2. *We may not be able to qualify for, compete and win projects, which could adversely affect our business and results of operations.*

We obtain a majority of our projects through a competitive bidding process. In selecting contractors for major projects, clients generally limit the tender to contractors (or sub-contractors) they have pre-qualified based on several criteria including experience, technical and technological capacity, previous performance, reputation for quality, safety record, the financial strength of the bidder as well as its ability to provide performance guarantees. However, price competitiveness of the bid is typically one of the most important selection criterion. In some cases we may enter into consortium arrangements with other companies to bid for contracts where we may not qualify on our own. We are currently qualified to bid for projects up to a certain value and size and therefore may not be able to compete for larger projects. Our ability to bid for and win major projects is also dependent on our ability to show experience of working on other similar sector and developing a track record of executing more technically complex projects. If we are unable to pre-qualify for projects that we intend to bid on, or successfully compete for and win such projects, our business, results of operations and financial condition may be adversely affected.

3. *Our Order Book does not represent our future revenues and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.*

The Company has orders from which it expects future revenue and profit. OrderBook refers to a compilation of our expected revenues from uncompleted projects received. Projects in the order book represent business that is considered firm. Our Order Book does not necessarily indicate future earnings related to the performance of that work, as cancellations or unanticipated variations or scope or schedule adjustments may occur. Due to changes in project scope and schedule, we cannot predict with certainty when or if contracts in our Order Book will be performed. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to make the payments due. We cannot guarantee that the income anticipated in our Order Book will be realized, or, if realized, will be realized on time or result in profits. Any project cancellations or scope adjustments, which may occur from time to time, could reduce the amount of our Order Book and the income and profits that we ultimately earn from the contracts. Any delay, cancellation or payment default could have a material adverse effect on our business. For some of the contracts in our Order Book, our clients are obliged to perform or take certain actions, such as acquiring land, securing the right of way, clearing forests, providing owner supplied material, securing required licenses, authorizations or permits, making advance payments or opening of letters of credit, approving designs, approving supply chain vendors and shifting existing utilities. If a client does not perform such actions in a timely manner, and the possibility of such failure is not provided for in the contract, our projects could be delayed, modified or cancelled. Accordingly, the realization of our Order Book and the effect on our results of operations may vary significantly from reporting period to reporting period depending on the nature of such contracts, actual performance of such contracts, as well as the stage of completion of such contracts as of the relevant reporting date as it is impacted by applicable accounting principles affecting revenue and cost recognition.

4. *We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.*

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

5. *Our Company had not complied with Section 203 of Companies Act, 2013 regarding the appointment of whole time company secretary for a certain period of time. Such non-compliance may result in penalties or other action on our Company by the statutory authorities.*

Our Company had not complied with Section 203 of Companies Act, 2013 regarding the appointment of whole time company secretary for a certain period of time from January 13, 2015 to July 21, 2015. At present, our Company has appointed Ms. Hema Lakhmichand Advani as its Company Secretary w.e.f. January 01, 2016. Even though no action has been initiated or taken for the above non-compliance, such non-compliance may result in penalties or other action against our Company. However, such non compliance was due to resignation of the then Company Secretary.

6. *Delay in filing of certain forms under Companies Act with RoC.*

We have delayed in filing of certain forms under Companies Act with RoC and although the Company has paid additional fees for the same, such non-compliance may result in penalties or other action against our Company.

7. *Our Company had negative cash flows from our investing activities as well as financing activities in some of the previous year(s) as per the Audited Financial Statements and the same are summarized as under:*

If we fail to estimate accurately the resources and the time required for a fixed price project, future wage inflation rates or currency exchange rates or if we fail to complete our contractual obligations within the contracted time frame, our profitability may suffer. - 24. *Our Promoters and the members of our Promoters Group will continue to retain significant control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval. As a result, our Promoters and our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoters and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Our business operations are subject to operating risks, such as breakdown or failure of equipments used at the project sites, weather conditions, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes and industrial accidents. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

- 26. *Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.***

The economic environment and pricing pressure could negatively impact our revenues and operating results. In the event that the Government of India or the government of another country changes its tax policies in a manner that is adverse to us, our tax expense may materially increase, reducing our profitability.

