Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein.

INTERNAL RISK FACTORS

1. We are dependent on our management team for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

3. There are certain discrepancies in filing of Financials with Registrar of Companies, National Capital Territory of Delhi and Haryana for the financial year 2013-2014.

We have filed Form 23AC and 23 ACA, regarding the filing of Balance Sheet and statement of Profit and Loss for the financial year 2013-2014, however due to certain discrepancies the same has not been taken on record by the Registrar Of Companies, National Capital Territory of Delhi and Haryana.. The objections raised by the Registrar Of Companies, NCT of Delhi, in this regard is that the documents filed are incomplete. The Board in its meeting held on 16th March, 2015 has decided to file an application before the Hon'ble Company Law Board within 15 days, seeking directions to direct Registrar Of Companies, NCT of Delhi to allow Company to file Revised Form 23AC & 23ACA and for compounding of offence. We may face certain liabilities as a result.

4. The Registered Office of our Company is not owned by us.

We operate from our registered office situated at 203, Gupta Arcade, Shrestha Vihar Market, Delhi-110 092. The registered office of our Company is owned by our Promoters M/s. | Various allottees as per list disclosed on page 32 of this Prospectus | 10/12/2014 | 14,95,000 | 10 | Cash | Allotment to infuse funds |

5. We do not have any long-term agreement or contract of supply of products in which we trade and we are exposed to price and supply fluctuations.

We are, to a major extent, dependent on external suppliers for our products in which we trade and we do not have any long-term supply agreements or commitments in relation to the same. Consequently, we are exposed to price and supply fluctuations and these fluctuations may adversely affect our ability to obtain orders and/or to execute them in a timely manner, which would have a material adverse effect on our business, results of operations and financial condition. In case of non-availability of materials on favourable terms, we may have to procure the same at the terms and conditions prevalent at that point. This will result in reducing our revenues by a considerable amount due to shortage of material or due to inability to procure the same.

6. If we are unable to manage our growth, our business could be disrupted

The growth of our business depend on the operations to realize our vision of attaining size and to improve our cost competitiveness in the iron & steel industry, and to reduce costs in our business. In order to achieve such future growth, we need to effectively manage our new project, accurately assess new markets, attract new customers, obtain sufficient financing, control our input costs, maintain sufficient operational and financial controls and make additional capital investments to take advantage of anticipated market conditions. We expect our growth to place significant demands on our management and other resources. Any inability to manage our growth could have an adverse effect on our business, financial condition and results of operations.

7. The Company may not be able to obtain adequate funding required to carry out its future plans for growth.

Disruptions in global credit and financial markets and the resulting governmental actions around the world could have a material adverse impact on the Company's ability to meet its funding needs. The Company, in order to carry out its day-to-day operations in the steel industry requires continuous access to large quantities of capital.

8. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

9. Our operations are geographically located in one area and any localized social unrest, natural calamities, etc. could have material adverse effect on business and financial operations.

Our operations are based in Delhi and National Capital Region of India. As a result, any localized social unrest, natural disaster or breakdown of services and utilities in and around Delhi could have material adverse effect on our business, financial position and results of operations.

10. Our inability to manage inventory in an effective manner could adversely impact our business operations.

Our business involves significant inventory levels based on present and future order books. If we underestimate the orders to be received, we may experience inventory shortages. Similarly, an over-estimation of orders may result in over stocking of inventory leading to increased cost. Any mismanagement on our part to handle inventory levels may impact our business and financial operations.

11. We do not have any insurance coverage for protecting us against any material hazards.

At present, we do not have any insurance policy for protecting us against any material hazards. Any damage suffered by us in respect of any events would not be covered under any insurance and we would bear the effect of such losses.

12. We have taken unsecured loan of Rs. 70.45 Lacs as on 30th September, 2014, which is repayable on demand. In case of untimely demand, we will have to arrange these funds which may carry higher cost of funding, which may have an impact on our financial operations.

We have taken unsecured loan of Rs. 70.45 Lacs as on 30th September, 2014 which can be recalled at any time and in that event, it may affect the financial operations of our Company to that extent.

