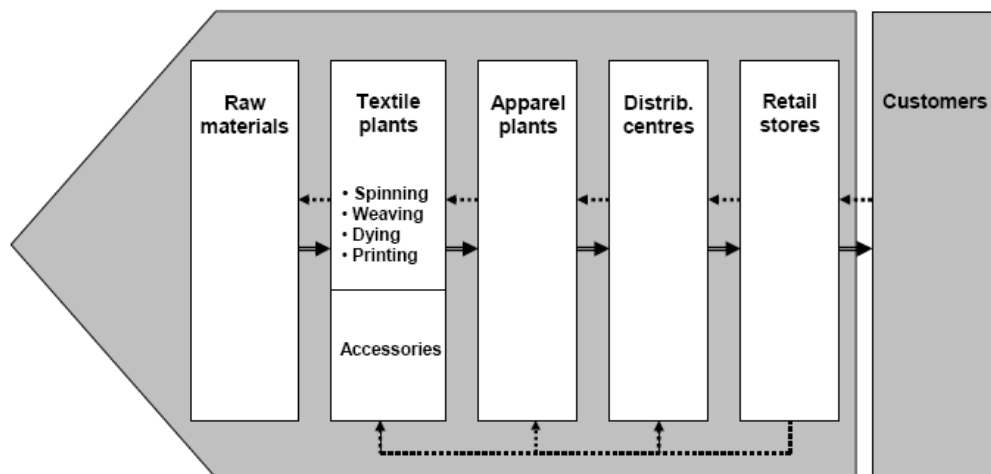

The clothing sector is a labour-intensive, low wage industry and a dynamic, innovative sector, depending on which market segments one focuses upon. In the high-quality fashion market, the industry is characterized by modern technology, relatively well-paid workers and designers and a high degree of flexibility. The competitive advantage of firms in this market segment is related to the ability to produce designs that capture tastes and preferences, and even better – influence such tastes and preferences – in addition to cost effectiveness.

The other major market segment is mass production of lower-quality and/or standard products such as t-shirts, uniforms, white undergarments etc. Manufacturers for this market segment are largely found in developing countries, often in export processing zones and/or under so-called outward processing agreements with major importers. They employ mainly female workers – semi-skilled and unskilled – and outsourcing to household production is quite common in the low end of the market.

With increasing disposable income, the consumers spend a smaller share of their income on clothing than in the past, although consumers shop more frequently and buy a larger number of clothing items than before. The response from producers to the challenge of slow growth in total demand is to build on consumers' love of variety and provide new fashions and a broad variety of sizes, colours, designs etc. at a frequent rate.

The pillars of the textile and clothing sector are the supply chain, assembly line and retailing

1. **SUPPLY CHAIN** : The textiles and clothing sectors can be seen as a supply chain consisting of a number of discrete activities. Increasingly the supply chain from sourcing of raw materials via design and production to distribution and marketing is being organized as an integrated production network where the production is sliced into specialized activities and each activity is located where it can contribute the most to the value of the end product. When the location decision of each activity is being made, costs, quality, reliability of delivery, access to quality inputs and transport and transaction costs are important variables.

The supply chain in the textile and clothing sector is illustrated above. The dotted lines represent the flow of information, while the solid lines represent the flow of goods. The direction of the arrows indicates a demand-pull-driven system. The information flow starts with the customer and forms the basis of what is being produced and when. It is also worth noticing that information flows directly from the retailers to the textile plants in many cases. The textile sector produces for the clothing sector and for household use. In the former case there is direct communication between retailers and textile mills when decisions are made on patterns, colours and material. In the second case textile mills often deliver household appliances directly to the retailers.

2. **ASSEMBLY LINE** : The basic production technology of the apparel industry has not changed much over the past century, and is characterized by the progressive bundle system. Work is organized such that each worker is specialized in one or a few operations. The fabric is first cut and then grouped by parts of the garment, tied into bundles (pre-assembly) and then sewed together. The individual sewing tasks are organized in a systematic fashion and specialized sewing machines have been developed for the individual tasks. A worker receives a bundle of unfinished garments, performs his/her single task and places the bundle in a buffer. A buffer of about one day's work has been common at each operation. It takes

about 40 operations to complete a pair of pants and 30 operations to complete a shirt . For men's blazers, however, it takes as much as 100 operations. Although a number of improvements in terms of systematizing the operations and reducing the time at each individual operation has taken place over-time, the basic system has remained the same. One explanation for this is that technology changes cannot be implemented in a partial fashion involving only a few operations. This would unbalance the system and any major technological change therefore needs to involve the entire system.

In the early days of industrial development in Europe and the United States, the bundles of unfinished garments could either be sewn together in a factory, or workers took the bundles home to sew them together there, after which they were returned to the shop or factory for finishing. The latter arrangement dominated in the early days and is still a feature of the apparel industry in developing countries today.

Even though the basic technology and the sequence of operations have not changed much, new innovations have improved efficiency at each stage of production and not least, improved coordination between stages and provided a more seamless interface between them. One major innovation was the automatic cutting machine introduced in 1969. This machine has made it possible to cut increasingly thick layers of cloth accurately. Moreover, cutting machines, pattern layouts and other functions are computer-assisted and in many cases designs can be transformed to patterns which are directly fed into cutting machines via electronic networks. These innovations are mainly related to the so-called pre-assembly phase of production, where technological developments have been more prominent than at the assembly stage. Pre-assembly is also the most capital intensive stage in the clothing sector and where quality and precision is the most important. If, for example the fabric is not cut precisely, the quality of the finished garment can be seriously damaged. Pre-assembly is therefore the stage in the production chain that is most likely to be done in-house by major clothing firms. However modern, the assembly stage of the clothing sector is still labour-intensive and it is the stage that is most likely to be farmed out to lower-cost firms.

3. **RETAILING** : Substantial changes in the retail sector have been observed during the past few decades and modern retailing has been called “lean retailing”. The technological building blocks of lean retailing are bar codes and uniform product codes, electronic data interchange (EDI) and data processing, distribution centres and common standards across firms. The change most visible to consumers is the expansion of large shopping malls at the outskirts of the cities at the expense of city centre department stores and boutiques. The retail sector has become more concentrated in the urban cities. Concentration implies more buying power for the retailer and thus increased bargaining power towards suppliers.

The bar code and complementary equipment for reading it are crucial for the retailer to collect point of sales information in real time. The technology allows retailers continuously to monitor which products sell and which do not – down to the details on size, colour and other characteristics. The technology also allows retailers to keep track of inventories. Such information is only valuable if it can be used for adjusting the supply of garments to consumer tastes as the information becomes available. Such adjustments require more frequent supply of garments in smaller quantities as opposed to the traditional stocking of the store before the season and clearance sales at the end of the season. In order for suppliers to be able to provide frequent supplies and make changes in the product spectre at short notice, retailers need to share point of sales data with suppliers, which requires frequent communication between retailers and their suppliers. For this purpose, EDI and data processing programmes are necessary. These provide a direct and often automated information exchange between retailers and suppliers and require that both parties invest in compatible software. A very crucial technology applied throughout the textile and clothing supply chain is the laser which is used for reading bar codes and transmitting the information content to the EDI and data processing equipment.

Finally, the integration of information flows, flows of goods, and payments are only possible if all the links in the chain use compatible standards. Suppliers are required to add bar codes that comply with industry standards to garments before they are shipped. Evidently, lean retailing has a bearing on suppliers and the technology applied in the clothing and textiles sectors.

THE INDIAN TEXTILE INDUSTRY

The Indian Textile Industry is one of the oldest and largest and the only vertically integrated industry which is self-reliant and complete in value chain i.e. from raw material to the highest value added products – garments/made-ups. The Indian textile industry is extremely complex and varied with hand-spun and hand-woven sector at one end of the spectrum and the capital-intensive sophisticated mill sector at the other, with the decentralized powerloom and knitting sectors coming in between. This industry uses natural fibres – cotton, jute, silk and wool, as well as synthetic/ man-made fibres – polyester, viscose nylon, acrylic and their multiple blends. The complex and varied structure of the industry coupled with its close linkage with our ancient culture and tradition provides it with the unique capacity to produce, with the help of latest technological inputs and design capability, a wide variety of products suitable to the varying consumer tastes and preferences, both within the country and overseas.

The textile sector plays a significant role in Indian economy by contributing to the Gross Domestic Product, generating employment and earning foreign exchange. An estimated 35 million people are directly employed in the Indian Textile

Industry, which contributes to 4% of GDP and 14% of the total industrial production. The contribution of this industry to the gross export earnings of the country is about 21 per cent. Due to its close linkage with agriculture it also has immense potential for employment generation, particularly in the rural and remote areas of the country and currently provides indirect employment to around 50 million people. The textile industry has shown remarkable resilience and has grown considerably in terms of installed spindleage, yarn production and output of fabrics and garments. The spindleage capacity of the organized sector as well as that of Small Scale Industries (SSI) has increased from 37.91 million in 2000-01 to 39.03 million in 2002-03. A noticeable feature in this growth process has been the installation of large number of open end rotors in the 1990s, and the setting up of 100% Export Oriented Units (EOUs) in the spinning sector. The production of spun yarn is anticipated to touch 3221.37 million kg during 2004-05. It is worth noting that the production of 100% non-cotton yarn has shown an upward trend in recent years and it is anticipated to reach 377.31 million kg during 2004-05 from 341.76 million kg achieved during 2003-04, registering an annual growth rate of 10.40%. The production of cloth by all sectors – mill, powerloom, handloom and khadi, wool and silk has shown an upward trend in recent years. The total production of cloth during 2003-2004 was 42,383 million sq.mtrs and is anticipated to touch 44,322 million sq.mtrs. in 2004-05. The cloth production from decentralized powerloom sector was 27,258 million sq.mtrs. during 2003-04 and is anticipated to be 28,803 million sq.mtrs during 2004-05. The per capita domestic availability of cloth in the country during 2004-05 is provisionally placed at 31.89 sq.mts. (Source: Ministry of Textiles Annual Report 2004-2005)