II. Risk related to this Issue and our Equity Shares

- 27. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.**

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

- 28. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.**

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

- 29. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.**

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. For more details, please refer to "Statement of Tax Benefits" on page 88 of this Prospectus.

- 30. There is no guarantee that the Equity Shares issued pursuant to this Issue will be listed on the NSE Emerge in a timely manner.**

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to NSE to use its name as the Stock Exchange in this offer document for listing our shares on the NSE- Emerge. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the NSE- Emerge. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 31. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.**

Following the Issue, we will be subject to a daily "circuit breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares.

B. EXTERNAL RISK FACTORS**32. *Natural calamities and force majeure events may have an adverse impact on our business.***

India has experienced natural calamities such as earthquakes, tsunamis, and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

33. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

34. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company’s business, operations, financial condition, profitability and price of its Shares. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

- 37. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

- 38. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

- 39. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

- 40. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

41. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (“STT”) is paid on the transaction. SECTION III- INTRODUCTION

SUMMARY OF OUR INDUSTRY

Overview of Indian Economy

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. India is the fourth largest economy in the world in terms of purchasing power parity (PPP). Gross Domestic GDP of the country for the year 2014-2015 stood at INR 106.6 trillion (US\$ 1.60 trillion) as compared to INR 99.21 trillion (UD\$ 1.49 trillion) in 2013-14 . India's economy has witnessed a significant economic growth in the recent past, growing by 7.2% in 2015 as against 6.6% in 2014. India is set to become the world's fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. Service sector contributes 65% to the GDP were as Industry and Agriculture shares the pie with 18% and 17% respectively. The Asian Development Bank (ADB) in its update released on July 16, 2015 for the Asian Development Outlook, kept its forecasts for India's GDP growth unchanged. The ADB expects India to grow by 7.8 % in 2015-16 backed by healthy growth in agriculture and a pick up in investment activity.

Stellar growth in the manufacturing sector pushed GDP growth for the second quarter of FY16 to 7.4 % providing some relief for the government after a slow first quarter, according to data release by Ministry of Statistics and Programme Implementation (MOSPI). Indian economy notched up 40 basis points from the first quarter with growth coming in line with VCCircle poll forecast of 7.4 % for Q2FY16. While growth in the second quarter was above the 7 % growth recorded in Q1 it came in well below the 8.4 % growth that the economy had seen in the corresponding period last fiscal.

Passing through the phase of high current account deficit, rising inflation, slowing down in capex cycle and industrial activities, now the economy is witnessing some revival. Fall in crude oil prices supported to grapple the rising inflation as well as rates cuts is expected from the central bank that could be the positive sign for accelerating the investment cycle in the Economy. Index of Industrial Production which depicts the performance of eight core industries of Indian economy for 2014-15 has grown by 3.6 % as compared to 4.2 % in 2013-14.

In 2014-15, current account deficit stood at \$27.9 billion, or 1.3% of GDP. In 2013-14 it was at \$32.4 billion (1.7% of GDP) and in 2012-13 at \$88.1 billion (4.7 % of GDP). India's current account deficit (CAD) narrowed to \$8.2 billion (1.6 % of gross domestic product) in the second quarter of FY2016 from \$10.9 billion (2.2 % of GDP) in the year-ago quarter. The contraction in CAD in the September quarter was primarily on account of lower trade deficit (\$37.4 billion) compared to \$39.7 billion in the same quarter of 2014-15. For the April-September 2015 period, CAD declined to \$14.3 billion (1.4 % of GDP) from 18.4 billion (1.8 % of GDP) during the same period in FY15. For the first half of 2015-16, BoP remained in the positive territory as there was an accretion of \$10.6 billion to foreign exchange reserves compared with \$18.1 billion in the year-ago period.

