We have been incorporated in the August 2014 and fiscal 2015 are first year of operations. Since we have limited operating history in this business. Consequently, there will be only limited information with which to evaluate the quality of our projects and our current or future prospects on which to base the investment decision.

- 5. We do not have any long-term agreement or contract of supply of products in which we trade and we are exposed to price and supply fluctuations.**

We are, to a major extent, dependent on external suppliers for our products in which we trade and we do not have any long-term supply agreements or commitments in relation to the same. Consequently, we are exposed to price and supply fluctuations and these fluctuations may adversely affect our ability to obtain orders and/or to execute them in a timely manner, which would have a material adverse effect on our business, results of operations and financial condition.

In case of non-availability of materials on favorable terms, we may have to procure the same at the terms and conditions prevalent at that point. This will result in reducing our revenues by a considerable amount due to shortage of material or due to inability to procure the same.

- 6. If we are unable to manage our growth, our business could be disrupted**

The growth of our business depend on the operations to realize our vision of attaining size and to improve our cost competitiveness in the fabric and jewellery industry, and to reduce costs in our business. We expect our growth to place significant demands on our management and other resources. - 7. The Company may not be able to obtain adequate funding required to carry out its future plans for growth.**

- 8. We may not be successful in implementing our business strategies.**

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

- 9. Our operations are geographically located in one area and any localized social unrest, natural calamities, etc. could have material adverse effect on business and financial operations.**

10. Our inability to manage inventory in an effective manner could adversely impact our business operations.

Our business involves significant inventory levels based on present and future order books. If we underestimate the orders to be received, we may experience inventory shortages. Similarly, an over-estimation of orders may result in over stocking of inventory leading to increased cost. Any mismanagement on our part to handle inventory levels may impact our business and financial operations.

11. The insurance coverage taken by our Company may not be adequate to protect against certain business risks. This may adversely affect our financial condition and result of operations.

Operating and managing a business involves many risks that may adversely affect our Company's operations, and the availability of insurance is therefore important to our operations. Our Company believes that our insurance coverage is generally consistent with industry practice. However, to the extent that any uninsured risks materialize or if it fails to effectively cover itself for any risks, we could be exposed to substantial costs and losses that would adversely affect financial condition. In addition, our Company cannot be certain that the coverage will be available in sufficient amounts to cover one or more large claims, or that our insurers will not disclaim coverage as to any claims. A successful assertion of one or more large claims against our Company that exceeds our available insurance coverage or that leads to adverse changes in our insurance policies, including premium increases or the imposition of a large deductible or coinsurance requirement, could adversely affect our financial condition and results of operations.

12. We have high working capital requirements. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on our results of operations.

Our business requires a substantial amount of working capital. In many cases, working capital is required to finance the purchase of materials and execution of work on projects before payment is received from clients. Our working capital requirements may increase if, in certain contracts, payment terms do not provide for advance payments to us or if payment schedules are less favorable to us. We may need to borrow additional funds in the future to fulfill our working capital needs. Continued increases in working capital requirements may have an adverse effect on our financial condition and results of operations.

We have entered into related party transactions with our Promoters and Directors. While we believe that all such transactions have been conducted on the arms length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will enter into related party transactions in the future. For details of these transactions, please refer to section titled "Related Party Transactions" at page 123 of this Prospectus.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 16. Delay in raising funds from the IPO could adversely impact the implementation schedule.**

The proposed expansion, as detailed in the section titled “*Objects of the Issue*” is to be entirely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

- 17. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.**

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 45 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

- 18. We have not identified any alternate source of financing the ‘Objects of the Issue’. If we fail to mobilize resources as per our plans, our growth plans may be affected.**

For further details please refer to the chapter titled “Objects of the Issue” on page no. 45 of this Prospectus.