India is globally a significant player in the textile sector and is globally the

- third largest producer of cotton and cellulose fibre/yarn.
- second largest producer of cotton yarn.
- largest producer of jute, second largest producer of silk.
- fifth largest producer of synthetic fibre/yarn

Cotton is one of the major crops cultivated in India. India has the largest cotton acreage in the world and cotton is the dominant fibre in Indian Textile Industry. About 75% of the total fibre consumption in the spinning mills and about 56% of the total fibre consumption in the textile sector was cotton in 2004-05. Almost all cotton used in India is grown locally and a tiny amount is imported. Cotton textiles account for 2/3rd of India's textile exports (Source: Ministry of Textiles Website and Annual Report 2004-2005)

During the last five decades, the production of cotton in India increased from 3.0 million bales of 170 kgs each in 1950-51 to an estimated 213 lakh bales (170 kg each) in 2004-05. There has also been a rise in area under cultivation from 5.89 million hectares in 1950-51 to an estimated 8.97 million hectares in 2004-05. (Source: Ministry of Textiles Annual Report 2004-2005)

TAMIL NADU: A LEADING TEXTILE HUB

Tamil Nadu is the leading textile producing state in the country. Cities like Coimbatore, once known as the 'Manchester of South India', and Tirupur are at the forefront of this development. The following table (2003-2004) compiled by the SIMA shows how Tamil Nadu stacks up vis-à-vis the rest of the country:

The Textile Industry occupies a place of unique importance in the economy of Tamil Nadu by virtue of its significant share in industrial production, large work force employed and the fact that it not only caters to the domestic textile needs but also accounts for sizeable portion in the country's exports.

Of the 1791 organised textile mills in the country, Tamil Nadu accounts for 835 units. Of the all India spinning capacity of 37.49 million spindles, Tamil Nadu alone has 15.83 million (42.2%). Textile mills in Tamil Nadu provide direct employment to about 224,000 workers. Indirectly dependent on this industry are 663,000 handloom workers, 836,000 powerloom workers and several lakhs of workers in garment, hosiery and processing units. Around 45% of the cotton yarn produced in the country comes from Tamil Nadu textile mills and 47% of the cotton yarn exports valued at Rs. 30,650 million came from these mills. In addition, powerloom and hosiery sectors from Tamil Nadu export around Rs.100,000 million per annum.

According to SIMA, Tamil Nadu has various unique advantages to its credit when compared to other states in India like good industrial relations and work culture, technical know-how, highly skilled entrepreneurship, availability of locally manufactured hi-tech machinery and testing equipment, availability of cost effective and quality spares and accessories, leading garment, made-ups and fabric manufacturing centers like Tirupur, Karur, Madurai, Palladam, Erode, Salem, etc.

Confederation of Indian Textile Industry (formerly ICMF) and Government of India have envisaged an investment of Rs.1,400,000 million for strengthening the competitiveness of the Indian textile industry in the next 5 years. This investment is expected to create 12 million additional jobs. Taking advantage of this, Tamil Nadu being the hub of the textile industry, the State would attract at least one third of the proposed investment and could generate 4 million new jobs apart from retaining the large existing work force.

TEXTILE EXPORTS

As per the National Common Minimum Programme, the textile industry will be enabled to meet new challenges imposed by the abolition of quotas from January 2005 under the international Multi-Fibre Arrangement (MFA). In pursuance, the Government has initiated a number of measures like reduction in custom and excise duties, introduction of capital and interest subsidy, etc for strengthening the domestic textile industry for meeting the global competition. Besides, a number of steps (like launching of textile mission on cotton to improve productivity and quality of cotton, launching of apparel park for exports, launching the "Textile Centre Infrastructure Development Scheme" for improving infrastructure at important textile centres) have been taken to provide an enabling environment to the Indian Textile Industry to meet the emerging global competition.

Textile exports on a year-to-year basis recorded a growth of 4.6% during April-November 2004 and in value terms amounted to US\$ 8,348.5 million against US\$ 7,981.5 million in the corresponding period of the previous year. According to a recent study by CRISIL {commissioned by Indian Cotton Mills Federation (ICMF)}, the Indian textiles and apparel industry can achieve a business of US\$ 85 billion by 2010, of which the domestic market share would be US\$ 45 billion and the share of export would be US\$ 40 billion, and approximately 60% of textile exports would be of garments. THE GARMENT INDUSTRY

The garment industry is one of the fastest growing industries in India. This industry is structurally a labour intensive, low wage industry with some variations across its market segments. Pricing in the industry depends upon the extent of value addition in the end product, the more the value addition the higher per unit price realization. The competitive advantage of companies in this market segment is related to their ability to create designs that capture tastes and preferences, and even better – influence such tastes and preferences – in addition to cost effectiveness. This industry has also seen a significant amount of relocation of production and outsourcing to lower-cost producers. In 2003, the Indian garment industry was of around USD 16 billion, consisting of domestic market of USD 10 billion and exports market of around USD 6.5 billion. Vision 2010 envisages this industry to be around USD 47 billion, consisting of domestic market of USD 22 billion and exports market of USD 25 billion by 2010. The following are the important factors, which gives India an edge over other countries in the garment industry:

Designing Skills: Globally it is difficult to forecast the demand and therefore buyers prefer to place small orders on the basis of seasonal trends. Order flow in the industry depends upon ability of manufacturer to recommend design changes in tandem with the on going trend. Skilled designers play an important role by analysing the existing trend and innovating new designs suited to preferences of end users. The ability of Indian designers to give innovative designs helps the garment manufactures to realize better prices for their products.

Raw Material Advantage: India is the third largest producer of cotton with the largest area under cotton cultivation in the world. Also, India is one of the largest producers of man-made fabric. Abundant availability of raw materials for the garment manufacturing at competitive costs gives India an edge and is in a position to meet global demand of garment products on large scales.

Low Labour Cost: Indian garment industry is internationally cost competitive, as cost of labour in India is cheap compared to other countries. A comparative analysis of India and other countries with respect to labour cost as a percentage of total manufacturing cost of apparel/garment making

Country	Labour Cost as a % of manufacturing cost of apparel/garment making
Germany	69%
Singapore	55%
S. Korea	51%
Taiwan	48%
Malaysia	44%
Hongkong	37%
Phillipines	31%
Turkey	29%
Thailand	22%
Mexico	19%
China	10%
India	6%
Indonesia	5%

(Source: CII-Accenture report 'Textile Industry: Road to Growth', November 2001)

Low Productivity:

However, the labour productivity of India is low compared to other countries which does to an extent erode the advantage of cheap labour. Findings of comparative analysis of productivity levels of Indian apparel/garment making units vis-à-vis their counterparts in other countries are given below:

	No. of pieces/machine/day				
	Ladies Blouses	Gents Shirts	Ladies Dresses	Ladies Skirts	Trousers

Thailand	17.0	19.8	12.2	20.5	13.
S.Korea	14.6	17.4	8.8	17.5	15.6
China	10.9	14.0	7.8	13.0	6.7
India	10.2	9.1	6.3	9.6	6.8

(Souce: CII-Accenture report "Textile Industry: Road to Growth", November, 2001)

According to the Vision Statement of ICMF for the textile industry, the apparel segment of the value chain will drive the textile industry growth in India. This sector provides the highest value addition for India's exports. This segment of the value chain is labour intensive, and India's competitive advantage-labour availability at low cost – is a core strength that can drive success in this segment. India thus has the potential to build a large-scale sourcing base. To achieve this, apparel companies need to

choose between 'operational excellence' and 'design and innovation'. Operational excellence-led companies will compete on the basis of lower costs and will be distinctive in their economies of scale, sourcing of fabrics and labour productivity. Best practices in operations and quality enhancement measures will ensure their success. Players competing through design & innovation will be characterized by innovative fabric R&D, close relationships with supplier mills, relationships with retailers' design departments, a good understanding of fashion trends and an ability to offer a range of readymade designs to customers.

GOVERNMENT INITIATIVES / POLICIES:

Post liberalization, the Indian government has removed many of the barriers hindering the textile sector's growth. To fulfill the potential of the country's apparel-export industry, the government needs to eliminate remaining restrictions that perpetuate the lack of scale and poor operational and organizational performance of local manufacturers and that discourage investment, particularly foreign direct investment. Some of the important initiatives taken by the Government of India in this sector are as follows:

- (i) New Textile Policy: - One of the main objectives of the New Textile Policy (NTxP-2000) announced in November 2000 is to facilitate the textile industry to attain and sustain a pre-eminent global standing in the manufacture and export of clothing. The policy endeavours to achieve the target of textile and apparel exports from the present level to US \$ 50 billion by 2010, of which the share of garments will be US \$ 25 billion. Subsequent to the announcement of NTxP-2000, the woven segment of readymade garment sector and the knitting sector have been de-reserved from SSI.
- (ii) The Technology Upgradation Fund Scheme (TUFS): TUFS is the "flagship" Scheme of the Ministry of Textiles which aims at making available funds to the domestic textile industry for technology upgradation of existing units as well as to set up new units with state-of-the-art technology to enhance their viability and competitiveness in the domestic as well as international markets. To meet the challenges of the post quota regime, the industry is required to become competitive, cost effective and quality oriented. With this background, Government of India has launched a Technology Upgradation fund scheme (TUFS) for Textiles and Jute Industries, w.e.f. 01.04.1999 for a period of 5 years, i.e., up to 31.03.2004, which was subsequently extended up to 31.03.2007. The main feature of the scheme is a 5% interest reimbursement in respect of loans availed thereunder from the concerned financial institution on a project of technology upgradation in conformity with this scheme. During the Tenth Plan Period, there is a provision of Rs. 1,270 crore for TUFS. Additionally the Ministry of Finance, Mr. P. Chindambaram while presenting the Union Budget for the Year 2005-06 stated that the TUFS was being continued with an enhanced allocation of Rs. 4350 million and proposed to introduce the 10% capital subsidy scheme for the textile processing sector in addition to the normal benefits available under TUFS. Operational guidelines on this behalf were announced by the Ministry of Textiles on April 25, 2005. Among other things, the guidelines provide that the additional 10% capital subsidy is admissible on investments made in specified processing machinery during a period of one year from April 20, 2005 to April 19, 2006.
- (iii) Liberalization of FDI Policy: Government has allowed foreign equity participation upto 100%, through automatic route.

