An investment in Equity Shares involves a high degree of financial risk. You should carefully consider all information in this Draft Prospectus, including the risks described below, before making an investment in our Equity Shares. To obtain a better understanding, you should read this section in conjunction with the chapters titled *"Our Business"* and *"Management's Discussion and Analysis of Financial Condition and Results of Operations as Reflected In The Financial Statements"* beginning on page 98 and 165 of this Draft Prospectus. If any of the following risks actually occur, our business, results of operations and financial condition could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries.

The risks set out in this Draft Prospectus may not be exhaustive and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future. Further, some events may have a material impact from a qualitative perspective rather than a quantitative perspective and may be material collectively rather than individually. This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our Company's actual results could differ materially from those anticipated in such forward-looking statements as a result of certain factors, including the considerations described below and in the chapter titled *"Forward Looking Statements"* beginning on page 14 of this Draft Prospectus.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. Unless otherwise stated, the financial information of our Company used in this section is derived from our restated financial statements prepared in accordance with Indian GAAP and the Companies Act and restated in accordance with the SEBI ICDR Regulations.

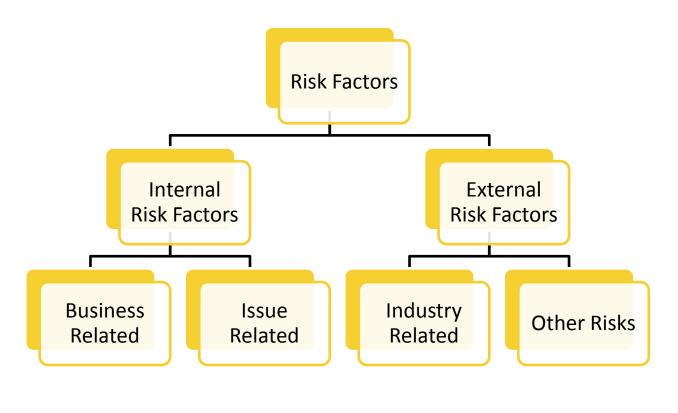

Materiality

The risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some risks may not be material individually but may be material when considered collectively.
- 2. Some risks may have an impact which is qualitative though not quantitative.
- 3. Some risks may not be material at present but may have a material impact in the future.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled "Definitions and Abbreviations" beginning on page 4 of this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISKS

BUSINESS RISKS/COMPANY SPECIFIC RISKS

1. We generate our entire sales from our operations in certain geographical regions especially Gujarat and Maharashtra and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.

Entire of our total sales are made in the states of Gujarat and Maharashtra. In financial year 2013-2014, 100% of our total revenues were generated from Gujarat and Maharashtra. Such geographical concentration of our real estate business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in the Gujarat and Maharashtra region to expand our operations in other parts of India, should we decide to further expand our operations.

Factors such as competition, culture, regulatory regimes, business practices and customs, customer tastes, behavior and preferences in these cities where we may plan to expand our operations may differ from those in the Gujarat and Maharashtra, and our experience in the Gujarat and Maharashtra may not be applicable to these cities. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national developers, but also local developers who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors, suppliers, relevant government authorities, and who have access to existing land reserves or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside the Gujarat and Maharashtra real estate market may adversely affect our business prospects, financial conditions and results of operations.

2. Company is yet to achieve scalable operations in their real estate business and has limited operating history in the business of real estate industry and therefore investors may not be able to assess our company's prospects based on past results.

We had no operations of real estate industry until Fiscal 2011 and accordingly, had no operational income for such periods from this segment. However, our Promoters viz., Rajul Shah and Pramoda Shah and our Group Entities have been into the business of real estate since 2007. Given our limited operating history in the real estate development business, we and our Promoters may not have sufficient experience to address the risks frequently encountered by early stage companies, including our ability to successfully complete the our infrastructure projects or maintain adequate control of our costs and expenses. We face significant competition from other more established real estate developers, many of whom undertake similar projects within the same regional markets as us. Given the fragmented nature of the real estate development industry in India, we often do not have complete information about the projects our competitors are developing and accordingly we may underestimate supply in the market. If we are unsuccessful in addressing such risks, our business may be materially and adversely affected. Accordingly, investors should consider our business and prospects in light of the risks, losses and challenges that we face as an early-stage company and should not rely on our results of operations for any prior periods as an indication of our future performance.

3. We utilize independent construction contractors, upon whom we do not have direct control, to construct projects.

We contract with independent construction contractors for the construction of our projects. If a contractor fails to perform its obligations satisfactorily or within the prescribed time periods with regard to a project, we may be unable to develop the project within the intended timeframe, at the intended cost, or at all. If this occurs, we may be required to incur additional cost or time to develop the property to appropriate quality standards in a manner consistent with our development objective, which could result in reduced profits or in some cases, significant penalties and losses. We cannot assure you that the services rendered by any of our independent construction contractors will always be satisfactory or match our requirements for quality.

4. Our Company has not complied with the provisions of the Contract Labour (Regulation and Abolition) Act, 1970 and which can be subject to penalties and regulatory actions

Our Company has not complied with the provisions of the Contract Labour (Regulation and Abolition) Act, 1970 for the contract labourers which we have employed in relation to our completed projects. Such non-compliance can render us liable to penalties and other regulatory actions under the Contract Labour (Regulation and Abolition) Act, 1970.

5. Our Promoter Group and Group Entity, M/s Jet Infotech India's does not have records/ information and has not complied with various regulatory requirements. Such non-compliances could lead to regulatory actions.

Our Promoter Group and Group Entity, M/s. Jet Infotech India's is not in possession of documents/ records including the deed of partnership and/or deed of reconstitution, if any. The partnership deed of M/s. Jet Infotech India's has not been registered with the Registrar of Firms. Further, M/s. Jet Infotech India's is not operational and has not filed any income tax returns from the financial year 2001 onwards. Such non-availability of records and non-filing of documents with various regulatory authorities could subject M/s Jet Infotech India's and our Promoter, Pramoda Shah (one of the partners of the firm) to penalties and regulatory actions, which may not be Such lapses by our Promoter Group and Group Entity may not be perceived positively by external parties such as customers, bankers, suppliers etc, which may affect our credibility and business operations.

For further details relating to M/s Jet Infotech India's, refer to the chapter titled "Our Group Entities" beginning on page 136 of this Draft Prospectus.

6. Our Company has made an incorrect filing with the Registrar of Companies, Mumbai for the alteration of their Memorandum of Association. Such non-compliance and delay may render us liable to statutory penalties in the future.

The main objects of the Company as on the date of this Draft Prospectus has been approved by the shareholders of our Company in the extraordinary general meeting held on July 10, 2010 for the alteration of main objects of our Company. The certified true copy of the resolution which is filed with the Registrar of Companies, Mumbai as part of form 23 is inconsistent with the attached amended copy of the Memorandum of Association. Such incorrect and inconsistent filing has not been rectified by the Company as on the date of the Draft Prospectus and can subject us to imposition of penalties and regulatory action, which can have an adverse impact on the results and financial position of our Company.

7. Our Company, our Promoter, Rajul Shah and Group Entity i.e., M/s. Shubham Associates are involved in legal proceeding(s). Any adverse decision in such proceedings may render them liable to liabilities / penalties and may adversely affect our / their business and results of operations.

Our Company, our Promoter, Rajul Shah and Group Entity are involved in certain legal proceedings and claims in relation to certain civil and tax matters. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. Any adverse decision may render us / them liable to liabilities / penalties and may adversely affect our / their business and results of operations.

For further details regarding these legal proceedings, please refer to the chapter titled 'Outstanding Litigations and Material Developments' beginning on page 177 of this Draft Prospectus.

8. Our Company has negative cash flow in the past 3 years details of which are given below; Sustained negative cash flow could impact our growth and business.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources.

				(Rs in Lakhs)
Particulars	March 31, 2012	March 31, 2013	March 31, 2014	For the period ended April 30, 2014

Cash Flow from / (used in) Financing Activities	(0.50)	(0.59)	22.86	(31.64)

Any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. Our Company has diversified into real estate and construction industry and is in initial phase of its life cycle in this segment where the cash flows are generally negative as real estate is a capital intensive industry with a long gestation period.

9. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive. A significant portion of our working capital is utilized towards Inventories. Summary of our working capital position is given below:-

(Rs. In lakhs)

The real estate business is working capital intensive and involves a lot of investment in inventories. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled "Objects of the Issue" beginning on page 74 of this Draft Prospectus.

10. Increased raw material, labour and other costs, may adversely affect our results of operation and feasibility of our development plan.

As there is a significant amount of construction activity in our development plan, our business would be affected by the availability cost and quality of raw materials and labour. The prices and supply of raw materials and labour depend on factors not under our control, including general economic conditions, competition, production levels, transportation costs and import duties. Additionally, inflation would play a critical role in the cost of construction, and could directly impact the profitability of the development and the peak funding requirements. We cannot assure you that we will be able to procure quality raw materials at competitive prices or at all which may adversely affect our business. In addition, during periods of significant increases in the price of building materials, we may not be able to pass price increases through to our customers, which could reduce or eliminate our profits with respect to such development. Our principal raw materials include steel and cement. Any increase in the costs of our principal raw materials may adversely affect our business, financial condition and results of operation.

11. We depend significantly on our residential development business. The success of our residential development business is dependent on our ability to anticipate and respond to consumer requirements.

Currently, our primary focus is the development of residential real estate projects (which comprises multi-storey apartments). As part of our growth strategy, we plan to concentrate our operations in this segment of the real estate market. We rely on our ability to understand the preferences of our customers in different segments and to accordingly develop projects that suit their tastes and preferences. The growing disposable income of India's middle and upper classes has led to a change in lifestyle resulting in substantial changes in the nature of their demands. As customers continue to seek better housing amenities as part of their residential needs, we plan to continue our focus on the development of quality residential accommodation with various amenities. Our inability to provide customers with quality construction or our failure to continually anticipate and respond to customer needs may affect our business and prospects and could lead to some of our customers switching to our competitors.

12. We have in the last 12 months issued Equity Shares at a price which is lower than the Issue Price.

The details of issue of Equity Shares in the past 12 months, which have been made at a price lower than the Issue Price, are as follows:

Date of allotment	Name of Allottee	Nature of Allotment	No. of Equity Shares	Face value per Equity Shares (in Rs.)	Issue price per Equity Shares (in Rs.)	Consideration
April 30, 2014	Rajul Shah	Conversion of unsecured loan	31,000	10	118	Other than cash

Further, our Company has also made a bonus issue on September 2, 2014 of 6,02,000 Equity Shares. For further details please see the chapter titled "*Capital Structure*" beginning on page 58 of the Draft Prospectus.

13. Our success depends largely upon the services of our Directors and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

Our Managing Director, Rajul Shah has built relations with clients and other persons who are connected with us. Our success is substantially dependent on the expertise and services of our Directors and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the real estate industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

14. We face significant risks with respect to the length of time needed to complete each project and there could be unscheduled delays and cost overruns in relation to our ongoing and upcoming projects.

It may take several years following the acquisition of land before income or positive cash flows can be generated. During this time, there can be changes to the domestic business and regulatory environment, local real estate market conditions, perceptions of prospective customers with respect to the convenience and attractiveness of the project and changes with respect to competition from other property developments. Changes to the economic, business and regulatory environment during such time may affect the costs and

revenues associated with the project and can ultimately affect the profitability of the project. If such changes occur during the time it takes to complete a certain project, our return on such project may be lower than expected and our financial performance may be adversely affected.

15. Delay in raising funds from the IPO could adversely impact the implementation schedule and affect our ability to execute the expansion project within the given time frame, thus impeding our growth plans and profitability

The expansion of our proposed project is to be funded from the proceeds of the IPO and internal accruals. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Net Proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion project within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

16. Our Group entity, M/s. Shubham Associates has incurred loss in the fiscal year 2013.

Sustained financial losses by our Group Entity may not be perceived positively by external parties such as customers, bankers, suppliers etc., which may affect our credibility and business operations. Our Group Entity, M/s. Shubham Associates, has incurred losses of Rs. 13.91 lakhs for the Financial Year 2012-2013. Such financial losses by our Group Entity may not be perceived positively by external parties such as customers, bankers, suppliers etc., which may affect our credibility and business operations.

17. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the Net Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "*Objects of the Issue*" beginning on page 74 of this Draft Prospectus.

18. Company is engaged into real estate business which involves huge capital investment at the first stage of operations

Our Company is engaged in the real estate industry which is capital intensive and requires huge capital deployment at early stages of the project. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled "Objects of the Issue" beginning on page 74 of this Draft Prospectus.

19. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. We will be applying for certain approvals relating to our business. If we fail

to maintain such registrations and licenses or comply with applicable conditions, or a regulatory authority claims we have not complied, with these conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity.

Further, we may become liable to penal action if our activities are adjudged to be undertaken in the manner not authorized under the applicable law. This could materially and adversely affect our business, financial condition and results of operations. We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For more information about the licenses required in our business and the licenses and approvals applied for, please refer to sections titled "*Government and other Statutory Approvals*" beginning on page 182 of this Draft Prospectus.

20. It is difficult to predict our future performance, or compare our historical performance between periods, as our revenue fluctuates significantly from period to period.

Under the percentage of completion method of revenue recognition, our revenue from sales depends upon the volume of bookings that we are able to obtain in relation to our projects as well as the rate of progress of construction. Our bookings depend on our ability to market and pre-sell our projects and the willingness of our customers to pay for developments or enter into sale agreements well in advance of receiving possession of properties, which can be affected by prevailing market sentiment. Construction progress depends on various factors, including the availability of labour and raw materials, the timely receipt of regulatory clearances and the absence of contingencies such as litigation and adverse weather conditions. The occurrence of any such contingencies could cause our revenues to fluctuate significantly, which could in turn adversely affect our margins. In addition, we cannot predict with certainty the rate of progress of construction or time of the completion of our real estate developments due to lags in development timetables occasionally caused by unforeseen circumstances.

Our results of operations may also fluctuate from period to period due to a combination of other factors beyond our control, including the timing during each year of the sale of properties that we have developed, and any volatility in expenses such as land and construction costs. Depending on our operating results in one or more periods, we may experience cash flow problems, thereby resulting in our business, financial condition and results of operations being adversely affected. Such fluctuations may also adversely affect our ability to fund future projects.

As a result of one or more of these factors, we may record significant turnover or profits during one accounting period and significantly lower turnover or profits during prior or subsequent accounting periods. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of our future performance.

21.It is difficult to compare our performance between periods, as our revenue fluctuates significantly from period to period.

We derive income from the sale of residential units and the sale of office spaces we have developed. Our income from these activities may fluctuate significantly due to a variety of factors. For example, revenues from sales are affected due to following percentage completion method and general market conditions. Moreover, due to occasional lags in development timetables caused by unforeseen circumstances, we cannot predict with certainty when our real estate developments will be completed. Our results of operations may also fluctuate from period to period due to a combination of other factors beyond our control, including volatility in expenses such as costs to acquire land or development rights and construction costs. Depending on our operating results in one or more periods, we may experience cash flow problems and difficulties in covering our operating costs, which may adversely affect our business, financial condition and results of operations. Such fluctuations may also adversely affect our ability to fund future projects. As a result of one or more of these factors, we may record significant turnover or profits during one accounting period and significantly lower turnover or profits during prior or subsequent accounting periods. Furthermore, the periods discussed in our financial statements included in this

Draft Prospectus may not be comparable to each other or to other future periods, and our results of operations and cash flows may vary significantly from period to period, year to year, and over time. Therefore, we believe that period–to–period comparisons of our results of operations should not be relied upon as indicative of our future performance.

22. Our Company has availed unsecured loans in past and may avail in future loans from related parties which are repayable on demand.

We have availed in past unsecured loans from related parties. For further details in relation to the unsecured loans, please refer the chapter *"Financial Statements"* beginning on page 143 of the Draft Prospectus. Unsecured loans may be called at any time by these Parties. In the event that these loans are required to be repaid on a short notice, or on demand our Company may have to arrange for additional funds which may impact our financials. Any such demand for repayment of the unsecured loans, may materially and adversely affect our business, results of operations and financial condition.