The Index of Industrial Production (IIP) contracted by 3.2 % in November 2015 after rising by a five year high of 9.9 % in the previous month. All three sub-groups of the industry underperformed in November 2015. Output of the manufacturing sector, which accounts for around 75 % of the index, contracted by 4.4 %. The electricity sector rose by just 0.7 % while the mining sector posted a growth of 2.3 %. In terms of industries, 17 out of 22 industry groups in the manufacturing sector recorded a y-o-y fall in production levels. The industry group "Electrical machinery & apparatus" witnessed the highest negative growth of (-) 46.5 %, followed by (-) 13.8 % in "Luggage, handbags, saddlery, harness & footwear; tanning and dressing of leather products" and (-) 13.1 % in "Wood and products of wood & cork except furniture; articles of straw & plating materials."

Retail price inflation, measured by the Consumer Price Index (CPI), rose to 5.6 % in December 2015 from 5.4 % in November 2015. This is the fifth consecutive month wherein the retail inflation has registered a rise. As per a poll by Reuters of economists, consumer price inflation was expected to stand at 5.6 % in December. Inflation in rural areas rose, while in urban areas inflation remained unchanged. Inflation in the rural areas rose to 6.3 % from six %, while in the urban areas it remained unchanged at 4.7 %. The rise was mainly accounted for by the increase in food inflation to 6.4 % in December 2015 from 6.1 % a month ago. Food inflation in rural India rose to 6.4 % from 5.8 % and in urban India it fell to 6.3 % from 6.5 %.

Apart from being a critical driver of economic growth, foreign direct investment (FDI) is a major source of non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of cheaper wages, special investment privileges like tax exemptions, etc. For a country where foreign investments are being made, it also means achieving technical know-how and generation of employment. The continuous inflow of FDI in India, which is now allowed across several industries, clearly shows the faith that overseas investors have in the country's economy. FDI inflows soared by 24.5 % to US\$ 44.9 billion during FY2015, as compared to US\$ 36.0 billion in FY2014, according to Department of Industrial Policy and Promotion (DIPP) data. The top 10 sectors receiving FDI include telecommunication which received the maximum FDI worth US\$ 2.83 billion in the 10 month period, followed by services (US\$ 2.64 billion), automobiles (US\$ 2.04 billion), computer software and hardware (US\$ 1.30 billion) and pharmaceuticals sector (US\$ 1.25 billion). FDI in the country grew by 13 percent to \$16.63

billion during the April-September 2015 period of the current fiscal. The foreign investment was \$14.69 billion during April-September 2014, according to the latest figures of the Department of Industrial Policy and Promotion (DIPP). During the first half of the financial year 2015-16, India received maximum FDI of \$6.69 billion from Singapore followed by Mauritius (\$3.66 billion), the Netherlands (\$1.09 billion) and Japan (\$815 million).

FII's net investments in Indian equities and debt are set to touch a record this financial year, backed by expectations of an economic recovery, falling interest rates and improving earnings outlook. FIIs have invested a net of US\$ 43.5 billion so far in 2014-15 expected to be their highest investment compared to others years. Of this, a huge amount US\$ 26.3 billion was invested in debt and it is their record investment in the asset class, while equities absorbed US\$ 17.2 billion.

The outlook for Indian economy for short and long period remains positive. Young and educated population, new elected government, larger and positive integration with the major economies like US, Russia, Japan China, Europe etc makes the India a long term growth economy. India is preferred designation for investment by foreign economies.

Sectors projected to do well in the coming years include automotive, technology, life sciences and consumer products. Engineering and research and development (ER&D) export revenue from India is expected to reach US\$ 37-45 billion by 2020, from an estimated US\$ 12.4 billion in FY14, according to Nasscom. The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2004-05) prices for Q1 FY15 is estimated at Rs 14.38 trillion (US\$ 232.63 billion), as against Rs 13.61 trillion (US\$ 220.12 billion) in Q1 FY14, registering a growth rate of 5.7%.

Engineering Industry Overview

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy. The Indian engineering sector is divided into two major segments - heavy engineering and light engineering. The capital goods and engineering turnover in India is expected to reach US\$ 125.4 billion by FY17. Likewise, Electrical equipment market size is forecast to reach US\$ 100 billion by FY22.