- (iv) Export Promotion Capital Goods (EPCG) Scheme: The scheme facilitates import of capital goods at 5% concessional rate of duty with appropriate export obligation. Import of second hand capital goods without any restriction on age is also allowed under the new Foreign Trade Policy which came into effect on September 1, 2004. The Foreign Trade Policy also permits EPCG license holders to opt for technological upgradation for their existing capital goods imported under the EPCG license, subject to certain prescribed conditions.
- (v) Advance Licensing Scheme: With a view to facilitating exports and to access duty-free inputs under the scheme, standard input-output norms for about 300 textiles and clothing export products have been prescribed and this scheme remained under operation.
- (vi) Duty Entitlement Pass Book (DEPB) Scheme: DEPB credit rates have been prescribed for 83 textiles and clothing products. The scheme aims to neutralise the incident of basic and special custom duty on the import content of the export product, by way of grant of duty credit against the export product at specified rates. However, these export incentives may be reviewed shortly to make them WTO – compatible.
- (vii) Duty Drawback Scheme: The exporters are allowed refund of the excise and import duty suffered on inputs of the export products under the Scheme. The Ministry of Finance has recently announced the revised 'All Industry Rates of Duty Drawback', which came into effect on May 5, 2005. The drawback rates have been determined on the basis of certain broad parameters including, inter alia, the prevailing prices of input, standard input/output norms published by the DGFT, share of imports in the total consumption of inputs and the applied rates of duty. An education cess is being collected as duties of excise/customs, the element of education cess has been factored in the drawback rates. The incidence of duty on HSD/furnace oil has also been factored in the drawback calculation. The changes in the drawback rates reflects the changes in applied duties and change in prices.
- (viii) Human Resource Development: Attention has also been paid to Human Resource Development in the textile sector. National Institute of Fashion Technology (NIFT) which is imparting training to Fashion Designers and Fashion Technologists to cater to the human resource requirements of garment industry has 7 branches at Delhi, Mumbai, Calcutta, Hyderabad, Bangalore, Chennai and Gandhinagar. Ministry of Textiles has established a Nodal Centre for Upgradation of Textile Education at the Indian Institute of Technology, Delhi with funding from the Ministry of Textiles. The Apparel Export Promotion Council has been running Apparel Training and Design Centres at important apparel centres located at Chennai, Delhi, Kolkata, Hyderabad, Jaipur, Bangalore, Noida, Gurgaon, Ludhiana and Thiruvananthapuram in order to impart training at shop floor level to meet the growing needs of apparel industry.
- (ix) Construction of Apparel International Mart: Apparel Export Promotion Council is constructing an Apparel International Mart at Gurgaon with assistance from the Government.
- (x) Setting up of modern laboratories: The Ministry of Textiles has assisted the Textile Committee in setting up of modern textile laboratories to ensure that the textiles exported from the country meet all international environmental standards.
- (xi) Apparel Park for Exports Scheme: A centrally sponsored scheme titled "Apparel Parks for Exports Scheme" has been launched. The scheme is intended to impart focused thrust to setting up of apparel manufacturing units of international standards at potential growth centres and to give fillip to exports. Since the inception of scheme in March 2002, twelve Project Proposals have been sanctioned for setting up Apparel Parks at Tronica City & Kanpur (U.P.), Surat (Gujarat), Thiruvananthapuram (Kerala), Visakhapatnam (Andhra Pradesh), Ludhiana (Punjab), Bangalore (Karnataka), Tirupur & Kanchipuram (Tamil Nadu), SEZ, Indore (Madhya Pradesh), Mahal (Jaipur, Rajasthan) and Butibori-Nagpur (Maharashtra).
- (xii) Textile Centres Infrastructure Development Scheme (TCIDS): Development of infrastructure facilities at pre-dominantly textile/apparel sector areas is one of the thrust areas of NTxP-2000. For attaining this objective, a new scheme (TCIDS) has been launched for upgrading infrastructure facilities at important textile centers.
- (xiii) Organisation of buyer-seller meets / fairs in the country as well as abroad: The Textile Export Promotion Councils have been regularly conducting seminars, organizing buyer seller meets, participating in exhibitions abroad to promote textile exports. Besides, events like TEXSTYLES India, Indian Handicrafts and Gift Fair, India International Garment Fair are also organized in the country to provide an exposition of India's capabilities in textile and clothing sectors to the visiting foreign buyers.
- (xiv) The Union Budget for the year 2005-06 provides for a reduction in custom tariffs on import of textile machinery from 20% to 10% in order to help the textile industry acquire a competitive edge in the post-quota regime.

INDIA'S EMERGING RETAIL STORY

Retail is the world's largest private industry with global retail sales of roughly USD 8 trillion. Retailing is one of the biggest contributors to the Gross Domestic Product (GDP) of most countries and also one of the biggest employers.

India is emerging as one of the most attractive destinations for retail. India's retail market has grown by 10% on an average over the past five years. The changing retail landscape in the country is attributed to the increasing mobility among the middle and upper classes and increasing urbanization. The Indian retail landscape is evolving with interplay of factors ranging from demographic to economic ones facilitating the growth of organized retails.

Given the highly fragmented nature of the retail industry in India, the organized retail industry constitutes about 3% of the total retail market presently. In terms of value, organized retail has been estimated at Rs. 287.5 billion in 2004 (Source: KSA Technopak, 2005)

The Indian Retail industry is evolving in line with the changing customer aspirations across product groups, with modern formats of retail emerging. India is believed to be in the second phase of this evolution. The Indian customers are becoming more demanding with improved standard of living and changing lifestyles. As the sector enters the third phase of evolution, supply chain management (SCM) will attain top priority.

Retail and the Indian Apparel Market

The Indian apparel market was valued at over Rs. 780,000 million in 2004 and is dominated by unorganized players having a share of about 80-85%. The men's segment dominates with 42% market share while the women and children's wear have 34% and 16% share respectively. Uniforms account for the remaining 8% (Source: KSA Technopak)

The growth rate in the apparel segment averages about 12% across the categories. The women's wear segment shows maximum potential at 13%.

Segment	2003 Value (Rs. Mn.)	2004 Value (Rs. Mn.)	Growth Rate
A. Core Segment			
Men's Apparel	291,950	326,440	12%
Women's Apparel	232,680	263,950	13%

The apparel market comprising of menswear, women's wear and children's wear accounted for Rs. 10,900 crore or 39% of the organized retail pie in 2004, making it the single largest segment in retail. (Source: KSA technopak)

This market can be further classified into the following two categories:

- The ready-to-stitch (RTS) segment, where the consumer purchases the fabric from a retail outlet and then uses the services of local tailors to convert them to ready garments and
- The ready-to-wear (RTW) segment, where the consumer purchases a ready-made apparel garment.

The RTW segment is a growing one in India and this growth has accelerated over the past ten years in line with the economic development and changes in lifestyle of the population.

In most other mature and developed countries, RTW is the norm. The RTS segment in these countries is meant for designing couture wear for the more elite classes. Even in China the RTW market has become the norm and very little local tailoring services exist.

Within the overall RTW segment apparel in India, branded RTW apparel has been witnessing a higher growth compared to unbranded RTW segment. This is reflected in the growing number of fashion labels being associated with Indian products. This growth is driven by the growth in disposable income and the expansion of organized retail infrastructure.

The major reasons for this growth are:

- Design and Quality acquiring significance
- Increase in the number of working women with the strong feminine desire to look good
- Kids become aware of External Environment and more demanding
- Increased effort to look and feel good
- Influence of the International Travel and Media
- Easier and uninhibited acceptance of luxury
- Following of fashion trends and the desire to not be left out
- Rise of the self employed meaning higher disposable incomes
- Increased availability of finance options and credit

Outlook

The outlook for growth in branded apparel business in India is robust and the rates of growth of the past decade are forecast to continue for the next decade (Source: Images/KSA Technopak). Growth might be expected to accelerated as more shopping mall locations come on stream and the youthful segment of the market which is generally more apparel conscious spend more.

Strong Infrastructure Set-up

We have successfully managed our growth by investing in infrastructure, including human and IT infrastructure. From 50 machines and 72 people small venture we have grown to 8 factories and 5000 people organization supported by a competent ERP system developed over the last 7 years. The ERP functions as a platform on which the production and marketing activities of Celebrity are coordinated and has laid a platform to adapt to technological advances. We have in-house laundry facility capable of processing garments to different washes such as silicon wash, enzyme wash, golf ball wash and numerous other treatments making us a complete solution provider.

Experience with cost-plus engagement models

We have demonstrated the ability to successfully deliver services on cost-plus and time-and-material driven engagement models. Majority of our export contracts are based on cost plus working model. Our ability to source fabric from the most appropriate destinations in the world is an advantage in our ability to manage cost. Our ability to manage cost in exports helps us in offering value for money proposition to our Indian Terrain customers.

Delivery Capabilities.