- 19. We face competition in our business from both domestic and international competitors. Such competition would have an adverse impact on our business and financial performance.**

The industry, in which we are operating, is highly and increasingly competitive and unorganized and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our

competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

20. Our trademark is not registered under the Trade Marks Act our ability to use the trademark may be impaired.

Our company's business may be affected due to our inability to protect our existing and future intellectual property rights. Currently, we do not have a registered trademark over our name and logo under the Trade Marks Act and consequently do not enjoy the statutory protections accorded to a trademark registered in India and cannot prohibit the use of such logo by anybody by means of statutory protection. Our Company has made application for registration of logo. We cannot guarantee that all the pending application will be decided in the favor of the Company. If our trademarks are not registered it can allow any person to use a deceptively similar mark and market its product, which could be similar to the products offered by us. Such infringement will hamper our business as prospective clients may go to such user of mark and our revenues may decrease.

The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 32 Indian Accounting Standards are to be converged with IFRS. The date of implementation

of such converged Indian accounting standards has not yet been determined and will be notified by the Ministry of Corporate Affairs after various tax related issues are resolved. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of IFRS may adversely affect our reported results of operations or financial condition. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

29. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian

legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

30. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

Prior to the offer, there has been no public market for our Equity Shares, and an active trading market on the SME Platform of BSE. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the jewellery industry, fabric industry, developments relating to India and volatility in the Exchange and securities markets elsewhere in the world. However, the LM will arrange for compulsory market making for a period of 3 years from the date of listing as per the regulations applicable to the SME Platforms under SEBI (ICDR) Regulations, 2009.

31. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

32. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Indo Jatalia Securities Private Limited is acting as Designated Market Maker for the Equity Shares of our Company. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the section titled *"General Information - Details of the Market Making Arrangement for this Issue"* on page 30 of this Prospectus.

33. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The BSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

INDUSTRY OVERVIEW

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

Since the fifth bi-monthly monetary policy statement of December 2014, the International Monetary Fund (IMF) has revised its forecasts for growth in 2015 and 2016 downwards. However, these forecasts are higher than the estimates for 2014. In the United States, growth moderated towards the end of 2014, with the boost to consumption demand from the fall in crude prices more than offset by the drag on net exports from a strong US dollar. In the Euro area, economic conditions have deteriorated in an environment of deflationary pressures, political tensions in Greece and still-elevated levels of unemployment. Demand in Japan is only just beginning to recover from the impact of the consumption tax increase last year, notwithstanding massive monetary and fiscal accommodation. The yen's depreciation, however, is helping support exports. In China, growth is slowing because of a weakening property market and excess capacity in several industries. This has prompted targeted measures to ease financial constraints faced by corporations and banks. In other emerging markets and developing economies (EMDEs), growth has weakened sharply for oil exporters, whereas inflationary pressures, subdued investment appetite and a neutral fiscal stance continue to dampen growth in non-oil exporters.

The announcement of massive quantitative easing by the European Central Bank (ECB) in late January has reinvigorated financial risk taking, boosting stock markets across the world, even though many market participants have read the softness in crude prices and the ECB's announcement as signifying a weaker global economic outlook. Along with the growing belief that the US Fed will stay on hold longer than previously thought, bond yields in advanced economies have fallen to historic lows. Financial markets remain vulnerable to uncertainty surrounding monetary policy normalisation in AEs as well as possibly weaker growth in China and oil exporting EMEs.

After the unexpected shock from the May 2013 tapering indication by the US Fed, global financial markets have weathered the initial dose of actual tapering of the quantitative easing quite well. However, the global interest rate cycle has just begun to turn. Moreover, a large part of the withdrawal of monetary accommodation by AEs remains to play out. Consequently, capital flows to EMDEs could remain volatile, even if they do not retrench. Also, with corporate leverage rising in many EMDEs, capital flow volatility could translate into liquidity shocks impacting asset prices.

Indian Scenario

While the global environment remains challenging, policy action in India has rebuilt buffers to cushion it against possible spillovers. These buffers effectively bulwarked the Indian economy against the two recent occasions of spillovers to EMDEs – the first, when the US Fed started the withdrawal of its large scale asset purchase programme and the second, which followed escalation of the Ukraine crisis. On both these occasions, Indian markets were less volatile than most of its emerging market peers. With the narrowing of the twin deficits-current account and fiscal -

as well as the replenishment of foreign exchange reserves, adjustment of the rupee exchange rate, and more importantly, setting in motion disinflationary impulses, the risks of near-term macro instability have diminished. However, this in itself constitutes only a necessary, but not a sufficient, condition for ensuring economic recovery. Much more efforts in terms of removing structural impediments, building business confidence and creating fiscal space to support investments will be needed to secure growth.