Comparative advantage vis-à-vis peers in terms of manufacturing costs, market knowledge, technology and creativity has been a driving force for engineering exports from India. Engineering exports from India stood at US\$ 70.6 billion in FY15, registering a Compound Annual Growth Rate (CAGR) of 11.10 % over FY08-15. Companies engaged in the engineering sector are virtually on a roll. Capacity creation in sectors like infrastructure, power, mining, oil & gas, refinery, steel, automotives, and consumer durables has been driving demand in the engineering sector. Separately, the approval of significant number of special economic zones (SEZs) across the country and the development of the Delhi Mumbai Industrial Corridor (DMIC) across seven states is expected to further bolster the engineering sector.

OUR BUSINESS OPERATIONS

We enter into contracts primarily through a competitive bidding process, which often requires a prequalification process especially in the public sector. Before a tender is submitted, we perform preliminary due diligence at the proposed project site. Once the tender is accepted by the client, it is converted into a letter of intent, and a project manager and the project team are identified. Detailed project planning occurs to estimate resources, cost of completion and profitability. Once all of these items are determined and after final negotiations, a contract is signed with the client. Resources are then mobilized at the project site and execution of work is started. Work begins when the client hands over the site, plans and drawings to our on-site team. The project execution work is carried out as per the plan and the on-going requirements of the client. The Bill is raised for the actual work completed and duly measured, and after certification by the client, the bill is paid by the client as per the contract term and conditions, after reaching the threshold limit of the agreed level of the preparatory work or the completion of Work. The actual cost of the work done and the revised estimates of the cost to complete the remaining work are carried out every quarter. The quality control and safety, health and environment efforts at the site offices are further supplemented by the efforts from the zonal or branch office and the head office by way of technical audits and quality audits as to cost and time parameters as well as client satisfaction. A Chart showing description of Business process is as under:

Overview of Indian Economy

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. India is the fourth largest economy in the world in terms of purchasing power parity (PPP). Gross Domestic GDP of the country for the year 2014-2015 stood at INR 106.6 trillion (US\$ 1.60 trillion) as compared to INR 99.21 trillion (UD\$ 1.49 trillion) in 2013-14 . India's economy has witnessed a significant economic growth in the recent past, growing by 7.2% in 2015 as against 6.6% in 2014. India is set to become the world's fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. Service sector contributes 65% to the GDP were as Industry and Agriculture shares the pie with 18% and 17% respectively. The Asian Development Bank (ADB) in its update released on July 16, 2015 for the Asian Development Outlook, kept its forecasts for India's GDP growth unchanged. The ADB expects India to grow by 7.8 % in 2015-16 backed by healthy growth in agriculture and a pick up in investment activity.

Stellar growth in the manufacturing sector pushed GDP growth for the second quarter of FY16 to 7.4 % providing some relief for the government after a slow first quarter, according to data release by Ministry of Statistics and Programme Implementation (MOSPI). Indian economy notched up 40 basis points from the first quarter with growth coming in line with VCCircle poll forecast of 7.4 % for Q2FY16. While growth in the second quarter was above the 7 % growth recorded in Q1 it came in well below the 8.4 % growth that the economy had seen in the corresponding period last fiscal.

Passing through the phase of high current account deficit, rising inflation, slowing down in capex cycle and industrial activities, now the economy is witnessing some revival. Fall in crude oil prices supported to grapple the rising inflation as well as rates cuts is expected from the central bank that could be the positive sign for accelerating the

investment cycle in the Economy. Index of Industrial Production which depicts the performance of eight core industries of Indian economy for 2014-15 has grown by 3.6 % as compared to 4.2 % in 2013-14.

In 2014-15, current account deficit stood at \$27.9 billion, or 1.3% of GDP. In 2013-14 it was at \$32.4 billion (1.7% of GDP) and in 2012-13 at \$88.1 billion (4.7 % of GDP). India's current account deficit (CAD) narrowed to \$8.2 billion (1.6 % of gross domestic product) in the second quarter of FY2016 from \$10.9 billion (2.2 % of GDP) in the year-ago quarter. The contraction in CAD in the September quarter was primarily on account of lower trade deficit (\$37.4 billion) compared to \$39.7 billion in the same quarter of 2014-15. For the April-September 2015 period, CAD declined to \$14.3 billion (1.4 % of GDP) from 18.4 billion (1.8 % of GDP) during the same period in FY15. For the first half of 2015-16, BoP remained in the positive territory as there was an accretion of \$10.6 billion to foreign exchange reserves compared with \$18.1 billion in the year-ago period.