23. We face labour risks, including potential increases in labour costs.

We operate in a labour-intensive industry and we or our contractors hire casual labour to work on our projects. In the event of a labour dispute, if our contractors are unable to successfully negotiate with the workmen or subcontractors, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. It may also be difficult to procure the required skilled workers for existing or future projects. Either of these factors could adversely affect our business, financial condition, results of operations and cash flows. In addition, we may be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors.

24. We may be unable to successfully identify and acquire suitable parcels of land for development, which may impede our growth.

Our ability to identify suitable parcels of land for development is a vital element of our business and involves certain risks, including identifying and acquiring appropriate land, appealing to the tastes of residential customers and undertaking and responding to the requirements of commercial clients. We have an internal assessment process for land selection and acquisition which includes a due diligence exercise to assess the title of the land and its suitability for development, development potential and marketability. Our internal assessment process is based on information that is available or accessible to us. There can be no assurance that such information is accurate, complete or current. Any decision based on inaccurate, incomplete or outdated information may result in certain risks and liabilities associated with the acquisition of such land, which could adversely affect our business, financial condition and results of operations.

25. Our Company has not made any application for registration of our logo """ to the Registrar of Trademarks. We may not be able to protect our intellectual property rights, which may harm our business. Further, we are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

We have not made any application for registration of the logo "**WE**" to the Registrar of Trade Marks, though the registration for the said trademark in our name which is important to retain our brand equity. We do not currently have any registered trademarks and we do not enjoy any statutory protection under the Trade Marks Act, 1999 for the aforesaid logo. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability. Our trademark application may not be allowed or competitors may challenge the validity or scope of our intellectual property.

In addition, the precautions we take to protect our intellectual property rights, may be inadequate and/or it is possible that third parties may copy or otherwise obtain and use our intellectual property without authorization or

otherwise infringe on our rights for which we may need to undertake expensive and time-consuming litigation to protect our intellectual property rights and this may have an adverse effect on our business, prospects, results of operations and financial condition. Further, if our unregistered trade mark is registered by a third party, we may not be able to make use of such trade mark in connection with our business and consequently, we may be unable to capitalize on the brand recognition associated with our Company. Until such time that we receive registered trademark, we can only seek relief against "passing off". Accordingly, we may be required to invest significant resources in developing a new brand.

26. The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds in the project is entirely at the discretion of our management and as per the details mentioned in the section titled "Objects of the Issue". Any revision in the estimates may require us to reschedule our project expenditure and may have a bearing on our expected revenues and earnings.

Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management's estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time and consequently our funding requirements may also change. Our estimates for expansion may exceed the value that would have been estimated by our management and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the objects of the Issue is entirely at the discretion of our management and is not subject to monitoring by any external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

27. Our business and growth plan could be adversely affected by the incidence and rate of property taxes and stamp duties.

We are subject to the property tax regime in Maharashtra and Gujarat. These taxes could increase in the future, and new types of property taxes may be levied which would increase our overall development and other costs. Property conveyances are subject to stamp duty. For details, see "*Key Industry Regulations and Policies*" beginning on page 106 of Draft Prospectus. If these duties increase, or any new type of property tax or stamp duty is introduced, the cost of leasing properties will rise which may affect the demand for apartments adversely. Any such changes in the incidence or rates of property taxes or stamp duties could materially and adversely affect our business, financial condition and results of operations.

28. Negative publicity with respect to our real estate business could adversely affect our business, financial condition and results of operations.

Our business is dependent on the trust our customers have in the quality of our real estate projects. Any negative publicity regarding us, our real estate projects could adversely affect our reputation and our results of operations. Challenges to the status of our real estate business and sold by us may result in a negative change in consumer attitudes towards our real estate promoters and could result in negative publicity, having a material adverse effect on our business, financial condition and results of operations.

29. Labour unrest problems and shortage of skilled labour may significantly affect our business and if our employees unionize, we may be subject to, slowdowns and increased wage costs.

We believe that the real estate industry in India is currently experiencing a shortage of skilled labour. As a consequence, we face competitive pressures in recruiting and retaining engineers as well as other skilled labour and professionally qualified staff as and when we need them. We believe that we currently pay salaries at market rate in order to secure an adequate number of skilled personnel, however, we may in the future need to pay remuneration that is above market rates which could result in lower profit margins for us. Further, there can be no assurance that increased salaries will result in a lower rate of attrition. The loss of the services of our skilled personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to

manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. In addition, India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and our business may be adversely affected.

30. Compliance with, and changes in, safety, health and environmental laws and various labour, workplace and related laws and regulations impose additional costs and may increase our compliance costs and a such adversely affect our results of operations and our financial condition.

We are subject to a broad range of safety, health and environmental laws and various labour, workplace and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of raw materials, noise emissions, air and water discharges, on the storage, handling, discharge and disposal of chemicals, employee exposure to hazardous substances and other aspects of our operations. Compliance with, and changes in these laws may increase our compliance costs and as such adversely affect our results of operations and financial condition.

Acquisition of land and development rights in relation to immovable properties are governed by certain statutory and governmental regulations, which govern various aspects, including the requirement of transaction documents, payment of stamp duty, registration of property documents, purchase of property for benefit of others and limitations on land acquisition by an individual entity. Some of these approvals are required to be obtained before and after the commencement of construction in relation to the project.

Development of real estate projects is subject to extensive local, state and central laws and regulations that govern the acquisition, construction and development of land, including laws and regulations related to zoning, permitted land uses, proportion and use of open spaces, building designs, fire safety standards, height of the buildings, access to water and other utilities, and water and waste disposal. In addition, we and our subcontractors are subject to laws and regulations relating to, among other things, environmental approvals in respect of the project, minimum wages, working hours, health and safety of labourers and requirements of registration for contract labour.

31. Our lender for secured loan has imposed certain restrictive conditions on us under our financing arrangements.

Under certain of our existing financing arrangements, the lender for secured loan has the right to withdraw the facilities in the event of any change in circumstances, including but not limited to, any material change in the ownership or shareholding pattern or management of the Company. We are required to obtain the prior consent from our lender for, among other matters amending our Articles of Association, our capital structure and changing the composition of our management. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain lender consents necessary for our future operations and growth on time or at all. This may limit our ability to pursue our business and limit our flexibility in planning for, or reacting to, changes in our business or industry.

32. Within the parameters as mentioned in the chapter titled 'Objects of the Issue' beginning on page 74 of this Draft Prospectus, our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

We intend to use entire Issue Proceeds for working capital, repayment of unsecured loans, general corporate and issue expenses. We intend to deploy the Net Issue Proceeds in Financial Year 2014-2015 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future.

The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled *"Objects of the Issue"* beginning on page 74 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled 'Objects of the Issue' beginning on page 74 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue.

33. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters and Promoter Group will collectively own 62.26% of our equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

34. Our Company faces competition in its business from other real estate development players.

The real estate development industry in India, while fragmented, is highly competitive and our Company may face competition from other real estate development players. There are a number of competitors having better financials and other resources who have achieved greater market penetration than our Company has, in the markets in which it competes. Our Company's real estate business is primary focused in Maharashtra and Gujarat; and it faces stiff competition from other large players who are concentrated in the same location due to high real estate demand. Our Company experience competition in the future from potential competitors with significant operations elsewhere in India. This may affect our relative market share and profit.

35. The statements contained in the Draft Prospectus with regard to our Company's Completed Projects, Up-coming Projects and the area expressed to be covered by our projects are based on management estimates and may be subject to change.

The Saleable Area and general composition of our Company's land presented herein with regard to completed projects, on-going project and proposed projects are based on management estimates. The square footage that it may develop in the future with regards to a particular property may differ from what is presented herein based on various factors such as prevailing market conditions, an inability to obtain the required regulatory approvals, and a change in the development norms or our understanding of what such development norms are. Moreover, title defects may prevent our Company from having valid rights enforceable against all third parties to lands over which we believe we hold interests or development rights, rendering the management's estimates of the area and make-up of our Company's land incorrect and subject to uncertainty.

36. Our insurance coverage may not be adequate.

As per our agreement with our contractors, our contractors generally have own, failure or subsist and workman compensation policies. Accordingly, any loss or damage which occurs during construction is recoverable by our contractors from their respective insurance companies and contractors are responsible for such loss or damage at their own cost. We cannot assure you that our contractors have policies for an adequate amount to cover all loss or damage which may occur, or that they have renewed such policies in a timely manner. Any failure to recover money from insurance companies for any reason whatsoever may impact a contractor to pay for such loss or damage caused, which may result in us incurring liability and requiring us to be responsible for such loss or damage.