13. We have high working capital requirements. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on our results of operations.

Our business requires a substantial amount of working capital. In many cases, working capital is required to finance the purchase of materials and execution of work on projects before payment is received from clients. Our working capital requirements may increase if, in certain contracts, payment terms do not provide for advance payments to us or if payment schedules are less favourable to us. We may need to borrow additional funds in the future to fulfill our working capital needs. Continued increases in working capital requirements may have an adverse effect on our financial condition and results of operations.

14. Rise in input costs may affect our profitability.

The input costs of the products of the Company may increase due to various reasons. In case the Company is not able to pass on such increase to the consumers because of competition or otherwise, it may affect the profitability of the Company.

15. We have entered into certain related party transactions and may continue to do so.

We have entered into related party transactions with our Promoters and Directors. While we believe that all such transactions have been conducted on the arms length basis, however it is difficult to ascertain

whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will enter into related party transactions in the future. For details of these transactions, please refer to section titled “Related Party Transactions” at page 92 of this Prospectus.

- 16. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.**

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 17. Delay in raising funds from the IPO could adversely impact the implementation schedule.**

The proposed expansion, as detailed in the section titled “*Objects of the Issue*” is to be entirely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

- 18. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.**

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 41 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

- 19. We have not identified any alternate source of financing the ‘Objects of the Issue’. If we fail to mobilize resources as per our plans, our growth plans may be affected.**

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” on page no. 41 of this Prospectus.

- 20. We face competition in our business from both domestic and international competitors. Such competition would have an adverse impact on our business and financial performance.**

The industry, in which we are operating, is highly and increasingly competitive and unorganized and our results of operations and financial condition are sensitive to, and may be materially adversely affected by,

competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

EXTERNAL RISK FACTORS

21. Political, economic and social changes in India could adversely affect our business.

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

22. Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.

The revenues recorded and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

23. Natural calamities and force majeure events may have an adverse impact on our business.

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

24. Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Our Company may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, the IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated 22nd January, 2010 ("IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 32 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined and will be notified by the Ministry of Corporate Affairs after various tax related issues are resolved. We have not yet determined with certainty what impact the adoption of IFRS will have on our financial reporting. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of IFRS may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period.

25. Any downgrading of India's debt rating by a domestic or international rating agency could negatively impact our business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial results and business prospects, ability to obtain financing for capital expenditures and the price of our Equity Shares.

26. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may adversely affect the Indian markets on which our Equity Shares will trade. These acts may result in a loss of business confidence, make travel and other services more difficult and have other consequences that could have an adverse effect on our business. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of our Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our Equity Shares.

27. Third party statistical and financial data in this Prospectus may be incomplete or unreliable.

We have not independently verified any of the data from industry publications and other sources referenced in this Prospectus and therefore cannot assure you that they are complete or reliable. Discussions of matters relating to India, its economies or the industries in which we operate in this Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable.

28. The new Companies Act, 2013 is recently being implemented and any developments in the near future may be material with respect to the disclosures to be made in this Letter of Offer as well as other rules and formalities for completing the issue.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. We may face difficulties in complying with any such overlapping requirements.

Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 that are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

RISKS RELATING TO THE EQUITY SHARES

- 29. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.**

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

- 30. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.**

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

- 31. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.**

Prior to the offer, there has been no public market for our Equity Shares, and an active trading market on the SME Platform of BSE. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the fire fighting industry, crushing industry, developments relating to India and volatility in the Exchange and securities markets elsewhere in the world. However, the LM will arrange for compulsory market making for a period of 3 years from the date of listing as per the regulations applicable to the SME Platforms under SEBI (ICDR) Regulations, 2009.

- 32. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.**

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 33. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.**

Prior to this Issue, there has been no public market for our Equity Shares. Indo Jatalia Securities Private Limited is acting as Designated Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business,

financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the section titled “General Information - Details of the Market Making Arrangement for this Issue” on page 29 of this Prospectus.

34. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily “circuit breaker” imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

INDUSTRY OVERVIEW

Overview of the Indian Economy

The Indian economy is ranked fourth in the world, on purchasing power parity basis, after United States, China and Japan (Source: <https://www.cia.gov/library/publications/the-world-factbook/geos/in.html>). For the fiscal year 2015, the forecast for real GDP growth rate in India is estimated at 6.3% - 6.5% by the National Council of Applied Economic Research (“NCAER”) in their ‘Quarterly Review of the Economy’ on September 30, 2014. (Source: NCAER’s Quarterly Review of the Indian Economy 2014-15 and Forecast for 2015-16).

Overview Of Iron & Steel Industry

The steel sector is one of the most crucial sectors in the development of a nation and is considered as the backbone of civilisation. The level of per capita consumption of steel is an important determinant of the socio-economic development of the country.

The Indian steel industry has entered a new development stage since 2007-08 and is riding on the resurgent economy and the growing demand for steel. India’s 33 per cent growth in steel production in the last five years was second only to China among the top five steel producing nations, according to data by World Steel Association (WSA).

India is the fourth largest producer of crude steel and the largest producer of soft iron in the world. Presently, the Indian steel industry employs around 500,000 people while the per capita consumption in 2013 stood at around 57.8 kilograms. However, these figures are expected to rise with increased industrialisation throughout the country.

India is expected to become the second-largest steel producer in the world by 2016. Easy availability of low-cost manpower and presence of abundant iron ore reserves make India competitive in the global setup

Steel production in India has increased at a compound annual growth rate (CAGR) of 7.9 per cent over FY09-14 to reach 81.54 million tonnes per annum (MTPA). The total market value of the Indian steel sector stood at US\$ 57.8 billion in 2011 and is anticipated to touch US\$ 95.3 billion by 2016. Total consumption of steel grew to 73.9 million tonnes (MT) in FY14 as against 73.5 MT in FY13; over FY08-14, consumption has expanded at a CAGR of six per cent. Driven by rising infrastructure development and growing demand for automotives, steel consumption is expected to grow at an average rate of 6.8 per cent, reaching 104 MT by 2017.

The Government of India has allowed 100 per cent foreign direct investment (FDI) under the automatic route in the steel sector. It has also reduced the basic custom duty on the plants and equipment required for initial setup or expansion of iron ore pellets plants and iron ore beneficiation plants from 7.5/5 per cent to 2.5 per cent. Huge scope for growth is offered by India’s comparatively low per capita steel consumption, the expected rise in consumption due to increased infrastructure construction, and the thriving automobile and railways sectors. Iron & Steel Industry

- ✓ The Indian steel industry has entered into a new development stage from 2007-08, riding high on the resurgent economy and rising demand for steel.

- ✓ Rapid rise in production has resulted in India becoming the 4th largest producer of crude steel and the largest producer of sponge iron or DRI in the world.
- ✓ As per the report of the Working Group on Steel for the 12th Plan, there exist many factors which carry the potential of raising the per capita steel consumption in the country, currently at 59.2 kg. These include among others, an estimated infrastructure investment of nearly a trillion dollars, a projected growth of manufacturing from current 8% to 11-12%, increase in urban population to 600 million by 2030 from the current level of 400 million, emergence of the rural market for steel currently consuming around 10 kg per annum buoyed by projects like Bharat Nirman, Pradhan Mantri Gram Sadak Yojana, Rajiv Gandhi Awaas Yojana among others.
- ✓ At the time of its release, the National Steel Policy 2005 had envisaged steel production to reach 110 million tonnes by 2019-20. However, based on the assessment of the current ongoing projects, both in greenfield and brownfield, the Working Group on Steel for the 12th Plan has projected that the crude steel capacity in the country is likely to be 140 mt by 2016-17 and has the potential to reach 149 mt if all requirements are adequately met.
- ✓ The National Steel Policy 2005 is currently being reviewed keeping in mind the rapid developments in the domestic steel industry (both on the supply and demand sides) as well as the stable growth of the Indian economy since the release of the Policy in 2005.