We believe that timely delivery is most important factor, as garment industry face high fashion risk. Our ability to provide end to end solution from design to delivery supported by global sourcing capabilities and owned manufacturing and processing facilities, allows us to consistently deliver on time, maintain a high level of client satisfaction.

A de-risked Business Model

We have established our presence in both the international and the domestic market. We had launched the "Indian Terrain" Brand in 2000 with the dual objective of tapping the huge opportunity in branded apparels for Indian Men and to de-risk our business model in exports in the quota free regime. We have built a natural hedge within our Company to weather any risk arising out of the Chinese domination of the global textile space. Our Indian Terrain brand has since grown at CAGR 90.73% and contributed 19.89% of total FY 2005 income .

Strong Customer Base

We continuously have received repeat orders from all our customers and have not lost a single customer since inception. This customer trust has been built on the foundation of our commitment to quality, providing end to end solution from design to delivery and good human resource practices. Our top five customers have remained with us and have consistently increased their business requirement. Sales to the top five customers have increased at a CAGR of 34.21% from Rs 422.08 mn in 2002-03 to Rs 760.28 mn in 2004-05.

OUR STRATEGY

Expansion of Business

We intend to expand, strengthen and consolidate our current position in the domestic and global market. We propose to expand our product range and increase product reach in the Indian branded apparel market and the international outsourced garment business.

Expansion of Product range

In the past we have been concentrating on export of shirts on account of quota restrictions. With the removal of quota restrictions, we propose to expand our product portfolio to men's trousers /bottoms, outer wear / jackets and women's wear. Similarly in domestic market our product portfolio currently include only ready-to-wear men's garments. We intend to expand our product offering to include women's western / office wear and knit wear.

Enhance our Customer Reach

We intend to set up marketing office in New York to cater to wider client base through quick response to customer requirement. We plan to build chain of twenty five own Indian Terrain Brand outlets, twenty of which will set up from part of the Issue proceeds. We will also increase our customer reach by partnering with the expansion plans of National Store Chains.

Maintain Our Focus on Long-term Relationships

We expect to maintain our focus on client relationships. We believe that there are significant business opportunities for additional growth with our existing clients as we diversify our product portfolio and build upon these existing relationships.. This strategy increases our in-depth client specific knowledge to provide them end to end solution of their requirement and develop closer relationships with our clients.

Continue to invest in infrastructure

We believe that we have managed growth on the back of our own infrastructure, which ensured quality and timely delivery. We will continue to invest in infrastructure, including human resources, to meet our growing needs. We plan to maintain the quality of our human resources and to continuously upgrade and benchmark our HR practices. We also plan to further strengthen IT support by installing software called Fast React authored by professional in garment in UK.

Strengthening our brands

We intend to invest in developing and enhancing recognition of our brands, through brand building efforts, communication and promotional initiatives such as advertisements in print media, hoardings , televisions, organizing events , participation in industry events, public relations and investor relations efforts. We have entered into a long term agreement with Bennett, Coleman & Co. Limited to use space in their publications to enhance the visibility of our brands and strengthen our recognition in the Indian garment industry.

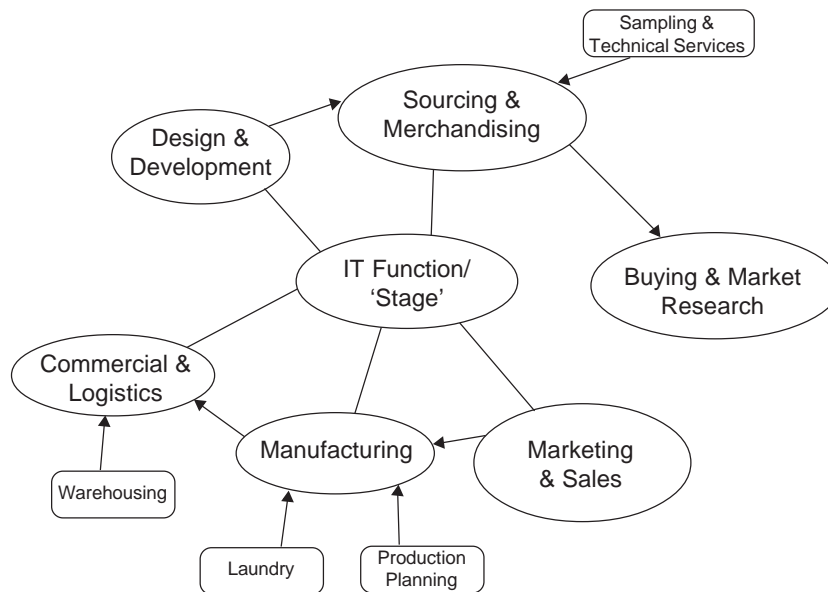

Pursue Strategic Relationships and Acquisitions

Over and above our organic growth strategies, we propose to enhance our capabilities through strategic investments/joint ventures in the areas that are related to our key strengths, are synergistic and, in our assessment, have manageable integration risks , in order to expand our existing client base, increase our horizontal skill-sets and to provide scalability of our product offerings.

Our Business Process

Export Process

Our business processes are supported by Information Technology back bone. We use an ERP package specific to garment manufacturing called 'Stage'. Stage provides the common link amongst all departments until the completion of the order and thereafter for Management Information Systems (MIS) reports. Our design team gets online fashion and style update from WGSN subscription.

Design and Product development Team

In 2001, we envisaged that garment manufacturing companies are witnessing a major shift from being robotic manufacturers or converters to one of being partners in the design process as well and hence we set up the design studio named 'Studio Celebrity'. Our studio provides latest design and fashion trends to customers. This is facilitated by usage of advanced technology like WGSN, an online research trend analysis and news service for the fashion and style industry. This site is used by the best brands across the world. Our designers travel regularly to the various fashion capitals of the world to keep track of fashion trends. The design team is part of the marketing process as well and this ensures that they get a first hand account of client requirements, trends, ideas etc.

The design team works by a design calendar where presentation dates for customers are clearly marked for the entire year. All client presentations are made for the following fashion seasons

USA

Spring /Summer

Fall/Holiday

Europe

Spring/Summer

Autumn/Winter

Our design team is well placed to take advantage of the next key phase in the garment export industry "Design outsourcing".

Marketing and Merchandising

The product development presentation is followed by selections by the clients and at this stage our design team ensures a smooth transition of the process to the Marketing/Merchandising team by way of handing over all required information of selected products to facilitate efficiency in Merchandising processes.

The product development process is followed by sales samples, marketing samples or photo shoot sample requests from the clients. Delivery of these samples are extremely crucial to the quantum of business being confirmed. Successful execution of sales samples ensures confirmation of an inquiry to an order.

Costing process is concurrent to the sales sample process and this involves a high level of awareness of the market, raw material qualities, raw material costs in order to provide the customer with various pricing options. Since raw materials constitute 60% of the cost of the garment, our merchandising team works in close coordination with the fabric sourcing team to negotiate and work the best fabric options for these programs.

In addition to the costing process, our production planning team is also involved in this process for the confirmation of production space availability and garment delivery.

The order is formally confirmed once the price, garment delivery, factory planning are agreed upon by all parties concerned.

The essence of merchandising is communication and coordination and the merchandising process begins by communicating all information about the order to various departments through the ERP package. This is followed by fixing the PPM date for the order. The PPM –is the Pre-production meeting and this is the deadline for completion of all merchandising activities and approvals before the package is formally handed over to the production team for manufacturing and delivery. In effect the PPM date is the "Garment delivery date for merchandising".

Raw material Order and Sourcing

Our capabilities in fabric sourcing and fabric knowledge help us getting the best combination of quality, price & reliability. Our raw material requirement comprises of fabric, accessories and trims such as fasteners, buttons, labels, & other consumables. Fabric accounts for about 70% of our material costs and is the dominant raw material. Our fabric sourcing spans the length and breadth of India, China, Taiwan and Europe.

Celebrity sources fabric qualities such as

- a) Cottons
- b) Synthetic blends
- c) Wool blends
- d) Knits
- e) Silk

We have a strong and matured partnership with our suppliers, most of whom have been closely involved with in our growth over the years. We nurture our fabric suppliers across various stages of growth and firmly believe in vendor loyalty. Our suppliers have stood by the company through all the market and pricing challenges that industry seems to throw at constant periodicity.

We have sourcing representatives in Erode, Bangalore, Mumbai and an agent in China. The average lead time of fabrics is 45-60 days for Indian piece goods and 35 days+15 day transit period for Chinese piece goods.

All fabric sourced by us is stored at the Central warehouse where they are checked, rated, tested and distributed to its various factories. This ensures that the factory receives only checked and passed goods thereby facilitating direct cutting without any loss of cutting production time.

The Trims and accessory sourcing department is an integral part of the sourcing department as a whole and is as flexible and dynamic as the fabric sourcing department.

Sampling and Technical services cell

We have full fledged, self –reliant “Centralised Sampling section”. This sampling department is a factory in itself if scale is taken into account. The department is equipped with all the machinery of a production unit in order to ensure that initial samples are done in the same process as bulk production. This results in understanding all production issues at the sampling stage and thereby provides for corrective action at the very beginning of the garment making process.

The Technical services cell is an integral part of the sampling cell and provides

- a) Lectra, pattern and consumption support
- b) Garment R&D support
- c) Industrial engineering analysis and support
- d) Embroidery support

Our Technical services cell analyses the construction and sewing details of the garment at the first sample stage. The cell then advises the production team and the planning team on details such as productivity, difficulties (if any) at the garment manufacturing process. The cell also requests the clients for certain changes in the construction of the garment thereby improving production feasibility and productivity during the manufacturing process. This cell forms the back bone of the technical process and provides an early alert system and solution for any problems that may arise due to garment construction, fit, machinery requirements, productivity, feasibility etc.

This Cell also interacts with clients on regular basis in order to eliminate ambiguity, loss of time and lack of clarity on technical issues.

