The risks described below are relevant to the industries our Company is engaged in, our Company and our Equity Shares. To obtain a complete understanding of our Company, you should read this section in conjunction with the chapters titled 'Our Business' and 'Management's Discussion and Analysis of Financial Condition and Results of Operations' beginning on page numbers 70 and 130, respectively, of the Draft Prospectus as well as the other financial and statistical information contained in the Draft Prospectus. (₹ in lacs)

Cash flow from	Period ended September 30, 2012	March 31, 2012	March 31, 2011	March 31, 2010	March 31, 2009	March 31, 2008
Operating activities	157.71	(93.51)	121.17	123.85	(44.85)	23.69

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. Any revision in the estimates may require us to reschedule our project expenditure and may have a bearing on our expected revenues and earnings.***

Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time and consequently our funding requirements may also change. Our estimates for the project may exceed the value that would have been determined by third party appraisals and may require us to reschedule our project expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the objects of the Issue is entirely at the discretion of our management and is not subject to monitoring by any external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

3. ***Our operations are significantly located in the Kolkata region and Mumbai region and failure to expand our operations may restrict our growth and adversely affect our business***

Currently, we are carrying our business mainly in the Kolkata region and Mumbai region and hence our major revenues are generated from operations in these regions only. In the event that demand for equity trading activities in general reduces or stops by any reason including political discord or instability or change in policies of State, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues.

4. ***Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.***

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. We will be applying for certain approvals relating to our business. If we fail to maintain such registrations and licenses or comply with applicable conditions, or a regulatory authority claims we have not complied, with these conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity.

Further, we may become liable to penal action if our activities are adjudged to be undertaken in the manner not authorized under the applicable law. This could materially and adversely affect our business, financial condition and results of operations. We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For more information about the licenses required in our business and the licenses and approvals applied for, please refer to sections titled “Government and other Key Approvals” beginning on page 140 of the Draft Prospectus.

5. ***If we are unable to retain the services of our Key Managerial Personnel, our business and our operating results could be adversely impacted.***

We are dependent on our Key Managerial Personnel for setting our strategic direction and managing our businesses. The loss of our key managerial personnel may materially and adversely impact our business, results of operations and financial condition.

6. ***At present we have no branches and we operate through our registered office and corporate office. We propose to set-up 25 branches in FY2013-14. The fund requirement for the above 25 branches will be met out of the funds to be raised by the Company from the issue of Equity Shares already issued to Promoters and others. However, we have not yet identified lease hold premises for the said 25 new branches. our inability to acquire the premises at the right time and at the stipulated price may delay the expansion or result in an increase in the cost of acquisition; thereby resulting in an increase in the cost or time overrun thus affecting our operations and profitability. Further, we have also not placed orders for office equipments for all 25 branches and delivery of all equipment for all the proposed 25 branches is yet to be taken and we may face time and cost overruns in***

relation to the same.

7. *Our inability to manage growth could disrupt our business and reduce our profitability.*

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our new business streams. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

8. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our owned funds, internal accruals and debt. Any shortfall in our net owned funds, internal accruals and our inability to raise debt would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations.

Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 48 of the Draft Prospectus.

9. *Major fraud, lapses of internal control or system failures could adversely impact the company’s business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

10. *Exchange has levied penalty in the past and may levy so for default on behalf of the Company in submission of time barring reports to the Exchange and any such heavy default may even hamper business operations of the Company as well.*

Following penalties have been levied by exchanges in past three years:

Type of Penalty	FY 2009-10	FY 2010-11	FY 2011-12
Late uploading of Reports	30,700	9,200	5,620
Inspection & Others	Nil	11,554	13,000

Further exchanges may even suspend company’s operations for any serious default by the Company.

11. *Absence of comprehensive business continuity and disaster recovery plan may lead to a temporary disruption of our operations.*

We rely extensively on technology to carry on our business and have invested in customary data centre, network components, application infrastructure and back-up. However, we have not implemented a comprehensive disaster recovery plan which may lead to a temporary disruption in connectivity with the Exchanges and between our data centre and our Business Locations affecting our business and possibly leading to loss of revenue, financial losses and damage to our reputation.

12. *Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.*

For the period ended September 30, 2012, we have only 57 HNI Clients. The loss of a significant client or clients would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them.

13. *Our clients deal in securities and any default by a client could result in substantial losses.*

We require clients to deposit a minimum initial margin and then to pay the balance settlement amount by the pay-in date for the transaction undertaken by us on their behalf. If a client is unable to pay this balance amount before the pay-in date, we may be required to make the payment on behalf of the defaulting client, which may affect our profitability. In case of high market volatility or adverse movements in share price, it is possible that clients may not honour their commitment, and any inability on our part to pay the margins to the Stock Exchanges may be detrimental to our business, reputation and profitability.

14. *We face intense competition in our businesses, which may limit our growth and prospects.*

Our Company faces significant competition from other stock brokers. In particular, we compete with other Indian and foreign brokerage houses operating in the markets in which we are present. We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability.

These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

15. *Downturns or disruptions in the securities markets could reduce transaction volumes, and could cause a decline in the business and impact our profitability.*

Our revenues, level of operations and, consequently, our profitability are dependent on favourable capital market conditions, a conducive regulatory and political environment, investor sentiment, price levels of securities and other factors that affect the volume of stock trading in India and the level of interest in Indian business developments. In recent years, the Indian and world securities markets have fluctuated considerably and a downturn in these markets could adversely affect our operating results. For example, Indian stock markets mirrored the global sentiments with the indices sliding during 2011-12. The BSE Sensex closed at 17,404 on March 30, 2012 compared to the close of 19,445 on March 31, 2011. S&P CNX Nifty, closed at 5,296 on March 30, 2012 compared to close of 5,834 on March 31, 2011. The percent decrease in BSE Sensex recorded as on end- March 2012 over end-March 2011 was at 10.5 percent while that for the S&P CNX Nifty during the same period stood at 9.2 percent. When markets are highly volatile, we run the risk of bad debts and losses and also litigation. Revenues are likely to decline during sustained periods of reduced trading volumes and our profit margins may be adversely affected if we are unable to reduce our expenses at the same pace as the decline in revenues. When trading volume is low, our profitability will be adversely affected because our revenues will be reduced and some of our operating costs are fixed. Decreases in equity prices or decreased trading activity could have an adverse effect on our business, financial condition and operating results.

16. *Our risk management policies and procedures may leave us exposed to unidentified risks or unanticipated levels of risk which could lead to material losses.*

Our risk management techniques and strategies may not be fully effective in mitigating our exposure to risks and may not cover risks that we fail to identify or anticipate. Some methods of risk management are based on the use of observed historical market behavior. We apply statistical and other tools to these observations to arrive at quantifications of our risk exposures. These tools and metrics may fail to predict future risk exposures. Our losses could therefore be significantly greater than those which the historical measures indicate. Our more qualitative approach to managing those risks could prove insufficient, exposing us to material unanticipated losses. Other risk management methods depend on evaluation of information regarding markets, clients or other matters that are

publicly available or otherwise accessible by us. This information may not be accurate, complete, up-to-date or properly evaluated. Management of operational, legal and regulatory risk requires, among other things, policies and procedures to properly record and verify a large number of transactions and events. We cannot assure you that our policies and procedures will effectively and accurately record and verify this information. We seek to monitor and control our risk exposure through a variety of separate but complementary financial, credit, operational and legal reporting systems. Nonetheless, the effectiveness of our ability to manage risk exposure cannot be completely or accurately predicted or fully assured. For example, unexpectedly large or rapid movements or disruptions in one or more markets or other unforeseen developments could have a material adverse effect on our results of operations and financial condition. The consequences of these developments could include losses due to adverse changes in inventory values, decreases in the liquidity of trading positions, higher volatility in systemic risk.

17. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

We have not paid any dividends since incorporation. Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders.

Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

18. *We do not own our Registered Office from which we operate.*

We do not own the premises on which our Registered Office is situated. Our Company has taken the registered office on lease basis from Mrs. Saroj Baid, one of our Promoter at the rent of ₹ 6,00,000 per annum. Further we have taken corporate office on lease basis from Cadillac Vanijya Private Limited one of our Promoter Group entity at the rent of ₹ 6,00,000 per annum. We cannot assure you that we will have the right to occupy, these premises in the future, or that we will be able to continue with the uninterrupted use of this property, which may impair our operations and adversely affect our financial condition. Further these agreements are not registered and may not be adequately stamped under Indian law. In the event of any such irregularity, we may not be able to enforce our rights under such agreements in the event of a dispute. For further details of our office premises please refer to the section titled "Our Business Overview" on page 70 of this Prospectus.

19. *Our Company has made application for registration of trademark, which is under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.*

We have made application for registration of trademark 'G', and the registration for the said trademark in our name is important to retain our brand equity. If our application for registration is not accepted or if the oppositions filed against our trademark application if any, are successful, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. Further, we cannot assure that our pending application would be granted registration or will not be challenged or if granted registration, will not be invalidated or circumvented or will offer us any meaningful protection. Further, the laws of some countries in which we may market our products may not protect our intellectual property rights adequately. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

20. *We have made an application for registration of our trademark under the Trade Marks Act. Our ability to use the trademark may be impaired if the same is not registered under our name.*

Our Company's business may be affected due to our inability to protect our existing and future intellectual property rights. We have made an application for registration of trademark over our name and logo under the Trade Marks Act and consequently do not enjoy the statutory protections accorded to a trademark registered in India and may not prohibit the use of such name and logo by anybody by means of statutory protection until it is registered.

21. *Future issuances of Equity Shares or future sales of Equity Shares by our Promoters and certain shareholders, or the perception that such sales may occur, may result in a decrease of the market price of our Equity Shares.*

In the future, we may issue additional equity securities for financing our capital requirements. In addition, our Promoters and certain shareholders may dispose off their interests in our Equity Shares directly, indirectly or may pledge or encumber their Equity Shares. Any such issuances or sales or the prospect of any such issuances or sales could result in a dilution of shareholders' holding or a negative market perception and potentially in a lower market price of our Equity Shares.

22. *We have in the past entered into related party transactions and may continue to do so in the future.*

We have entered into transactions with our promoters and our Promoter Group. While we believe that all such transactions have been conducted on an arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. For further details, please refer to "Annexure XV – Related Party Transactions" of the "Auditors Report" beginning on page 129 of this Prospectus.

23. *Our insurance cover may be inadequate to fully protect us from all losses and may inturn adversely affect our financial condition.*

We maintain such insurance coverage as we believe is customary for our Company. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We maintain premises and vehicle insurance coverage. However, we cannot assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our results of operations or cash flow may be affected.

24. *Some of the Group Companies promoted by our Promoters have incurred losses in the last three years. Sustained financial losses by our Group Companies may not be perceived positively by external parties such as clients, customers, bankers etc, which may affect our credibility and business operations.*

The following Group Companies promoted by the Promoters has incurred losses in one or more of the last three years:

Name of the Company	FY 2012	FY 2011	(₹ Lacs) FY 2010
GCM Commodities & Derivatives Private Limited	-0.16		-1.21
Silverpearl Commercial Private Limited		-0.16	

EXTERNAL RISKS

1. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude.

2. *Global recession and market conditions could cause our business to suffer.*

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of recovering from recession which is affecting the economic condition and markets of not only these economies but also the economies of the emerging markets like Brazil, Russia, India and China. General business and consumer sentiment

has been adversely affected due to the global slowdown and there cannot be assurance, whether these developed economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets.

3. *Any disruption in the supply of power, IT infrastructure, telecom lines and disruption in internet connectivity could disrupt our business process or subject us to additional costs.*

Any disruption in basic infrastructure or the failure of the Government to improve the existing infrastructure facilities could negatively impact our business since we may not be able to provide timely or adequate services to our clients. We do not maintain business interruption insurance and may not be covered for any claims or damages if the supply of power, IT infrastructure, internet connectivity or telecom lines is disrupted. This may result in the loss of a client, impose additional costs on us and have an adverse effect on our business, financial condition and results of operations and could lead to decline in the price of our Equity Shares.

4. *Natural calamities and changing weather conditions caused as a result of global warming could have a negative impact on the Indian economy and consequently impact our business and profitability.*

Natural calamities such as draughts, floods, and earthquakes could have a negative impact on the Indian economy and may cause suspension, delays or damage to our current projects and operations, which may adversely impact our business and our operating results. India's being a monsoon driven economy, climate change caused due to global warming bringing deficient / untimely monsoons could impact Government policy which in turn would adversely affect our business.

5. *Tax rates applicable to Our Company may increase and may have an adverse impact on our business.*

Any increase in the tax rates including surcharge and education cess applicable to us may have an adverse impact on our business and results of operations and we can provide no assurance as to the extent of the impact of such changes.

6. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms. However, there can be no assurance that such policies will be continued in the future. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and adversely affect our business, financial condition and results of operations.

7. *Civil unrest, acts of violence including terrorism or war involving India and other countries could materially and adversely affect the financial markets and our business.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

8. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

9. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed Sherwood Securities Private Limited as Designated Market Maker for the equity shares of our company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the chapter titled “General Information” beginning on page 30 of this Prospectus.

10. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Following the Issue, we will be subject to a daily “circuit breaker” imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares.

The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

GENERAL MACRO-ECONOMIC ENVIRONMENT

After a robust growth of over 8 percent in the last two years, the Indian economy has slowed down in the year 2011-12 to a modest 6.5 percent. Revised estimates of Central Statistical Organisation (CSO) estimate Gross Domestic Product (GDP) at factor cost at constant (2004-05) prices for FY12 is likely to be ₹ 52,22,515 crore as against ₹ 48,85,954 crore for FY11 of and the growth is expected to be 6.5 percent as compared to 8.4 percent in FY11.

Services sector continued to maintain its momentum with only a minor decrease in growth from 9.2 percent to 8.5 percent, and is expected to boost the overall growth in the economy. Industry and agriculture sectors, on the other hand, have dampened in the current fiscal attributed to both the domestic and global factors. The growth rate for agriculture sector may, however, be treated in synchronous with the trend as it comes to 2.8 percent on a high base of 2010-11(exhibiting 7 percent growth). Industry sector, meanwhile has displayed a dip in its growth with a more than halving of the growth rate to 2.6 percent from an earlier 6.8 percent primarily due to demand and inflationary factors.

Primary Market

During 2011-12, 71 companies accessed the primary market and raised ₹ 48,468 crore through public (55) and rights issues (16) as against 91 companies which raised ₹ 67,609 crore in 2010-11 through public (68) and rights issues (23) (Table 2.1). The weak investment climate led to fall in the number of IPOs and amount raised from new issues market. There were 34 IPOs during 2011-12 as against 53 during 2010-11. The amount raised through IPOs during 2011-12 was considerably lower at ₹ 5,904 crore as compared to ₹ 35,559 crore during 2010-11. Of the amount raised through IPOs and FPOs, ₹ 2,054 crore was through offer for sale by existing shareholders and five issues used this mechanism to raise resources. The share of public issues in the total resource mobilisation increased to 95.1 percent during 2011-12 from 85.9 percent in 2010-11 whereas share of rights issues declined from 14.1 percent in 2010-11 to 4.9 percent in 2011-12. Of the public issues, the share of debt issues was the largest at 73.5 percent during 2011-12, which is one of the highest in the history of Indian securities market. This is a positive sign for the corporate bond markets as firms are increasingly resorting to public issue of debentures for raising resources.