Delayed fiscal adjustment materialised only in H2 of 2012-13, by which time the current account deficit (CAD) had widened considerably. However, since H2 of 2012-13, demand management through monetary and fiscal policies has been brought in better sync with each other with deficit targets being largely met. Recent tightening, especially the last round of hike in January 2014, was aimed at containing the second round effects of the food price pressures felt during June-November 2013. Since then, inflation expectations have somewhat moderated and the temporary relative price shock from higher vegetable prices has substantially corrected along with a seasonal fall in these prices, without further escalation in ex-food and fuel CPI inflation. While headline CPI inflation receded over the last three months from 11.2 per cent in November 2013 to 8.1 per cent in February 2014, the persistence of ex-food and fuel CPI inflation at around 8 per cent for the last 20 months poses difficult challenges to monetary policy.

Growth in the Indian economy had been shifting down from 9.6 per cent in Q4 of 2010- 11. It troughed around 4.4 per cent for three quarters from Q3 of 2012-13 to Q1 of 2013-14. Since then there are signs of growth bottoming out with marginal improvement recorded during Q2 and Q3 of 2013 -14 to 4.8 and 4.7 per cent respectively. However, this improvement has been feeble and clear signs of recovery are yet to emerge, even as the economy seems to be gearing for a modest recovery during 2014-15.

The downward spiral in growth caused in large part by structural factors that impeded investment activity had a profound effect on India's potential growth. On the basis of quarterly output levels, India's potential growth appears to have dropped from 8-8.5 per cent during the period Q2:2005-06 to Q3:2008-09 to around 6 per cent during the period Q2:2012-13 to Q3:2013-14.

(Source: *Macroeconomic and Monetary Developments 2014-15 (An Update)*, RBI Publication)

The wide range of estimates using alternative techniques, on balance, suggests that currently the potential growth may be even somewhat lower than 6.0 per cent. Decline in financial savings, sluggish growth in fixed capital formation over successive quarters, persistently high inflation and low business confidence contributed to the decline in potential growth, particularly in the absence of adequate structural policy measures to lower inflation on a durable basis through improved supply responses and to facilitate implementation of large investment projects. Estimates of potential output are subject to considerable uncertainties given that they are sensitive to choice of methodologies, the time period used for estimation and end-period growth rates and have to be interpreted with

judgment. On current reckoning, the economy seems to be running a negative output gap of about one percentage point, though the error bands around this estimate are wide.

OVERVIEW OF THE GEMS AND JEWELLERY INDUSTRY

The Jewellery market worldwide has grown steadily over the last few years while it slowed down during the global economic recession but is likely to grow at a faster rate compared to the growth rate of past three years. The value of world's Jewellery market is expected to grow at the CAGR of over 5% over the next five years. The global market for Jewellery is expected to surpass USD 257 Billion revenues by 2017. The market is predominantly driven by the Asia Pacific and the Middle Eastern markets, but U.S. continues to remain the dominant player in the industry.

U.S. currently accounts for the largest jewellery market in the world with more than half of its market being dominated by the diamond jewellery segment. Regionally, Asia Pacific holds the world's largest jewellery market and is being driven largely by China and India which is the two largest consumers of gold in the world and also hold majority of the processing and manufacturing industry for jewellery. The global market is now witnessing an improvement in the jewellery sales overall and with the rising disposable incomes and changing lifestyles; the global jewellery market is set to experience a strong growth over the coming years. However, the market is still challenged by the large unorganized markets, particularly in the developing economies.