Production planning Cell

Our production planning cell(PPC) is a coordinating cell for all matters related to production planning and production. The functions of this cell are

- a) Delivery confirmation of new orders based on production space availability
- b) Slotting and planning of all orders across all of our factories
- c) Weekly review of planned orders in order to ensure targets are met with respect to factory productivity and garment delivery.
- d) Production space reservation for forecasted orders by clients.
- e) Update on production space availability(after slotting confirmed and forecast orders) to the marketing and merchandising teams.
- f) Monitoring a team of production coordinators who in turn coordinate raw material and approval follow up with the merchandising team and passing the information to the production planning and production team. This provides for faster response to changes and better contingency planning. This follow up is done by way of information updated in the ERP system.
- g) Release of work orders to the factories and there by ensuring tracking of raw material issues and receipts from warehouse to the factories.

Production

Our factories are configured to provide for optimum productivity and flexibility for both its American and European businesses. Each factory is configured separately for

- a) Type of business- European/American
- b) Style and category-Tops, Bottoms
- c) Large and small runs.

We have a flexible production system that is able to meet the rising demands of the customer in garment deliveries, quick lead times and complexity of styles. We manufacture

- a) Men's shirts
- b) Ladies Tops
- c) Men's bottoms
- d) Ladies bottoms
- e) Men's jackets

The PPM is the first step in the production process and the PPM is conducted by the merchandise manager along with the factory manager, production manager, line supervisors, Finishing in charge, QA manager. This meeting is an exchange of all information between merchandising and production on all details pertaining to the history of the given program. The meeting is formally recapped in order that all personnel are updated. The PPM signals the start of production process, please refer to production process given on page 56 of this Red Herring Prospectus.

Commercial and Logistics

Our Commercial and logistics department is in charge of all commercial transactions like-

- a) Checking of sale order for reconfirmation of garment price, delivery etc.
- b) Checking payment mode with Client- L/C, TT , DP etc
- c) Follow up on L/C with the client
- d) On receipt of L/C-Checking L/C details such as price, delivery, value etc in accordance with sale order.
- e) Opening fabric L/C to suppliers overseas
- f) Follow up of timely delivery of fabric shipments, transit, documents and clearance
- g) Imported trims order, payment and delivery
- h) Coordinating with shipping departments in client offices for garment delivery date, vessel planning and loading of cargo.
- i) Coordinating with factory and merchandising for effecting shipment as per buyer's specifications
- j) Working out various vessel plans, options and keeping nominated forwarders updated of the same.
- k) Follow up to ensure receipt of payment on the due date soon after shipment is effected.

The culmination of the business process is effecting the shipment and this is done by close coordination with the commercial department. In keeping with our philosophy of building partnerships, this department too has built strong partnerships with the various shipping and forwarding agencies across the country.

Our MIS team frames the shipment completion report for every order and this is sent out to all departments on a weekly basis. This gives the final status of the process with respect of costing, budget and actuals.

Business Process

Indian Terrain

Our Board of Directors draws a comprehensive fiscal plan outlining the financial outlay available for the year and the revenue to be generated during the year. Projections of fiscal plan are used for number crunching and for fixing targets and budgets to achieve fiscal plans objectives. To achieve the fiscal plan objectives, a target and budget plan is prepared. This is achieved through extensive number crunching and fixing targets and budgets. The projections of the fiscal plan are taken as a base to prepare these budgets and fix targets.

Our marketing team with the sales management team plots the road map to achieve the objectives set in the fiscal plan. The marketing team studies the latest trends in the market and with the inputs received from the sales team plans out strategies to improve the market share of the brand. The marketing team also plans and envisages the market growth and capitalization.

The Marketing plan encompasses the following areas for capitalising the market share of the brand:-

- a) Increase the offerings in the product category.
- b) Studying the demographic needs in the different regions of the country.
- c) Plans ad campaigns and promotions for increasing the sales.

To propel the growth of the brand, our Design Studio works on the designs and options that can be offered and these are worked taking into consideration the International trends and the market feed back received from the sales team. A concrete merchandising plan is then put into place. Designs and patterns are worked to suit the Indian dress sense and demographic requirement of the Indian milieu. Once the merchandise plan is accepted, it is finalized for execution.

The merchandise metrics is put up and the feasibility study is done by the finance team and the sourcing team. On getting approval of the feasibility study the sourcing plan is prepared.

Product Development:-

Central to the development of the brand, our design studio has established itself as a consistently market savvy and quality conscious unit aiming at true value for money design. Drawn from the best design schools in the country, the team comprises of young energetic, creative individuals specialising in various product categories.

The design process commences with the creation of a fashion calendar for the season, all activities are planned around this calendar. Research is crucial to our design and there is extensive analysis of trends through international fashion journals and websites such as WGSN. Competitor activities are analysed for product success and failure, market surveys are conducted in the domestic market and finally the performance of the brands own product for the past season is analysed.

Our association with exports division also provides a window into the plans of internationally renowned brands giving us a cutting edge

Based on this, relevant fashion trends and practices are forecast for the season and inspiration drawn for various product lines. Fabrics are designed, embellishments and stylings are planned to create collections based on the inspirations.

The merchandise is planned in two broad classifications, core and fashion

Core refers to products which have had a long run in the market and which continue to have a strong demand. For example our range of Wrinkle Free Chino trousers

Fashion refers to products which are transient, i.e.. relevant only to a particular season or a current fashion trend. These products are used to spice up a range and make the merchandise mix attractive to the end consumer

The next important function of the design team is the initial product costing. The costing report and the product proto type complete packaging ideas are then offered to the buying and market research team to run a feasibility test.

The product is fine tuned based on the feed back received from the Buying and Market research team and on final approval, product specifics - technical packages and costing targets are handed over to the Sourcing and the Merchandising team.

Marketing

Road show is an important marketing activity in the marketing calendar. Road shows showcase the offerings of the brand for the coming season. We conduct two road shows a year. One in January showcasing the offerings for the Spring/Summer and the other in July showcasing the offerings for Autumn/Winter and Festive season. Road shows are elaborately planned, and are held in all the 4 metro cities of India. Invitations are sent to all the existing retailers and prospective retailers are also called to see the products on display. Normally during the road show 60% of the target is achieved. These road shows are well received by the market and during the road show there is an active interaction with the retailers and this helps us in planning for the future. Our success has been due to the immaculate management of the Road show.

SOURCING AND MERCHANDISING

The merchandising acts as liaison officers between design and manufacturing facilities. Maintaining time and action plan for merchandise movement from design to retail is one of the key functions. The merchandising is also responsible for inventory control of raw materials, work in progress and finished goods. The merchandising submits the final cost sheet of every product which helps in justification of the planned MRP. Merchandising also takes care of market support activities such as salesman sampling and swatch cards creation for retail outlets.

The first step for this planning is to allocate all the orders to two of our own dedicated production facilities which are based in Chennai. If the order requirements exceeds the available production capacity, the excess orders are outsourced. Before outsourcing the production planning cell validates such outsourced facilities.

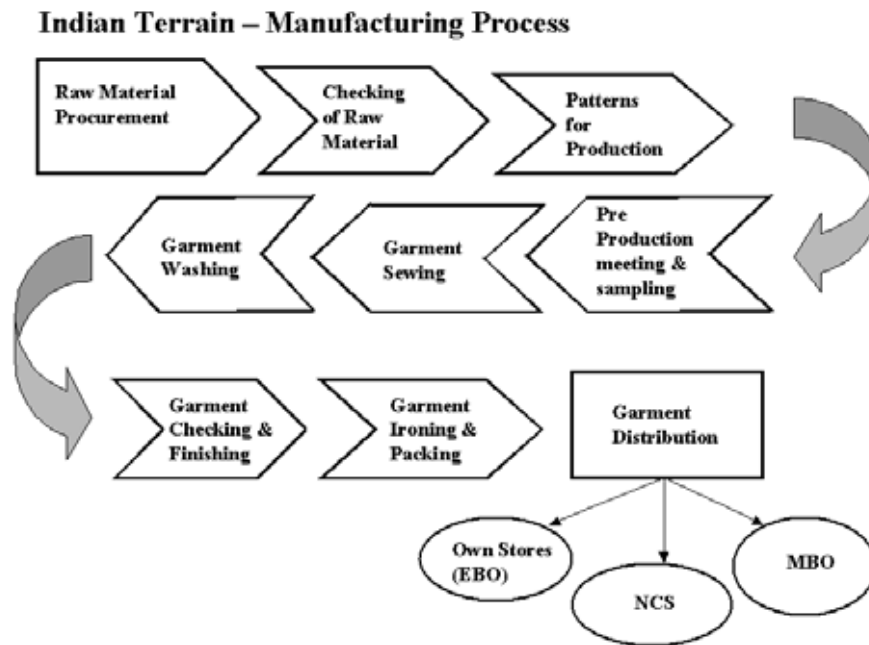

Our two dedicated facilities have a capacity to churn out 720,000 units per annum.

One of the dedicated facilities is meant for trousers whereas the other unit meant for shirts only.

The manufacturing operations at all the units are subject to stringent quality control standards. Quality control for the entire manufacturing process from the receipt of raw material to the dispatch of finished goods is managed by a team of qualified and experienced professionals. The outsourced production also undergoes the same quality control procedures as is applicable for our own units.

The process flow for the different steps of the manufacturing process is as given below :-

Raw material procurement and receipt

In order to ensure a quality product it is important to select the right raw materials i.e. fabrics and trims. A team of skilled professionals are engaged in this procurement process. All the leading mills in India cater to our fabric requirements based on their specialization. The raw materials once made at the supplier's end is subjected to a stringent checking process before the same is dispatched to our end. These dispatches are sent directly to our centralized warehouse.