Indian Secondary Market

Secondary markets are often referred to as the barometer to a nation's health. The stock prices in the current year have fluctuated owing to its integration with global financial markets which have been equally volatile. Some policy

initiatives have though been taken to revive the confidence in the stock market and encourage small investors to invest as well.

The equity markets continued their declining trend fuelled by the global crisis spillovers and weak macro-economic trends and forecasts. Investment climate in India remained dampened due to a confluence of worsening cyclical and global factors, as well as by concerns about structural impediments. Inflation remained at an elevated level for major part of the year. RBI has raised its policy rates on 13 occasions since March 2010 amounting to an increase of 350 basis points. As a result, inflation has moderated significantly since January 2012. The antiinflationary monetary policy stance has had a dampening effect on investment demand as well as on interest-sensitive components of private consumption. Hardening of interest rates and the sharp depreciation of rupee heavily impacted the corporates. Rupee was one of the most depreciated currencies among major Asian currencies in 2011, partly due to India's current account deficit. In addition, capital flows moderated and turned more volatile fuelled by risk aversion and sharp shifts in risk appetite.

Even though Indian equity markets faced severe pressures during 2011-12, it closed on a positive note. There was a strong pickup in the last quarter led by the rebound in the global equity markets, sustained FII inflows, fall in inflation and softening interest rates.

During 2011-12, the BSE Sensex and S&P CNX Nifty declined by 10.5 percent and 9.2 percent, respectively, over March 31, 2011 (Chart 2.3). The BSE Sensex declined by 17,404 points to close at 17,404 on March 30, 2012 compared to 19,445 on March 31, 2011. The S&P CNX Nifty also declined 538 points to close at 5296 at the end of March 2012 over 5834 at the end of March 2011.

BSE Sensex and S&P CNX Nifty reached their maximum on April 6, 2011, when the indices touched the levels of 19811 and 5944 respectively. The lowest level for the financial year was reached on December 20, 2011 when BSE Sensex and S&P CNX Nifty touched 15136 and 4531, respectively.

In tandem with the decline in stock prices in 2011-12, there was a significant decline in turnover and market capitalisation across the board. In the cash segment, the turnover at BSE and NSE declined by 39.6 percent and 21.4 percent respectively during 2011-12 as compared to a rise of 0.5 percent and 30 percent, increase during 2010-11. While derivatives turnover at BSE showed an exponential rise as compared to previous year but NSE gained by 7.2 percent over the previous year. During 2011-12, market capitalisation at BSE witnessed a decline of 9.1 percent and that at NSE witnessed a decline of 9.0 percent. Although there was a decline in P/E ratios over the past year, they still reigned high in comparison with other emerging markets. In spite of the bearish trend in the stock markets and the comparatively high PE ratios, FIIs were bullish on Indian stock markets. Volatility, measured by annualised standard deviation, declined marginally in 2011-12 compared to the previous year.

The downturn witnessed in the stock markets was widespread in all the sectors including mid-cap and small cap. The highest fall in BSE Sensex was observed on September 22, 2011 (4.1 percent), followed by February 27, 2012 (2.7 percent) and November 21, 2011 (2.6 percent). The highest gain of 3.6 percent was observed on August 29, 2011 for BSE Sensex.

Turnover in Indian Stock Market

In consonance with the declining trend in equity prices, there was a fall in the trading volumes in stock exchanges in 2011-12. The turnover of all stock exchanges in the cash segment declined by 25.6 percent from ₹ 46,85,034 crore to ₹ 34,84,381 crore in 2011-12 (Table 2.10). BSE and NSE together contributed 99.8 percent of the turnover, of which NSE accounted for 80.7 percent in the total turnover in cash market whereas BSE accounted for 19.2 percent of the total. Apart from NSE and BSE, the only stock exchange which recorded turnover during 2011-12 was Calcutta Stock Exchange. There was hardly any transaction on other stock exchanges. The turnover at BSE and NSE declined by 39.6 percent and 21.4 percent, respectively in 2011-12 over the levels recorded in 2010-11. Month-wise, BSE and NSE together recorded the highest turnover in February 2012 followed by March 2012 and April 2011

Broadening and widening of the geographical reach of the capital market could be observed from the city-wise turnover. About 60.4 percent of the total turnover of NSE and 39.4 percent of BSE was concentrated in Mumbai and Thane, the financial hub of the country. At NSE, Calcutta /Howrah contributed 8.6 percent and Delhi/ Ghaziabad accounted for 8.4 percent of the turnover. On the other hand at BSE, Delhi/ Ghaziabad and Ahmedabad accounted 10.9

percent and 9.5 percent respectively. The top five cities accounted for 85.2 percent of turnover at NSE during 2011-12 compared to 84.8 percent in 2010-11. At BSE, 69.7 percent of turnover is contributed by top five cities.

Market Capitalisation

Market capitalisation is a major indicator that indicates size of the stock market. A higher market capitalisation reflects growing stock market activities and an upward trend in stock markets. The market capitalisation of BSE has been higher than that of NSE in India reflecting large number of shares being listed in BSE. The market capitalisation of BSE declined by 9.1 percent to ₹ 62,14,941 crore in 2011-12 from ₹ 68,39,084 crore at the end of March 2011. On the other hand, at NSE market capitalisation declined by 9.0 percent to ₹ 60,96,518 crore in 2011-12 from ₹ 67,02,616 crore at the end of March 2011. Reflecting fall in stock prices, the market capitalisation of BSE witnessed downturn in every month except in April 2011, November 2011, January 2012 and February 2012, when there was an increase over the previous month. At NSE, market capitalisation increased during the months of April 2011, June 2011, November 2011, January 2012 and February 2012.

Dematerialisation

Dematerialisation of securities is a significant milestone which has transformed the market microstructure of Indian securities markets. There are two depositories in India viz., National Securities Depository Limited (NSDL) and Central Depository Services Limited (CDSL). The depositories have set up nation-wide network with proper infrastructure to handle the securities deposited or settled in dematerialised mode in the Indian stock markets. As on March 30, 2012, 9,741 companies have signed up for dematerialisation at NSDL and 8,329 at CDSL (Table 2.24). At NSDL, quantity of dematerialised securities increased by 23.0 percent to 57,98,010 lakh in 2011-12 from 47,13,045 lakh in 2010-11. At CDSL too, the quantity of dematerialised securities increased by 26.4 percent from 10,53,100 lakh in 2010-11 to 13,35,700 lakh in 2011-12. While the quantity of dematerialised shares increased at the depositories, the quantity and value of shares settled in demat declined, primarily following the market downturn and consequent fall in traded value. The total value of demat settled shares declined by 19.4 percent from ₹ 15,47,196 crore in 2010-11 to ₹ 12,47,249 crore in 2011-12 at NSDL. The same in case of CDSL declined by 34.0 percent from ₹ 4,39,931 crore in 2010-11 to ₹ 2,90,572 crore in 2011-12.

DERIVATIVES SEGMENT

The presence and role of derivatives in India, both OTC and exchange traded, has been increasing steadily over the years. These instruments are an important component of the overall financial sector strategy and the broad regulatory objective is to ensure that they are used to their potential in ways that are consistent with both financial development and the contribution of financial markets to economic growth.