The hub of India's jewellery industry is Mumbai that receives the majority of the country's gold and rough diamond imports. Mumbai has a considerable number of modern, semi-automatic factories and laser -cutting units, the majority of which are located in the special economic zone(s) . Most of the diamond processing, is undertaken in Gujarat, (primarily in Surat, Bhavnagar, Ahmedabad and Bhuj) and in Rajasthan (Jaipur) with Gujarat contributing to 80% of the total diamonds processed in India.

Demand drivers of the Industry

❖ Rising Disposable Income

The rising disposable income has been a major demand driver for the sector over the years, both domestically as well as internationally. Jewellery, particularly diamond jewellery, is considered as a lifestyle product, and the demand for lifestyle products has also gone up with the increase in disposable incomes; as a result, the gems and jewellery sector has recorded tremendous growth in the past few years. Gold demand has been rising in India in the last few years because of increased purchasing parity of the middle class and the increasing income levels.

❖ Penetration of the Organised Players

It is estimated that growth in the industry would be highly contributed with the development of large retailers / brands in the coming years. The leading brands are pulling the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. These players are also offering financing schemes to consumers to further boost sales. However, the phenomenon is more prevalent in the tier-1 and tier-2 cities.

❖ Low Cost of Labour

The low cost of labour for cutting and polishing of diamonds has made India an attractive destination for diamond processing.

❖ Availability of Skilled Craftsmen

Jewellery manufacturing is an ancient industry in India therefore it has a huge population of skilled artisans / craftsmen. Furthermore, India is famous for processing very small diamonds that requires immense skill, which the Indian artisans seem to have developed over the years. These advantages help India score over its peers.

❖ Government Initiatives / Policy Support

- The Indian government is planning to establish a special zone with tax benefits for diamond import and trading in Mumbai, in an effort to develop the city as a rival to Antwerp and Dubai, which are currently the top trading hubs for diamond.
- The Reserve Bank of India (RBI) has liberalized gold import norms. Now, star and premier export houses can import the commodity, while banks and nominated agencies can offer gold for domestic use as loans to bullion traders and jewellers, as per a notification issued by the RBI.
- To further liberalize norms for rough diamond imports, the RBI has lifted restrictions on some mines abroad. Advance remittances can now be given to these mines for such import of roughs.
- India and Russia have signed a Memorandum of Understanding (MoU) to source data on diamond trade between the two countries. India is the top global processor of diamonds while Russia is the largest rough diamond producer.

Challenges faced by the Industry

The industry faces several challenges impacting consumption and the investment demand side of the market.

❖ *High import dependence*

The gems and jewellery industry is highly dependent on import for meeting its raw material requirements and among the imported commodities rough diamonds account for almost 50% of the imports. India is also one of the largest importer and consumer of silver in the world.

❖ *Lack of financial support*

The gross credit deployment towards the gems & jewellery industry has been increasing in value terms; but still it is less than 3.00% during the last five years and stood at around 2.74% of the total credit deployment towards industry in 2013. Further, as the market is mainly constituted by small players, the industry faces difficulties in availing financing options. Further, the unavailability of Gold (Metal) Loans has increased the cost of financing for domestic jewelers. Traditional financing is costly due to high input costs.

❖ *Fluctuations in Exchange Rate*

Gems and Jewellery industry is influenced by the rupee/dollar exchange rate because it is export & import oriented industry. Any variation in the exchange rates affects the margins of the players.

❖ *Overregulated consumption industry and under-developed investment industry*

In terms of regulatory policy, there is a lack of differentiation between investment demand and consumption demand. As a result, while imports have surged primarily to feed investment demand, regulations have also constrained consumption demand. There is no clear policy on the investment demand of gold.

❖ *Large investment demand and associated supply infrastructure*

There is substantial investment demand in both jewellery and bars and coins form. This is due to the great attractiveness of gold as an investment option, the limitations of alternate investment options, and the inadequacies of financial products backed by gold. However, bars and coins in particular have limited value addition and thus make a limited contribution to industry growth. Further, the investment demand adds to the import burden, leading to regulatory actions that impact the industry. There are a number of jewelers that cater primarily to investment demand, especially in rural and semi-urban areas.