Checking of Raw Materials

After the fabric is received each of the fabric rolls are checked on the Fabric checking machine and the same is verified for both quality and quantity. The design department provides a swatch card as a standard for each of the fabric designs based on which this checking is carried out. Stress is also laid on the fabric shades. A random shrinkage test is also carried out for each of the fabrics so that the average shrinkage can be incorporated in the cutting pattern which is to be issued to the factory. Besides the fabrics the accessories are also checked for defects and damages.

Patterns for Production

We have a computer aided designing cell (CAD) which makes patterns for each of the styles. The shrinkage factor given by the fabric department is incorporated in the patterns on this CAD system only. The grading of patterns is error free as the same is done through PDS (pattern designing system). Finally the patterns are issued to the respective production units.

Pre production meeting and sampling

Before commencing bulk production a pre production meeting is conducted in the factory and the same is done in the presence of merchandisers and the quality assurance team. After this the factory makes the size set samples based on the Gold Seal Sample. If the measurements of this size set are correct after wash then the factory is given a green signal by the QA department to go ahead with the bulk production.

Garment Sewing

The cut parts are assembled into a complete garment keeping the Gold Seal Sample as a standard. This sewing process is carried out on the best of the Japanese machines in order to ensure a quality product. A major part of this sewing process is automated to ensure minimal inconsistency or errors in production. A dedicated team of production and quality staff ensure that the final product which comes out of the line meets the required specifications.

Garment Washing

The styles which are supposed to be washed are sent to the laundry. Our laundry, has the top loading washing machines as part of its facility. The wash process is carried out as per the specifications laid down by the designer for that particular style.

Garment Checking and Finishing

We as a company attach utmost importance to the quality of our final product. Hence it is ensured that all the garments are checked and is defect free. Every piece manufactured is ensured to be as per the required quality standards. An independent QA team is solely responsible for ensuring that all finished goods are free from defects and are constructed as per the required measurements. Any garment having variation beyond acceptable limits is rejected.

Garment Ironing & Packing:-

After the garments are checked it is given a finishing touch by customized ironing. Other processes such as tagging and attaching of barcode labels is carried out here before the garments are inserted into poly bags. Care is taken to make the packaging attractive and it also protects the garments from getting damaged as well as from any contamination. The finished products are stacked in cartons and are sent to the central warehouse for further distribution to the markets.

Garment Distribution

Our Central Warehouse is the main hub for Distribution throughout the country. We have excellent warehouse systems in place and ERP systems, the movement of merchandise is well tracked and timely deliveries are ensured. Indian Terrain garments are distributed through three channels viz own stores (EBOs), NSC and MBOs. All orders during the Road shows from the three channels are collated and delivery schedules are drawn as per priority obtained from each of the channel. The sale orders for each of the outlet are prepared by the Back Office Marketing team, these sale orders are communicated to the warehouse. The warehouse, prepares dispatch details as per the sale orders, these garments are packed in cartons and the cartons are shrink wrapped in a special shrink wrapping machine. This is done to avoid damage of garments due rain or water during trans shipment.

Our warehouse is efficiently managed, with infrastructure of the highest quality. Top end warehousing systems are employed for easy and quicker identification of garments. Our warehouse is equipped to handle dispatch of 6000 garments per day.

Central Warehouse is fed with regular orders from the market. Orders are booked by our sales team and these orders are communicated to the back office team who in turn prepare the sale orders and intimate the warehouse for dispatching.

To facilitate this smooth functioning, Indian Terrain has an excellent ISD system installed. The HO; the factories and warehouse are well connected by our own server and this department is well managed by trained and experience ISD personnel. We have the latest software in place to help us in preparing the MIS for all the activities and a regular review of the working of all departments is done to keep a track of the company's performance and its achievement of the goals set in the Fiscal plan

Competition

Our competition in export segment is from various apparel exporters in India, who are manufacturing for customers in the international market. Indian Terrain faces competition from other Brand present in the market.

We also face competition from apparel manufacturer across the globe. We compete with manufacturer from other cost efficient countries such as China, Sri Lanka, Pakistan and Bangladesh. We also face competition from countries like Mexico and Turkey, who have locational advantage being closer to American and European Market respectively.

Our domestic branded apparel business faces competition from well entrenched brands as well as local brands .

REGULATIONS AND POLICIES

Over the past five years, the Indian government has removed many of the barriers hindering the sector's growth. But to fulfill the potential of the country's apparel-export industry, the government needs to eliminate the remaining restrictions that perpetuate the lack of scale and poor operational and organizational performance of local manufacturers and that discourage investment, particularly foreign direct investment. Regulations still protect small-scale producers in a number of ways. While the production of ready-made garments is no longer reserved for small-scale manufacturers, a few product markets, such as hosiery, still are.

Textile Policy

One of the main objectives of the New Textile Policy (NTxP-2000) announced in November 2000 is to facilitate the textile industry to attain and sustain a pre-eminent global standing in the manufacture and export of clothing. The policy endeavours to achieve the target of textile and apparel exports from the present level to US \$ 50 billion by 2010, of which the share of garments will be US \$ 25 billion. Subsequent to the announcement of NTxP-2000, woven segment of readymade garment sector has been de-reserved from SSI and the announcement has been made for de-reservation of knitwear from SSI.

Liberalization of FDI Policy

Government has allowed foreign equity participation upto 100%, through automatic route, in the textile sector with the only exception in knitwear/knitting sector, which is still reserved for SSI. SSI investment limit for the knitwear/knitting sector has been increased from Rs.10 million to Rs. 50 million.

Export Promotion Capital Goods (EPCG) Scheme

The scheme facilitates import of capital goods at 5% concessional rate of duty with appropriate export obligation. Import of second hand capital goods is allowed under the EXIM Policy as announced on 31.03.2003.

Advance Licensing Scheme

With a view to facilitating exports and to access duty-free inputs under the scheme, standard input-output norms for about 300 textiles and clothing export products have been prescribed and this scheme remained under operation.

Duty Drawback Scheme

The exporters are allowed refund of the excise and import duty suffered on raw materials under the scheme so as to make the products more competitive in the international market.

Textile Centres Infrastructure Development Scheme (TCIDS)

Development of infrastructure facilities at pre-dominantly textile/apparel sector areas is one of the thrust areas of NTx P-2000. For attaining this objective, a new scheme (TCIDS) has been launched for upgrading infrastructure facilities at important textile centers.

The WTO 2005 Initiative

Protection of the textile and clothing sector has a long history in United States and Europe. In the 1950s, Japan, Hong Kong, China, India and Pakistan agreed to voluntary export restraints for cotton textile products to the United States. In 1962 a Long Term Agreement regarding International Trade in Cotton Textiles (LTA) was signed under the auspices of the GATT (replacing a 1-year short-term agreement). The LTA was renegotiated several times until it was replaced by the MFA, which extended restrictions on trade to wool and man-made fibers in addition to cotton.

Since 1947, when the General Agreements on Tariff and Trade (GATT) was first signed, an increasing proportion of international trade was regulated by the international agreements, designed to ensure countries could erect or maintain barriers to international trade only under mutually agreed terms.

Apparel / readymade garments were not included in GATT provisions. In 1947, the Multi-Fibre Agreement (MFA) was signed, without reference to GATT, essentially ratifying countries right to impose quotas on textiles and apparel / readymade garment imports from each other. This was intended to be a temporary measure allowing developed countries time to restructure their apparel / ready-made garments and textile industries before opening them up to competition from developed countries.

In practice the MFA was frequently renewed. In 1994, GATT signatories signed the Agreement on Textiles and Clothing (ATC), committing to phasing out MFA and replacing it by the general systems for agreeing trade barriers and disputes that the GATT has laid down. Almost simultaneously, the GATT was replaced by the World Trade Organisation (WTO).

The most important underlying principles of the ATC are:

- The quotas would be phased out to an agreed timetable (16% of imports quota-free by 1/1/95, a further 17% by 1/1/98, a further 18% by 1/1/02 and the remaining 49% by 1/1/05)
- There would be no extension date
- The ATC would be binding only on trade between WTO member states.
- There would be no temporary provisions while the ATC was in force for monitoring progress and managing duties

Accordingly, quota restrictions have been removed with effect from January 1, 2005. This removal of world trade quota restrictions is expected to bring a change in the global apparel trade. Productivity, labour costs, quality and creativity will determine which countries will eventually emerge as winners.

Environmental Regulations:

We are subject to Indian laws and regulations concerning environmental protection, in particular, the discharge of effluent water and solid particulate matter during our manufacturing processes. The principal environmental regulations applicable to industries in India are the Water (Prevention and Control of Pollution) Act, 1974, the Water Access Act, 1977, the Air (Prevention and Control of Pollution) Act, 1981 and the Environment Protection Act, 1986.

Further, environmental regulations require a company to file an Environment Impact Assessment ("EIA") with the State Pollution Control Board ("PCB") and the Ministry of Environment and Forests ("MEF") before undertaking a project entailing the construction, development or modification of any plant, system or structure. If the PCB approves the project, the matter is referred to the MEF for its final determination. The estimated impact, which a project would have on the environment, is carefully evaluated before granting clearances. When granting clearance, conditions can be imposed and the approving authorities can direct variations to the proposed project.

The PCB located across the States monitors compliance with applicable environmental regulations. No industrial or productive facility may operate without a valid authorisation from the local PCB office. PCBs routinely inspect industrial and productive facilities, to monitor compliance with applicable environmental standards and regulations, including the provisions of the Water Act and the Water Access Act. The PCBs are also empowered to grant authorisation for collection, treatment, storage and disposal of hazardous waste, either to the occupier or the operator of the facility.

Violations of relevant environmental regulations are punishable by monetary fines and imprisonment for company officers and controlling persons.

We have established water and air pollution control systems at our washing plant. Our environmental compliance program is administered internally by our operations & administration department and includes monitoring, measuring and reporting compliance, establishing safety programs and training our personnel in environmental and safety matters.