Textile and Apparel Industry

Post the expiration of the Multi Fibre Agreement on January 1, 2005, the textile and apparel industry has witnessed a clear distinction between countries as production and consumption hubs. Developed countries like the USA, countries of the European Union and Japan have emerged as consuming countries while developing countries like India, China and Bangladesh are producing countries. Cheap labour is one of the most important factors driving the developing countries to gain production advantage. According to the Technopak Report, 2014, the expected slower annual GDP growth (CAGR 2013 to 2018 is 2.4%) in the advanced economies is directly impacting the consumption of textile and apparel, hence reducing its demand. On the other hand, the expected higher annual GDP growth (CAGR 2013 to 2018 is 5.4%) of the developing countries has led to an increase in purchasing power of consumers, favouring the growth in textile and apparel consumption in these countries.

India is one of the largest exporters of textiles and apparel. India also has vertically integrated supply chain and is known for producing wide range of textiles and apparel products. In India's exports of textiles and apparel, 60% contribution comes from apparel, and 40% from textiles. (Source: Technopak Report, 2014)

INDUSTRY OVERVIEW

Overview of the Indian Economy

The Indian economy is ranked fourth in the world, on purchasing power parity basis, after United States, China and Japan (Source: <https://www.cia.gov/library/publications/the-world-factbook/geos/in.html>). For the fiscal year 2015, the forecast for real GDP growth rate in India is estimated at 6.3% - 6.5% by the National Council of Applied Economic Research (“NCAER”) in their ‘Quarterly Review of the Economy’ on September 30, 2014. (Source: NCAER’s Quarterly Review of the Indian Economy 2014-15 and Forecast for 2015-16).

Growth in the Indian economy had been shifting down from 9.6 per cent in Q4 of 2010-11. It troughed around 4.4 per cent for three quarters from Q3 of 2012-13 to Q1 of 2013-14. Since then there are signs of growth bottoming out with marginal improvement recorded during Q2 and Q3 of 2013-14 to 4.8 and 4.7 per cent respectively. However, this improvement has been feeble and clear signs of recovery are yet to emerge, even as the economy seems to be gearing for a modest recovery during 2014-15.

OVERVIEW OF IRON & STEEL INDUSTRY IN INDIA

The steel sector is one of the most crucial sectors in the development of a nation and is considered as the backbone of civilisation. The level of per capita consumption of steel is an important determinant of the socio-economic development of the country.

The Indian steel industry has entered a new development stage since 2007-08 and is riding on the resurgent economy and the growing demand for steel. India’s 33 per cent growth in steel production in the last five years was second only to China among the top five steel producing nations, according to data by World Steel Association (WSA).

Present Status

India is the fourth largest producer of crude steel and the largest producer of soft iron in the world. Presently, the Indian steel industry employs around 500,000 people while the per capita consumption in 2013 stood at around 57.8 kilograms. However, these figures are expected to rise with increased industrialisation throughout the country. India is expected to become the second-largest steel producer in the world by 2016. Easy availability of low-cost manpower and presence of abundant iron ore reserves make India competitive in the global setup

Steel production in India has increased at a compound annual growth rate (CAGR) of 7.9 per cent over FY 09-14 to reach 81.54 million tonnes per annum (MTPA). The total market value of the Indian steel sector stood at US\$ 57.8 billion in 2011 and is anticipated to touch US\$ 95.3 billion by 2016. Total consumption of steel grew to 73.9 million tonnes (MT) in FY 14 as against 73.5 MT in FY 13; over FY 08-14, consumption has expanded at a CAGR of six per cent. Driven by rising infrastructure development and growing demand for automotives, steel consumption is expected to grow at an average rate of 6.8 per cent, reaching 104 MT by 2017.