❖ **Limited research and technology adoption**

Innovation is critical for success in the export market and for growing the domestic segment. This requires the use of modern design and the latest technology. While the industry is adept at traditional designs, there is a lack of design-led innovations. Adding to this are sub-scale facilities that limit the use of modern technology.

(Source: FICCI Report titled “All that glitters is Gold: India Jewellery Review 2013”)

Road Ahead

Exports from the gems and jewellery industry could reach US\$ 58 billion by 2015, according to a joint report by Technopak and an industry body. It is further anticipated that the value of the domestic market for gems and jewellery will be around US\$ 35-40 billion by 2015. Indian consumers, however, are not wholly dependent on diamonds and gold for jewellery. For instance, the costume jewellery industry in India grew at 20-30 per cent in the first half of FY14, with women showing a gradual preference for costume jewellery over gold. This market is expected to touch 15,000 crore (US\$ 2.42 billion) by December 2015 - a marked increase from the 8,000 crore (US\$ 1.29 billion) in December 2012.

India is also considered one of the top exporters in the sector. Key exporting destinations in FY14 were UAE at 35 per cent of exports valued at US\$ 12,195.34 million; Hong Kong at 28 per cent of exports valued at US\$ 9,790.45 million; and the US at 14 per cent of exports valued at US\$ 4,948.92 million.

OVERVIEW OF THE INDIAN TEXTILE AND APPAREL INDUSTRY

Indian textiles and apparel have a history of fine craftsmanship and global appeal. Cotton, silk and denim from India are highly popular abroad and with the upsurge in Indian design talent, Indian apparel too has found success in the fashion centres of the world.

The Indian textile and apparel industry is one of the largest in the world with an enormous raw material and manufacturing base. The present domestic textile industry is estimated at US\$ 33.23 billion and unstitched garments comprise US\$ 8.307 billion. The industry is a significant contributor to the economy, both in terms of its domestic share and exports. It accounts for a phenomenal 14 per cent of total industrial production, contributes to nearly 30 per cent of the total exports and employs around 45 million people.

Road Ahead

The Indian textiles and apparels industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand. The industry is expected to reach US\$ 200 billion by fiscal 2020, at a CAGR of 10.25% in the next 7 years. For the textiles industry, the proposed hike in FDI limit in multi-brand retail will bring in more players, thereby providing more options to consumers. It will also bring in greater investments along the entire value chain - from agricultural production to final manufactured goods.

Gem and Jewellery Export Promotion Council

The Gol has designated the Gem and Jewellery Export Promotion Council (“GJEPC”) as the importing and exporting authority in India in keeping with its international obligations under Section IV(b) of the Kimberley Process Certification Scheme (“KPCS”). The GJEPC has been notified as the nodal agency for trade in rough diamonds. The KPCS is a joint government, international diamond and civil society initiative to stem the flow of conflict diamonds, which are rough diamonds used by rebel movements to finance wars against legitimate governments. The KPCS comprises participating governments that represent approximately 99.8% of the world trade in rough diamonds. The KPCS has been implemented in India from January 1, 2003 by the Gol through communication No. 12/13/2000-EP (GJ) dated November 13, 2002. However, under the SEZ Rules, 2006, the Development Commissioners have been delegated powers to issue Kimberley Process Certificates for units situated in respective SEZs.

National Textile Policy

Subsequent to the announcement of the Textile Policy, the woven segment of readymade garment sector and the knitting sector have been de-reserved from the list of items reserved for exclusive manufacture in the small scale sector. The Textile Policy also targets the development of a strong multi-fibre base to facilitate product upgradation and diversification. The Textile Policy provides for government financing and venture capital funding for setting up textile plants. Particular emphasis is laid on exports with the proposal of multi-disciplinary institutional mechanisms to formulate policy and action plans, including the restructuring of Export Promotion Councils and operating a brand equity fund exclusively for textile and apparel products. The Textile Policy also contains sector specific agendas. For the cotton sector, it designates the Technology Mission of Cotton as the nodal body to bring about increase in productivity and stability in prices. For the spinning and weaving sectors, decentralized modernizations is the thrust of the government policy and for the garments sector, the government proposes a number of measures in light of the WTO rules and regulations, including strategic alliances with leading global manufacturers and the establishment of textile/apparel parks. The Ministry of Textiles announced the formulation of the National Textile Policy, 2000 118 (“Textile Policy”) in November 2000 with the objective of enabling the textile industry to attain and sustain a preeminent global standing in the manufacture and export of clothing. The Textile Policy envisages a multi-pronged strategy to achieve these long term goals. The strategy