The equity derivatives segment is the most active derivatives market in India. During 2011-12, turnover of derivatives market exceeded the all-India cash market turnover by over 11 times (Chart 2.9). Trading in derivatives segment is dominated by NSE, which has a share of more than 99 percent of the total turnover. The total number of contracts traded in the derivative segment of NSE increased by 16.5 percent to 120,50,45,464 in 2011-12 from 103,42,12,062 in 2010-11, whereas, at BSE, the number of contracts traded increased exponentially from 5,623 in 2010-11 to 2,50,55,608 in 2011-12. The value of the contracts traded in the derivative segment of NSE increased by 7.2 percent to ₹ 3,13,49,732 crore in 2011-12 from ₹ 2,92,48,221 crore in 2010-11, whereas the turnover at the derivatives segment of BSE increased exponentially to ₹ 8,08,476 crore in 2011-12 from ₹ 154 crore in 2010-11. The open interest in the derivative segment of NSE declined by 12.5 percent to ₹ 89,049 crore at the end of 2011-12 from ₹ 1,01,816 crore at the end of 2010-11.

Global Secondary Markets

International comparison indicates that the majority of the indices witnessed major corrections during 2011-12. Global economy was hit by a barrage of shocks during 2011-12 in the form of earthquake and tsunami in Japan, unrest in the Middle East oil producing countries, high oil and commodity prices and downgrading of USA by S&P. Yet again, the

year was unprecedented as it entered a dangerous phase. Intensifying concerns on the deteriorating Euro crisis transmitted market stress across the world posing severe threat to financial stability. Slowdown in global growth, in particular of advanced economies portended, the onset of an imminent recession for the world.

Prospects

The overall health of securities markets depends on several factors such as macroeconomic environment, trading and settlement infrastructure, and belief in the integrity of the markets. Among these factors, the latter two continue to be robust with several forward looking steps being taken by SEBI. The macroeconomic factor has contributed to slightly negative sentiment in the markets. It may however be emphasized that this is more likely to be a temporary phenomenon as the economy shifts from a very high growth path to merely a high growth path. Other factors remaining constant, the securities markets are expected to resume their original trendline. However, SEBI in its endeavour to maintain the integrity of the market and promoting seamless trading, clearing and settlement process in the securities market, has continuously harped on improving the conditions of systemic factors in a persistent manner.

Keeping in view the changing scope and nature of the market structure, SEBI has in the past and in future, will continue to make rules and regulations to preserve and maintain a safe, fair and orderly market to protect the interest of investors, development of the securities market and supervision. Towards achieving the same, SEBI conducts investor awareness and education programme in various parts of the country to make investor an informed investor. SEBI is in constant upgradation of its surveillance mechanism and updates its system to keep pace with the evolving demands of a growing market.

Currently, participation of retail investors in the securities market is insignificant. In view of this, investor assistance and education will continue to be SEBI's priority area in the future. This would help in developing wide and deep markets aimed at increasing base of savvy investors and thus also help in achieving financial inclusion for the investors in the country. Enhancing the retail participation in mutual funds is a challenge, which can contribute not only to the financial inclusion and can play a balancing role vis-a vis potential destabilising effect of varying foreign institutional investments. Introduction of Rajiv Gandhi Equity Saving Scheme proposed in the Union Budget 2012-13 is expected to enhance the retail investor participation directly and through mutual funds.

It is, however, to be emphasised that in a dynamic market like securities market, the robustness of the markets is to be preserved through constant endeavour. SEBI will continue to ensure that the markets remain vibrant, fair and safe. Emerging trends such as relative dominance of derivatives market segment over the cash market segment will require effort and attention on the part of the regulator.

As per clause (a) sub-regulation (1) Regulation 32 of the SEBI ICDR Regulations and in terms of the aforesaid table, an aggregate of 20% of the post-Issue Equity Share Capital of our Company shall be locked in by our Promoters for a period of three (3) years from the date of Allotment (“minimum Promoters’ contribution”).

The Promoters’ contribution has been brought in to the extent of not less than the specified minimum amount and has been contributed by the persons defined as Promoter under the SEBI ICDR Regulations. Our Company has obtained written consents from our Promoters for the lock-in of 38,58,4000 Equity Shares for a period of three years from the date of Allotment in the Issue.

The balance pre-Issue Equity Share capital of our Company, *i.e.* 90,41,600 Equity Shares shall be locked in for a period of one year from the date of Allotment in the Issue. Equity Shares offered by the Promoters for the minimum Promoters’ contribution are not subject to pledge. Lock-in period shall commence from the date of Allotment of Equity Shares in the Issue.

We confirm that the minimum Promoters’ contribution of 20% which is subject to lock-in for three years does not consist of:

- Equity Shares acquired during the preceding three years for consideration other than cash and revaluation of assets or capitalisation of intangible assets;
- Equity Shares acquired during the preceding three years resulting from a bonus issue by utilisation of revaluation reserves or unrealised profits of the issuer or from bonus issue against equity shares which are ineligible for minimum Promoters’ contribution;
- Equity Shares acquired by Promoters during the preceding one year at a price lower than the price at which equity shares are being offered to public in the Issue; or equity shares pledged with any creditor.

Further, our Company has not been formed by the conversion of a partnership firm into a company and no Equity Shares have been allotted pursuant to any scheme approved under Section 391-394 of the Companies Act, 1956.

The share certificates for the Equity Shares in physical form, which are subject to lock-in, shall carry the inscription ‘non-transferable’ and the non-transferability details shall be informed to the depositories.

Equity Shares locked-in for one year

In addition to 20% of the post-Issue shareholding of our Company locked-in for three years as the minimum Promoters' contribution, the balance Pre-Issue Paid-up Equity Share Capital *i.e.* 90,41,600 Equity Shares, would be locked-in for a period of one year from the date of Allotment in the proposed Initial Public Offering. Further, such lock-in of the Equity Shares would be created as per the bye laws of the Depositories.

Other requirements in respect of 'lock-in'

In terms of Regulation 40 of the SEBI ICDR Regulations, the Equity Shares held by persons other than the Promoters' prior to the Issue may be transferred to any other person holding the Equity Shares which are locked-in as per Regulation 37 of the SEBI ICDR Regulations, subject to continuation of the lock-in in the hands of the transferees for the remaining period and compliance with the Takeover Code as applicable.

In terms of Regulation 40 of the SEBI ICDR Regulations, the Equity Shares held by our Promoters which are locked in as per the provisions of Regulation 36 of the SEBI ICDR Regulations, may be transferred to and amongst Promoters / members of the Promoter Group or to a new promoter or persons in control of our Company, subject to continuation of lock-in in the hands of transferees for the remaining period and compliance of Takeover Code, as applicable.

In terms of Regulation 39 of the SEBI ICDR Regulations, the locked-in Equity Shares held by our Promoters can be pledged only with any scheduled commercial banks or public financial institutions as collateral security for loans granted by such banks or financial institutions, subject to the following:

- If the specified securities are locked-in in terms of sub-regulation (a) of Regulation 36 of the SEBI ICDR Regulations, the loan has been granted by such bank or institution for the purpose of financing one or more of the objects of the issue and the pledge of specified securities is one of the terms of sanction of the loan;
- If the specified securities are locked-in in terms of sub-regulation (b) of Regulation 36 of the SEBI ICDR Regulations and the pledge of specified securities is one of the terms of sanction of the loan.