The Index of Industrial Production (IIP) contracted by 3.2 % in November 2015 after rising by a five year high of 9.9 % in the previous month. All three sub-groups of the industry underperformed in November 2015. Output of the manufacturing sector, which accounts for around 75 % of the index, contracted by 4.4 %. The electricity sector rose by just 0.7 % while the mining sector posted a growth of 2.3 %. In terms of industries, 17 out of 22 industry groups in the manufacturing sector recorded a y-o-y fall in production levels. The industry group "Electrical machinery & apparatus" witnessed the highest negative growth of (-) 46.5 %, followed by (-) 13.8 % in "Luggage, handbags, saddlery, harness & footwear; tanning and dressing of leather products" and (-) 13.1 % in "Wood and products of wood & cork except furniture; articles of straw & plating materials."

Retail price inflation, measured by the Consumer Price Index (CPI), rose to 5.6 % in December 2015 from 5.4 % in November 2015. This is the fifth consecutive month wherein the retail inflation has registered a rise. As per a poll by Reuters of economists, consumer price inflation was expected to stand at 5.6 % in December. Inflation in rural areas rose, while in urban areas inflation remained unchanged. Inflation in the rural areas rose to 6.3 % from six %, while in the urban areas it remained unchanged at 4.7 %. The rise was mainly accounted for by the increase in food inflation to 6.4 % in December 2015 from 6.1 % a month ago. Food inflation in rural India rose to 6.4 % from 5.8 % and in urban India it fell to 6.3 % from 6.5 %.

Apart from being a critical driver of economic growth, foreign direct investment (FDI) is a major source of non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of cheaper wages, special investment privileges like tax exemptions, etc. For a country where foreign investments are

being made, it also means achieving technical know-how and generation of employment. The continuous inflow of FDI in India, which is now allowed across several industries, clearly shows the faith that overseas investors have in the country's economy. FDI inflows soared by 24.5 % to US\$ 44.9 billion during FY2015, as compared to US\$ 36.0 billion in FY2014, according to Department of Industrial Policy and Promotion (DIPP) data. The top 10 sectors receiving FDI include telecommunication which received the maximum FDI worth US\$ 2.83 billion in the 10 month period, followed by services (US\$ 2.64 billion), automobiles (US\$ 2.04 billion), computer software and hardware (US\$ 1.30 billion) and pharmaceuticals sector (US\$ 1.25 billion). FDI in the country grew by 13 percent to \$16.63 billion during the April-September 2015 period of the current fiscal. The foreign investment was \$14.69 billion during April-September 2014, according to the latest figures of the Department of Industrial Policy and Promotion (DIPP). During the first half of the financial year 2015-16, India received maximum FDI of \$6.69 billion from Singapore followed by Mauritius (\$3.66 billion), the Netherlands (\$1.09 billion) and Japan (\$815 million).

FII's net investments in Indian equities and debt are set to touch a record this financial year, backed by expectations of an economic recovery, falling interest rates and improving earnings outlook. FIIs have invested a net of US\$ 43.5 billion so far in 2014-15 expected to be their highest investment compared to others years. Of this, a huge amount US\$ 26.3 billion was invested in debt and it is their record investment in the asset class, while equities absorbed US\$ 17.2 billion.

The outlook for Indian economy for short and long period remains positive. Young and educated population, new elected government, larger and positive integration with the major economies like US, Russia, Japan China, Europe etc makes the India a long term growth economy. India is preferred designation for investment by foreign economies.

Sectors projected to do well in the coming years include automotive, technology, life sciences and consumer products. Engineering and research and development (ER&D) export revenue from India is expected to reach US\$ 37-45 billion by 2020, from an estimated US\$ 12.4 billion in FY14, according to Nasscom. The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2004-05) prices for Q1 FY15 is estimated at Rs 14.38 trillion (US\$ 232.63 billion), as against Rs 13.61 trillion (US\$ 220.12 billion) in Q1 FY14, registering a growth rate of 5.7%.