The Government of India has allowed 100 per cent foreign direct investment (FDI) under the automatic route in the steel sector. It has also reduced the basic custom duty on the plants and equipment required for initial setup or expansion of iron ore pellets plants and iron ore beneficiation plants from 7.5/5 per cent to 2.5 per cent. Huge scope for growth is offered by India's comparatively low per capita steel consumption, the expected rise in consumption due to increased infrastructure construction, and the thriving automobile and railways sectors. Iron & Steel Industry

- ✓ The Indian steel industry has entered into a new development stage from 2007-08, riding high on the resurgent economy and rising demand for steel.
- ✓ Rapid rise in production has resulted in India becoming the 4th largest producer of crude steel and the largest producer of sponge iron or DRI in the world.
- ✓ As per the report of the Working Group on Steel for the 12th Plan, there exist many factors which carry the potential of raising the per capita steel consumption in the country, currently at 59.2 kg. These include among others, an estimated infrastructure investment of nearly a trillion dollars, a projected growth of manufacturing from current 8% to 11-12%, increase in urban population to 600 million by 2030 from the current level of 400 million, emergence of the rural market for steel currently consuming around 10 kg per annum buoyed by projects like Bharat Nirman, Pradhan Mantri Gram Sadak Yojana, Rajiv Gandhi Awaas Yojana among others.
- ✓ At the time of its release, the National Steel Policy 2005 had envisaged steel production to reach 110 million tonnes by 2019-20. However, based on the assessment of the current ongoing projects, both in greenfield and brownfield, the Working Group on Steel for the 12th Plan has projected that the crude steel steel capacity in the county is likely to be 140 mt by 2016-17 and has the potential to reach 149 mt if all requirements are adequately met.
- ✓ The National Steel Policy 2005 is currently being reviewed keeping in mind the rapid developments in the domestic steel industry (both on the supply and demand sides) as well as the stable growth of the Indian economy since the release of the Policy in 2005.

Market value of the Indian steel sector

Demand - Availability Projection

- ✓ Demand - Availability of iron and steel in the country is projected by Ministry of Steel in its Five Yearly Plan documents.
- ✓ Gaps in availability are met mostly through imports.
- ✓ Interface with consumers by way of a Steel Consumers' Council exists, which is conducted on regular basis.
- ✓ Interface helps in redressing availability problems, complaints related to quality.

Steel Prices

- ✓ Price regulation of iron & steel was abolished on 16.1.1992. Since then steel prices are determined by the interplay of market forces.

- ✓ Domestic steel prices are influenced by trends in raw material prices, demand - supply conditions in the market, international price trends among others.
- ✓ An Inter-Ministerial Group (IMG) is functioning in the Ministry of Steel, under the Chairmanship of Secretary (Steel) to monitor and coordinate major steel investments in the country.
- ✓ The Government earlier took various fiscal and other measures for stabilizing steel prices like significant reduction in import duties on steel, major raw materials, including mineral products and ores and concentrates in last few years. Also, excise duty for steel is currently at 12% and there is no export duty on steel items. The government has also imposed export duty of 30% on all forms of iron ore and 5% on iron ore pellets in order to control ad-hoc exports of the mineral and conserve it for long term requirement of the domestic steel industry.
- ✓ For ensuring quality of steel several items have been brought under a quality control order issued by the Government.
- ✓ Further, a Steel Price Monitoring Committee has been constituted by the Government with the aim to monitor price rationalization, analyze price fluctuations and advice all concerned regarding any irrational price behaviour of steel commodity.

Imports

- ✓ Iron & steel are freely importable as per the extant policy.
- ✓ Last five year's import of total finished steel (alloy + non alloy) is given below:

| Indian steel industry : Imports (in million tonnes) (Source: Joint Plant Committee) | | | | | |
|---|---------|---------|---------|---------|---------|
| Category | 2009-10 | 2010-11 | 2011-12 | 2012-13 | 2013-14 |
| Total Finished Steel (alloy + non alloy) | 7.38 | 6.66 | 6.86 | 7.93 | 5.45 |

Exports

- ✓ Iron & steel are freely exportable.
- ✓ Last five year's export of total finished steel (alloy + non alloy) is given below:-

| Indian steel industry : Exports (in million tonnes) (Source: Joint Plant Committee) | | | | | |
|---|---------|---------|---------|---------|---------|

| Total Finished Steel (alloy + non alloy) | 3.25 | 3.64 | 4.59 | 5.37 | 5.98 |

Opportunities for growth of Iron and Steel in Private Sector

The New Industrial Policy Regime

The New Industrial policy opened up the Indian iron and steel industry for private investment by (a) removing it from the list of industries reserved for public sector and (b) exempting it from compulsory licensing. Imports of foreign technology as well as foreign direct investment are now freely permitted up to certain limits under an automatic route. Ministry of Steel plays the role of a facilitator, providing broad directions and assistance to new and existing steel plants, in the liberalized scenario. (Source: <http://steel.gov.in/overview.htm>)