8. Our Company does not have any Employee Stock Option Scheme / Employee Stock Purchase Plan for our employees and we do not intend to allot any shares to our employees under Employee Stock Option Scheme / Employee Stock Purchase Plan from the proposed issue. As and when, options are granted to our employees under the Employee Stock Option Scheme, our Company shall comply with the SEBI (Employee Stock Option Scheme and Employees Stock Purchase Plan) Guidelines 1999.
9. Our Company has not issued any Equity Shares during a period of one year preceding the date of the Draft Prospectus at a price lower than the Issue price.
10. There will be no further issue of capital, whether by way of issue of bonus shares, preferential allotment, rights issue or in any other manner during the period commencing from the date of the Draft Prospectus until the Equity Shares have been listed. Further, our Company presently does not have any intention or proposal to alter our capital structure for a period of six months from the date of opening of this Issue, by way of split / consolidation of the denomination of Equity Shares or further issue of Equity Shares (including issue of securities convertible into exchangeable, directly or indirectly, for our Equity Shares) whether preferential or otherwise, except that if we

enter into acquisition(s) or joint venture(s), we may consider additional capital to fund such activities or to use Equity Shares as a currency for acquisition or participation in such joint ventures.

DETAILED BREAK UP OF THE PROJECT COST

(A) Augmenting long term working capital

Net Proceeds will be used towards maintaining adequate levels of margin with the stock exchanges. The margin requirements with the stock exchanges are determined by the stock exchanges on the basis of trading volumes, market volatility and to extent of open interests in respect of equity index/ stock futures. Such margin requirements comprise of “initial margin” representing initial margin paid and “margin deposits”, representing additional margin over and above the initial margin, for entering into contracts for equity index/ stock futures, which are released on final settlement and/or squaring up of underlying contracts. Further, equity index/ stock futures are marked-to-market on a daily basis, in which case, “mark-to-market margin” is required to be provided, representing the net amount paid or received on the basis of movement in the prices of index/ stock futures till the balance sheet date. While the initial margin and the margin deposits with the stock exchanges/ professional clearing members, can be created by way of deposit of either stock or bank guarantees or fixed deposits with banks or cash, however, the marked-to-market margin is typically created by way of deposit of cash. In addition, we are also required to maintain additional daily margin with exchanges, based on the total outstanding position of the trades undertaken on the exchange till settlement. These margin requirements are determined by the exchanges based on the volatility of stocks and are applicable to all brokers. We intend to utilise part of the Issue proceeds will be used to fund our long term working capital requirement which comprises margins to be placed with the Stock Exchanges.

SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GENERAL MACRO-ECONOMIC ENVIRONMENT

After a robust growth of over 8 percent in the last two years, the Indian economy has slowed down in the year 2011-12 to a modest 6.5 percent. Revised estimates of Central Statistical Organisation (CSO) estimate Gross Domestic Product (GDP) at factor cost at constant (2004-05) prices for FY12 is likely to be ₹ 52,22,515 crore as against ₹ 48,85,954 crore for FY11 and the growth is expected to be 6.5 percent as compared to 8.4 percent in FY11.

Services sector continued to maintain its momentum with only a minor decrease in growth from 9.2 percent to 8.5 percent, and is expected to boost the overall growth in the economy. Industry and agriculture sectors, on the other hand, have dampened in the current fiscal attributed to both the domestic and global factors. The growth rate for agriculture sector may, however, be treated in synchronous with the trend as it comes to 2.8 percent on a high base of 2010-11 (exhibiting 7 percent growth). Industry sector, meanwhile has displayed a dip in its growth with a more than halving of the growth rate to 2.6 percent from an earlier 6.8 percent primarily due to demand and inflationary factors.

Savings and Investments:

The latest data of CSO points to a decrease in India's Gross Domestic Savings as a percentage of GDP at market prices from 33.8 percent in 2009-10 to 32.3 percent in 2010-11. The decrease came primarily on the back of reduced Private corporate savings from 8.2 percent in 2009-10 to 7.9 percent in 2010-11 as also the Household savings in financial assets moving from 12.9 percent in 2009-10 to 10 percent in 2010-11, which may be attributed to the inflationary pressures that loomed over the economy for most of the year. The household savings in physical assets though increased marginally from 12.4 percent in 2009-10 to 12.8 percent in 2010-11, along with a substantial increase in the Public sector savings from 0.18 percent in 2009-10 to 1.7 percent in 2010-11 due to fiscal consolidation. The investment too has seen a dwindling trend in both the private and public sector.

It may be noted here that Indian households have the highest savings rates in the world with the annual household saving nearly quadrupling in the last decade. While the share of physical assets has outweighed financial assets in most of the years, it is to be noted that the fall in 2010-11 household savings (as a percent of GDP at market prices) to 22.8 percent from 25.4 percent in 2009-10 is primarily reflected in the reduction in share of financial assets with the share of physical assets being nearly constant.

In other words, when the global environment is turbulent, as also witnessed during the slowdown of 2008, investments in physical assets like gold and real estate remain stable or incremental while that in the financial assets record a slump. We may hence deduce that for financial savings to increase the macro-economic scenarios needs to be favourable. The savings-investment gap in terms of percent of GDP has nearly been the same at 2.7 percent in 2010-11 as that of 2.8 percent in 2009-10. The gap as a percent of GDP has though increased in recent years (1.3 percent in 2007-08) on account of the increased reliance on the foreign inflows (savings) to finance our investment requirements. The trend as in 2010-11 though exhibits a slight narrowing of this trend. The savings- investment gap in public sector has moved from 9 percent in 2009-10 to 7.1 percent in 2010-11 while in private sector it stands at 5.8 percent in 2010-11 as compared to 8.5 percent in 2009-10.

Primary Market

Primary market is a major and prominent source of fund raising for corporates and governments. A healthy and efficient primary market is crucial to the capital markets and mirrors the underlying strength of an economy that further provides a favourable investment opportunity to the investors. Indian primary market has seen a slackening of the activity in the current fiscal year partly reflected by the global sentiments and partly by domestic factors. Fewer companies have raised capital backed by the fear of failure in turbulent markets. A total of ₹ 12, 857 crore of equity capital has been raised during 2011-12 through 51 issues, compared with ₹ 58, 157 crore raised through 81 issues in 2010-11. Certain reforms in policies have been undertaken to build up the investor confidence further.

The primary market activities were subdued during 2011-12. Weak macroeconomic and investment environment slackened expansion plans of corporates. This was exacerbated by the negative returns from the previously listed IPOs and declining trend in equity markets. In consonance with dampened returns, the lukewarm investor response for the existing primary market issues adversely affected investor and promoter sentiments. Resource mobilisation by companies through IPOs and FPOs was substantially lower in 2011-12 compared to the previous years.

During 2011-12, 71 companies accessed the primary market and raised ₹ 48,468 crore through public (55) and rights issues (16) as against 91 companies which raised ₹ 67,609 crore in 2010-11 through public (68) and rights issues (23) (Table 2.1). The weak investment climate led to fall in the number of IPOs and amount raised from new issues market. There were 34 IPOs during 2011-12 as against 53 during 2010-11. The amount raised through IPOs during 2011-12 was considerably lower at ₹ 5,904 crore as compared to ₹ 35,559 crore during 2010-11. Of the amount raised through IPOs and FPOs, ₹ 2,054 crore was through offer for sale by existing shareholders and five issues used this mechanism to raise resources. The share of public issues in the total resource mobilisation increased to 95.1 percent during 2011-12 from 85.9 percent in 2010-11 whereas share of rights issues declined from 14.1 percent in 2010-11 to 4.9 percent in 2011-12. Of the public issues, the share of debt issues was the largest at 73.5 percent during 2011-12, which is one of the highest in the history of Indian securities market. This is a positive sign for the corporate bond markets as firms are increasingly resorting to public issue of debentures for raising resources. Table below shows Resource Mobilisation through Public and Rights Issues:

Particulars	2010-11		2011-12		Percentage share in total amount

Indian Secondary Market

Secondary markets are often referred to as the barometer to a nation's health. The stock prices in the current year have fluctuated owing to its integration with global financial markets which have been equally volatile. Some policy initiatives have though been taken to revive the confidence in the stock market and encourage small investors to invest as well.