Engineering Industry Overview

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy. The Indian engineering sector is divided into two major segments - heavy engineering and light engineering. The capital goods and engineering turnover in India is expected to reach US\$ 125.4 billion by FY17. Likewise, Electrical equipment market size is forecast to reach US\$ 100 billion by FY22.

Comparative advantage vis-à-vis peers in terms of manufacturing costs, market knowledge, technology and creativity has been a driving force for engineering exports from India. Engineering exports from India stood at US\$ 70.6 billion in FY15, registering a Compound Annual Growth Rate (CAGR) of 11.1 % over FY08-15. Companies engaged in the engineering sector are virtually on a roll. Capacity creation in sectors like infrastructure, power, mining, oil & gas, refinery, steel, automotives, and consumer durables has been driving demand in the engineering sector. Separately, the approval of significant number of special economic zones (SEZs) across the country and the development of the Delhi Mumbai Industrial Corridor (DMIC) across seven states is expected to further bolster the engineering sector.

Engineering is a diverse industry with various segments. A company from this sector can be a power equipment manufacturer (like transformers and boilers), execution specialist for Engineering, Procurement and Construction (EPC) projects or a niche player (e.g.: providing environment friendly solutions like waste water and air pollution treatment plants). The company can also be an electrical, non-electrical machinery or static equipment manufacturer too.

Order book size is the biggest determinant of the company's performance in engineering sector. The same holds true for construction companies as well. It indicates companies' revenue visibility. In order to bag big contracts, companies need to have a strong balance sheet and proven execution capabilities. Companies in these sectors need huge working capital to execute bigger contracts. In most cases, they receive only part payment at initial stages and the remaining comes as projects get executed.

Power sector contributes almost 70-75% to the engineering companies' revenues. The government plans to add large-scale generation as well as transmission and distribution (T&D) capacities in view of the paucity of power in the country. Thus, there is enormous potential for the engineering majors in both generation and T&D space.

Given the lack of quality infrastructure in India, the construction industry has been witness to a strong growth wave powered by large spends on housing, road, ports, water supply, rail transport and airport development over the long term. The sector's growth has however remained subdued over the past few years - especially when compared to the pre-2008 period. A big reason for this is the stalling of various big ticket projects in the recent past due to myriad reasons. Infrastructure is also a key area of operation for major Indian engineering companies.

Strong Policy Support

- **De-licensing:**
 1. The engineering industry has been de-licensed and 100 % FDI has been permitted in the sector.
 2. Foreign technology agreements are allowed under the automatic route.
- **Tariffs and custom duties:**
 1. The government has eliminated tariff protection on capital goods.
 2. It has reduced custom duties on arrangement of engineering equipment.
- **Focus on power generation and infrastructure:**
 1. Governmental infrastructure projects such as Golden Quadrilateral and the North-South and East-West corridors fuelled growth in the engineering sector.
- **Special Economic Zones (SEZs):**
 1. The government approved a significant number of SEZs across the country for the engineering sector.
 2. Delhi Mumbai Industrial Corridor (DMIC) is being developed across even states; it is expected to bolster the sector.
- **Make in India plan to promote manufacturing facilities in India:**
 1. Government of India launched the Make in India plan in 2014 with the aim of enhancing the manufacturing facilities and employability in India. The key objective of Make in India plan is to make India a renowned manufacturing hub and invite companies to investment. Mission of the Make in India plan is to manufacture in India and sell the products worldwide.

Key Parameters in Engineering

- **Supply**

Supply is abundant across most of the segments, except for technology intensive executions. However, supply of equipments face bottlenecks such as logistics and lack of manpower for timely assembly and erection of equipment's etc.

- **Demand**

Demand growth in this sector is fuelled by expenditure in core sectors such as power, railways, infrastructure development, private sector investments and the speed at which the projects are implemented. The pace of project execution has been lumpy in the year gone by due to delays in execution and cash crunch on the part of clients.