We currently have insurance policies with respect to our Registered Office and our property in Navsari. Our real estate projects could suffer physical damage from fire or other causes, resulting in losses which may not be fully compensated by insurance. In addition, there are certain types of losses, such as those due to floods, hurricanes, terrorism or acts of war, which may be uninsurable, are not insurable at a reasonable premium or which may exceed our insurance limits. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all material losses. Further, we may not have obtained insurance cover for some of our projects that do not require us to maintain insurance. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, that is not covered by insurance or exceeds our insurance coverage, the loss would have to be borne by us and our results of operations and financial performance could be adversely affected. The proceeds of any insurance claim may be insufficient to cover rebuilding costs as a result of inflation, changes in building regulations, environmental issues as well as other factors.

37. Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.

The amount of our future dividend payments, if any, will depend upon various factors such as our future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors. There can be no assurance that we shall have distributable funds or that we will declare dividends in the future. Additionally, the terms of any financing we obtain in the future, may contain restrictive covenants which may also affect some of the rights of our shareholders, including the payment of the dividend.

38. Our business is prone to accidents. Mishaps or accidents could result in a loss or slowdown in operations and could also cause damage to life and property.

The services provided by our Company are subject to operating risks, including but not limited to, breakdown or accidents and mishaps. Improper handling of equipment's on site or equipment failure or other mishap on site may result in accidents which could cause injury to our employees, other persons on the site and could also damage our properties thereby affecting our operations. Till date, there have been some incidents involving mishaps mentioned in chapter "Outstanding Litigation and Material Developments" on page 177 of the Draft Prospectus. We cannot assure that such mishaps or major accidents may not occur in future. Any consequential losses arising due to such events will affect our operations and financial condition.

39. Our Company does not have any long-term contracts with our Dealers/Customers and Suppliers which may adversely affect our results of operations.

Our Company neither has any long-term contract with any of dealers/customers and suppliers nor any marketing tie up. As a result, our customers can terminate their relationships with us due to a change in vendor preference or any other reason upon relatively short notice, which could materially and adversely impact our business.

40. Delays or defaults in client payments could result in a reduction of our profits.

We may be subject to working capital shortages due to delays or defaults in payment by clients. If clients default in their payments to which we have devoted significant resources it could have a material adverse effect on our business, financial condition and results of operations.

41. Our Promoter and Directors may have interest in our Company, other than reimbursement of expenses incurred or remuneration.

Our Promoter and Directors may be deemed to be interested to the extent of the Equity Shares held by them, or their relatives or loans advanced and personal guarantee's provided by them to/for the Company and benefits deriving from their directorship in our Company. Our Promoter is interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Entity. For further details, please refer to the chapters titled "Our Business" and "Our Promoter and Promoter Group", beginning on page 98 and 131, respectively and "Related Party Transactions" beginning on page 141 of this Draft Prospectus.

42. Our Company is dependent on third party transportation providers for the delivery of raw materials and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations

Our Company uses third party transportation providers for delivery of our raw materials. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. In addition raw materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in receipt of raw materials which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure and port facilities, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

43. Our Group Entities have objects similar to that of our Company's business and this could lead to a potential conflict of interest between Group Entities.

Our Group Entities, M/s. Shubham Associates, M/s. Jet Associates and M/s. Shree Pancham Associates have business similar to that of our Company's business. As we do not have any non–compete agreements in place with our Group Entities, there is a conflict of interest between our Company and our Group Entities, M/s. Shubham Associates, M/s. Jet Associates and M/s. Shree Pancham Associates. Such a conflict of interest may have adverse effect on our business and growth. For further details of business activities of our Group Entities, please refer to the chapter titled "Our Group Entities" beginning on page 136 of the Draft Prospectus.

44. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

45. Any future equity offerings may lead to dilution of your shareholding in our Company.

Investors in this Issue may experience dilution of their shareholding to the extent that our Company makes future equity or convertible offerings. Further, any perception or belief that further issues might occur may adversely affect the trading price of our Equity Shares.

46. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

47. Our Company may enter into MoUs, Agreements with various third parties to acquire land which entails certain completion and other risks that could adversely affect our business, financial condition and result of operation.

We may enter into MoUs, partnership and joint venture agreements, agreement's with third parties to acquire title with respect to land. We may enter into these agreements after making certain advance payments to ensure that the sellers of the land satisfy certain conditions within the time frames stipulated under these agreements. Further, since we do not acquire ownership of land with respect to such land upon the execution of such MoUs, a formal transfer of title of land is completed after we have conducted satisfactory due diligence or requisite Governmental consents and approvals have been obtained or we have paid all of the consideration for such land. As a result, we are subject to the risk that pending such consents and approvals, payment of consideration or our due diligence, the owners of such land may transfer the land to other purchasers or may grant developments rights to other parties so that we may never acquire formal title with respect to such land, which could have an adverse impact on our business. Additionally, we cannot assure you that the lands identified will be acquired at prices previously agreed to with the land owners. In the event that the prices are increased by the land owners during the acquisition process, we may not be able to acquire these lands at competitive prices, or at all.

48. Fluctuations in market conditions between the time we acquire land and sell developed projects on such land may affect our ability to sell our projects at expected prices which could adversely affect our revenues and profit margins.

The Indian real estate market has been historically cyclical, a phenomenon that can affect the optimal timing for both the acquisition of sites and the sale of our properties. Given the fact that real estate projects can take a significant amount of time to develop, we may be subject to significant fluctuations in the market value of our land and inventories. We could be adversely affected if market conditions deteriorate as we have purchased land during stronger economic periods. We cannot assure you that real estate market cyclicality will not continue to affect the Indian real estate market in the future, nor can we assure you that prices of real estate in and around Mumbai will increase in the future. As a result, we may experience fluctuations in property values over time, which in turn may adversely affect our business, financial condition and results of operations.

EXTERNAL RISK FACTORS

49. The real estate industry has witnessed significant downturns in the past and any significant downturn in future could adversely affect our business, financial condition and results of operations.

Economic developments within and outside India adversely affected the property market in India. The global credit markets experienced, and may continue to experience, significant volatility and may continue to have a significant adverse effect on the availability of credit and the confidence of the financial markets, globally as well as in India. In the recent past, the real estate industry experienced a significant downturn. It resulted in an industry-wide softening of demand for property due to a lack of consumer confidence, decreased affordability, decreased availability of mortgage financing, and large supplies of apartments.

Even though the global credit and the Indian real estate markets are showing signs of recovery, economic turmoil may continue to exacerbate industry conditions or have other unforeseen consequences, leading to uncertainty about future conditions in the real estate industry. These effects include, but are not limited to, a decrease in the sale of, or market rates for, our projects, delays in the release of certain of our projects in order to take advantage of future periods of more robust real estate demand, and the inability of our contractors to obtain working capital. Any significant downturn in future would have an adverse effect on our business, financial condition and results of operations.

50. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

51. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other

developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the real estate sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

52. Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.

Any adverse revision to India's credit ratings for domestic or international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such funding is available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

53. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operation as well as the price of the Equity Shares.

54. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Auditor included in this Draft Prospectus under section titled "Financial Statements" beginning on page 143, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

55. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

56. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which are sold other than on a recognised stock exchange and as a result of when the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain realised on the sale of shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

57. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

The Government of India has proposed the introduction of the Direct Taxes Code ("DTC"), to revamp the implementation of direct taxes. If the DTC is notified and becomes applicable, the tax impact discussed in this Draft Prospectus may not accurately reflect the provisions of the DTC. In addition, the application of various Indian and international sales, value-added and other tax laws, rules and regulations to our products and services, currently or in the future which are subject to interpretation by applicable authorities, if amended/ notified, could result in an increase in our tax payments (prospectively or retrospectively) and/ or subject us to penalties, which could affect our business operations.

The governmental and regulatory bodies in India may notify new regulations and/ or such policies which will require us to obtain approvals and licenses from the government and other regulatory bodies or impose onerous requirements and conditions on our operations in addition to what we are undertaking as on date. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on our business, financial condition and results of operations.

58. Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Our Company may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, the IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 ("IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 32 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined and will be notified by the Ministry of Corporate Affairs after various tax related issues are resolved. We have not yet determined with certainty what impact the adoption of IFRS will have on our financial reporting. Our financial condition, results of operations, cash flows or changes in the shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of IFRS may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period.

59. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the financial services sector contained in the Draft Prospectus.

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the infrastructure sector has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken

reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled *'Our Industry'* beginning on page number 92 of the Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

60. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the BSE could adversely affect the trading price of the Equity Shares.

61. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchange. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

62. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

63. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

64. Financial instability in Indian financial markets could adversely affect our Company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

INDIAN ECONOMY

Source: Economic Survey 2013-2014

In 2014-15, the Indian economy is poised to overcome the sub-5 per cent growth of gross domestic product (GDP) witnessed over the last two years. The growth slowdown in the last two years was broad based, affecting in particular the industry sector. Inflation too declined during this period, but continued to be above the comfort zone, owing primarily to the elevated level of food inflation. Yet, the developments on the macro stabilization front, particularly the dramatic improvement in the external economic situation with the current account deficit (CAD) declining to manageable levels after two years of worryingly high levels was the redeeming feature of 2013-14. The fiscal deficit of the Centre as a proportion of GDP also declined for the second year in a row as per the announced medium term policy stance. Reflecting the above and the expectations of a change for the better, financial markets have surged. Moderation in inflation would help ease the monetary policy stance and revive the confidence of investors, and with the global economy expected to recover moderately, particularly on account of performance in some advanced economies, the economy can look forward to better growth prospects in 2014-15 and beyond.

OUTLOOK FOR 2014-15

The descent into the present phase of sub-5 per cent growth has been rather sharp. The interplay of structural constraints alongside delays in project implementation, subdued domestic sentiments, and an uncertain global milieu led to general growth slowdown while rendering macroeconomic stabilization particularly challenging. Inflation also remained at elevated levels. These factors triggered risk-aversion and injected considerable uncertainty in investment activity. The current macroeconomic situation precludes fiscal stimulus to kick-start activity. Similarly, the task of monetary policy calibration for growth revival has been made difficult by persistent inflation and further complicated by uncertainty in international financial conditions and, until recently, by rupee depreciation. Targeted measures by the government and RBI have improved the external economic situation significantly, even as India remains exposed to risk on/off sentiments of investors and to policy shifts in advanced economies. Regaining growth momentum requires restoration of domestic macroeconomic balance and enhancing efficiency. To this end, the emphasis of policy would have to remain on fiscal consolidation and removal of structural constraints. Though some measures have been initiated to this end, reversion to a growth rate of around 7-8 per cent can only occur beyond the ongoing and the next fiscal.

Global economic activity is expected to strengthen in 2014- 15 on the back of some recovery in advanced economies. The Euro area is also expected to register a growth rate of above 1 per cent as against contraction witnessed in 2012 and 2013 (IMF, WEO, April 2014). The European Central Bank's monetary policy measures, most significantly introduction of the negative deposit facility interest rate are expected to boost economic activity in Europe. In addition, the performance of the real sector in the US (that is likely affect the pace of taper) is a major factor that would impact the global economic situation in 2014-15. The growth outlook for emerging Asian economies is generally benign with some grappling with inflation, structural bottlenecks, and external imbalances. The slowdown in emerging economies comes at an inopportune juncture.

Downward movement along with heightened volatility, witnessed, for example, in fixed investment post 2008-09 in India, often tends to magnify the impact and transmission channels of shocks (e.g. below-normal monsoons and/or upshot in oil prices) and hampers build-up of positive expectations. Under such circumstances, the Indian economy can recover only gradually with the GDP at factor cost at constant prices expected to grow in the range of 5.4 – 5.9 per cent in 2014-15. This assumes the revival of growth in the industrial sector witnessed in April 2014 to continue for the rest of the year, the generally benign outlook on oil prices (notwithstanding the uncertainty on account of recent developments in the Middle East), and the absence of pronounced destabilizing shocks (including below-normal monsoons). Growth in the above range implies a pick-up, aided by an improved external economic situation characterized by a stable current account and steady capital inflows, improved fiscal situation and, on the supply side, robust electricity generation and some recovery in manufacturing and non-government services.

Growth in 2014-15 is expected to remain more on the lower side of the range given above, for the following reasons: (i) steps undertaken to restart the investment cycle (including project clearances and incentives given to industry) are perceived to be playing out only gradually; (ii) the benign growth outlook in some Asian economies, particularly China; (iii) still elevated levels of inflation that limit the scope of the RBI to reduce policy rates; and (iv) expectation of below-normal monsoons. Downside risk also emerges from prolonging of the geo-political tensions. On the upside, such factors as institutional reform to quicken implementation of large projects and a stronger-than-expected recovery in major advanced economies would help the Indian economy clock a higher rate of growth.

INDIAN CONSTRUCTION SECTOR

Construction activity creates physical assets in a number of sectors of the economy. Construction sector has two key segments:

- Buildings, falling into one of the following categories: residential, commercial, institutional and industrial; and
- Infrastructure such as road, rail, dams, canals, airports, power systems, telecommunication systems, urban infrastructure including water supply, sewerage, and drainage and rural infrastructure.

Assets once created need to be maintained. Many upstream economic activities depend upon the construction sector. It is roughly estimated that 40–45 per cent of steel; 85 per cent of paint; 65–70 per cent of glass and significant portions of the output from automotive, mining and excavation equipment industries are used in the construction industry.

Construction accounts for nearly 60–80 per cent of the project cost of roads and housing and a significant portion in case of other infrastructure sectors. Construction materials such as cement and steel, bricks and tiles, sands and aggregates, fixtures and fittings, paints and chemicals, petrol and other petro-products, timber, minerals, aluminium, glass and plastics account for nearly two-third of the construction costs. The forward and backward multiplier impact of the construction sector is significant.

The construction sector has been contributing around 8 per cent to the nation's GDP (at constant prices) in the last five years (2006–07 to 2010–11).GDP from Construction at factor cost (at constant prices) increased to Rs.3.85lakh crore (7.9 per cent of the total GDP) in 2010–11 from Rs.2.85 lakh crore (8 per cent of the total GDP) in2006–07. The growth in construction sector in GDP has primarily been on account of increased spending on physical infrastructure in the last few years through programmes such as National Highway Development (NHDP) and PMGSY/Bharat Nirman.

Macro variable	2008-09	2009-10	2010-11	2011-12	2012-13
GDP from Construction (lakh crore)	2.85	3.15	3.33	3.56	3.85
Share of GDP (%)	8.0	8.1	8.0	7.9	7.9
Growth rate for GDP in Construction (%)	10.3	10.7	5.4	7.0	8.1

The sectoral pattern of growth associated with the 8.0 per cent growth scenario is summarised in the table below. The construction sector is projected to grow at 9.1 per cent, an improvement over the 7.7 per cent rate achieved in the Eleventh Plan.

INDIAN REAL ESTATE SECTOR

Overview

The Indian real estate sector is one of the fastest growing and globally recognised sectors. It comprises four sub sectors-housing, retail, hospitality, and commercial. The real estate industry's growth is linked to developments in the retail, hospitality and entertainment (hotels, resorts, cinema theatres) industries, economic services (hospitals, schools) and information technology (IT)-enabled services (like call centres) etc and vice versa. The total realty market in the country is expected to touch US\$ 180 billion by 2020.

Private equity (PE) funding has picked up in the last one year due to attractive valuations and low level of bank funding to the sector. Delhi NCR alone has already attracted PE investments of Rs 80 crore (US\$ 13.22 million) in first quarter of 2014. Moreover, with the government trying to introduce developer and buyer friendly policies, the outlook for the real estate sector in 2014 looks promising.

Source: India Brand Equity Foundation, http://www.ibef.org/industry/real-estate-india.aspx

The residential segment of real estate has also seen tremendous growth in recent years owing to the continuous growth in population, migration towards urban areas, ample job opportunities in service sectors, growing income levels, rise in nuclear families and easy availability of finance.