The equity markets continued their declining trend fuelled by the global crisis spillovers and weak macro-economic trends and forecasts. Investment climate in India remained dampened due to a confluence of worsening cyclical and global factors, as well as by concerns about structural impediments. Inflation remained at an elevated level for major part of the year. RBI has raised its policy rates on 13 occasions since March 2010 amounting to an increase of 350 basis points. As a result, inflation has moderated significantly since January 2012. The antiinflationary monetary policy stance has had a dampening effect on investment demand as well as on interest-sensitive components of private consumption. Hardening of interest rates and the sharp depreciation of rupee heavily impacted the corporates. Rupee was one of the most depreciated currencies among major Asian currencies in 2011, partly due to India's current account

deficit. In addition, capital flows moderated and turned more volatile fuelled by risk aversion and sharp shifts in risk appetite.

Even though Indian equity markets faced severe pressures during 2011-12, it closed on a positive note. There was a strong pickup in the last quarter led by the rebound in the global equity markets, sustained FII inflows, fall in inflation and softening interest rates.

During 2011-12, the BSE Sensex and S&P CNX Nifty declined by 10.5 percent and 9.2 percent, respectively, over March 31, 2011 (Chart 2.3). The BSE Sensex declined by 1014 points to close at 17,404 on March 30, 2012 compared to 19,445 on March 31, 2011. The S&P CNX Nifty also declined 538 points to close at 5296 at the end of March 2012 over 5834 at the end of March 2011.

BSE Sensex and S&P CNX Nifty reached their maximum on April 6, 2011, when the indices touched the levels of 19811 and 5944 respectively. The lowest level for the financial year was reached on December 20, 2011 when BSE Sensex and S&P CNX Nifty touched 15136 and 4531, respectively.

In tandem with the decline in stock prices in 2011-12, there was a significant decline in turnover and market capitalisation across the board. In the cash segment, the turnover at BSE and NSE declined by 39.6 percent and 21.4 percent respectively during 2011-12 as compared to a rise of 0.5 percent and 30 percent, increase during 2010-11. While derivatives turnover at BSE showed an exponential rise as compared to previous year but NSE gained by 7.2 percent over the previous year. During 2011-12, market capitalisation at BSE witnessed a decline of 9.1 percent and that at NSE witnessed a decline of 9.0 percent. Although there was a decline in P/E ratios over the past year, they still reigned high in comparison with other emerging markets. In spite of the bearish trend in the stock markets and the comparatively high PE ratios, FIIs were bullish on Indian stock markets. Volatility, measured by annualised standard deviation, declined marginally in 2011-12 compared to the previous year.

The downturn witnessed in the stock markets was widespread in all the sectors including mid-cap and small cap. The highest fall in BSE Sensex was observed on September 22, 2011 (4.1 percent), followed by February 27, 2012 (2.7 percent) and November 21, 2011 (2.6 percent). The highest gain of 3.6 percent was observed on August 29, 2011 for BSE Sensex.

Turnover in Indian Stock Market

In consonance with the declining trend in equity prices, there was a fall in the trading volumes in stock exchanges in 2011-12. The turnover of all stock exchanges in the cash segment declined by 25.6 percent from ₹ 46,85,034 crore to ₹ 34,84,381 crore in 2011-12 (Table 2.10). BSE and NSE together contributed 99.8 percent of the turnover, of which NSE accounted for 80.7 percent in the total turnover in cash market whereas BSE accounted for 19.2 percent of the total. Apart from NSE and BSE, the only stock exchange which recorded turnover during 2011-12 was Calcutta Stock Exchange. There was hardly any transaction on other stock exchanges. The turnover at BSE and NSE declined by 39.6 percent and 21.4 percent, respectively in 2011-12 over the levels recorded in 2010-11. Month-wise, BSE and NSE together recorded the highest turnover in February 2012 followed by March 2012 and April 2011.

Broadening and widening of the geographical reach of the capital market could be observed from the city-wise turnover. About 60.4 percent of the total turnover of NSE and 39.4 percent of BSE was concentrated in Mumbai and Thane, the financial hub of the country. At NSE, Calcutta /Howrah contributed 8.6 percent and Delhi/ Ghaziabad accounted for 8.4 percent of the turnover. On the other hand at BSE, Delhi/ Ghaziabad and Ahmedabad accounted 10.9 percent and 9.5 percent respectively. The top five cities accounted for 85.2 percent of turnover at NSE during 2011-12 compared to 84.8 percent in 2010-11. At BSE, 69.7 percent of turnover is contributed by top five cities.

Market Capitalisation

Market capitalisation is a major indicator that indicates size of the stock market. A higher market capitalisation reflects growing stock market activities and an upward trend in stock markets. The market capitalisation of BSE has been higher than that of NSE in India reflecting large number of shares being listed in BSE. The market capitalisation of BSE declined by 9.1 percent to ₹ 62,14,941 crore in 2011-12 from ₹ 68,39,084 crore at the end of March 2011. On the

other hand, at NSE market capitalisation declined by 9.0 percent to ₹ 60,96,518 crore in 2011-12 from ₹ 67,02,616 crore at the end of March 2011. Reflecting fall in stock prices, the market capitalisation of BSE witnessed downturn in every month except in April 2011, November 2011, January 2012 and February 2012, when there was an increase over the previous month. At NSE, market capitalisation increased during the months of April 2011, June 2011, November 2011, January 2012 and February 2012.

Dematerialisation

Dematerialisation of securities is a significant milestone which has transformed the market microstructure of Indian securities markets. There are two depositories in India viz., National Securities Depository Limited (NSDL) and Central Depository Services Limited (CDSL). The depositories have set up nation-wide network with proper infrastructure to handle the securities deposited or settled in dematerialised mode in the Indian stock markets. As on March 30, 2012, 9,741 companies have signed up for dematerialisation at NSDL and 8,329 at CDSL (Table 2.24). At NSDL, quantity of dematerialised securities increased by 23.0 percent to 57,98,010 lakh in 2011-12 from 47,13,045 lakh in 2010-11. At CDSL too, the quantity of dematerialised securities increased by 26.4 percent from 10,53,100 lakh in 2010-11 to 13,35,700 lakh in 2011-12. While the quantity of dematerialised shares increased at the depositories, the quantity and value of shares settled in demat declined, primarily following the market downturn and consequent fall in traded value. The total value of demat settled shares declined by 19.4 percent from ₹ 15,47,196 crore in 2010-11 to ₹ 12,47,249 crore in 2011-12 at NSDL. The same in case of CDSL declined by 34.0 percent from ₹ 4,39,931 crore in 2010-11 to ₹ 2,90,572 crore in 2011-12.