- **Opportunity**

Barriers to entry are high at upper end of the industry as skilled manpower and technologies as well as ability to execute large projects are a prerequisite in engineering sector. However, in few construction businesses like road business, which are not very technologically inclined, the company's expertise in execution is the key differentiator.

- **Bargaining power of supply**

Bargaining power of suppliers is low because of intense competition amongst them. However, in technology driven high-end segments, suppliers have the upper hand.

- **Bargaining power of Customers**

Bargaining power for technology driven and highly skilled segments is low. However, fierce competition has increased bargaining power of customers in power generation and T&D equipments.

- **Competition**

Majority of the companies compete in terms of pricing, experience in specific field, quality of equipment, capabilities with respect to size of projects that can be handled and timely execution. Nevertheless, competition is higher in the industry as companies of all sizes have been trying to move towards scaling up their technology and capacity.

Government Initiatives

'Make in India' campaign has received the attention of several infrastructure and engineering multi nationals including GE and ThyssenKrupp, which are considering investing in the country. The Government has also awarded a record 56 defence manufacturing permits to private sector entities like Mahindra, Tata and Pipavav, etc., in the past year to set up production units for major military equipment.

The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100% FDI. With the aim to boost the manufacturing sector, the government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles. It has also reduced the basic customs duty from 10 % to 5 % on forged steel rings used in the manufacture of bearings of wind operated electricity generators.

The Government of India in its Union Budget 2014-15, has provided investment allowance at the rate of 15 % to a manufacturing company that invests more than US\$ 4.17 million in any year in new plant and machinery. The government has also taken steps to improve the quality of technical education in the engineering sector by allocating a sum of Rs 500 crore (US\$ 75.33 million) for setting up five more IITs in the states of Jammu, Chhattisgarh, Goa, Andhra Pradesh and Kerala.

Steps have also been taken to encourage companies to perform and grow better. For instance, EIL was recently conferred the Navaratna status after it fulfilled the criteria set by the Department of Public Enterprises, Ministry of Heavy Industries and Public Enterprises, Government of India. The conferred status would give the state-owned firm more financial and operational autonomy.

OUR BUSINESS OPERATIONS

We enter into contracts primarily through a competitive bidding process, which often requires a prequalification process especially in the public sector. Before a tender is submitted, we perform preliminary due diligence at the proposed project site. Once the tender is accepted by the client, it is converted into a letter of intent, and a project manager and the project team are identified. Detailed project planning occurs to estimate resources, cost of completion and profitability. Once all of these items are determined and after final negotiations, a contract is signed with the client. Resources are then mobilized at the project site and execution of work is started. Work begins when the client hands over the site, plans and drawings to our on-site team. The project execution work is carried out as per the plan and the on-going requirements of the client. The Bill is raised for the actual work completed and duly measured, and after certification by the client, the bill is paid by the client as per the contract term and conditions, after reaching the threshold limit of the agreed level of the preparatory work or the completion of Work. The actual cost of the work done and the revised estimates of the cost to complete the remaining work are carried out every quarter. The quality control and safety, health and environment efforts at the site offices are further supplemented by the efforts from the zonal or branch office and the head office by way of technical audits and quality audits as to cost and time parameters as well as client satisfaction. EMPLOYEES STATE INSURANCE ACT, 1948

The promulgation of Employees' State Insurance Act, 1948 (ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

It seeks to prevent the exploitation of workers and protect their interest in the 'sweated industries'. Wage fixing authorities have been guided by the norms prescribed by the Fair Wage Committee in the settlement of issues relating to wage fixation in organized industries. The Act contemplates the minimum wage rates must ensure not only the mere physical needs of a worker which keeps them just above starvation level, but must ensure for him and his family's subsistence, and also to preserve his efficiency as a worker.

PAYMENT OF WAGES ACT, 1936

The main object of the Act is to avoid unnecessary delay in the payment of wages and to prevent unauthorized deductions from the wages. It regulates the payment of wages to certain classes of employed persons and provides for the imposition of fines and deductions and lays down wage periods and time and mode of payment of wages. Persons whose wages are `6,500 or more per month are outside the ambit of the Act. Wages must be paid in current coin or currency notes or in both and not in kind.