In the residential segment, the number of new launches in the first quarter of 2014 has increased by 43 per cent at 55,000 units across eight major cities. Bengaluru recorded the largest number of units launched, an increase of 22 per cent at 16,838 units, followed by Mumbai and Chennai with new launches at 10,698 units and 7,436 units with a growth rate of 93 per cent and 191 per cent respectively, during the first quarter.

With the government allowing 100 percent foreign direct investment (FDI) in this sector, the number of foreign firms owning real estate projects in India has also increased. The construction development sector, including townships, housing, built-up infrastructure and construction-development projects garnered total FDI worth US\$ 23,587.25 million in the period April 2000-June 2014.

FUTURE OUTLOOK

The Indian real estate sector continues to be a favoured sector for investments from international as well as private investors. In the upcoming years, the residential as well as commercial segments of the real estate industry is set for major growth, aided in no small part by the government's plans and initiatives to boost this sector.

Excise duty reduction on cement and steel will lower project costs and expansion of the interest subsidy on loans will boost developers' interest in this segment. Moreover, tax measures such as increasing the limit of interest deduction on home loans will provide necessary motivation to consumers to increase buying activity and revive demand in the value and affordable segment. Further, demand for space from sectors such as education and healthcare has opened up ample opportunities in the real estate sector.

Schedule of Implementation/Utilization of Net Proceeds

Our Company proposes to deploy the Net Proceeds in the aforesaid objects in the Fiscal year 2015.

Basis of Estimation

The incremental long term working capital requirements are based on historical Company data and estimation of the future requirements in FY 2014-15 considering the growth in activities of our Company and in line with norms accepted by our banker(s).

Our Debtors cycle was of about 5 days for FY 2013-14. We have assumed that our debtor's cycle will be 90 days for FY 2014-15. Similarly we have estimated advance to suppliers, other current assets and current liabilities in line with working capital employed in FY 2014-15.

Justification for "Holding Period" levels

Inventories	During FY 2013-14 the inventory holding days were 374 days, as 2 projects were under construction. In the FY 2014-15 we will make sales from completed projects and hence we expect the inventory holding days to lesser as compared to previous year
Debtors	In FY 2014-15, the Trade Receivable holding days are expected to go up against FY 2013-14 as our Company will provide higher credit period to complete the sales of pending completed projects
Creditors	Our Company expects that suppliers will be paid within 90 days in FY 2014-15 which is in line with the last year holding period.

Repayment of Unsecured Loans

We have from time to time availed unsecured loans from our Promoter and Promoter Group. These loans were used for the purpose business of our Company, primarily working capital.

The details of the repayment of loans to Promoter and Promoter Group Entities are provided below:

Amount in Rs.

Name of Lender	Amount outstanding as at September 9, 2014	Tenure	Rate of Interest	Repayment from the Net Proceeds of the Issue

Tushar Bhakta	3,374,826	Repayable on demand	9% p.a.	3,374,826

Manish Parikh	1,300,000	Repayable on demand	Nil	1,300,000
Total	8,774,826			8,774,826

We may repay the above loans when due, before we obtain proceeds from the Issue, through other means and source of financing, including bridge loan or other financial arrangements, which then will be repaid from the proceeds of the Issue. We believe our repayment will help us to improve our ability to leverage equity for our future needs towards any of our existing operations and towards further expansion.

Our management, in response to the dynamic nature of the real estate industry, will have the discretion to revise its business plan from time to time and consequently our funding requirement and deployment of funds may also change. APPROACH TO REAL ESTATE INDUSTRY ANALYSIS

Analysis of real estate industry needs to be approached at both macro and micro levels, whether for domestic or global markets. Real estate industry forms part of construction sector. Hence, broad picture of construction sector should be at preface while analyzing the real estate industry. If the entire construction sector is likely to be impacted by a specific set of factors, so would, most likely, be the real estate industry as well.

Construction sector comprises various industries, which in turn, have numerous classes or segments. One such major industry in the overall construction sector is 'Real Estate'.

An appropriate view on real estate industry, then, calls for the overall economy outlook, performance and expectations of manufacturing sector, position of construction sector and micro analysis.

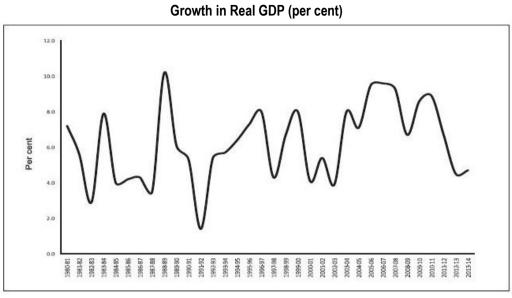

This Approach Note is developed by Pantomath Capital Advisors Private Ltd ('Pantomath') and any unauthorized reference or use of this Note, whether in the context of real estate industry and / or any other industry, may entail legal consequences.

INDIAN ECONOMY

In 2014-15, the Indian economy is poised to overcome the sub-5 per cent growth of gross domestic product (GDP) witnessed over the last two years. The growth slowdown in the last two years was broad based, affecting in particular the industry sector. Inflation too declined during this period, but continued to be above the comfort zone, owing primarily to the elevated level of food inflation. Yet, the developments on the macro stabilization front, particularly the dramatic improvement in the external economic situation with the current account deficit (CAD) declining to manageable levels after two years of worryingly high levels was the redeeming feature of 2013-14. The fiscal deficit of the Centre as a proportion of GDP also declined for the second year in a row as per the announced medium term policy stance. Reflecting the above and the expectations of a change for the better, financial markets have surged. Moderation in inflation would help ease the monetary policy stance and revive the confidence of investors, and with the global economy expected to recover moderately, particularly on account of performance in some advanced economies, the economy can look forward to better growth prospects in 2014-15 and beyond.

OUTLOOK FOR 2014-15

The descent into the present phase of sub-5 per cent growth has been rather sharp. The interplay of structural constraints alongside delays in project implementation, subdued domestic sentiments, and an uncertain global milieu led to general growth slowdown while rendering macroeconomic stabilization particularly challenging. Inflation also remained at elevated levels. These factors triggered risk-aversion and injected considerable uncertainty in investment activity. The current macroeconomic situation precludes fiscal stimulus to kick-start activity. Similarly, the task of monetary policy calibration for growth revival has been made difficult by persistent inflation and further complicated by uncertainty in international financial conditions and, until recently, by rupee depreciation. Targeted measures by the government and RBI have improved the external economic situation significantly, even as India remains exposed to risk on/off sentiments of investors and to policy shifts in advanced economies. Regaining growth momentum requires restoration of domestic macroeconomic balance and enhancing efficiency. To this end, the emphasis of policy would have to remain on fiscal consolidation and removal of structural constraints. Though some measures have been initiated to this end, reversion to a growth rate of around 7-8 per cent can only occur beyond the ongoing and the next fiscal.

Global economic activity is expected to strengthen in 2014- 15 on the back of some recovery in advanced economies. The Euro area is also expected to register a growth rate of above 1 per cent as against contraction witnessed in 2012 and 2013 (IMF, WEO, April 2014). The European Central Bank's monetary policy measures, most significantly introduction of the negative deposit facility interest rate are expected to boost economic activity in Europe. In addition, the performance of the real sector in the US (that is likely affect the pace of taper) is a major factor that would impact the global economic situation in 2014-15. The growth outlook for emerging Asian economies is generally benign with some grappling with inflation, structural bottlenecks, and external imbalances. The slowdown in emerging economies comes at an inopportune juncture.

Downward movement along with heightened volatility, witnessed, for example, in fixed investment post 2008-09 in India, often tends to magnify the impact and transmission channels of shocks (e.g. below-normal monsoons and/or upshot in oil prices) and hampers build-up of positive expectations. Under such circumstances, the Indian economy can recover only gradually with the GDP at factor cost at constant prices expected to grow in the range of 5.4 - 5.9 per cent in 2014-15. This assumes the revival of growth in the industrial sector witnessed in April 2014 to continue for the rest of the year, the generally benign outlook on oil prices (notwithstanding the uncertainty on account of recent developments in the Middle East), and the absence of pronounced destabilizing

shocks (including below-normal monsoons). Growth in the above range implies a pick-up, aided by an improved external economic situation characterized by a stable current account and steady capital inflows, improved fiscal situation and, on the supply side, robust electricity generation and some recovery in manufacturing and non-government services.