Foreign Investment Regulations

The new industrial policy was formulated in 1991 to implement the Government's liberalisation programme and consequently, the industrial policy reforms relaxed industrial licensing requirements and restrictions on foreign investment. In subsequent years, the Government has further liberalized the foreign investment regime.

Customs Regulations

All imports to the country or exports from the country are subject to duties under the Customs Act, 1962 at the rates specified under the Customs Tariff Act, 1975. However, the Government has the power to exempt certain specified goods from excise duty, by notification.

- Premium / Discount on Forward Foreign Exchange Contracts are recognized over the life of the Contracts. The value of unperformed contracts is shown under Loans & Advances.

5. Investments:

- Long Term Investments are carried in the Financial Statements at Cost. There were no Short Term Investments held by the Company.

6. Accounting of Government Grants:

II. NOTES ON ACCOUNTS:

1 Adjustments for Changes in Accounting Policies:

- Deferred Revenue Expenses - Advertisement:

As per the original policy followed earlier to 01/Apr/2003, by the erstwhile Indian Terrain Clothing P Ltd., Advertisement Expenses should have been written off over a period of 36 months. Subsequent to the Merger of the said Company with Celebrity Fashions P Ltd. with effect from 01/Apr/2003, the treatment given for deferred revenue expenditure in the books of accounts was continued upto 31/Mar/2004. This is due to the reason that the Transitional Provisions of Accounting Standard 26, which applies to the intangible asset lying on the date this standard becomes applicable to the company (i.e. 01/04/2003), allowed to continue with the existing policy. However, as per Accounting Standard, 28 (Impairment of Assets) which came into force from 01/Apr/2004, the amount lying as Deferred Revenue Expenditure (7.55 Millions) was identified as an impaired asset and the same was adjusted against the opening balance of Revenue Reserves as per the provisions of that Standard. Now, for the purposes of Restatement of Accounts, the said amount of 7.55 Millions which was adjusted in the year 2004-05, has been written off directly against the Profits of the year 2003-04 itself.

- Deferred Tax Liability:

Till 31/Mar/2002, the company accounted for current income tax only and did not account for deferred tax. Consequent to the mandatory adoption of Accounting Standard 22 on "Taxes on Income" the Company started accounting for Deferred Tax also from the year 2002-03.

For the purposes of Restatement, deferred tax has now been recognised on the timing differences of all earlier years and the amount recognised in the restatement of accounts of 2000-01 includes the deferred tax liability upto 31/Mar/2000.

2 Non-Adjustments:

- In the opinion of the board, Current Assets, Loans & Advances have a value of at least equal to the amounts shown in the Balance Sheet, if realised in the ordinary course of business. The provision of all the known liabilities is adequate and not in excess of the amount reasonably necessary.

The following discussions is based on our restated financial statements for the five financial years ended March 31, 2005 and six months period ended September 30, 2005 which have been prepared in accordance with Indian GAAP, the Companies Act and the SEBI (DIP) Guidelines and on information available from other sources. Our fiscal year ends on March 31 each year, so all references to a particular year are to the twelve-month period ended on March 31 of that year.

BUSINESS OVERVIEW:

Our company is engaged in the business of designing, manufacturing and selling of men's garments and was set up in the year 1988 as a small 50 machine factory and 72 people venture in Chennai. We cater to the demand of leading international brands and also to the domestic market through our own brand "Indian Terrain". We have over the last two decades grown to 8 factories (4283machines), housed over 300,000 sq. ft. employing over 5000 employees.

We started our operations with a focus on exports of shirts when quota restrictions were still prevalent. Over the last two decades we have achieved the status of one of the leading exporters of men's shirts from India and have acquired the status of two star export house. Several international brands source their requirement of shirts from us. We have among our customers, top international brands both from America and Europe. Some of our regular customers are Kohl's Corporation- USA, Timberland – USA, Eddiebauer – USA, Diesel – Europe, Marlboro Classics-Europe and Armani – Europe.

Celebrity launched its foray into the domestic branded ready to wear men's garment market in the year 2000 under the brand name "Indian Terrain". The brand "Indian Terrain" has in a short span of five years established itself and has earned an image for quality and style. The Indian Terrain Brand products are sold through various channels – five of its own stores and retailed through 276 National Store Chains (NSC) / Multi Brand Outlets (MBO).

Sales Mix in %:

Given below is the Product – wise split of our Sales Quantity in percentage terms.

Period / Year Ended	30.09.05	31.03.05	31.03.04	31.03.03
Men's Shirts	78%	87%	87%	81%
Ladies' Garments	8%	5%	4%	8%
Kids' Garments	7%	4%	5%	8%
Bottom Wear	6%	3%	3%	2%
Others	1%	1%	1%	1%
Total	100%	100%	100%	100%

The marginal change in our product mix from 2003-04 and onwards is due to merger of domestic unit, Indian Terrain. As a dedicated bottoms factory is on the cards, the product mix would see a notable transformation in the immediate future.

Inventory Turnover:

Inventory turnover is the number of times the business is able to turn over its stock in a year and is an essential tool particularly for those in the FMCG industry. It is arrived at by dividing the total sales (manufactured goods) for the year with the average inventory.

Year Ending - March 31,	2005	2004	2003
Inventory Turnover (no. of times)	3.56	4.26	3.99

Average Selling price in FOB terms:

Average FOB (Free on Board) Price of garments exported is arrived at by dividing the gross export sales made during the year with the number of garments exported.

Period/Year Ending	30.09.2005	31.03.2005	31.03.2004	31.03.2003
Average FOB (in USD)	7.50	7.59	6.84	6.97

The increase in FOB Price in 2004-05 was due to shipment of garments with relatively higher quality fabrics and with higher price tags.

Average MRP per Garment – Indian Terrain

Period/Year Ending	30.09.2005	31.03.2005	31.03.2004
Average Selling Price	1,117	1,059	955

Sales Channels of Indian Terrain:

We categorise the sales channels of Indian Terrain, our domestic arm as follows:

Outright Sales:

In this mode, as soon as we dispatch our merchandise, we raise the invoice and the ownership of the goods is passed on to our buyers. As we fix the Maximum Retail Price (a price beyond which our garments can not be sold to the ultimate consumer), the difference between this MRP and the invoice price will stand as the margin for our dealer-buyers.

Consignment Sales:

In this channel, the dealers act as our agents and they sell on our behalf. Hence no invoice would be raised immediately after the goods are dispatched; we account for the sales turnover only based on the actual sales made by our consignees, evidenced by their Fortnightly / Monthly Sales Memo. From that, they will be paid an amount towards Consignees' Commission.

Direct-to-Retail Sales:

Apart from the above modes of sales where we reach out the ultimate customer through our business partners, we also sell directly to them. This happens through our Exclusive Showrooms. As on date, we have five exclusive showrooms, of which three are managed directly by us and the two other stores are run by our franchisees.

Showrooms apart, every year we correct our surplus inventory by way of Annual Clearance Sales, wherein we give nominal discounts to our surplus garments by cutting down the MRP.

Of the above, in cases of Consignment and Direct Sales, we recognise income at MRP; and under Outright, income is recognised after netting off the Dealers' Margin from the MRP. So, it becomes essential for us to track the sales in MRP terms, as this is more congruous to analyse the behaviour of various costs. This analysing process will be uniform for the two primary sales channels, Outright and Consignment. The sales figure of the above channels are as under:

Period / Year Ended	30.09.05	31.03.05	31.03.04	30.09.05	31.03.05	31.03.04

Job work income	–	–	–	3.37	0.37	0.85
Other Income	3.87	2.31	1.81	1.12	0.82	1.35

Total Income	903.05	1,341.04	1,027.71	467.97	383.82	318.56

Sales from 2003-04 are post merger sales. Of which the export sales account for 80% in 2004-05. In the domestic segment, turnover from Indian Terrain (net off excise duty) was 178.09 millions during the 1st half year ended September 30, 2005, 214.15 millions in 2004-05 and 148.29 millions in 2003-04, the share of which has increased marginally from 15% (in 2003-04) to 16% (2004-05) of the total turnover. Though this ratio increased to 20% during Apr – Sept 05, the half yearly figures are not directly comparable with that of the yearly figures.

Export incentives are the government grants received in the form of duty drawbacks. Job work income for the three financial years ending on March 31, 2003 relates to the garment stitching charges received for producing garments of the erstwhile Indian Terrain Clothing P Ltd. This company was merged with us in 2003-04. Other income predominantly includes the interest received out of Term Deposits made with State Bank of India, which is held as the margin money for the local bill discounting facility provided by that bank.

PROFITABILITY

The Comparisons of Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA) and Profit After Tax (PAT) in both absolute terms and a percentage on Total Income are as below:

(Rs. In Mn)

Period / Year Ended	30.09.05	31.03.05	31.03.04	31.03.03	31.03.02	31.03.01
Total Income	903.05	1,341.04	1,027.71	467.97	383.82	318.56
Restated PAT	52.45	58.01	40.88	11.04	9.34	8.14
Add:						
Interest Expenses	21.08	31.88	29.76	15.13	13.97	11.93
Depreciation	20.06	32.55	29.41	17.65	17.18	17.67
Taxes	27.28	36.89	5.41	4.64	0.91	1.46
EBITDA	120.86	159.34	105.46	48.47	41.40	39.19
EBITDA as a % of Total Income	13.38%	11.88%	10.26%	10.36%	10.78%	12.30%
Restated PAT as a % of Total Income	5.81%	4.33%	3.98%	2.36%	2.43%	2.56%

EBITDA and PAT of the 1st half of 2005-06 are not comparable with the ratios of previous years, since they reflect the performance of only six months. Also, the absolute figures for the years ended March 31, 2004 and 2005 and the half-year ended September 30, 2005 are that of the merged entity and hence are not comparable with the earlier years. The increase in Taxes for the year ending March 31, 2005 is due to the fact that income tax benefits u/s 80HHC has been completely phased out. Although 30% of export profits were eligible for the said benefit in 2003-04, due to merger, the taxable profits have come down, and hence the taxation was low during that year. In spite of an increase in Taxation, EBITDA of 2004-05 has grown up mainly due to decrease in raw material consumption rate, and the reduction in Excise Duty of domestic business.