Apart from the equity shares, dematerialisation facility is also offered for other instruments like commercial paper and bonds. The total dematerialised value of the commercial papers increased at both NSDL and CDSL (Table 2.25). At NSDL, dematerialised value of commercial paper rose from ₹ 80,312 crore in 2010-11 to ₹ 90,019 crore in 2011-12. However, the dematerialised value of commercial paper at CDSL declined from ₹ 1,324 crore in 2010-11 to ₹ 1,299 crore in 2011-12. The number of active instruments and dematerialised value of debentures/bonds increased at NSDL in 2011-12 over 2010-11. In CDSL, even though number of active instruments under debentures/ bonds declined, the demat value increased in 2011-12. Depository participants as a class of intermediary form the backbone of the dematerialised framework in Indian securities market. The geographical coverage of depository participants (DPs) of NSDL and CDSL widened in 2011-12. The DP locations for NSDL were available at 1,554 cities in 2011-12 as compared to 1,422 cities in 2010-11 (Table 2.26). The number of DP locations improved considerably for CDSL also from 1,572 in 2010-11 to 2,104 in 2011-12.

DERIVATIVES SEGMENT

The presence and role of derivatives in India, both OTC and exchange traded, has been increasing steadily over the years. These instruments are an important component of the overall financial sector strategy and the broad regulatory objective is to ensure that they are used to their potential in ways that are consistent with both financial development and the contribution of financial markets to economic growth.

The equity derivatives segment is the most active derivatives market in India. During 2011-12, turnover of derivatives market exceeded the all-India cash market turnover by over 11 times (Chart 2.9). Trading in derivatives segment is dominated by NSE, which has a share of more than 99 percent of the total turnover. The total number of contracts traded in the derivative segment of NSE increased by 16.5 percent to 120,50,45,464 in 2011-12 from 103,42,12,062 in 2010-11, whereas, at BSE, the number of contracts traded increased exponentially from 5,623 in 2010-11 to 2,50,55,608 in 2011-12. The value of the contracts traded in the derivative segment of NSE increased by 7.2 percent to ₹ 3,13,49,732 crore in 2011-12 from ₹ 2,92,48,221 crore in 2010-11, whereas the turnover at the derivatives segment of BSE increased exponentially to ₹ 8,08,476 crore in 2011-12 from ₹ 154 crore in 2010-11. The open interest in the derivative segment of NSE declined by 12.5 percent to ₹ 89,049 crore at the end of 2011-12 from ₹ 1,01,816 crore at the end of 2010-11.

Currency futures trading commenced in India on August 29, 2008 at NSE. Later, MCX-SX and BSE were also granted permission on October 7, 2008 and October 8, 2008 respectively to start trading in currency derivatives. Subsequently, BSE has stopped its operations in the currency derivatives segment from April 7, 2010. On the other hand, the third exchange, USE started the currency futures trading on September 20, 2010. Even though initially only USD-INR futures were traded, currency futures segment was expanded with the introduction of EURO: INR, GBP: INR and JPY: INR. A new product, currency options was introduced at NSE and USE from October 29, 2010. The currency options was introduced on only USD-INR pair. During 2011-12, total turnover was the highest at NSE (₹ 46,74,990 crore) followed by MCX-SX (₹ 37,32,446 crore) and USE (₹ 14,88,978 crore). The product-wise share in currency derivatives volume shows that USD-INR futures dominated the currency futures market with an average share of 82.0 percent followed by USD-INR options at 13.7 percent and Euro-INR futures at 2.7 percent.

Trading in ten year notional coupon bearing Government of India (GoI) bond futures started at NSE on August 31, 2009. Further, interest rate futures on 91 day Government of India (GoI) treasury bills (T-bills) started at NSE on July 4, 2011. The trends in turnover and open interest in Interest Rate Derivatives (Ten Year Notional coupon and 91 day T-bill bearing GoI bond futures) at NSE is depicted in Table 2.36. During 2011-12, the total turnover in the interest rate derivatives segment was ₹ 3,959 crore compared to ₹ 62 crore in 2010-11.

FOREIGN INSTITUTIONAL INVESTMENT

Foreign capital flows are indispensable to growth of emerging market economies to finance the capital needed for excess of investment over the domestic savings. They help in developing nascent financial markets and overall financial development. Foreign institutional investment is an important component in the capital flows available to a country to pursue its trajectory of economic growth. Foreign Institutional investment brings in a flow of non debt creating foreign inflows into any market. Since 1992 when FIIs were allowed to invest in the country, FII flows into India has increased manifold. The gross purchases of debt and equity by FIIs declined by 7.2 percent to ₹ 9,21,285 crore in 2011-12 from ₹

9,92,599 crore in 2010-11 (Table 2.51). The combined gross sales by FIIs declined by 2.2 percent to ₹ 8,27,562 crore from ₹ 8,46,161 crore during the same period in previous year. The total net inflow of FII was ₹ 93,725 crore in 2011-12 compared to ₹ 1,46,438 crore in 2010-11. During 2011-12, there was a net inflow in the equity segment by FIIs amounting to ₹ 43,738 crore (Table 2.52). The debt segment also witnessed a positive net inflow of ₹ 49,988 crore. Month-wise, the net FII inflow was the highest in equity segment during the last quarter of 2011-12 particularly in February 2012 (₹ 25,212 crore) followed by January 2012 (₹ 10,358 crore) and March 2012 (₹ 8,381 crore). In the equity segment, FII investment was negative in for three months viz., August 2011 (₹ 10,834 crore), May 2011 (₹ 6,614 crore) and

November 2011 (₹ 4,198 crore). In the debt segment, inflow was the highest in December 2011 (₹ 21,775 crore) followed by January 2012 (₹ 15,971 crore) and February 2012 (₹ 10,016 crore). Net investment by FII increased from December 2011 and reached the highest in February 2012. The cumulative investment by FIIs at acquisition cost, which was USD 121.6 billion at the end of March 2011, increased to USD 140.5 billion at the end of March 2012.

Venture Capital Funds and Foreign Venture Capital Investors

The cumulative net investments by venture capital funds (VCFs) and foreign venture capital investors (FVCIs) was ₹58,936 crore as on March 31, 2012 compared to ₹52,688 crore as on March 31, 2011. Of the total investments, ₹39,492 crore was invested by FVCIs and ₹28,839 crore was by VCFs.

Global Secondary Markets

International comparison indicates that the majority of the indices witnessed major corrections during 2011-12. Global economy was hit by a barrage of shocks during 2011-12 in the form of earthquake and tsunami in Japan, unrest in the Middle East oil producing countries, high oil and commodity prices and downgrading of USA by S&P. Yet again, the year was unprecedented as it entered a dangerous phase. Intensifying concerns on the deteriorating Euro crisis transmitted market stress across the world posing severe threat to financial stability. Slowdown in global growth, in particular of advanced economies portended, the onset of an imminent recession for the world.

Emerging economies and their stock markets could not remain immune to these developments. The uncertainties in the financial markets, changing risk appetite, slowdown in exports due to low growth in US and Euro area, consequences of de-leveraging in the Euro area and hugely volatile capital flows intensified the risks for the emerging markets. However, owing to a vast set of collective policy actions in the Euro area, fiscal adjustments plans, and infusion of fiscal discipline, outlook has improved since the beginning of 2012. The recent growth statistics of USA has also shown improvements. As a result there has been a rebound in the equity markets towards the end of 2011-12. Among the emerging markets the annual return on a point-to-point basis was the highest in Thailand (12.4 percent), followed by Indonesia (11.9 percent) and Mexico (5.5 percent). India's stock return was negative as BSE Sensex and S&P CNX Nifty registered a decline of 10.5 percent and 9.2 percent respectively. Of the developed markets, only gain was recorded by USA (10.8 percent) and Japan (3.9 percent). Ironically, both countries had faced crises of historic dimensions during the year. The highest decline, among various markets was witnessed in China (23.7 percent) followed by Russia (20.7 percent) and Hungary (19.4 percent).