Road Ahead

The recently released Union Budget 2014-15 has paved the way for the development of the Indian steel sector with proposals for the construction of 100 smart cities and changes in the MMRD Act. Also, India's ranking in the global list for production of crude steel is all set to improve with increasing demand for domestic consumption in the years to follow. As per Tata Steel, India's steel sector is anticipated to witness investment of about Rs. 2 trillion (US\$ 32.68 billion) in the coming years. (Source: <http://www.ibef.org/industry/steel.aspx>)

Textile and Apparel Industry

Post the expiration of the Multi Fibre Agreement on January 1, 2005, the textile and apparel industry has witnessed a clear distinction between countries as production and consumption hubs. Developed countries like the USA, countries of the European Union and Japan have emerged as consuming countries while developing countries like India, China and Bangladesh are producing countries. Cheap labour is one of the most important factors driving the developing countries to gain production advantage. According to the Technopak Report, 2014, the expected slower annual GDP growth (CAGR 2013 to 2018 is 2.4%) in the advanced economies is directly impacting the consumption of textile and apparel, hence reducing its demand. On the other hand, the expected higher annual GDP growth (CAGR 2013 to 2018 is 5.4%) of the developing countries has led to an increase in purchasing power of consumers, favouring the growth in textile and apparel consumption in these countries.

India is one of the largest exporters of textiles and apparel. India also has vertically integrated supply chain and is known for producing wide range of textiles and apparel products. In India's exports of textiles and apparel, 60% contribution comes from apparel, and 40% from textiles. (Source: Technopak Report, 2014)

Market Size of Textile Industry in India

The size of India's Textile market in 2011 was US\$89 billion, the market expected to expand at a compounded annual growth rate (CAGR) of 10.1% over 2009-2021.

The Indian textile industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand. Abundant availability of raw materials such as cotton, wool, silk and jute and skilled workforce has made India a sourcing hub.

The most significant change in the Indian textile industry has been the advent of man-made fibres (MMF). India has successfully placed its innovative range of MMF textiles in almost all the countries across the globe. MMF production increased by 6 per cent during December 2013. The production increased by about 4 per cent during the year April-December 2013.

INDUSTRY RELATED LAWS:

National Steel Policy, 2005

The National Steel Policy, 2005 (hereinafter referred to as the “Policy”) lays down a broad policy framework for India’s steel industry, and aspires for India to have a modern and efficient steel industry of world standards, catering to diversified steel demand. The Policy envisages a compounded annual growth of 7.3 per cent per annum in the steel sector. To achieve this, it aims to increase production from 38 MTPA in 2004-05 to over 110 MTPA by 2020, through a multi-pronged strategy. The Policy focuses on achieving global competitiveness not only in terms of cost, quality and product-mix, but also in terms of global benchmarks of efficiency and productivity. The Government proposes to create incremental demand for domestic consumption via promotional efforts, awareness drives and strengthening the delivery chain, particularly in rural areas. On the supply side the strategy would be to facilitate creation of additional capacity, remove procedural and policy bottlenecks in the availability of inputs such as iron ore and coal, make higher investments in R&D and HRD and encourage the creation of infrastructure such as roads, railways and ports.