Growth in 2014-15 is expected to remain more on the lower side of the range given above, for the following reasons: (i) steps undertaken to restart the investment cycle (including project clearances and incentives given to industry) are perceived to be playing out only gradually; (ii) the benign growth outlook in some Asian economies, particularly China; (iii) still elevated levels of inflation that limit the scope of the RBI to reduce policy rates; and (iv) expectation of below-normal monsoons. Downside risk also emerges from prolonging of the geopolitical tensions. On the upside, such factors as institutional reform to quicken implementation of large projects and a stronger-than-expected recovery in major advanced economies would help the Indian economy clock a higher rate of growth.

INDIAN CONSTRUCTION SECTOR

Construction activity creates physical assets in a number of sectors of the economy. Construction sector has two key segments:

- Buildings, falling into one of the following categories: residential, commercial, institutional and industrial; and
- Infrastructure such as road, rail, dams, canals, airports, power systems, telecommunication systems, urban infrastructure including water supply, sewerage, and drainage and rural infrastructure.

Assets once created need to be maintained. Many upstream economic activities depend upon the construction sector. It is roughly estimated that 40–45 per cent of steel; 85 per cent of paint; 65–70 per cent of glass and significant portions of the output from automotive, mining and excavation equipment industries are used in the construction industry.

Construction accounts for nearly 60–80 per cent of the project cost of roads and housing and a significant portion in case of other infrastructure sectors. Construction materials such as cement and steel, bricks and tiles, sands and aggregates, fixtures and fittings, paints and chemicals, petrol and other petro-products, timber, minerals, aluminium, glass and plastics account for nearly two-third of the construction costs. The forward and backward multiplier impact of the construction sector is significant.

The construction sector has been contributing around 8 per cent to the nation's GDP (at constant prices) in the last five years (2006–07 to 2010–11).GDP from Construction at factor cost (at constant prices) increased to Rs.3.85lakh crore (7.9 per cent of the total GDP) in 2010–11 from Rs.2.85 lakh crore (8 per cent of the total GDP) in2006–07. The growth in construction sector in GDP has primarily been on account of increased spending on physical infrastructure in the last few years through programmes such as National Highway Development (NHDP) and PMGSY/Bharat Nirman.

Macro variable	2008-09	2009-10	2010-11	2011-12	2012-13

The sectoral pattern of growth associated with the 8.0 per cent growth scenario is summarised in the table below. The construction sector is projected to grow at 9.1 per cent, an improvement over the 7.7 per cent rate achieved in the Eleventh Plan.

INDIAN REAL ESTATE SECTOR

Overview

The Indian real estate sector is one of the fastest growing and globally recognised sectors. It comprises four sub sectors-housing, retail, hospitality, and commercial. The real estate industry's growth is linked to developments in the retail, hospitality and entertainment (hotels, resorts, cinema theatres) industries, economic services (hospitals, schools) and information technology (IT)-enabled services (like call centres) etc and vice versa. The total realty market in the country is expected to touch US\$ 180 billion by 2020.

Private equity (PE) funding has picked up in the last one year due to attractive valuations and low level of bank funding to the sector. Delhi NCR alone has already attracted PE investments of Rs 80 crore (US\$ 13.22 million) in first quarter of 2014. Moreover, with the government trying to introduce developer and buyer friendly policies, the outlook for the real estate sector in 2014 looks promising.

The residential segment of real estate has also seen tremendous growth in recent years owing to the continuous growth in population, migration towards urban areas, ample job opportunities in service sectors, growing income levels, rise in nuclear families and easy availability of finance.

In the residential segment, the number of new launches in the first quarter of 2014 has increased by 43 per cent at 55,000 units across eight major cities. Bengaluru recorded the largest number of units launched, an increase of 22 per cent at 16,838 units, followed by Mumbai and Chennai with new launches at 10,698 units and 7,436 units with a growth rate of 93 per cent and 191 per cent respectively, during the first quarter.

With the government allowing 100 percent foreign direct investment (FDI) in this sector, the number of foreign firms owning real estate projects in India has also increased. The construction development sector, including townships, housing, built-up infrastructure and construction-development projects garnered total FDI worth US\$ 23,587.25 million in the period April 2000-June 2014.

The market size of real estate in India is expected to increase at a CAGR of 11.2 per cent during FY2008 – 2020.

GOVERNMENT POLICIES

The Government of India has announced a host of measures to spur the real estate sector, which include an allocation of Rs 7,060 crore (US\$ 1.16 billion) for the development of 100 smart cities, a reduction in the size of projects eligible for FDI from 50,000 sq m to 20,000 sq m, and having the minimum investment limit for FDI to US\$ 5 million.

A committee on Streamlining Approval Procedure for Real Estate Projects (SAPREP) was constituted by the Ministry of Housing & Urban Poverty Alleviation (MHUPA) to streamline the process of seeking clearances for real estate projects.

The governments of different states have also taken various measures to facilitate the growth of this sector. For instance, the Punjab government has proposed to exempt residents having houses with an area of up to 125 square yards from paying the levy and delink tax payment from collector rates. It has also proposed to keep vacant plots out of the ambit of property tax which will be implemented during 2014-15.

The Indian Green Building Council (IGBC) has joined hands with the US Green Building Council (USGBC) to strengthen their association for the next 10 years to focus on areas of knowledge exchange and work on the green building movement in India. The USGBC also plans to expand its support for LEED in India.

FUTURE OUTLOOK

The Indian real estate sector continues to be a favoured sector for investments from international as well as private investors. In the upcoming years, the residential as well as commercial segments of the real estate industry is set for major growth, aided in no small part by the government's plans and initiatives to boost this sector.

Excise duty reduction on cement and steel will lower project costs and expansion of the interest subsidy on loans will boost developers' interest in this segment. Moreover, tax measures such as increasing the limit of interest deduction on home loans will provide necessary motivation to consumers to increase buying activity and revive demand in the value and affordable segment. Further, demand for space from sectors such as education and healthcare has opened up ample opportunities in the real estate sector.

Since our business involves the acquisition of land, we are governed by a number of Central and State legislation regulating substantive and procedural aspects of the acquisition of, and transfer of land as well as town and city planning. For the purposes of executing our projects, we may be required to obtain licenses and approvals depending upon the prevailing laws and regulations applicable in the relevant state and/or local governing bodies such as the Municipal Corporation of Greater Mumbai, the Fire Department, the Environmental Department, the City Survey Department, the Collector, etc. For details of such approvals, please refer to the chapter titled "Government and other Statutory Approvals" on page 182 of this Draft Prospectus.

Additionally, our projects require, at various stages, the sanction of the concerned authorities under the relevant Central and State legislations and local byelaws. The following is an overview of some of the important laws and regulations, which are relevant to our business as a real estate developer.

Transfer of Property Act, 1882 (the "TP Act")

The TP Act establishes the general principles relating to transfer of property in India. It forms a basis for identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. It also provides for the rights and liabilities of the vendor and purchaser in a transaction of sale of land.

Indian Stamp Act, 1899 (the "Stamp Act")

Under the Stamp Act, stamp duty is payable on instruments evidencing a transfer or creation or extinguishment of any right, title or interest in immovable property. Stamp duty must be paid on all instruments specified under the Stamp Act at the rates specified in the schedules to the Stamp Act. The applicable rates for stamp duty on instruments chargeable with duty vary from state to state. Instruments chargeable to duty under the Stamp Act, which are not duly stamped, are incapable of being admitted in court as evidence of the transaction contained therein and it also provides for impounding of instruments that are not sufficiently stamped or not stamped at all. However, the instruments which have not been properly stamped can, in certain cases, be validated by paying a penalty of up to 10 times of the proper duty or deficient portion thereof payable on such instruments.

Maharashtra Stamp Act, 1958 (the "Maharashtra Stamp Act")

Stamp duty on instruments in the state of Maharashtra is governed by the Maharashtra Stamp Act. This act levies stamp duty on documents/instruments by which any right or liability is or purports to be created, transferred, limited, extended, extinguished or recorded. All instruments chargeable with duty and executed by any person are required to be stamped before or at the time of execution or immediately thereafter on the next working day following the day of execution. It authorises the State government on receiving information from any source, to call for examination of any instrument to satisfy itself that the market value of the property referred therein has been truly set forth and the duty paid on it is adequate. Instruments not duly stamped are incapable

of being admitted in court as evidence of the transaction in question. The State government has the authority to impound insufficiently stamped documents.