Prospects

The overall health of securities markets depends on several factors such as macroeconomic environment, trading and settlement infrastructure, and belief in the integrity of the markets. Among these factors, the latter two continue to be robust with several forward looking steps being taken by SEBI. The macroeconomic factor has contributed to slightly negative sentiment in the markets. It may however be emphasized that this is more likely to be a temporary phenomenon as the economy shifts from a very high growth path to merely a high growth path. Other factors remaining constant, the securities markets are expected to resume their original trendline. However, SEBI in its endeavour to maintain the integrity of the market and promoting seamless trading, clearing and settlement process in the securities market, has continuously harped on improving the conditions of systemic factors in a persistent manner.

Keeping in view the changing scope and nature of the market structure, SEBI has in the past and in future, will continue to make rules and regulations to preserve and maintain a safe, fair and orderly market to protect the interest of investors, development of the securities market and supervision. Towards achieving the same, SEBI conducts investor awareness and education programme in various parts of the country to make investor an informed investor. SEBI is in constant upgradation of its surveillance mechanism and updates its system to keep pace with the evolving demands of a growing market.

Currently, participation of retail investors in the securities market is insignificant. In view of this, investor assistance and education will continue to be SEBI's priority area in the future. This would help in developing wide and deep markets aimed at increasing base of savvy investors and thus also help in achieving financial inclusion for the investors in the country. Enhancing the retail participation in mutual funds is a challenge, which can contribute not only to the financial inclusion and can play a balancing role vis-a vis potential destabilising effect of varying foreign institutional

investments. Introduction of Rajiv Gandhi Equity Saving Scheme proposed in the Union Budget 2012-13 is expected to enhance the retail investor participation directly and through mutual funds.

It is, however, to be emphasised that in a dynamic market like securities market, the robustness of the markets is to be preserved through constant endeavour. SEBI will continue to ensure that the markets remain vibrant, fair and safe. Emerging trends such as relative dominance of derivatives market segment over the cash market segment will require effort and attention on the part of the regulator.

Registration of Stock Brokers

During 2011-12, 256 new stock brokers were registered with SEBI in cash segment whereas there were 184 cases of cancellation/surrender of brokeship during the year 2011-12 as compared to 531 and 100, respectively in 2010-11. The total number of registered stock brokers as on March 31, 2012, increased to 9,307 from 9,235 in 2010-11

Overview

Our Company was incorporated on May 2, 1995 as a Public Limited Company under the name "GCM Securities Limited".

We are currently engaged in the business of equity broking, investing and trading activities. Our Company became the member of National Stock Exchange and started the stock broking operation on the NSE platform after obtaining SEBI Registrarian as Trading Member in October 1995. The company was mainly into retail broking at the time of starting the stock broking operations. Subsequently with the introduction of the Future and option segment into the Indian capital market the company became Self Clearing Member under F & O Segment in the year 2007. Post this development our focus was mainly shifted to HNI clients. In the year 2010 our company further decided to expand its area of activities and decided to take the membership of Bombay Stock Exchange. Currently, our company is member on both capital market segment and F&O segment. The company has been successful to create a niche for itself in the select HNI segment also.

The company is providing broking services in Equity and Future & Options segment. We have membership in the cash and future and options segments of both BSE and NSE.

We are currently serving the corporate clients and mainly the high net worth individuals. We intend to expand and increase our presence in the retail segment by setting up of up additional 25 branches in Kolkata, Mumbai, Delhi, Chennai and Bikaner.

Post the launch of SME Platform by BSE, our Company has sensed the opportunity and hence we have got our selves registered as Market Maker with BSE SME. Further we have also applied for membership to MCX Stock Exchange Limited vide our letter dated September 11, 2012 and the same is under process.

Our Company is also engaged in making investment in various companies. We are not bound by pre-defined restrictions in regards to our search for investment opportunities. We invest in companies at various stages. Our management approach can take the form either of driving change or partnership with existing owners. We invest in both quoted and unquoted securities and derivatives with sufficient liquidity. The investment strategies are mostly long-term, and are based on an analysis of investment fundamentals. We also do proprietary investment in tradable securities.

Further Expansion Plans of Our Company

Our Company has raised ₹ 1,914.00 Lacs by issuing 95,70,000 Equity Shares of face value of ₹ 10 each at a issue price of ₹ 20 per equity share to Promoters, Friends and Other Strategic Investors. We intend to utilise the above amount on the expansion of the business of our Company including the following:

a. Expansion and Establishments of Branch Offices

Our entire business is currently being undertaken from our registered office situated at Kolkata and corporate office situated at Mumbai. All the back office and support functions are carried out from this office only.

We believe that our branches will play an important role in customer targeting and acquisition and customer service. We plan to set up 25 branches in 5 cities across India for our broking business. The cities will include Kolkata, Mumbai, Delhi, Chennai and Bikaner. On each new branch we will incur outlay towards furniture and fixtures, computers, connectivity (including VSAT for our broking branches), rent deposit, glow sign boards, etc. Typically, these branches would be about 1,000 sq. ft in size. Some branches will be smaller and there would be larger branches like Area offices and Branch offices. We are yet to identify suitable location for the proposed office spaces. As a result, we have not entered into any lease or license arrangements for establishment of any of these offices. We have not entered into any definitive arrangements for establishing any of these offices. These offices will enable us to expand our presence in retail segment and shall also enable us to identify new clients in different regions and offer our services to them. We have already taken one office at 505, Raheja Centre, Free Press Journal Marg, Nariman Point, Mumbai – 400 021 on lease and licence basis in Mumbai on February 15, 2013 for one of the proposed branch in Mumbai.

b. Acquiring membership of CDSL

Being broker taking a depository license will make our clients very comfortable to operate their account. They won't be required to open up trading account and DP account separately at different places, which will definitely help us to improve our services for existing clients and also help us in capturing new clients.

c. Setting up Merchant Banking Division

Opening up of new listing platform in the form of SME segment can be taken as a great opportunity for merchant bankers and underwrites. It is great platform for small and medium enterprises to raise funds from market and enhance their business. As the number of enterprises will show their interest for raising fund through this platform, we see huge scope in undertaking merchant banking and underwriting activities for all types of public issues. The following discussion on results of operations should be read in conjunction with the Audited Financial Results of our Company for the years ended March 31, 2008, 2009, 2010, 2011, 2012 and six months period ended September 30, 2012.

Key factors affecting the results of operation:

Our Company's future results of operations could be affected potentially by the following factors:

Competition

Our Company faces significant competition from other brokerage houses operating in the markets in India in which it operates. Some of these firms have greater resources and/or a more widely recognised brand than we have, which may give them a competitive advantage. Our ability to grow revenues will depend on demand for our products and services in preference to those of its competitors.

Growth in the Indian economy

General economic conditions in India have a significant impact on our results of operations. The Indian economy has grown rapidly over the past decade and is expected to continue to grow in the future. We believe growth in the overall economy has driven, and will drive, the underlying demand for investment products and services both in terms of the availability of capital for investment and the availability of such products and services.

Stock market trends

A significant portion of our revenues is derived from equity broking. Revenues, level of operations and, consequently, profitability are dependent on favourable capital market conditions and other factors that affect the volume of stock trading in India. In recent years, the Indian and world securities markets have fluctuated considerably and the volumes have declined.

Regulatory developments

Our Company is regulated by the Companies Act and some of its activities are subject to supervision and regulation by statutory and regulatory authorities including the SEBI, RBI, CDSL, NSDL and the exchanges. It is therefore subject to changes in Indian law, as well as to changes in regulation and government policies and accounting principles.