National Textile Policy

Subsequent to the announcement of the Textile Policy, the woven segment of readymade garment sector and the knitting sector have been de-reserved from the list of items reserved for exclusive manufacture in the small scale sector. The Textile Policy also targets the development of a strong multi-fibre base to facilitate product upgradation and diversification. The Textile Policy provides for government financing and venture capital funding for setting up textile plants. Particular emphasis is laid on exports with the proposal of multi-disciplinary institutional mechanisms to formulate policy and action plans, including the restructuring of Export Promotion Councils and operating a brand equity fund exclusively for textile and apparel products. The Textile Policy also contains sector specific agendas. For the cotton sector, it designates the Technology Mission of Cotton as the nodal body to bring about increase in productivity and stability in prices. For the spinning and weaving sectors, decentralized modernizations is the thrust of the government policy and for the garments sector, the government proposes a number of measures in light of the WTO rules and regulations, including strategic alliances with leading global manufacturers and the establishment of textile/apparel parks. The Ministry of Textiles announced the formulation of the National Textile Policy, 2000 118 (“Textile Policy”) in November 2000 with the objective of enabling the textile industry to attain and sustain a preeminent global standing in the manufacture and export of clothing. The Textile Policy envisages a multi-pronged strategy to achieve these long term goals. The strategy aims at modernizing the equipment and technology that is used in the sector and simultaneously strengthening the traditional knowledge, skills and capabilities in this sector.

The Essential Commodities Act, 1955

The Essential Commodities Act, 1955 (hereinafter referred to as the “Act”) provides for the control of the production, supply and distribution of, and trade and commerce, in certain commodities. Coal including coke and other derivatives as well as iron and steel including manufactured products of iron and steel are essential commodities as per Section 2 of the Act. Section 3 of the Act confers extensive powers on the Central Government to make orders for achieving the primary objective of exercising effective control over the supply and equitable distribution of the essential commodity at fair prices. The order made, under Section 3, by the Central Government may provide *inter alia* for regulating by licenses, permits or otherwise the production or manufacture of any essential commodity. The Colliery Control Order, 2000 has been issued by the Central Government under this Act.

Industry Overview

Iron & Steel Industry

The steel sector is one of the most crucial sectors in the development of a nation and is considered as the backbone of civilisation. The level of per capita consumption of steel is an important determinant of the socio-economic development of the country.

The Indian steel industry has entered a new development stage since 2007-08 and is riding on the resurgent economy and the growing demand for steel. India's 33 per cent growth in steel production in the last five years was second only to China among the top five steel producing nations, according to data by World Steel Association (WSA).

India is the fourth largest producer of crude steel and the largest producer of soft iron in the world. Presently, the Indian steel industry employs around 500,000 people while the per capita consumption in 2013 stood at around 57.8 kilograms. However, these figures are expected to rise with increased industrialisation throughout the country.

India is expected to become the second-largest steel producer in the world by 2016. Easy availability of low-cost manpower and presence of abundant iron ore reserves make India competitive in the global setup

Steel production in India has increased at a compound annual growth rate (CAGR) of 7.9 per cent over FY09-14 to reach 81.54 million tonnes per annum (MTPA). The total market value of the Indian steel sector stood at US\$ 57.8 billion in 2011 and is anticipated to touch US\$ 95.3 billion by 2016. Total consumption of steel grew to 73.9 million tonnes (MT) in FY14 as against 73.5 MT in FY13; over FY08-14, consumption has expanded at a CAGR of six per cent. Driven by rising infrastructure development and growing demand for automotives, steel consumption is expected to grow at an average rate of 6.8 per cent, reaching 104 MT by 2017.

Textile and Apparel Industry

Post the expiration of the Multi Fibre Agreement on January 1, 2005, the textile and apparel industry has witnessed a clear distinction between countries as production and consumption hubs. Developed countries like the USA, countries of the European Union and Japan have emerged as consuming countries while developing countries like India, China and Bangladesh are producing countries. Cheap labour is one of the most important factors driving the developing countries to gain production advantage. According to the Technopak Report, 2014, the expected slower annual GDP growth (CAGR 2013 to 2018 is 2.4%) in the advanced economies is directly impacting the consumption of textile and apparel, hence reducing its demand. On the other hand, the expected higher annual GDP growth (CAGR 2013 to 2018 is 5.4%) of the developing countries has led to an increase in purchasing power of consumers, favouring the growth in textile and apparel consumption in these countries.

India is one of the largest exporters of textiles and apparel. India also has vertically integrated supply chain and is known for producing wide range of textiles and apparel products. In India's exports of textiles and apparel, 60% contribution comes from apparel, and 40% from textiles. (Source: Technopak Report, 2014)