aims at modernizing the equipment and technology that is used in the sector and simultaneously strengthening the traditional knowledge, skills and capabilities in this sector.

However, the entitlement to gratuity in the event of death or disablement will not be contingent on an employee having completed five years of continuous service. An employee in a factory is said to be in ‘continuous service’ for a certain period notwithstanding that his service has been interrupted during that period by sickness, accident, leave, absence without leave, lay-off, strike, lock-out or cessation of work not due to the fault of the employee. The employee is also deemed to be in continuous service if the employee has worked (in an establishment that works for at least six days in a week) for at least 240 days in a period of 12 months or 120 days in a period of six months immediately preceding the date of reckoning.

Under the current regime of VAT the trader of goods has to pay the tax (VAT) only on the Value added on the goods sold. Hence VAT is a multi-point levy on each of the entities in the supply chain with the facility of set-off of input tax- that is the tax paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. Only the value addition in the hands of each of the entities is subject to tax. Periodical returns are required to be filed with the VAT Department of the respective States by the Company.

The Act prescribes regulatory mechanism regarding all relevant aspects including organizational, financial and managerial aspects of companies. Regulation of the financial and management aspects constitutes the main focus of the Act. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. LAWS REGULATING TRANSFER OF PROPERTY:

Transfer of Property Act, 1882

Stamp duty must be paid on all instruments specified under the Stamp Act at the rates specified in the schedules to the Stamp Act. Industry Overview

OVERVIEW OF THE GEMS AND JEWELLERY INDUSTRY

The Jewellery market worldwide has grown steadily over the last few years while it slowed down during the global economic recession but is likely to grow at a faster rate compared to the growth rate of past three years. The value of world's Jewellery market is expected to grow at the CAGR of over 5% over the next five years. The global market for Jewellery is expected to surpass USD 257 Billion revenues by 2017. The market is predominantly driven by the Asia Pacific and the Middle Eastern markets, but U.S. continues to remain the dominant player in the industry.

U.S. currently accounts for the largest jewellery market in the world with more than half of its market being dominated by the diamond jewellery segment. Regionally, Asia Pacific holds the world's largest jewellery market and is being driven largely by China and India which are the two largest consumers of gold in the world and also hold majority of the processing and manufacturing industry for jewellery. The global market is now witnessing an improvement in the jewellery sales overall and with the rising disposable incomes and changing lifestyles; the global jewellery market is set to experience a strong growth over the coming years. However, the market is still challenged by the large unorganized markets, particularly in the developing economies.

OVERVIEW OF THE INDIAN TEXTILE AND APPAREL INDUSTRY

Indian textiles and apparel have a history of fine craftsmanship and global appeal. Cotton, silk and denim from India are highly popular abroad and with the upsurge in Indian design talent, Indian apparel too has found success in the fashion centres of the world.

The Indian textile and apparel industry is one of the largest in the world with an enormous raw material and manufacturing base. The present domestic textile industry is estimated at US\$ 33.23 billion and unstitched garments comprise US\$ 8.307 billion. The industry is a significant contributor to the economy, both in terms of its domestic share and exports. It accounts for a phenomenal 14 per cent of total industrial production, contributes to nearly 30 per cent of the total exports and employs around 45 million people.

Road Ahead

The Indian textiles and apparels industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand. The industry is expected to reach US\$ 200 billion by fiscal 2020, at a CAGR of 10.25% in the next 7 years. For the textiles industry, the proposed hike in FDI limit in multi-brand retail will bring in more players, thereby providing more options to consumers.