Besides the above, the proportion of Depreciation on Total Income has faced a gradual dropdown, which lifted up the PAT ratio. While the depreciation on additions to the fixed assets was compensated by the increase in revenues, one of the reasons for the said dropdown is that we follow the Written Down Value method of depreciation, which inherits the nature of charging higher amount in the initial years of the life of the asset.

In addition, there is a continual fall in the ratio of Interest Cost on Total Income, as we have grabbed the opportunity thrown by the RBI, which allowed the extending of foreign currency loans to the exporters. Consequently, we started converting our borrowings from Indian Rupees to Foreign Currency, which resulted in savings in interest costs, as the interest rates on foreign currency loans are LIBOR based.

COMPARISON OF FY 2002-03 WITH 2001-02:

Some of the key developments that occurred during 2002-03 include the following:

Our seventh manufacturing facility was set up at Porur, Chennai.

Total Income:

2002-03 was a challenging period for Garment Export Industry, as the United States, which is one of the major markets for Indian Garment Exports, has witnessed an economic slowdown. This has resulted in the dropdown of average FOB price per garment from USD 7.25 (2001-02) to USD 6.97 (2002-03). Despite this, we registered a growth of 17% in turnover.

Also the duty draw back rates have come down by 2.5% from June 2002, which has lowered our income from Export Incentives marginally.

**Raw Materials Consumed:**

The Raw Materials to Total Income ratio has gone up by just above 1%, which was mainly due to the drop in Export Incentives and change in the fabric mix used.

Employees Costs:

Staff Costs, though increased by about 6.5 millions in absolute terms, as a percentage of Total Income, it had come down by about 1.2% which was due to a marginal increase in outsourcing costs and better sales realisations as mentioned earlier in this discussion.

Other Manufacturing Costs:

These are conversions costs other than Staff Costs, which includes Power & Fuel, Factory Expenses and cost of outsourcing. We maintained almost the same rate of expenditure as a proportion of total income. As against 9.31% in 2001-02, it was 9.75% in 2002-03.

Administrative & Other Costs:

The expenses covered here are semi variable in nature like, Traveling, Security, Consultancy etc which was maintained in between 6.15% to 6.35% of total income during 2001-02 & 2002-03 respectively.

Selling & Distribution Costs:

It has increased by just above 2 million during 2002-03, over the previous year for an increase of 84 millions in total income. Hence as a portion of total income, Selling Costs being directly variable to sales has dropped down narrowly by 0.34%

Interest and Other Finance Costs:

This interest cost on total income ratio has also come down slightly by 0.10%, inspite of the increase of about 3 millions in value terms.

Depreciation:

It has increased in value by a mere 0.47 million against the previous fiscal.

Taxes:

Provision for Taxation for the year-ended 31.03.2003 has gone up from 0.24% (in 2001-02) to 0.99% because the tax deduction u/s 80HHC of the Income Tax Act, 1961, was lowered to 50% of the export profits as against 70% (in FY 2001-02) and Deferred Tax has been provided as per the mandatory Accounting Standard which became applicable only from 2002-03. However, this deferred tax adjustment has been separately dealt with under "Impact on account of adjustments required by Para 6.18.7 (b) of Chapter VI of the Guidelines."

Adjustments for fiscal 2003:

There were no adjustments required to be made on account of changes in accounting policies for the fiscal 2003.

COMPARISON OF FY 2003-04 with 2002-03:

Some of the key developments that occurred during 2003-04 include the following:

The group companies, M/s Celebrity Designs (India) Pvt. Ltd., and M/s Indian Terrain Clothing Pvt. Ltd., were merged with effect from 01/Arp/2003. Besides this, the garment manufacturing division of M/s Celebrity Connections was also acquired on 31/Mar/2004. Also, during this fiscal, the Centralised Stores for our Raw Materials has been set up at Narayanapuram, Chennai.

Since the figures of 2003-04 are that of the merged entity, the same is not comparable with the previous year figures.

COMPARISON OF FY 2004-05 with 2003-04:

Some of the key developments that occurred during 2004-05 include the following:

Our expansion went on as we acquired one existing garment manufacturing unit at Poonamalle, Chennai. This took our total manufacturing factories count to eight. The production activities were started from March 2005 in this unit. On the other side, we entered into a share subscription agreement with M/s Bennett Coleman & Co. wherein the consideration for the shares would be adjusted by them by way of issuing advertisements of our Domestic brand Indian Terrain, in their publications (viz., The Times Of India, The Economic Times etc.)

**Total Income:**

Our total income increased by over 30% in FY 2005 as compared to FY2004. This was mainly due to the increase in our production capacity.

Raw Materials Consumed:

Raw Materials Consumption grew by 22.5%, as compared to increase in total income of about 30.5%, thus helped us report higher returns in our business.

Employees Costs:

Because of the increase in the head counts due to increase in the production capacity and due to inflationary increments, the Staff Costs on total income has gone just over 12% as against 11.6% in the previous financial year.

Other Manufacturing Costs:

It increased by 35.66% over the previous fiscal, and as a percentage on total income, it has marginally gone up by 0.42%, which was mainly due to the increase in our outsourcing costs as certain orders had to gone through special wash programs.

Administrative & Other Costs:

Our total administrative and other costs as a ratio on total income is maintained in between 6% and 7%, though it moves in either ways narrowly.

Selling & Distribution Costs:

The selling and distribution costs to total income ratio has increased from 6.95% to 7.91% on account of increase in consignment commissions and discounts in case of domestic business besides the increase in shipping costs in case of exports.

Interest and Other Finance costs:

The increase of almost Rs 5 million is due to the increase in our working capital utilization; however, as a percentage of total income, this ratio has come down by 0.55%

Depreciation:

As there was a substantial increase in the manufacturing facility, the depreciation has increased by 3 millions, in absolute terms.

Taxes:

During the previous fiscal 2003-04, as the accumulated losses of amalgamating company were absorbed, the taxation was less in that year. Hence the provisions of income tax figures are not comparable.

Adjustments for year 2004-05:

There were no adjustments made on account of changes in accounting policies for the fiscal ending March 31, 2005

COMPARISON OF HALF YEAR ENDED SEPTEMBER 30, 2005 WITH F.Y. 2004-05:

Some of the key developments that occurred during the above period include the following:

M/s New Vernon Bharat Ltd. has invested Rs. 340 Millions in the Equity Capital of our Company.

The bonus equity shares have been issued in the ratio of 1:1

A Share Subscription and Share holder agreement has been entered into with M/s Reliance Capital Limited authorizing the said company to acquire 9,35,000 Equity Shares.

Total Income:

Our Total Income for the half year ended September 30, 2005, stood at Rs. 903 million as against Rs. 1,341 million in the previous year ending March 31, 2005.

Raw Materials Consumed:

One of our prime costs, Raw Materials was consumed for Rs. 428 million or 47.44% of our Total Income. This resulted in a drop of 1.7% over previous year.

**Employees Costs:**

As against the previous financial year, Staff Costs has shot up by 2.16%. This was mainly due to the upward revision by the State Government in the Minimum Wages payable to workers. This apart the inflationary increments have also made the Employee Cost ratio move upwards. As this cost is fixed in nature, this increase would be compensated in the balance period of the year when the Total Income increases.

Other Manufacturing Costs:

Other Manufacturing Cost to Total Income was at 10.77% for the three months ended September 30, 2005.

Administrative & Other Costs:

Rs. 53.19 million of Administrative & Other Costs for the I Half Year made this ratio come down by 0.64% which is due to the increase in Sales.

Selling & Distribution Costs:

There is a marginal drop in the selling and distribution costs from 7.9% for FY 2004-05 to 7.42% for the half year ended September 2004. The drop is on account of advertisement, selling & distribution commission which have not increased in relation to increase in sales.

Interest and Other Finance costs:

Interest and Other Finance Cost incurred during the said period was Rs. 28.47 million which is just above 3% to total income.

Depreciation:

Depreciation for the period April to September 2005 was Rs. 20.06 million.

Taxes:

The Corporate tax rate has been lowered by Finance Act 2005. However the Tax rate of our Company has marginally increased from 2.75% for FY 2004-05 to 3.02% on account of fringe benefit tax imposed by Finance Act 2005.

Adjustments for the half year ended September 30, 2005:

There were no adjustments made on account of changes in accounting policies for the half year ended September 30, 2005

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Equity Shares and convertible debentures of an Indian company is regulated through the foreign direct investment policy of the GoI ("FDI Policy") and by the Reserve Bank of India ("RBI") as per the provisions of the Foreign Exchange Management Act, 1999 ("FEMA") and rules, regulations and guidelines there-under. While the FDI Policy lays down the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA, along with rules, regulations and guidelines there- under, regulates the precise manner in which such investment may be made. Under the FDI Policy, unless specifically restricted, foreign direct investment is freely permitted in all sectors of Indian economy and without any prior approvals, but persons resident outside India are required to follow prescribed procedures for making such investment. In the event an approval of the GoI is required, the same may be obtained through the Foreign Investment Promotion Board ("FIPB").

By way of Circular No. 53 dated December 17, 2003, the RBI has permitted FIIs to subscribe to Equity Shares of an Indian company in a public offer without prior RBI approval, so long as the price of Equity Shares to be issued is not less than the price at which Equity Shares are issued to residents.