Registration Act, 1908 (the "Registration Act")

The Registration Act has been enacted with the objective of providing public notice of the execution of documents affecting, inter alia, the transfer of interest in immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title and publication of documents and prevention of fraud. It details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in any immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. A document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the TP Act or as collateral), unless it has been registered. Evidence of registration is normally available through an inspection of the relevant land records, which usually contains details of the registered property. Further, registration of a document does not guarantee title of land.

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 ("2013 Land Acquisition Act")

The 2013 Land Acquisition Act has repealed the Land Acquisition Act, 1894 and aims at establishing a participative, informed and transparent process for land acquisition for industrialization, development of essential infrastructural facilities and urbanization. While aiming to cause least disturbance to land owners and other affected families, it contains provisions aimed at ensuring just and fair compensation to the affected families whose land has been acquired or is proposed to be acquired. It provides for rehabilitation and resettlement of such affected persons. Under the 2013 Land Acquisition Act, the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (Maharashtra) Rules, 2014 have been notified which frame rules in relation to inter alia the consent process, the compensation mechanism and rehabilitation and resettlement.

Indian Easements Act, 1882 (the "Easement Act")

An easement is a right which the owner or occupier of land possesses for the beneficial enjoyment of that land and which permits him to do or to prevent something from being done, in or upon, other land not his own. Under the Easements Act, a license is defined as a right to use property without any interest in favour of the licensee. The period and incident may be revoked and grounds for the same may be provided in the license agreement entered in between the licensee and the licensor.

Maharashtra Land Revenue Code, 1966 (the "MLR Code")

The MLR Code is a consolidated code governing the sphere of land revenue and powers of revenue officers in the state of Maharashtra. Under the MLR Code, the Commissioner is the chief controlling authority in all matters connected with the land revenue for a particular division within the state, subject to the superintendence, direction and control of the State Government. Land revenue has been defined to mean all sums and payments claimable by the State Government on account of any land or interest in or right exercisable over any land held, and any cess or rate authorized by the State Government, any rent, lease money, quit rent or any other payment provided under any law or contract. All land, whether applied for agricultural or other purposes, and wherever situated, is liable for the payment of land revenue to the State Government as provided under the MLR Code, unless otherwise exempted. Further, any arrears of land revenue due on a land shall be a paramount charge on

the land and shall have precedence over every other debt, demand or claim. The MLR Code also provides for the constitution of Maharashtra Revenue Tribunal.

The Bombay Tenancy and Agricultural Lands Act, 1948 (the "BTAL Act")

The BTAL Act regulates the concept of tenancy over those areas of the state of Maharashtra within which our project is situated. A tenancy has been defined in the BTAL Act as the relationship between the landlord and the tenant, and recognizes a deemed tenancy in favour of a person lawfully cultivating land belonging to another. The BTAL Act lays down provisions with respect to the term for which tenancy could be granted, and the renewal and termination of a tenancy. The transfer of land to non-agriculturists is barred except in the manner provided under the BTAL Act. Agricultural land tribunals have been constituted under the BTAL Act with an officer not below the rank of a mamlatdar as the presiding officer.

The Employees Provident Fund and Miscellaneous Provisions Act, 1952 ("EPF Act")

The EPF Act provides for the institution of compulsory provident fund, pension fund and deposit linked insurance funds for the benefit of employees in factories and other establishments. A liability is placed both on the employer and the employee to make certain contributions to the funds mentioned above. Further, the employer is required to maintain records and submit periodic returns with regard to the implementation of the Act and Schemes. An establishment which is governed by EPF Act will continue to be governed by it even if the number of persons employed therein at any time falls below twenty.

Employees State Insurance Act, 1948 (the "ESI Act")

The ESI Act provides for certain benefits to employees in case of sickness, maternity and employment injury. All employees in establishments covered by the ESI Act are required to be insured, with an obligation imposed on the employer to make certain contributions in relation thereto.

It applies to, inter alia, seasonal power using factories employing ten or more persons and non-power using factories employing 20 or more persons. Every factory or establishment to which the ESI Act applies is required to be registered in the manner prescribed in the ESI Act. The ESI Act is applicable to all factories and other businesses as the Central Government may determine, unless a specific exemption has been granted. Section 2 (9) of the ESI Act lays down a list of the employees who can be covered by this Act.

Pursuant to the ESI Act only those employees drawing a salary below Rs. 15,000/- per month are covered under the ESI Act. However, prior to 2010 those employees drawing a salary below Rs. 7,500/- per month were covered under the ESI Act.

Shops and Commercial Establishments Acts

Shops and Establishments Act is a state enactment being different for every state of India. The Act is intended for the regulation of conditions of work, number of days of leave and employment in shops, commercial establishments and other establishments. Every establishment not regulated/being under the purview of Factories Act, 1948 has to be registered under the respective state Shops and Establishments Act. Pursuant to Section 5 of the Shops and Establishment Act every new establishment is required to obtain a certificate of registration from the designated authority within 90 (ninety days) from commencement of work of the establishment.

Central Sales Tax

The Central Sales Tax Act, 1956 (the "**CST Act**") imposes sales tax on the interstate sale of goods. Pursuant to Section 7 of the CST Act, every dealer involved in the sale of interstate goods is required to procure a sales tax registration certificate from the notified authority in accordance with the Central Sales Tax (Registration and Turnover) Rules, 1957.

Initially sales tax was imposed by both the central government and the respective state governments where the dealers were located. Hence, each dealer had to procure separate sales tax registration each from the central government and state governments. However, since the introduction of value added taxation, the state sales tax acts have been repealed and replaced by the respective statutory acts relating to value added taxation. Hence, although the Company initially had procured separate registration certificates for their establishments under the statutory act for sales tax to be imposed by the state, they are no longer in force.

Value Added Tax

Value Added Tax (the "VAT") is an indirect tax levied at each stage of the value addition chain. Any person who, for the purposes of or consequential to his engagement in or in connection with his business, buys or sells goods directly or otherwise, whether for cash or for deferred payment or for commission, remuneration or other valuable consideration is required to pay such value added taxes and has to compulsorily obtain a VAT certificate. The VAT certificate is not a centralized certificate and has to be obtained by a company from each state wherein their business is taxable. The VAT registration shall be valid until it is cancelled by the issuing authority.

Environmental Laws

The three major statutes in India which seek to regulate and protect the environment against pollution and related activities in India are the Water (Prevention and Control of Pollution) Act 1974, the Air (Prevention and Control of Pollution) Act, 1981 and the Environment (Protection) Act, 1986. The basic purpose of these statutes is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards ("PCB") which are vested with diverse powers to deal with water and air pollution, have been set up in each state. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking investigations to ensure that industries are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure, and investigation if the authorities are aware of or suspect pollution.

The Environment (Protection) Act, 1986 confers extensive powers on the Ministry of Environment and Forests to lay down rules for, inter alia, the standards of quality of air, water or soil for various areas and purposes and the prohibition and restriction on the location of industries and carrying on of processes and operations in different areas, towards the prevention, control and abatement of environmental pollution.

In addition, the Ministry of Environment and Forests looks into Environment Impact Assessment. The Ministry of Environment and Forest receives proposals for expansion, modernization and setting up of projects and the impact which such projects would have on the environment is assessed by the Ministry of Environment and Forest before granting clearances for the proposed projects.

Allotment will be made in consultation with the SME Platform of BSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth hereunder:

- (a) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Shares applied for).
- (b) The number of Shares to be allocated to the successful Applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- (c) For applications where the proportionate allotment works out to less than 2,000 equity shares the allotment will be made as follows:

- i. Each successful Applicant shall be allotted 2,000 equity shares; and
- ii. The successful Applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- (d) If the proportionate allotment to an Applicant works out to a number that is not a multiple of 2,000 equity shares, the Applicant would be allotted Shares by rounding off to the nearest multiple of 2,000 equity shares subject to a minimum allotment of 2,000 equity shares.
- (e) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Applicants in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 2,000 Equity Shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Draft Prospectus.
- (f) The above proportionate allotment of Shares in an Issue that is oversubscribed shall be subject to the reservation for Retail individual Applicants as described below:
