SECTION II: RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, financial condition, results of operations and cash flows could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact is not quantifiable and hence the same has not been disclosed in such risk factors. Investment in equity and equity related securities involves a degree of risk and investors should not invest any funds in this offer unless they can afford to take the risk of losing their investment. Investors are advised to read the risk factors carefully before taking an investment decision in this offering. Before making an investment decision, investors must rely on their own examination of the offer and us.

This Red Herring Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including the considerations described below and elsewhere in this Red Herring Prospectus. See "Forward-Looking Statements" on page 16.

Internal Risks

- 1. If we do not successfully anticipate market needs or develop and introduce new solutions that meet users' needs on a timely basis, we may not be able to compete effectively and our revenue, reputation, financial conditions, results of operations and cash flows may be adversely affected.***

We operate in a market that is characterised by rapidly changing technologies and business plans, which require users to adapt to increasingly complex IT infrastructures that incorporate a variety of hardware, software applications, operating systems and networking protocols. As our users' technologies and business plans grow more complex, we expect them to face new and increasingly sophisticated methods of cyber attacks. Our solutions focus on safeguarding IT systems, infrastructure, applications, network, information and data. However, hackers, cybercriminals and advanced cyber attackers are skilled at adapting to new technologies and developing new methods of gaining access to users' sensitive personal and business data. Although the market expects us to timely introduce improved solutions to respond to new threats, the development of these solutions can be challenging and time-consuming. We may experience delays in the introduction of such new solutions, updates, enhancements and features. If we fail or are perceived to fail to respond to the rapidly changing needs of our end-users by developing upgraded solutions and introducing them on a timely basis that effectively protect against new security threats, our competitive position, reputation and business prospects could be harmed.

Our solution enhancements or new solutions could fail to attain sufficient market acceptance for many reasons, including:

- delays in releasing enhancements or new solutions;
 - inability to protect against new types of attacks or techniques used by cyber attackers, hackers or other data thieves;
 - negative publicity about the performance or effectiveness of our introduced solutions;
 - introduction or anticipated introduction of competing products by our competitors; and
 - difficulties in installation, configuration or usage errors by our users.
- 2. We face intense competition, and competition may have a negative impact on our business prospects, future performance and financial condition.***

The market for security software solutions is intensely competitive and characterised by rapid changes in technology, user requirements, industry standards and frequent new product introductions and improvements.

We expect competitive pressures to lead to increases in expenses such as advertising and sales promotion expenses,

R&D expenses, product rebates, product placement fees, and marketing support provided to our channel partners. Our current and potential competitors may also establish cooperative relationships among themselves or with third parties that may further enhance their resources. Current or potential competitors may be acquired by third parties with greater available resources. We compete with companies that offer a broad array of IT security solutions. We face competition from both international and Indian companies such as Symantec, Trend Micro, Kaspersky, McAfee, Sophos, Fortinet, Watchguard, Apps Daily, Syska and K7. Large vendors of hardware or operating system software, such as Microsoft, Cisco Systems and International Business Machines Corp. (IBM), HP and Lenovo increasingly incorporate the system and network security functionality into their products, and enhance that functionality either through internal development or through strategic alliances or acquisitions. Some of our competitors are global companies that have larger technical and financial resources and the broad customer bases needed to bring competitive solutions to the market. Such companies may use these advantages to offer solutions that are perceived to be as effective as ours at a lower price or for free as part of a larger product package or solely in consideration for maintenance and services fees. They may also develop different products to compete with our current solutions and respond more quickly and effectively than we do to new or changing opportunities, technologies, standards, devices, platforms or client requirements.

Our competitors may enjoy potential competitive advantages over us, such as:

- greater name recognition, a longer operating history, a larger customer base and extensive international operations;
- larger sales and marketing budgets and resources;
- larger technical teams, research and product development budgets and resources;
- broader distribution and established relationships with channel partners and hardware vendors;
- greater customer support resources;
- resources to make acquisitions; and
- larger intellectual property portfolios.

Low-priced or free competitive products. Security protection is increasingly being offered by third parties at significant discounts to our prices or, in some cases is bundled for free. The widespread inclusion of lower-priced or free products that are perceived to perform the same or similar functions as our products within computer hardware or other companies' software products could potentially reduce the need for our products or render our products unmarketable — even if these incorporated products are inferior or more limited than our products. It is possible that a major competitor may offer a free anti-virus or anti-malware enterprise product. For instance, software companies may partner with manufacturing companies to provide pre-loaded anti-virus on smartphones and other mobile devices. Thus, we face competition from competitors like AVAST and AVG which provide several freemium products and with whom we compete to acquire users, especially those users who are sensitive to pricing.

Smaller competitors. Additionally, from time to time we may compete with smaller regional vendors that offer products with a limited range of capabilities or customised solutions for specific segment that purport to perform functions similar to our solution. Such companies may enjoy stronger sales and service capabilities in their particular regions or segment. Smaller and/or newer companies often compete aggressively on price and may force us to reduce prices or face loss of users.

3. *Our financial results may vary from time to time, due to fluctuations in demand for our solutions, making it difficult to project future results.*

Our portfolio of solutions initially targeted home users but in recent years we have increased our focus on small and medium-sized businesses (“SMBs”), enterprise customers, educational institutions, government agencies and departments. In addition, high visibility attacks on prominent enterprises and governments have increased market awareness of the problem of cyber attacks and malware and help to provide an impetus for customers to devote resources to protecting against such problems. If cyber attacks and malware-related issues were to decline or potential customers perceived that the general level of advanced cyber attacks have declined, our ability to attract

new customers and expand our offerings within our existing customers could be materially and adversely affected. A reduction in the threat landscape could increase our sales cycles and harm our financial condition, business, results of operations and cash flows.

Demand for our solutions may fluctuate from period to period due to factors such as general economic conditions, competition, brand recall, product obsolescence, technological change, shifts in buying patterns, financial and business conditions of our current and potential customers and levels of Internet usage. A variety of factors may hence cause volatility in our financial results, making any projections of future results uncertain. Such factors include but are not limited to fluctuations in demand for or pricing of our solutions, the expectation by our channel partners of higher incentives, timing of orders and payments, issues relating to alliances with third parties, product and geographic mix and timing of new solutions.

There are also particular factors driving demand for each of our specific solutions. For instance, demand for our solutions among enterprise customers is driven by such customers' need for protection of business-critical data, potential users' awareness of Internet security threats (including cybercrime) generally, the perceived potential damage caused by information loss and other factors. A change in the factors driving demand for our solutions generally or for a particular solution could adversely affect our revenue, financial condition, results of operations and cash flows.

4. *We depend heavily on sales to home users of our “Quick Heal” branded products and any factor adversely affecting sales of our solutions to home users will negatively impact our profitability, results of operations and cash flows.*

We sell our solutions under the brand names “Quick Heal” and “Seqrite.” We believe that the recognition and reputation of our “Quick Heal” and “Seqrite” brands among end users have significantly contributed to the growth of our business and hence maintaining and enhancing both of these brands is critical to our business. Our business depends on our brand recognition and the failure to maintain or enhance our brand image could adversely affect our business operations.

We depend heavily on sales of our “Quick Heal” branded solutions to home users. While we have recently expanded our portfolio of solutions with the launch of “Seqrite” branded solutions and have increased focus on acquiring enterprises, educational institutions and government departments and agencies as customers, we expect sales of “Quick Heal” branded products to home users to continue to constitute a majority of our sales and profits over the next few years.

5. *Our business and operations have experienced rapid growth in recent periods, and if we do not effectively manage any future growth or are unable to improve our systems and processes, integrate new systems or train new employees, our operating results may be adversely affected.*

We have experienced rapid growth and increased demand for our products and solutions over the last few years. The number of active licenses installed by our users has increased from 2.5 million as of March 31, 2011 to 7.13 million as of December 31, 2015. Our total revenue grew at a CAGR of 21.94% over the last five fiscal years. Our revenue from operations (net) for the six months ended September 30, 2015 was ₹1,481.84 million. Our revenue from operations (net) for fiscal years 2015, 2014 and 2013 was ₹ 2,861.15 million, ₹ 2,428.38 million and ₹ 2,050.05 million, respectively. Our headcount has increased from 644 as of March 31, 2013 to 1,173 as of March 31, 2015, and 1,396, as of December 31, 2015 and we plan to continue to hire additional employees across various functions. Our rapid growth has placed significant demands on our management, sales, operational and financial infrastructure, and our growth will continue to place significant demands on these resources. Further, in order to manage our current and future growth effectively, we must continue to improve and expand our infrastructure, operating and administrative systems and controls, invest in brand building and efficiently manage headcount, capital and processes. We may not be able to successfully manage these resources in a timely or efficient manner, and our failure to do so may materially impact our projected growth rate and future results.

As we continue to invest in the growth of our business, our operating and net profit margins and our operating and net income may decline, primarily as a result of the increase in operating costs associated with our increased rate of investment in research and development (“R&D”), increased investments in advertising and sales promotion activities, additional headcount growth and our increased administrative costs in connection with becoming a public company.

Further, on account of the various reasons mentioned above, our EBITDA margins have been impacted in the past

and may continue to be adversely impacted in the future as well. For the six months ended September 30, 2015, our EBITDA margin was 29.69% while for the fiscal years 2015, 2014 and 2013, our EBITDA margins were 32.09%, 42.98% and 51.30%, respectively.

Any inability to manage our growth, integrate new systems or train new employees could negatively affect our business, financial condition, results of operations and cash flows.

6. *If we are unable to retain existing users and acquire new customers, our future revenues and operating results will be harmed.*

Our Company's future success depends on our ability to increase sales of solutions to new users and retain existing users. Some of our customers may stop using our solutions in any given period due to, among other things, the cost of switching to the solutions of competitors on existing hardware being minimal and some competitors' products being preinstalled on new hardware purchased by our users. For example, in the security software market, many new desktop/laptop computers have pre-installed security products. In addition, we may not be able to acquire new users if our solutions are perceived to be less cost effective or other products and solutions of comparable or better quality are available in the market at the same or lower cost.

Our success also depends on our ability to acquire new users, home users as well as enterprises, educational institutions and government customers. The number of users that we add in a given period impacts both our short-term and long-term revenues. If we are unable to attract a sufficient number of new users, we may be unable to generate revenue growth at desired rates. Our industry is highly competitive and many of our competitors have substantial financial, personnel, technical and other resources that they utilise to develop products and attract users. As a result, it may be difficult for us to add new users to our customer base. Additional factors that may impact our ability to acquire new users include the perceived need for IT security, the size of our prospective users' IT budgets, the utility and efficacy of our existing and new solutions, whether proven or perceived, and general economic conditions. Our efforts to retain existing users and acquire new users require a significant investment in building and maintaining customer relationships, as well as significant R&D efforts in order to provide upgrades and launch new solutions.

7. *We invest in brand building and our business, financial condition, results of operations and cash flows may be negatively affected by any adverse publicity regarding our brand and/or solutions.*

We sell our solutions under the brand names "Quick Heal" and "Seqrite". We believe that the recognition and reputation of our "Quick Heal" and "Seqrite" brands among end users have significant impact on our business prospects. For the six months ended September 30, 2015, we incurred ₹ 90.20 million on advertising and sales promotion. In fiscal years 2015, 2014 and 2013, we incurred ₹ 288.09 million, ₹ 223.10 million and ₹ 190.28 million, respectively, on advertising and sales promotion. Further, for the six months ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, we incurred ₹ 54.58 million, ₹ 134.53 million, ₹ 109.70 million and ₹ 70.48 million, respectively, on business promotion expenses. If our marketing and advertising programmes are unsuccessful, our results of operations and cash flows could be materially adversely affected. Further, as we continue to invest in brand building and incur expenditure on advertising and sales promotion as well as business promotion, our operating profit margin, EBITDA margin and net profit margins may decline and our operating income, EBITDA and net income may be adversely impacted. For details, see "*Our Business — Advertising and Sales Promotion*" on page 104.

Our "Quick Heal" and "Seqrite" branded solutions may become subject to adverse publicity due to an actual, perceived or potential specific quality issue or the solution not meeting the user's requirements. Our reputation may also be adversely affected by negative user reviews on online forums, technical journals and elsewhere. Any such event would likely impact our market share and the demand for our solutions thereby affecting our business, financial condition, results of operations and cash flows.

The brand positioning and sales of our solutions may also be adversely affected on account of various factors which may be beyond our control. Our solutions may falsely detect threats that do not actually exist or identify applications or content as malware based on the classifications. False detection of threats, while typical in our industry, may reduce perception of the reliability of our solutions and may therefore adversely impact market acceptance of our products and solutions. In addition, we may become involved in litigation and may be subject to civil actions and/or monetary penalties in connection with such false detection of threats. There can be no assurance that, despite testing by us, errors will not be found in existing and new versions of our solutions, resulting in loss of or delay in market acceptance. In such an event, we may be required, or may choose, for user

relations or other reasons, to expend additional resources in order to help correct the problem and, in an extreme situation, be unable to rectify the problem, which may significantly impact our reputation, competitive position and business prospects.

In addition, changes in the nature of advanced cyber threats could render our solutions obsolete and may result in a shift in IT budgets away from solutions such as ours. If solutions such as ours are not viewed by users as necessary or integral to their operations, or if they do not recognise the benefit of our solutions as a critical layer of an effective cyber security strategy, then our revenues may not grow as quickly as expected, or may decline, and our financial position could suffer.

We may not be able to undertake effective marketing initiatives to deepen the presence of our brand and differentiate it from competition. In addition, current and future competitors may also introduce new and more competitive solutions which may adversely affect the sales of our solutions to end users. We also have a large channel partner network that helps us to reach a larger number of users and any disruption in our relationship with these channel partners may disrupt sales. Any decrease in sales to home users may have an adverse effect on our business, financial condition, results of operations and cash flows.

We propose to spend a large proportion of the proceeds from the Fresh Issue for our advertising and sales promotion activities. There can be no assurance that we will be successful in our efforts and such initiatives will result in increased sales and greater brand recognition. For details, please see “*Objects of the Offer - Advertising and sales promotion*” on page 104.

8. *Our quarterly operating results vary and hence a comparison of our quarterly results may not be meaningful.*

Our quarterly operating results have been, and may continue to be, subject to variation, depending on several factors that may cause us to record higher revenue in some quarters compared with others. For example, we have historically recorded the highest level of revenue in our fourth quarter, which we believe corresponds to the fourth quarter results/performance of a majority of our channel partners and end users. The first and third quarters of our fiscal years typically correspond to lower quarterly revenues.

In addition to fluctuations in quarterly revenues, our operating costs are also not fixed and may vary from quarter to quarter. As a result of these factors, our profitability may also vary from quarter to quarter and we may make losses in some quarters.

We expect these fluctuations in our quarterly results to continue. As a result, we believe that quarterly comparisons of our financial results should not be relied upon as an indication of our future performance. In addition, if our rate of growth slows over time, seasonal or cyclical variations in our operations may become more pronounced, and our business, results of operations and cash flows may be adversely affected.

9. *Our R&D efforts and investments may not produce successful results or solutions or enhancements to our solutions that result in significant revenue or other benefits in the near future, or at all.*

We have, in recent quarters, increased our R&D efforts and expect to continue to dedicate significant financial and other resources to our R&D efforts in order to maintain our competitive position. For the six months ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, we expensed ₹290.22 million, ₹ 459.54 million, ₹ 312.07 million and ₹ 196.87 million, respectively, on R&D-related expenses, which formed 19.59%, 16.06%, 12.85% and 9.60% of our revenue from operations (net) in these periods.

In addition, on account of us continuing to incur R&D-related expenses and making further investments in R&D, our EBITDA margins have been impacted in the past and may continue to be adversely impacted in the future as well. For the six months ended September 30, 2015, our EBITDA margin was 29.69% while in fiscal years 2015, 2014 and 2013, our EBITDA margins were 32.09%, 42.98% and 51.30%, respectively.

We define R&D-related expenses to include salaries paid for R&D employees, fees for technical services and technological subscription charges. In addition, capital expenditure for R&D is also one of the Objects of the Offer. For details, see “*Objects of the Offer - Capital expenditure on research and development*” on page 106. However, investing in R&D, developing new solutions and enhancing existing solutions is expensive and time consuming, and there is no assurance that such activities will result in significant new marketable solutions or enhancements to our solutions, design improvements, cost savings, revenues or other expected benefits. If we

spend significant time and effort on R&D and are unable to generate an adequate return on our investment, our business, results of operations and cash flows may be materially and adversely affected.

10. *Sales of counterfeit or imitation solutions may impact our reputation and revenue which may in turn affect our financial position.*

As is the case with leading products around the world, our solutions may be subject to efforts by third parties to produce counterfeit versions of our solutions. While we work diligently to block counterfeit products and stop their sale, and to detect counterfeit products in customer networks, there can be no guarantee that such efforts will succeed. While counterfeiters often aim their sales at customers who might not have otherwise purchased our products, such counterfeit sales, to the extent they replace otherwise legitimate sales, could adversely affect our sales volume or market share. In addition, our failure to detect counterfeiting or imitation of our brand names and trademarks and to mitigate the adverse impact from such counterfeiting and imitation could result in negative publicity and impact our brand name and reputation. We may also need to spend resources such as management time and money on litigation relating to these counterfeit or imitation products.

11. *Our Company and our Directors have been named respondents in a criminal proceeding.*

Our Company, on behalf of our Directors Kailash Sahebrao Katkar and Mehul Mulchand Savla, has received two letters from the Special Investigation Unit of the Police Station at Baddi in the state of Himachal Pradesh in July 2014 to provide certain documents and join the investigation in relation to the first information report filed by Umesh Gupta, Director of Softalk Technologies Limited against the then directors and management of our Company (“FIR”). The first information report pertains to allegations of cheating, forgery and criminal conspiracy. Kailash Sahebrao Katkar, Sanjay Sahebrao Katkar, Mehul Mulchand Savla and others are in the process of filing a quashing petition before High Court of Himachal Pradesh at Shimla (the “**High Court**”) against the FIR. Umesh Gupta has further filed a writ petition before the High Court against State of Himachal Pradesh, Director General of Police, Himachal Pradesh, Superintendent of Police, Baddi District, Himachal Pradesh, our Company, Kailash Sahebrao Katkar, Sanjay Sahebrao Katkar, Mehul Mulchand Savla and others against the decision of the police to prepare and submit a cancellation report for closure of the FIR without proper investigation. See also the section “*Outstanding Litigation and Other Material Developments – Litigation against our Company – Criminal proceedings*” on page 330.

It is possible that criminal proceedings against our Directors may render them ineligible to hold their existing positions in our Company. Any conviction of our Directors as well as any penalties or other action against our Company and/or our Directors for the offences alleged by the complainant may potentially cause negative publicity thereby affecting our reputation, business, financial condition, results of operations and cash flows.

12. *We are exposed to counterparty credit risk and frauds in our operations which may have an adverse impact on our financial condition.*

We rely significantly on our channel partners to sell and support our solutions and we expect that sales through our channel partners will continue to account for a significant percentage of our revenues. Weakness in the end user market could negatively affect the cash flow of our channel partners, or distributors and resellers, who could, in turn, delay making payments to us and impact our working capital. We typically offer our channel partners between 60 to 90 days of credit. Furthermore, a change in the credit quality at one of our channel partners or other counterparties can increase the risk that such counterparty is unable or unwilling to pay amounts owed to us, which could directly or indirectly (through a disruption in our network) have a material adverse effect on our results of operations and cash flows. In fiscal year 2014, we made a one time charge to our Profit and Loss account of ₹ 173.28 million as an exceptional items, for the provision created due to default by one of our distributors and fraud by one of our employees, which negatively impacted our financial condition. For details, please see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations – Counterparty Credit Risk*” on page 327.

13. *If we fail to maintain successful relationships with our channel partners, or attract new channel partners, especially in our international operations, our business and growth prospects may be harmed.*

We rely significantly on our channel partners to sell and support our solutions and we expect that sales through our channel partners will continue to account for a significant percentage of our revenues. Our channel partners include service providers, system integrators, resellers and distributors. Service providers typically sell directly to end users and often provide system installation, technical support, professional services, and other support services

in addition to network equipment sales.

We categorise our sales as retail sales and other sales. Our retail sales are conducted primarily through our retail channel partners and we define retail sales as all sales, other than those through our enterprise channel partners, government partners, mobile channel partners and sales outside India. Based on this definition, other sales refers to sales where our sales team works closely with the enterprise, government and mobile channel partners, as well as the eventual end users, such as enterprises and government customers, to sell our solutions. For the six months ended September 30, 2015, we derived 86.76% and 13.24% of our revenue from retail sales and other sales, respectively. For fiscal year 2015, we derived 86.67% and 13.33% of our revenue from retail sales and other sales, respectively.

Our agreements with channel partners are non-exclusive, meaning our partners may offer customers software security products from other companies, including products that compete with our solutions. Our standard distribution agreements with our channel partners are valid until terminated by us. We may also work with certain channel partners without any legal agreement. For more details on our channel partners, see “*Our Business — Sales and Distribution*” on page 148.

Though we set minimum sales targets for our channel partners which we review annually, we have limited control over the amount of software that our channel partners will eventually purchase from us or sell on our behalf. If our channel partners do not effectively market and sell our solutions, or choose to use greater efforts to market and sell their own solutions or the solutions of our competitors, our business operations will be adversely affected. Our channel partners may cease or de-emphasise the marketing of our solutions with limited or no notice and with little or no penalty. Further, any new channel partners will require extensive training and may take several months or more to achieve the desired level of sales and productivity. The loss of a substantial number of our channel partners, the inability to replace them or the failure to recruit additional channel partners could materially and adversely affect our results of operations and cash flows.

Adverse changes in our channel partner network or relationships with channel partners could adversely affect the quantity and pricing of the solutions offered by us which may in turn materially and adversely affect our business prospects, financial condition, results of operations and cash flows. It is also possible that, from time to time, our channel partners may violate the terms of our agreements, such as the pricing terms, and hence we may need to sever ties with certain of our channel partners. We may also become aware of fraud and financial irregularities on behalf of our channel partners which may have legal or financial implications for us. For details, see “*Risk Factors - We are exposed to counterparty credit risk in our operations which may have an adverse impact on our financial condition*” on page 22.

14. *We rely on third party manufacturers and vendors for important services and any delay and/or failure in the performance of these services may adversely affect our business, results of operations and cash flows.*

Pursuant to an agreement, a third-party vendor manufactures CDs and DVDs with our security software solutions at its manufacturing facility located at Rudrapur, in the state of Uttarakhand. Fire, floods, earthquakes, rains, inundations and heavy downpours in this area could disrupt the manufacturing operations. The operations may also be disrupted by man-made causes there, such as civil strikes and riots that may cause a total or partial shutdown of this facility or otherwise prevent the operation of this facility. Disruption to the manufacturing process may also result from other factors beyond the third party's or our control, including, power supply, breakdown or failure of equipment and labour disputes such as strikes and work stoppages. There can be no assurance that there will not be a material disruption to these operations in the future. If the manufacturer fails to take adequate steps to mitigate the likelihood or potential impact of these events, or to effectively respond to these events if they occur, our sales may be adversely impacted. If these events disrupt our ability to provide solutions to our users, our business, financial condition, results of operations and cash flows would be adversely affected.

While we generally operate call centres for technical support, we also outsource the management of certain of our call centres and other support services for our sales personnel. As on the date of this Red Herring Prospectus, our Company has four technical support centres. While three technical support centres are operated by the Company, our Company has outsourced the management of a technical support centre in Coimbatore. We also depend on external third parties for hosting our website and regular updates to our solutions. If our third party service providers experience difficulty meeting our requirements for quality and customer service standards, our reputation could suffer and our business and prospects could be adversely affected. Our operations and business could also be materially and adversely affected if our service providers face operational or system interruptions.

We may also, from time to time, outsource other activities such as handling insurance claims for various solutions such as Quick Heal Gadget Security. For more details, see “*Our Business — Strategies — Expand our Capabilities for Smart Phones/ Mobile Devices*” on page 145.

Although we actively manage such third party relationships to ensure continuity of solutions on time and to our required specifications, some events beyond our control could result in the complete or partial failure of supplies or services or in supplies and services not being delivered on time. Any such failure could adversely affect our business by resulting in delays and/or cost overruns. The failure of any of these third parties to adequately provide the needed services could have a material adverse effect on our business, results of operations and cash flows.

15. *We benefit from the tax incentives available to the third party manufacturer of our CDs and DVDs and any loss of this benefit may impact our financial performance, results of operations and cash flows.*

A third-party vendor manufactures CDs and DVDs with our security software products at its manufacturing facility located at Rudrapur, in the state of Uttarakhand. This facility is entitled to avail of an excise duty exemption that in effect lowers the cost of manufacturing. This excise duty exemption is valid for a period of 10 years from the date of the government notification or the commencement of commercial production, whichever is later, and the facility is exempt from excise duty on the goods manufactured during this period of time. The loss of this excise duty exemption will effectively increase these manufacturing costs, which will have an adverse impact on our profitability. We understand that the exemption from payment of excise duty at this manufacturing facility is available until June 20, 2018. In addition, in the event of the termination of this agreement, we may not be able to find a suitable replacement third party manufacturing facility on similar terms, or at all.

Further, the central government has proposed a comprehensive national goods and services tax (“GST”) regime that will eliminate excise duties and, depending on the rates proposed under the GST regime, may also increase the cost of manufacturing of these CDs and DVDs. For more details on GST, see “*Risk Factors — Changing laws, rules and regulations and legal uncertainties in India, may adversely affect our business and financial performance*” on page 38.

16. *If we do not effectively expand, train and retain our sales team, we may be unable to acquire new customers or sell additional solutions to existing customers, and our business will suffer.*

We depend significantly on our sales teams to attract new channel partners, maintain relationships with existing channel partners and attract new users and expand sales to existing users. We may also, from time to time, hire additional resources to focus on new areas, such as our recent hire of a team to focus on SMB and enterprise users. As a result, our ability to grow our revenues depends in part on our success in recruiting, training and retaining sufficient numbers of sales personnel to support our growth. The number of our Sales & Marketing personnel increased from 166 as of March 31, 2013 to 312 as of March 31, 2015 and 400 as of December 31, 2015. We expect to continue to expand our sales and marketing personnel significantly and face various challenges in achieving our hiring and integration goals. There is intense competition for individuals with sales training and experience. In addition, the training and integration of a large number of sales and marketing personnel in a short time requires the allocation of significant internal resources. Our failure to hire a sufficient number of qualified sales team members and training them to operate at target performance levels may materially and adversely impact our growth.

17. *Our statutory auditors have included certain observations and emphasis of matter on certain matters in their auditor’s reports.*

Our statutory auditors for fiscal years 2015, 2014, 2013, 2012 and 2011 have provided certain observations and emphasis of matter in their respective auditor’s reports. Further, the statutory auditors of our Company for each of these periods have also reported certain observations in their reports on the Companies (Auditors Report) Order, 2003 (to extent applicable) and Companies (Auditors Report) Order, 2015. These matters include slight delay in payment of statutory dues, taxes not deposited on account of a dispute with the tax authorities and concerns relating to our Company’s internal control management. For details on the matters of emphasis and steps taken by our Company, see “*Summary Financial Information*” on page 52. Investors should consider the same in evaluating our financial position, results of operations and cash flows.

18. *We currently derive a small portion of our revenue through online sales on digital commerce websites and our business could be harmed due to unauthorised discounted sales on digital commerce websites.*

India has witnessed growth in e-commerce websites in recent years. As various digital commerce websites compete for customers, they have been offering steep discounts on products sold through their websites. Currently, we have not entered into any direct agreements with such digital commerce websites for the sale of our solutions. We have granted non-exclusive distribution and marketing rights to certain distributors and resellers, who typically purchase our solutions from our channel partners, to market and sell our solutions to end users in India through online commerce websites. As the popularity of such digital commerce websites increases and more end users seek to buy solutions online, we may need to explore agreements and arrangements for such sales. If we are unable to enter into satisfactory arrangements for sales on digital commerce websites or are required to provide discounts, our business and financial performance may be adversely affected.

In addition, it has been brought to our attention that certain unauthorised third parties have also made attempts to sell our solutions through such digital commerce websites. Such sales are typically made at a price lower than authorised sales and hence customers may be unwilling to pay our regular prices and prefer other discounted solutions. If we are unable to stop such sales, including by means of legal action against these unauthorised sellers, such sales may have an adverse effect on our brand value, sales, profits and our financial condition.

19. Our business handles a large amount of data and the improper use or disclosure of such data could harm our reputation and make us vulnerable to liability for breach of data privacy.

During the course of activation of our antivirus and anti-malware offerings, we often receive and store a large volume of user data, including personal data. We face risks inherent in handling large volumes of data and in protecting the security of such data. We face a number of challenges, including protecting the data in and hosted on our system, including against attacks on our system by outside parties or fraudulent behaviour or improper use by our employees.

User data is increasingly subject to legislation and regulations in various jurisdictions, including India, and governments are increasingly acting to protect the privacy and security of personal information that is collected, processed and transmitted in or from the governing jurisdiction. As issues like privacy and data protection gain more importance in India, we may also become exposed to potential liabilities, including criminal liability. For example, under the Information Technology Act, 2000, as amended, we may become subject to civil liability for wrongful loss or gain arising from any negligence by us in implementing and maintaining reasonable security practices and procedures with respect to sensitive personal data or information on our computer systems, networks, databases and software. India has also implemented data privacy laws, including the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011, which impose limitations and restrictions on the collection, use, disclosure and transfer of personal information.

Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

20. Some of our corporate records relating to forms filed with the Registrar of Companies are not traceable.

We are unable to trace certain corporate records in relation to our Company. These corporate records include prescribed forms filed with the RoC by our Company relating to certain allotments of Equity Shares made by our Company and increase in authorised share capital of our Company. These documents pertain to the period between 1995 and 2007. Whilst we believe that all filings have been made, there is no assurance that we will not be subject to penalties on this account.

21. Our ability to sell our solutions is partially dependent on the quality of our support services and our channel partners' support services and any failure by us and/or our channel partners to offer adequate support services could have an adverse effect on our reputation, results of operations and cash flows.

Our end users depend on us or our channel partners to resolve installation, technical or other issues relating to our solutions. We provide multi-lingual user support in English, Hindi and several other major regional Indian languages. In addition, we also provide multi-mode support to our users through phone, email, chat and remote access. This helps us to resolve any user issues in a more time-efficient manner thereby helping us to increase user satisfaction. We believe that a high level of end customer support is critical for the successful marketing and sales of our solutions as well as for retaining our existing users. If we or our channel partners do not provide

accurate technical assistance or otherwise succeed in helping our users resolve issues related to the use of our solutions, our reputation could be harmed and our results of operations and cash flows could be adversely affected.

While our Company and our channel partners provide technical and installation support, our users are ultimately responsible for effectively using our solutions and, for our SMB or enterprise customers, ensuring that their IT staff is properly trained in the use of our solutions. The failure of our users to correctly use our solutions, or our failure to effectively assist users in installing our solutions and providing effective ongoing support, may result in an increase in the vulnerability of our users' IT systems and sensitive business data. Additionally, if our channel partners do not effectively provide support to the satisfaction of our users, we may be required to provide support to such users, which would require us to invest in additional personnel and systems, which requires significant time and resources. Accordingly, our failure to provide satisfactory maintenance and technical support services could have a material and adverse effect on our business, results of operations and cash flows.

As the number of users increases, we may be unable to respond quickly enough to accommodate short to medium-term increases in user demand for support services. We may also need to increase our investment in support services and may need to outsource part of this function to be more efficient and cost-effective. We also may be unable to modify the format of our support services to compete with changes in support services provided by competitors or successfully integrate support for our users. Further, increase in user demand for support services, without corresponding revenue, could increase our costs and adversely affect our operating results.

In addition, to the extent that we are unsuccessful in hiring, training, and retaining adequate support resources, our ability to provide adequate and timely support to end users will be negatively impacted, and our end users' satisfaction with our solutions may be adversely affected. Our Company's failure to provide and maintain high quality support services, especially as our business grows, could materially adversely affect our business prospects, results of operations and cash flows.

22. *Our business, prospects and results may be diminished if we lose the services of our senior management and/or key R&D personnel.*

Our success depends largely on the efforts, expertise and abilities of our senior management and key R&D personnel. Our senior management is important to our business because of their experience and knowledge of the industry. Owing to the technical and specialised nature of our work, we are also significantly dependent upon our technology and R&D personnel.

Changes in management may be disruptive to our business and might also result in our loss of unique skills and the departure of existing employees and/or customers. In addition, there is intense competition for qualified scientific and technical personnel in India. To effectively compete, we may be required to offer higher compensation and other benefits which could materially and adversely affect our financial condition, results of operations and cash flows. In the future, we may not be able to attract and retain the qualified personnel necessary for the conduct and further development of our business which could affect our ability to execute our business strategy. If one or more of our senior management team or key personnel are unwilling or unable to continue in their present positions, we may not be able to replace them with persons of comparable skill and expertise promptly, or at all, which could have a material adverse effect on our business, prospects and financial results. If any of our key employees were to join a competitor or to form a competing company, some of our channel partners and end users might choose to work with and/or use the solutions of that competitor or new company instead of our own thereby also adversely affecting our business, prospects and financial results.

23. *All of our Subsidiaries have incurred losses in their respective preceding fiscal year, which may have an adverse effect on our business, financial position, results of operations and cash flows.*

Our Subsidiaries have incurred losses during their respective preceding fiscal years as below:

We shall continue to invest in our Subsidiaries, in order to grow our presence in various international markets and to that extent, our Subsidiaries may continue to incur losses in the future as well. We cannot assure you that our Subsidiaries will break even or start making profits in future periods, or that there will not be an adverse effect on our reputation or our business as a result of their losses.

24. We may outsource certain R&D functions from time to time and any delay and/or failure in the performance of these services may adversely affect our business, results of operations and cash flows.

We have a large R&D team in-house that works on developing new solutions and enhancing existing solutions. In addition, we often outsource some parts of our R&D activities to third party vendors. These include the development and testing of certain modules which are part of our solutions. We seek to work closely and supervise the activities of our vendors but remain dependent on these vendors for the timely execution of these R&D activities and, more importantly, the quality and efficacy of these activities. Further, arrangements with such vendors are typically not exclusive arrangements and they may work for other IT companies, including our competitors. The vendors may thus prioritise the work of other competitors and focus more on the quality and delivery of services to them to our disadvantage.

In addition, while we enter into confidentiality agreements for the protection of our intellectual property, these vendors may, intentionally or inadvertently, disclose confidential information which could impact our business, growth prospects and reputation negatively.

25. We are exposed to risks associated with credit card fraud and credit card payment processing.

Home users often use credit and debit cards to pay for our solutions. We may suffer losses as a result of orders placed with fraudulent credit and debit cards. We, our payment providers and our channel partners may not have the means to detect or control payment fraud, which could have an adverse effect on our results of operations and cash flows. The secure transmission of confidential credit and debit card information is essential to maintain customer confidence in us. Security breaches, whether of our system or third party systems, could significantly harm our business or our reputation. Our efforts to mitigate and comply with the payment card industry data security standard, or similar standards, and even the perception of a breach of such standards increase the risk that such incidents will lead to fines and other penalties, claims by banks, card holders and others and disclosure leading to public knowledge of such incidents, potentially causing reputational damage to our business.

For credit and debit card transactions we may be required to pay interchange and other fees which may increase over time and raise our operating costs and lower profitability. In addition, our credit card fees may be increased by credit card companies if our chargeback rate, or the rate of payment refunds, exceeds certain minimum thresholds. If we are unable to maintain our chargeback rate at acceptable levels, our credit card fees for chargeback transactions, or for all credit card transactions, may be further increased, and credit card companies may increase our fees or terminate their relationship with us. Any increase in the credit card fees we are required to pay could adversely affect our results of operations and cash flows. The termination of our ability to process payments on any major credit or debit card could significantly impair our ability to operate and grow our business.

26. Any inability to protect our proprietary technology and intellectual property rights may adversely affect our business and growth prospects.

Proprietary technology used in our solutions is important to our success. We typically protect our intellectual property under patent, trademark, copyright and trade secret laws, and through a combination of confidentiality procedures, contractual provisions and other methods, all of which offers only limited protection. For example, we have been granted four patents in the United States and have registered trademarks such as “Quick Heal”, “Guardian”, “Security Simplified”, “Aapke PC mein kaun rehta hai, Virus ya Quick Heal” and “SurfCanister” in India. We have registered trademarks for “Quick Heal” and “Seqrite” in the European Union. We have also obtained trademark registration for “Quick Heal” in various countries such as Australia, Japan and the United States, among others, where we currently do business or are planning to do business. In addition, our employees typically are subject to confidentiality and non-disclosure clauses in their employment agreements. Any deliberate or inadvertent disclosure by present or former employees may also expose us to liability.

We have not registered our corporate logo “Quick Heal” and hence we do not enjoy the statutory protection accorded to a registered trademark. We have made trademarks applications for the registration of certain marks and words. However, there can be no assurance that our application will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may

still continue to use the corporate logo but remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our corporate logo which may adversely affect our reputation and business and could require us to incur additional costs.

The protection and enforcement of our intellectual property rights in the markets in which we operate is uncertain. The laws of countries in which we operate or intend to expand our operations, may afford little or no protection to our patents, copyrights, trade secrets and other intellectual property rights. For instance, patentability of computer software per se is not available in several jurisdictions, unless combined with hardware. While we have applied for registration of certain patents in India, none of them have been granted so far.

Typically we do not obtain signed license agreements from customers who license products from us. In these cases, we include an electronic version of an end-user license in all of our electronically distributed software and a printed license with our products that are distributed in a box. Although this is common practice for software companies that sell off-the-shelf products to have licenses that are not signed by the licensee, certain legal authorities believe that such licenses may not be enforceable under the laws of many jurisdictions.

Further, while we monitor the use of and respect for our intellectual property rights, policing unauthorised use of our copyrighted and trade secret technologies and proving misappropriation of our technologies could be difficult. Furthermore, any changes in, or unexpected interpretations of, the copyright, trade secret and other intellectual property rights laws in any country in which we operate or intend to expand our operations may adversely affect our ability to enforce our copyright, trade secret and other intellectual property rights. Costly and time-consuming litigation could be necessary to enforce or defend our intellectual property rights and/or to determine the scope of our confidential information, intellectual property right and trade secret protection. If we are unable to protect our intellectual property rights or if third parties independently develop technologies similar to ours or otherwise gain legal access to our or similar technologies, our competitive position and brand recognition could suffer and our revenue, financial condition, results of operations and cash flows could be adversely affected. For details, please see “*Outstanding Litigation and Other Material Developments*” on page 330.

27. *Intellectual property claims may increase our costs or require us to cease selling certain solutions, which could adversely affect our financial condition, results of operations and cash flows.*

The IT security industry is characterised by the existence of a large number of trademarks and patents and frequent claims and related litigation regarding patent and other intellectual property rights. In particular, leading companies in the IT security industry have extensive patent portfolios. It is possible that a third party may assert their patent, copyright, trademark and other intellectual property rights against us, our channel partners or our customers. Furthermore, we may be subject to indemnification obligations with respect to third party intellectual property rights pursuant to our agreements with our channel partners or customers. Such indemnification provisions are customary for our industry. Successful claims of infringement or misappropriation by a third party against us or a third party that we indemnify could prevent us from distributing certain products or performing certain services or could require us to pay substantial damages, royalties or other fees. Such claims also could require us to cease making, licensing or using products that are alleged to infringe or misappropriate the intellectual property of others, to expend additional development resources to attempt to redesign our products or services or otherwise to develop non-infringing technology, to enter into potentially unfavourable royalty or license agreements in order to obtain the right to use necessary technologies or intellectual property rights, and to indemnify our partners and other third parties, including our customers and channel partners whom we typically indemnify against such claims. Even if third parties offer a license to their technology, the terms of any offered license may not be acceptable, and the failure to obtain a license or the costs associated with any license could cause our business, financial condition, results of operations or cash flows to be materially and adversely affected. Defending against claims of infringement or being deemed to be infringing the intellectual property rights of others could impair our ability to innovate, develop, distribute and sell our current and planned solutions. If we are unable to ensure that we are not violating the intellectual property rights of others, our financial position may be adversely affected.

28. *Any inability to license or incorporate software and technology developed by third parties in our solutions may adversely impact our business, financial position, results of operations and cash flows.*

Our success depends to a great extent on the proprietary technology we use in our solutions. We primarily develop our technology in-house and also incorporate software and technology developed by third parties in our solutions. For details of technology that we have licensed from others, please see “*Our Business — Technology and Intellectual Property*” on page 151. We may not be able to license or otherwise obtain rights to use and incorporate

third party intellectual property in our solutions, or such license or rights may only be available at a high cost. This may impact our ability to develop new solutions and/or our profitability.

29. *A portion of our revenues is generated by sales to government entities, and hence subject to a number of challenges and risks.*

We derive a portion of our revenues from sales to Indian central, state and local governments and their respective agencies and expect to see growth in this segment in medium and long-term. Revenue from sales to government entities constituted 4.73% of the total revenue of our Company in fiscal 2015.

Sales to government entities are often on commercial terms decided through a reverse auction tender with e-bidding or open tender. These entities may also invite quotations from selected vendors in certain instances or make direct purchases from vendors. Transactions with government entities may be subject to challenges from time to time for a number of reasons. Government entities may have contractual or other legal rights to terminate contracts with our resellers for convenience or due to a default, and any such termination may adversely impact our future results of operations and cash flows. In addition, government demand and payment for our solutions may be affected by public sector budgetary cycles and funding authorisations, with funding reductions or delays adversely affecting public sector demand for our solutions. Additionally, government contracts are generally subject to government oversight which can result in various penalties and administrative sanctions, including termination of contracts, fines and suspensions or debarment from future government business.

30. *We do not own some of the offices from which we operate and have not yet completed execution and registration of lease documents in respect of several of our office premises and warehouses.*

Our Registered Office is located in Pune at premises owned by us. We also conduct our sales and marketing activities out of 64 offices and warehouses across 36 cities in India. While we own some of these premises, we also operate out of leased premises in some cities and towns. As of December 31, 2015, the Company conducted its sales and marketing activities out of 64 offices and warehouses out of which 20 are on premises owned by the Company and 44 are on leasehold premises.

In line with the continued growth in our business operations, we may, from time to time, lease additional office space. Out of the aforesaid 44 offices which are on leasehold premises, lease agreements for 36 offices have not been registered. Further, we are yet to execute a renewed lease agreement for our office premises in Rajkot. Accordingly, we may not be accorded legal protection in the event of any dispute pertaining such leased premises and may have to vacate the premises prior to the completion of the lease term and/ or may have to forfeit any security deposits paid for such premises. Further, we may not be able to obtain alternate office space in a timely manner and on similar terms or at all which may disrupt our business and divert management time affecting our financial condition, results of operations and cash flows.

31. *If our solutions do not effectively inter-operate with our users' existing or future IT infrastructures, installations could be delayed or cancelled, which would harm our business.*

Our solutions must effectively inter-operate with our users' existing or future IT infrastructures, which often have different specifications, utilise multiple protocol standards, are based on different platforms, deploy products from multiple vendors, use various devices, and contain multiple generations of products that have been added over time. If we find errors in the existing software or defects in the hardware used in our users' infrastructure or problematic or incompatible network configurations or settings, we may have to modify our software so that our solutions can effectively inter-operate with our users' infrastructure and business processes. In addition, to stay competitive within certain markets or to comply with new statutory or regulatory requirements, we may be required to make software modifications in future releases of our offerings. These issues could result in longer sales cycles for our solutions which may adversely affect our business, financial condition, results of operations and cash flows.

32. *We have identified a small portion of our revenue as coming from countries subject to U.S. and other sanctions. Such historical and future international sales expose us to special risks. If we are not in compliance with applicable legal requirements, we may be subject to civil or criminal penalties and other remedial measure.*

The U.S. Department of the Treasury's Office of Foreign Assets Control administers certain laws and regulations that restrict U.S. persons and, in some instances, non-U.S. persons, from conducting activities, transacting

business with or making investments in certain countries, regions, governments, entities and individuals subject to U.S. economic sanctions. The European Union, the United Nations and other organisations and countries also have sanctions regimes in place. Our Company has recorded sales in countries subject to U.S. and other sanctions, including Iran and Syria. Specifically, from time to time, our Company and certain of our Subsidiaries have sold solutions, through distributors or resellers, to individuals, companies and entities located in, or controlled by the governments of, certain countries that are or have previously been subject to sanctions imposed by the U.S. government and others. End users located in countries subject to sanctions may have also downloaded our solutions online. We have not identified aggregate sales to U.S.-, E.U.- or U.N.-sanctioned countries, governments, persons or organisations in an amount exceeding 0.5% of our total revenue in any completed fiscal year and do not expect such sales to exceed this level in the current fiscal year. However, we may not have completely identified, and we may continue to be unable to completely identify, all sales of our solutions to these countries, governments, regions, persons or organisations subject to sanctions.

Although we believe that we have been in compliance with all applicable sanctions laws and regulations, and intend to maintain such compliance, there can be no assurance that we will be in compliance in the future, particularly as the scope of certain laws may be unclear and may be subject to changing interpretations. Any such violation could result in fines, penalties or other sanctions that could prevent our ability to access U.S. and other international capital markets and conduct our business, and could result in some investors deciding, or being required, to divest their interest, or not to invest, in us.

33. *We depend on download sites and search engines to attract certain customers and if those sites or search engines change their listings, increase their pricing or experience a material reduction in their online traffic, our ability to attract new users would be adversely affected.*

In addition to our website, many of our users locate our solutions and our website online through download sites and search engines such as Google and Yahoo. If any of these key download sites cease to feature or carry our solutions, fewer potential customers may download our solutions. Search engines typically provide two types of search results — algorithmic and purchased listings — and we rely on both types. Algorithmic listings cannot be purchased and are determined and displayed based on criteria formulated by the relevant search engine. Search engines revise their algorithms from time to time in an attempt to optimise their search results. If the search engines on which we rely for algorithmic listings modify their algorithms in a manner that reduces the prominence of our listings, fewer potential users may click through to our websites, requiring us to resort to more costly methods of attracting this traffic. Furthermore, the majority of our traffic from search engines came from a single source, Google. This traffic is unrelated to our agreement with Google to steer search queries to Google in connection with our dynamic secure search solution. The concentration of search traffic from a single search engine increases our vulnerability to potential algorithm modifications by that search engine. Any failure to replace the traffic to our website coming from search engines could reduce our revenue or require us to increase our customer acquisition expenditures.

Similarly, we may in the future be the target of so-called “cybersquatters,” who seek to register Internet domain names that are confusingly similar to our own domains or marks. Although we have not suffered material losses due to cybersquatters to date, we nonetheless make diligent efforts to block their activities. In addition, although no cyber-squatting incidents have raised material security concerns relating to our business and solutions to date, there can be no guarantee that future cybersquatting incidents will not cause material losses or raise security concerns. If search engines rank cybersquatters’ imitation websites above our own sites, existing or potential customers may be misled, and this could harm our reputation, cost us customer goodwill and negatively affect our operating results.

34. *Our business may suffer if the SMB and enterprise market for our solutions proves less lucrative than projected or if we fail to effectively acquire and service SMB and enterprise customers.*

We market and sell our solutions to SMBs and enterprises and expect sales to such customers to drive our growth going forward. Some of our competitors, by contrast, have emphasised sales to larger enterprises, which are attractive customers due to the high revenue and low relative costs they offer per transaction and their low failure and high renewal rates. SMBs frequently have limited budgets and may choose to allocate resources to items other than our solutions, especially in times of economic uncertainty. However, we believe that the SMB market is under-served, and intend to continue to devote substantial resources to it. We aim to grow our revenue by adding new customers, selling additional solutions to existing customers and encouraging existing customers to renew their subscriptions to our solutions. If this market fails to be as lucrative as we project or we are unable to market and sell our services to such users effectively, our ability to grow our revenue quickly and remain profitable will

be harmed.

35. *Our insurance coverage may be inadequate to cover all possible economic losses and liabilities associated with our business.*

We maintain such insurance coverage as we believe is customary in our industry in India. We have taken insurance policies with various insurance companies covering certain risks in relation to our business and our people. We have obtained directors' and officers' liability cover. We also maintain a mediclaim policy for our employees, their spouses and their dependent children. We have also taken personal accident insurance cover for our employees.

Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We cannot assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. In particular, we do not maintain business interruption insurance and therefore if our operations are interrupted, we would suffer loss of revenues, and our results of operations and cash flows would be adversely affected. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, financial condition, results of operations and cash flows. For more details of our insurance coverage, see "*Our Business — Insurance*" on page 153.

36. *Our business operations may be disrupted by an interruption in power supply which may impact our business operations.*

We conduct our R&D activities primarily at our registered office in Pune and operate call centres in Pune, Nashik and Coimbatore. For more details of our call centres, see "*Our Business — Suppliers*" on page 153. Our operations require constant power supply and any disruption in the supply of power may disrupt our operations. While we try to ensure that all locations where we conduct R&D and other technical activities have power back-up, in the event of any continuous disruption, we may be required to arrange alternate sources of power. There can be no assurance that we will be able to make alternate arrangements, such as diesel generator sets, on acceptable terms or at all and may need to incur additional costs. Any continuous disruptions may have a material adverse effect on our business, financial condition, results of operations and cash flows.

37. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.*

Our business is subject to government regulations and we require certain approvals, licenses, registrations and permissions for operating our business, some of which may have expired and for which we may have either made or are in the process of making an application for obtaining the approval or its renewal. In addition, we may not be in compliance with certain conditions prescribed by such approvals or licences. Our failure to obtain such licences and approvals and comply with the applicable laws and regulations could lead to imposition of sanctions by the relevant authorities, including penalties. For example, we have not obtained shops and establishment registrations for our office premises in Ahmedabad, Surat, Pune, Kolkata, Chennai and Rajkot. For more information, see "*Government and Other Approvals - Approvals for which no application has been made*" on page 339.

Further, fresh and renewal applications for approvals, licenses, registrations and permissions for operating our business need to be made within certain timeframes. While we have made fresh applications for few approvals and licenses, we cannot assure you that we will receive these approvals in a timely manner or at all. Further, in future we will be required to apply for the renewal of approvals and permits for our business operations to continue. If we are unable to make applications and renew or obtain necessary permits, licenses and approvals on acceptable terms, in a timely manner or at all, we may be required to shut down or relocate our offices or warehouses and face other consequences due to which our business operations may be adversely affected.

38. *The objects of the Offer for which the funds are being raised have not been appraised by any bank or financial institutions. Further, the deployment of the proceeds from the Fresh Issue is at the discretion of our Company.*

The objects of the Offer have not been appraised by any bank or financial institution. The estimate of costs is based on quotations received from vendors and consultants, as well as based on internal management estimates. Though these quotes or estimates have been taken recently, they are subject to change and may result in cost escalation. Any change or cost escalation can significantly increase the cost of the objects of the Offer.

Hence, the deployment of the proceeds from the Fresh Issue will be at the discretion of our Company. Proceeds from the Fresh Issue, pending utilisation (for the stated objects) shall be deposited only with scheduled commercial banks included in the Second Schedule of Reserve Bank of India Act, 1934

39. *We have not entered into definitive agreements to use the proceeds of the Fresh Issue.*

We intend to use the Net Proceeds as set forth in the section “*Objects of the Offer*” on page 103. We have not entered into definitive agreements for certain objects of the Offer to utilise the Net Proceeds. We have relied on third party quotations to calculate the expected amount of the Net Proceeds to be spent on property, furnishing and office and R&D infrastructure (“*Assets*”). We cannot confirm when we will place our orders and whether we will be able to purchase the Assets at the same price at which we obtained the quotations. Consequently, these estimates may be inaccurate and we may require additional funds to implement the objects of the Offer.

40. *Any delay in the schedule of implementation for Net Proceeds may have an adverse impact on our profitability.*

Our schedule of implementation for the use of Net Proceeds may be affected by various risks, including time and cost overruns as well as factors beyond our control. Any delay in our schedule of implementation may cause us to incur additional costs. Such time and cost overruns may adversely impact our business, financial condition, results of operations and cash flows. For details of our current schedule of implementation, see “*Objects of the Offer*” on page 103.

41. *Our international operations may expose us to complex management, foreign currency, legal, tax and economic risks. These risks may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.*

We operate through our Subsidiaries in Japan, Kenya, Dubai and the United States and are also exploring opportunities in Africa (with special focus to South Africa), the Middle East (including United Arab Emirates) and South East Asia. As a result of our existing and expanding international operations, we are subject to risks inherent to establishing and conducting operations in international markets, including:

- cost structures and cultural and language factors associated with managing and coordinating our international operations, including establishing new relationships with channel partners;
- compliance with a wide range of regulatory requirements, foreign laws, including immigration, tax laws where we usually rely on the opinions of experts on such matters, including in relation to transfer pricing norms and applicability of the relevant provisions of double taxation avoidance agreements, but which often involve areas of uncertainty;
- difficulty in staffing and managing foreign operations;
- potential difficulties with respect to protection of our intellectual property rights in some countries; and
- Indian regulations and restrictions on export and import of solutions.

The risks stated above and the constantly changing dynamics of international markets could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Further, our exposure to foreign currency risk arises in respect of our non-Indian Rupee-denominated trade and other receivables, trade payables, and cash and cash equivalents. While our presentation and functional currency

is the Indian Rupee, we have trade receivables and trade payables denominated in other foreign currencies such as the U.S. dollar, the Japanese Yen, the Kenyan Shilling and the UAE Dirham. Any fluctuation in the value of the Indian Rupee may affect our results of operations and cash flows.

42. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm our financial condition and operating results.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through wholly owned subsidiaries, or through tie-ups, acquisitions, strategic alliances, partnerships or joint ventures across countries and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and speaking to several potential partners, we have not entered into any definitive agreements in relation to this. Further, the identification of suitable acquisition candidates can be difficult, time-consuming and costly, and we may not be able to successfully complete acquisitions that we target in the future. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and sales and marketing functions and the diversion of management time and focus from operating our business to addressing acquisition integration challenges.

Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could cause us to fail to realise the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

43. *This Red Herring Prospectus contains information from an industry report which was prepared by Zinnov Management Consulting pursuant to an engagement with our Company.*

44. *We have a number of contingent liabilities, and our profitability could be adversely affected if any of these contingent liabilities materialise.*

45. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows and working capital requirements.

Our Board of Directors will be guided by our dividend policy. For details, see “*Dividend Policy*” on page 190. We may be unable to pay dividends in the near or medium term, and the future dividend payout will depend on our planned capital expenditures and working capital requirements, financial condition, results of operations and cash flows.

46. We have in the past entered into related party transactions and may continue to do so in the future and there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.

In the ordinary course of our business, we have entered into transactions with related parties that include our Promoters and certain members of the Promoter Group and Group Companies. These transactions primarily relate to financial consultancy, payment of rent for property leased by our Company from our Promoters, reimbursement of expenses and remuneration.

While we believe that all related party transactions that we have entered into are legitimate business transactions conducted on an arms’ length basis, there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Furthermore, it is likely that we will continue to enter into related party transactions in the future. There can be no assurance to you that any future related party transactions that we may enter into, individually or in the aggregate, will not have an adverse effect on our business, financial condition, results of operations and cash flows. Further, any future transactions with our related parties have involved or could potentially involve conflicts of interest which may be detrimental to our Company. For further details regarding our related party transactions, see “*Related Party Transactions*” as disclosed on page 189.

The show cause cum demand notice is in relation to applicability of service tax on anti-virus software on CDs supplied by our Company through distributors.
- Additionally, our Company has filed two appeals before the relevant income tax appellate authorities challenging the income tax assessment orders for the assessment years 2010-2011, 2012-2013 and has filed two appeals before the relevant appellate authorities challenging VAT assessment orders for the assessment years 2012-2013 and 2014-2015.

These tax proceedings are at various stages of adjudication and are currently pending. In the event of any adverse outcome in any of these proceedings, we may be required to pay the disputed amounts along with applicable interest and penalty and may also incur additional tax incidence going forward. Further, we may also be required to obtain additional registrations from the relevant authorities in India, including for our sales branches. Any such outcome may individually, or in the aggregate, have an adverse effect on our business, financial condition, results of operations and cash flows.

48. *There is outstanding litigation against our Company, our Promoters and our Directors. An adverse outcome in any of these proceedings may affect our reputation and standing and impact our future business and could have a material adverse effect on our business, financial condition, results of operations and cash flows.*

As on the date of this Red Herring Prospectus, we are involved in certain civil and criminal legal proceedings which are pending at different levels of adjudication before various courts, tribunals, forums and appellate authorities. We cannot assure you that these legal proceedings will be decided in our favour. Decisions in proceedings adverse to our interests may have a significant adverse effect on our business, financial condition, results of operations and cash flows.

We are also involved in various tax proceedings including alleged non-payment/short payment of VAT, service tax and income tax. These tax proceedings are at various stages of adjudication and are currently pending. In the event of any adverse outcome in any of these proceedings, we may be required to pay the disputed amounts, along with applicable interest and penalty, and may also incur additional tax incidence going forward. Any such outcome may individually, or in the aggregate, have an adverse effect on our business, financial condition, results of operations and cash flows.

**The details in the table only includes litigation proceedings as identified by the Company pursuant to its materiality policy on litigation.*

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities. For further details, see “*Outstanding Litigation and Material Developments*” on page 330.

49. While we will not receive any proceeds from the Offer for Sale, certain of our Promoters, who are also Selling Shareholders, will receive proceeds from the Offer for Sale.

The Offer comprises of the Fresh Issue and the Offer for Sale by the Selling Shareholders. The entire proceeds from the Offer for Sale will be paid to the Selling Shareholders, which include some of our Promoters, and our Company will not receive any proceeds from the Offer for Sale. For further details, see “*Objects of the Offer*” on page 103.

50. The interests of our Promoters may conflict with our interests or with the best interests of our other shareholders.

After the completion of the Offer, our Promoters will own, approximately [●]% of our post-Offer paid-up equity share capital. As a result, our Promoters will continue to exercise significant control over us, including being able to determine the outcome of director elections and decisions requiring a majority of the total voting power of our shareholders. The interests of our controlling shareholders may conflict in material aspects with our interests or with the best interests of our other shareholders and our controlling shareholders may not take decisions in our best interests. We cannot assure that our Promoters will exercise their voting rights in a manner that would be for the benefit of, or in, the best interests of our Company. For example, they could, by exercising their powers of control, delay or defer a change of control or a change in our capital structure, delay or defer a merger, consolidation, takeover or other business combinations involving us, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us even if such an event were to be beneficial for our shareholders. As a result, the value of your Equity Shares may be adversely affected or you might be deprived of a potential opportunity to sell your Equity Shares at a premium.

External Risks

51. We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could adversely affect our business.

The Competition Act, 2002, of India, as amended (“**Competition Act**”) regulates practices having an appreciable adverse effect on competition (“**AAEC**”) in the relevant market in India. Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an AAEC is considered void and results in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, shares the market by way of geographical area or number of guests in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC in the relevant market in India and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise.

We are not currently party to any outstanding proceedings, nor have we received notice in relation to noncompliance with the Competition Act or the agreements entered into by us. However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations and cash flows.

52. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards. In addition, all income-tax assesses in India, including our

Company, will be required to follow the Income Computation and Disclosure Standards.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”). These “IFRS based / synchronised Accounting Standards” are referred to in India as Ind AS. The Ministry of Corporate Affairs, Government of India, has through a notification dated February 16, 2015, set out the Ind AS and the timelines for their implementation. Accordingly our Company is required to prepare their financial statements in accordance with Ind AS from April 1, 2017. Given that Ind AS is different in many respects from Indian GAAP under which our financial statements are currently prepared, our financial statements for the period commencing from April 1, 2017 may not be comparable to our historical financial statements.

There can be no assurance that the adoption of Ind AS will not affect our reported results of operations or cash flows. In addition, our management may also have to divert its time and other resources for the successful and timely implementation of Ind AS. Any failure to successfully adopt Ind AS may have an adverse effect on the trading price of our Equity Shares and/or may lead to regulatory action and other legal consequences. Moreover, our transition to Ind AS reporting may be hampered by increasing competition and increased costs for the relatively small number of Ind AS-experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Any of these factors relating to the use of Ind AS may adversely affect our financial condition, results of operations and cash flows.

Further, the Ministry of Finance has issued a notification dated March 31, 2015 notifying 10 Income Computation and Disclosure Standards (“ICDS”), thereby creating a new framework for the computation of taxable income. The ICDS came into force with effect from April 1, 2015 and shall apply to the assessment year 2016-17 and subsequent assessment years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. For example, where ICDS-based calculations of taxable income differ from Indian GAAP or Ind AS-based concepts, the ICDS-based calculations will have the effect of requiring taxable income to be recognised earlier, higher overall levels of taxation to apply or both. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for Minimum Alternate Tax.

The application and interpretation of the ICDS by assessing authorities may differ substantially from our interpretation, and such variations could lead to additional tax demands. It is also possible that the resultant computation of taxable income based on the ICDS and net income based on our Company’s financial statements may be significantly different, and, if they differ, we may be required to recognise taxable income for tax purposes earlier and/or pay higher overall taxes, thus either negatively impacting our effective tax rates, or the amount of taxes paid out relative to the income reported by the relevant accounting standards. This may lead to tax outflows happening in accounting periods earlier relative to the period when these incomes would get reported under the relevant accounting standards.

53. There are no standard valuation methodologies or generally accepted accounting practices or standard of measure of the information technology and related industries.

There are no standard valuation methodologies or generally accepted accounting practices or standard of measure of the IT and related industries. Consequently, any comparison of our Company with other companies engaged in similar businesses may not provide investors with meaningful information, comparisons or analysis. Current valuations may not be reflective of future valuations within the information technology industries as our business is not meaningfully comparable with businesses in these industries. Our investors may therefore not be able to accurately assess and measure the value of our business factoring in the effectiveness of our solutions, and our potential for growth.

54. It may not be possible for investors outside India to enforce any judgement obtained outside India against our Company or our management or any of our associates or affiliates in India, except by way of a suit in India.

Our Company is incorporated as a public limited company under the laws of India and most of our Directors and senior management reside in India. Further, most of our assets, and the assets of our senior management and Directors, are located in India. As a result, it may be difficult to effect service of process outside India, including in the United States, upon us, our senior management and our Directors or to enforce judgments obtained in courts outside India against us or our senior management and Directors, including judgments predicated upon the civil

liability provisions of the securities laws of jurisdictions outside India, including without limitation United States federal securities laws.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, Singapore and Hong Kong. The United States has not been declared as a reciprocating territory for the purposes of the Civil Code and thus a judgement of a court outside India may be enforced in India only by a suit and not by proceedings in execution. In order to be enforceable, a judgement from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the “**Civil Code**”). The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties and does not include arbitration awards. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgement for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgement in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. The suit must be brought in India within three years from the date of the foreign judgement in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgement rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with public policy in India. In addition, any person seeking to enforce a foreign judgement in India is required to obtain prior approval of the RBI to repatriate any amount recovered pursuant to the execution of the judgement.

55. *The occurrence of natural or man-made disasters could adversely affect our financial condition, results of operations and cash flows.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism, military actions, civil unrests and other acts of violence or war in India and around the world, could adversely affect our business, financial condition, results of operations and cash flows, including in the following respects:

- A natural or man-made disaster, could result in damage to our assets or losses in our projects, or the failure of our counterparties to perform, or cause significant volatility in global financial markets.
- Pandemic disease, caused by a virus such as H5N1, the “avian flu” virus, the Ebola virus, or H1N1, the “swine flu” virus, could have a severe adverse effect on our business.
- Political tension, civil unrest, riots, acts of violence, situations of war or terrorist activities may result in disruption of services and may potentially lead to an economic recession and/or impact investor confidence.

India has, from time to time, experienced instances of civil unrest and political tensions and hostilities in some parts of the country and among neighbouring countries. Such political and social tensions could create a perception that investment in Indian companies involves higher degrees of risk could have a possible adverse effect on the Indian economy, future financial performance and the trading prices of our Equity Shares.

56. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely impact the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI’s prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all. In addition, due to possible delays in obtaining requisite approvals, investors in our Equity Shares may be prevented from realising gains during periods of price increase or limiting losses during periods of price decline. Please see “*Restrictions on Foreign Ownership of Indian Securities*” on page 412.

57. *Fluctuations in the exchange rate of the Indian Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our financial results.*

The Equity Shares will be quoted in Indian Rupees on the BSE and the NSE. Any dividends in respect of the Equity Shares will be paid in Indian Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the net proceeds received by shareholders.

58. *Changing laws, rules and regulations and legal uncertainties in India, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. Please see “*Regulations and Policies*” on page 155 for details of the major laws currently applicable to us in India.

There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition, results of operations and cash flows. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially adversely impact our results of operations and cash flows.

For instance, the government has proposed a comprehensive GST regime that will combine taxes and levies by the central and state governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable. The Finance Act, 2015 received presidential assent, whereby certain changes have been announced in relation to various tax legislations. The changes introduced, include, hike in service tax rates, changes to Cenvat Credit Rules, 2004, changes in excise duty rates and amendments to the Customs Act, 1952 and we cannot predict the impact of the changes introduced in Finance Act, 2015 on the business, financial condition, results of operations and cash flows.

59. *The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.*

The Offer Price of the Equity Shares will be determined by our Company and the Selling Shareholders in consultation with the BRLMs through the Book Building Process. This price will be based on numerous factors, as described in section “*Basis for Offer Price*” on page 113 and may not be indicative of the market price for the Equity Shares after the Offer. The market price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Offer Price.

60. *Any future issuance of Equity Shares by us may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares or securities linked to Equity Shares by us may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares.

61. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a

stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (“STT”) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of equity shares held for more than 12 months, which are sold other than on a recognised stock exchange and on which no STT has been paid to an Indian resident, will be subject to long term capital gains tax in India at a relatively higher rate as compared to a transaction where STT has been paid in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

62. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

63. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in the Company may be reduced.

64. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Red Herring Prospectus.*

The financial statements included in this Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS. Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

65. *There is no existing market for our Equity Shares, and a market with adequate liquidity may not develop. Our stock price may fluctuate after the Offer and, as a result, you may lose a significant part or all of your investment.*

Prior to the Offer, there has been no public market for our Equity Shares. Listing and quotation does not guarantee that a market for our Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. In addition, immediately after the Offer, only [●]% of our share capital will be available for trading on the

stock exchanges. The trading price of our Equity Shares may fluctuate after the Offer due to a wide variety of factors, including:

- volatility in the Indian and global securities market or in the Indian Rupee's value relative to the U.S. dollar or the Euro;
- our results of operations, cash flows and performance;
- perceptions about our future performance or the performance of companies in our industry generally;
- performance of our competitors and the perception in the market about investments in our sector;
- significant developments in the regulation of IT industry in our key markets;
- adverse media reports on our Company or the Indian IT industry;
- changes in the estimates of our performance or recommendations by financial analysts;
- significant developments in India's economic liberalisation and deregulation policies; and
- significant developments in India's fiscal and environmental regulations.

66. *There is no public market for our Equity Shares outside India.*

After the Offer, there will be no public market for our Equity Shares in the United States, the United Kingdom or any country other than India. The Offer Price will be determined by the Company and the Selling Shareholders in consultation with the BRLMs and we cannot assure you that the Offer Price will correspond to the price at which the Equity Shares will trade subsequent to the Offer. Our outstanding Equity Shares may be sold in the United States only pursuant to a registration statement under the Securities Act or an exemption from the registration requirements of the Securities Act. This may also affect the liquidity of the Equity Shares and restrict your ability to sell them. Certain of the Equity Shares are "restricted securities" within the meaning of Rule 144(a)(3) under the Securities Act and may not be sold publicly within the United States.

The Equity Shares to be offered and sold in the United States pursuant to an exemption from registration are "restricted securities" within the meaning of Rule 144(a)(3) under the Securities Act. Restricted securities may not be sold publicly within the United States (although the Equity Shares may be sold to other qualified institutional buyers (as defined in Rule 144A) pursuant to Rule 144A resales) unless they are registered under the Securities Act or sold pursuant to Rule 144 or another exemption from registration. Prospective investors are urged to consult with their own legal advisors regarding any contemplated investment in the Equity Shares, including in relation to compliance with applicable resale restrictions.

67. *Your ability to acquire and sell our Equity Shares in jurisdictions outside India is restricted by the distribution and transfer restrictions contained herein.*

No actions have been taken to permit a public offering of the Equity Shares in any jurisdiction except India. As such, the Equity Shares have not and will not be registered under the Securities Act, any state securities laws or the law of any jurisdiction other than India. Furthermore, the Equity Shares are subject to restrictions on transferability and resale. You are required to inform yourself about and observe these restrictions. We, our representatives and our agents will not be obligated to recognise any acquisition, transfer or resale of the Equity Shares made other than in compliance with the restrictions contained herein. SECTION III: INTRODUCTION

SUMMARY OF INDUSTRY

India - The Value Proposition

India is emerging as a significant market for security services and products as organisations across various verticals are now investing in building a robust security infrastructure. With the increase in adoption of smart devices, organisations in India have become particularly vulnerable. With the rise in IP traffic and data growing at a rapid speed, networks are being threatened like never before. The new threat landscape has taken many shapes and definitions. The weakest link in the security apparatus is an employee with access to organisational systems through his own device. These threats are commonly attached with the concept of Bring Your Own Device. IT security issues on cloud environments have almost reached the same level as attacks on traditional IT, with increased adoption of cloud-based services by the enterprise. Securing critical data in the cloud, even a private cloud, can pose serious security risk when moving data and applications from conventional enterprise data centres into cloud environments, especially public clouds. Even in private clouds, financial organisations face increased risks posed by having multiple data sets and applications sharing the same physical services.

In 2013, the IT security market was valued over ₹5,000 Crore, due to the rapid adoption of IT security solutions and services by enterprises of all sizes, this value is expected to grow by 12% to reach ₹6,600 Crore in 2015, with hardware, software and services making up 20%, 23% and 57% of the share respectively.

IT Penetration in India

As of June 2015, India has over 350 million Internet users and is the second largest user base in the world. By 2017, this number is expected to reach an impressive 500 million, but a poor penetration rate (A measure of amount of sales or adoption of a product or service compared to the theoretical market for that product or service) of 19% (approx.) limits the potential. The adoption of mobile Internet is expected to drive the growth of Internet penetration. Urban areas in India have “number of wireless telephone connections” for every hundred individuals living within an area- of 142.39%, the same number for the rural area was only 44.32%, as of September 2014.

Users accessing the Internet through their mobile devices have become a key driver for the increase in overall Internet subscriber base in the country. As of February 2015, only 13% of subscribers in India were using 3G and 4G networks. Based on Cisco’s 2014 VNI Mobile Forecast, India is at the lower-end of global use of data, in that mobile users average 149 MB per month, this data average is reflective of conditions where, 47% of network capacity is driven by streaming audio and video and 15.3% of connections are via smartphones. The increase in Internet users is mainly driven by a significant growth in smartphone subscription in India that witnessed a growth of 55% to reach 140 million subscriptions for the year. Smartphones account for around 15% of the total mobile subscriptions in India and 11% of Indian population is smartphone users as on now. 65% of India’s Internet traffic as of May 2015 was driven by mobile.

Need for IT Security

The number of cyber-attacks in India was nearly 50,000 during the first five months of 2015. The trend in increase in cyber-attacks is similar to that worldwide. A total of 27,605 and 28,481 websites were hacked during the year 2012 and 2013, respectively in India. In the year 2014 and 2015 (up to May), the number was 32,323 and 9,057, respectively. India is also in the Top 10 countries with the largest number of reported attacks involving Trojans capable of sending SMS to premium short numbers.

Cyber security threats today have become increasingly sophisticated and complex. Organisations, however, have not been able to evolve at the same pace. As organisations move ahead and embrace new technologies without fully comprehending the implications these have on the entire enterprise, they are rendering themselves vulnerable to an array of cyber security threats. The need for securing the IT infrastructure has been of prime importance for many organisations. While threats like malware / virus / phishing / trojans continue to pose a threat, organisations as well as individuals have plenty of options to secure their offices and homes from such attacks. The cyber security market is currently undergoing unprecedented growth and development due to a wide variety of internal and external factors.

SMB Landscape:

India is currently home to 51 million SMBs, employing over 40% of India’s workforce amounting to about 116 million people. The SMB sector contributes 38% of the national gross domestic product and comprises 40% of India’s total exports. In terms of technology adoption, SMB’s are likely to spend around ₹71,300 crore in 2015

on IT products like Social, Mobility, Analytic and Cloud (SMAC) etc. By 2020 this expenditure is expected to rise to ₹154,800 crore with a CAGR of over 16%.

Out of the base of 51 million SMBs, around 12 million have high degree of technology influence and are looking to adopt new IT products.

As of December 31, 2015, we have over 19,000 retail channel partners, 349 enterprise channel partners, 319 government partners and 944 mobile channel partners, who act as the distributors and resellers of our solutions, and we conduct our sales and marketing activities out of 64 offices and warehouses across 36 cities in India. As of December 31, 2015, our Sales & Marketing team comprised 400 employees who work closely with our channel partners.

We are not dependent on a single or small group of channel partners for the distribution of our solutions, and seek to establish and maintain collaborative relationships with various channel partners. We believe that the distribution reach and selling capabilities of our extensive channel partner network will continue to drive our business growth and provide us a competitive advantage in the market as well as serve as a barrier to entry for new entrants. In order to maintain a healthy relationship with our channel partners and coordinate business development activities effectively, we host regular meetings with our channel partners to discuss the challenges encountered by them, and find suitable solutions. These solutions are aimed at enhancing overall channel partner satisfaction and may address issues like pricing, our channel partner rewards system, end user satisfaction and business development policies. We believe these meetings foster effective dialogue between our channel partners and us, and among the channel partners themselves, increase channel partner satisfaction and retention, and enhance our understanding of users' requirements as well as improve our market intelligence. We often organise and attend industry conferences and organise technical training programmes for our channel partners that provide support tools including lead generation support. For more details on our channel partners, please see "*Our Business— Sales*

and Distribution” on page 148.

Significant R&D and Technology Capabilities

We believe our R&D and technology capabilities represent our core competency and a key competitive advantage.

Our R&D division consists of various teams including Threat Research & Response team, Business Logic team, Development team, Incidence Response team, IoT security team and the Quality Assurance team, all of which have specific pre-defined roles, and enable us to comprehensively integrate and manage the entire R&D value chain from conceptualisation, design and prototyping, to testing, development and commercial release. We have devoted considerable resources to R&D, including our investment in anti-ransomware technology, behavioural detection system as well as antivirus technology for mobiles and tablets.

The technology used in our solutions is typically developed in-house, though we may license certain technology or other software and integrate that with our solutions as well. We have been granted four patents in the United States and have one pending patent application in the United States. Further, we have five pending patent applications in India, of which two have been published, which relate to various aspects of our products and technology. For example, our Advanced DNAScan technology uses behaviour-based detection method to determine whether a computer program is malicious or not based on its behavioural characteristics. It is effective against latest and emerging threats, and protects users against zero-day attacks. For instance, the recently discovered “CryptoLocker” family uses various advance obfuscation techniques to evade detection. Quick Heal’s behaviour detection module successfully detects and blocks most of these “CryptoLocker” samples. Our various solutions are available across a wide range of platforms such as Windows, Mac, Linux, Android and iOS. In line with our continued focus on R&D, we have introduced several solutions aimed at our enterprise customers such as gateway virus content filtering and advanced firewall. We are also working on IoT security and home automation security systems.

In fiscal years 2015, 2014 and 2013, we expensed ₹ 459.54 million, ₹ 312.07 million and ₹ 196.87 million, respectively, on R&D-related expenses, which formed 16.06%, 12.85% and 9.60%, respectively, of our revenue from operations (net) in these years. For the six months period ended September 30, 2015, we expensed ₹290.22 million on R&D-related expenses which formed 19.59%, of our revenue from operations (net) in this period. Our in-house R&D team comprised 547 employees, which was 39.18% of our total employees, as of December 31, 2015. Among them, 221 had obtained master’s or higher degrees, and 326 had obtained bachelor’s degrees or other degrees.

In addition, we believe the strength and entrepreneurial vision of our Promoters and senior management has been instrumental in driving our growth and implementing our strategies. Our Managing Director and Chief Technical Officer, Sanjay Sahebrao Katkar, is a qualified computer engineer and heads our R&D and innovation efforts.

In addition, we have an experienced and qualified team of employees. We believe our position as a leading provider of security solutions for detecting, preventing and resolving advanced security threats represents a significant competitive advantage in attracting and retaining high-quality talent. Our personnel policies are also aimed towards recruiting qualified and talented individuals, facilitating their integration into our Company, providing a conducive work environment, and promoting the development of their skills, including through in-house and external training programmes. For details, see the section “*Management*” on page 168.

Further, we achieved Gross Margins of 91.65%, 91.09%, 92.13% and 92.38%, EBITDA Margins of 29.69%, 32.09%, 42.98% and 51.30% and restated profit for the year (period) margins of 16.35%, 18.81%, 24.04% and 37.51% for the six months period ended September 30, 2015 and fiscal years 2015, 2014 and 2013, respectively.

As of September 30, 2015, we had current investments totalling ₹ 959.49 million which comprised investments in mutual funds (quoted), and cash and bank balances of ₹ 105.21 million.

Strategies

Our aim is to satisfy our end users, by developing compelling, differentiated and cutting-edge solutions that optimise and secure their IT data systems and assets.

Retain and Expand our User Base

We have a large home user base and are actively working to increase our presence in the SMB, enterprises, educational institutions and government customers market. We have separate internal teams that are focused on SMB and enterprise users, educational institutions and government customers. These teams help us in identifying opportunities and lead generation. The number of active licenses installed by our users has increased from 2.5 million as of March 31, 2011 to 7.13 million as of December 31, 2015.

We expect to continue to develop our offerings by adding features and functionalities tailored towards the SMB and enterprise customer segment, such as security and other functionality delivered on demand, or through a software-as-a-service model. We believe that there are significant opportunities in this segment, as these customers may often have little-to-no internal IT support, making them reliant on third-party solutions that are cost effective, high quality and easy to use.

We are working to actively expand the number of channel partners we work with, especially in so-called tier II and tier III cities and towns across India, so as to enhance our geographic penetration and sales in newer towns and cities to leverage the growth opportunities offered by them. We also intend to pursue additional customer acquisition strategies and to increase our sales and marketing efforts to further build brand awareness and accelerate the growth of our customer base. In addition, we expect to invest significantly in building our brand through advertising and sales promotion and intend to deploy ₹ 1,110 million from the Net Proceeds for this purpose. For details, please see “*Objects of the Offer — Advertising and Sales Promotion*” on page 104.

Grow our SMB and Enterprise Business

In fiscal year 2015, we introduced the “Seqrite” range of solutions especially aimed at our SMB and enterprise customers. According to the Zinnov Industry Report, there are nearly 51 million SMBs in India and these employ over 40% of India’s workforce amounting to about 116 million people. The SMB sector contributes to 38% of the national gross domestic product and comprises 40% of India’s total exports. In terms of technology adoption these SMBs are likely to spend around ₹ 71,300 crore in the year 2015 on IT products. By 2020 this expenditure is expected to rise to ₹ 154,800 crore with a CAGR of over 16%.

As IT adoption is on the rise among SMBs and enterprises, we see a greater need for security software solutions. Thus, we believe there exist significant opportunities for us to expand this business across India. We aim to

leverage our existing infrastructure, channel partner relationships and market knowledge to provide solutions to such customers and are working closely with our enterprise channel partners to identify and target new SMB and enterprise accounts. We have set up a new sales team internally to exclusively focus on SMBs and enterprises, and in this space, we plan to mainly focus on manufacturing companies, banking, financial and insurance (BFSI) companies, healthcare, hospitality, educational institutions, government customers, emerging e-commerce companies and other services companies. We also intend to focus on SMBs and enterprises in certain geographies internationally such as the United States and Japan, respectively. As of December 31, 2015, we work with 349 enterprise channel partners and 319 government partners and are expanding our sales and distribution reach. We also have an internal team dedicated to identifying new opportunities among SMBs and enterprises which works closely with the dedicated sales team.

Pursue International Growth Opportunities

We are an established company with a proven track record of successful operations in India for over two decades. As of December 31, 2015, we sold our solutions globally and had end users in more than 80 countries. We believe that there exist substantial opportunities to grow our business internationally, especially our SMB and enterprise business. We have been focused on international expansion in recent years and in fiscal year 2012 we opened offices in the United States, in Japan in fiscal year 2013 and in Kenya and Dubai in fiscal year 2014, and expect to expand these offices in the near to medium term. We intend to mainly focus on SMB and enterprise customers in certain geographies internationally such as the United States and Japan. Further, we intend to mainly focus on the home user market in Kenya and Dubai, and may expand into the SMB and enterprise customers market in the future in these geographies. We may further invest in expanding our footprint in Africa (with a special focus on South Africa), the Middle East (including the United Arab Emirates) and South East Asia in the near to medium term. We have, in the past, explored and continue to explore opportunities on our own, through wholly owned subsidiaries, or through tie-ups, acquisitions, strategic alliances, partnerships or joint ventures in these countries and regions. While we are currently evaluating opportunities and speaking to several potential partners, we have not entered into any definitive agreements in relation to this.

We have recently entered into a preliminary term sheet to form a new company for a joint venture to distribute, sell and market our offerings in South Africa. We expect the other party to provide local market insight and currently propose to structure the joint venture company with us as a majority partner. We are currently engaged in legal and financial negotiations and we cannot assure investors that we will proceed with this investment in a timely manner, or at all.

For the six months period ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, we derived 2.66%, 2.69%, 2.36% and 2.17%, respectively, of our total revenue outside India. We plan to continue to market our products and solutions to users located outside India by investing in brand building and advertising and marketing activities in those geographies. Further, we also intend to expand our international sales and distribution network, by increasing the number of experienced sales personnel across geographies and are also working to augment the number of channel partners to strengthen our distribution network. Our R&D team is also focused on customising and localising our solutions to better address the needs of users in various international markets. For example, our solutions for home users are available in several major international languages such as Japanese, Spanish, Polish, Arabic and Italian.

Strengthen our R&D Capabilities and Broaden our Portfolio of Solutions

The security software industry is characterised by continuous advancement in technology. To maintain and advance our position in the market, we intend to continue to strengthen our R&D capabilities, which shall enable us to innovate and develop solutions with the latest technology for existing and upcoming platforms. In addition to continued R&D and technology investments in development of new solutions, we may pursue acquisitions of, or investments in, or licensing of, technologies that complement our portfolio. In our continuing effort to strengthen our R&D abilities, we propose to utilise ₹ 418.80 million of the Net Proceeds towards funding our capital expenditure for R&D activities. For more details, see “*Objects of the Offer — Capital expenditure on research and development*” on page 106.

We believe we have built a strong reputation and brand name in the data security and cyber security industry and most importantly, with our end users, for continuous innovation and technological advances. Our objective is to continue to enhance and broaden our portfolio of solutions to address our customers’ evolving needs, ultimately driving greater customer growth, increased retention and revenue from new customer adoption. As of December 31, 2015, we had been granted four patents in the United States, have one pending patent application in the United

States and have five pending patent applications in India, of which two have been published, which relate to various aspects of our products and technology and are currently working on developing new solutions towards applications like IoT and home automation security solutions.

We had entered into a preliminary term sheet with an entity that is engaged in developing technology for home automation to make an investment not exceeding ₹ 60 million in this entity. We have recently signed definitive documents to proceed with this investment.

Expand our Capabilities for Smartphones/ Mobile Devices

The proliferation of smartphone/ mobile devices has created a diverse computing environment for users. We already offer several solutions, both free and paid, for mobile devices and intend to develop additional solutions that deliver functionality currently available for our desktop and laptop users to mobile devices, particularly smartphones and tablets. For example, we have entered into agreements with certain distributors of branded mobile phones whereby our Quick Heal mobile antivirus solution is offered by these distributors bundled with smartphones sold by them. In addition to mobile security solutions, we are also focussing on insurance for mobile phones. We have entered into an agreement with an insurance company regulated by the Insurance Regulatory and Development Authority (IRDA) and through our product, Quick Heal Gadget Securance, offer a mix of mobile security and handset insurance. In addition to security against viruses and malware, this product provides insurance cover against theft, burglary and physical, liquid and fire damage. We have an agreement with an IRDA regulated insurance broker that has enabled us to design the insurance scheme and implement it in accordance with IRDA guidelines. This insurance broker also handles claims processing and payments for admissible claims, for damages, theft and loss in accordance with the terms of the insurance scheme.

Our solutions are currently available for the Android, Windows, Linux, iOS and Blackberry platforms. As of December 31, 2015, we had more than 1.1 million active licenses for our mobile solutions. We currently offer a freemium product under the brand name Fonetastic Free, and believe there may be opportunities in the future to monetise some of our free solutions for mobile devices.

Annexure to statutory auditor's report for the Financial Year ended March 31, 2014

In the opinion of the statutory auditor and according to the information and explanation given to the statutory auditors and having regard to the explanation that purchase of items of inventories and fixed assets of proprietary and specialised nature, for which alternative sources were not available to obtain comparable quotations, the internal control system over timely update of customer and vendor records in the system, as well as obtaining customer purchase orders and delivery acknowledgements with respect to sale of inventory items was required to be further strengthened. In the opinion of the statutory auditor, this is a continuing failure to correct major weakness in the internal control system. Subsequent to the year end, the management had taken adequate steps to strengthen the internal controls and was in the process of further updating the customer and vendor records and strengthening the process of customer purchase orders and delivery acknowledgements with respect to sale of inventory items. However, in the opinion of the statutory auditor and according to the information and explanations, given to the statutory auditor, there was adequate internal control system commensurate with the size of the Company and the nature of its business for the purchase of fixed assets.

The statutory auditor indicated that undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, wealth-tax, service tax, customs duty, excise duty, cess and other material statutory dues had generally been regularly deposited with the appropriate authorities though there had been a slight delay in few cases with respect to tax deducted at source. As informed, the Company did not have any dues towards investor education and protection fund during the year.

The statutory auditor indicated that, according to the records of the Company, the dues outstanding of income-tax, sales-tax, wealth-tax, service-tax, customs duty, excise duty and cess which have not been deposited on account of dispute, are as follows:

Nature of statute	Nature of dues	Amount (₹ in million)	Period to which the amount relates	Forum where dispute is pending
Income Tax Act, 1961	Tax on account of Valuation of closing stock	1.75*	FY 2009-10	Commissioner of Appeal

*Net of amount paid under protest ₹ 1.75 million

The statutory auditor indicated that they had been informed by the management that during the year under audit the Company noted that an employee of the Company had abused his position of responsibility and had committed a fraud on the Company by approving sales invoices with differential pricing terms amounting to ₹ 11.43 million in violation of the policies of the Company in respect of sales made to certain companies. The statutory auditor further reported that trade receivables amounting to ₹ 18.37 million with respect to such companies were outstanding as at the year end which was fully provided for. On internal investigation by the Company, the concerned employee was dismissed and appropriate legal action had been initiated by the management.

Management response

The Company has taken account of the auditor's emphasis of matter and qualifications under CARO, 2003, and appropriate actions have been taken as follows:

1. The auditors have opined that the internal controls relating to purchase orders and delivery acknowledgements needs to be strengthened. Subsequent to this, the Company has strengthened these processes, by
 - a. conducting educational training to its employees relating to internal control, statutory payments and record-keeping, at the corporate and branch levels;
 - b. increasing the scope of review of branches and logistics operations in the internal audit programme;
 - c. review by senior management on a regular basis; and
 - d. additional cross-checking by inter-branch or third party personnel covering revenue initiation and customer validation, to address potential misuse of authority

As regards the tax dues unpaid, these were under dispute, and our Company's appeals were pending before competent authorities. Appropriate action would be taken based on the order passed by competent authorities in the appeals filed by the Company.

Illustration of Book Building and Price Discovery Process *(Investors should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes bidding by Anchor Investors.)*

Bidders can bid at any price within the price band. For instance, assume a price band of ₹ 20.00 to ₹ 24.00 per share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1,000	23.00	1,500	50.00%
1,500	22.00	3,000	100.00%
2,000	21.00	5,000	166.67%
2,500	20.00	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The issuer, in consultation with the book running lead manager(s), will finalise the issue price at or below such cut-off price, i.e., at or below ₹ 22.00. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

India - The Value Proposition

India is emerging as a significant market for security services and products as organisations across various verticals are now investing in building a robust security infrastructure. With the increase in adoption of smart devices, organisations in India have become particularly vulnerable. With the rise in IP traffic and data growing at a rapid speed, networks are being threatened like never before. The new threat landscape has taken many shapes and definitions. The weakest link in the security apparatus is an employee with access to organisational systems through his own device. These threats are commonly attached with the concept of Bring Your Own Device (BYOD). IT security issues on cloud environments have almost reached the same level as attacks on traditional IT, with increased adoption of cloud-based services by the enterprise. Securing critical data in the cloud, even a private cloud, can pose serious security risk when moving data and applications from conventional enterprise data centres into cloud environments, especially public clouds. Even in private clouds, financial organisations face increased risks posed by having multiple data sets and applications sharing the same physical services.

Cyber-attacks on India are increasing and these cyber attacks originate from the cyber space of a number of countries. The future of cyber-security in India will involve a tripartite model wherein the government, the organisation and the individual should work together to secure information and information assets in a concerted unified manner. This will require enhanced collaboration and communication of security techniques among individuals, executives and industry organisations, as well as potential future improvements in legal exposure and assistance in regulatory compliance.

In 2013, the IT security market was valued over ₹ 5,000 Crore, due to the rapid adoption of IT security solutions and services by enterprises of all sizes, this value is expected to grow by 12% to reach ₹ 6,600 Crore in 2015, with hardware, software and services making up 20%, 23% and 57% of the share respectively.

Weak security has direct impact on business operations. This impact can be as major as losing proprietary intellectual property or worse, customer trust. A cyber-attack can set a company years behind in product development, revenue, and reputation; security is now a board-level conversation. Companies recognise the threats and vulnerabilities and are adopting measures not just to detect these threats but also prevent and fight back. In India several government initiatives and Public-Private Partnership (PPP) efforts towards educating the end consumer are gathering pace. This, along with several other factors, will see the IT security market cross ₹ 8,000 Crore mark by the end of 2017.

The driving factors behind this growth are the increasing number of security issues for which bigger budgets are being allotted to IT and regulatory forces. Corporate spying and hacking for socially motivated purposes have also encouraged organisations to spend more on keeping important data safe from digital thieves. Organisations today are increasingly more aware of security considerations in India, driven by factors like highly visible security incidents, and regulatory focus on security and privacy. Enterprises in India that traditionally did not focus on, or invest in a lot of security technologies are now beginning to realise the implications that a weak security and risk posture can have on their business. Verticals like banking and financial services have a strong focus on security and are now investing in technology that can enable them to grow their business securely. Vertical markets, such as banking and financial services, that have had a strong focus on security are now preparing themselves for the third era of IT digitalisation by investing in technology approaches that can enable them to grow their business securely while embracing digital business models. Leading security adopters from mature technology buying segments, such as banking, financial services and insurance (BFSI), telecom, oil and gas, and utilities, are looking to enhance their deployment of preventive security controls with continued focus on security operations and incident response, with a view towards protecting against advanced targeted attacks. Since the industry has now matured, it is expected to focus on spending towards more enhanced tools to tackle advanced cyber threats. The businesses, which have higher dependency on Internet like e-commerce or those with sensitive information such as BFSI, telecom, or the government, will prioritise IT security in terms of annual expenditure.

Expected percentage of smartphones in all network devices by 2019

IT Penetration in India

As of June 2015, India has over 350 million Internet users and is the second largest user base in the world. By 2017, this number is expected to reach an impressive 500 million, but a poor penetration rate (A measure of amount of sales or adoption of a product or service compared to the theoretical market for that product or service) of 19% (approx.) limits the potential. The adoption of mobile Internet is expected to drive the growth of Internet penetration. Urban areas in India have “number of wireless telephone connections” for every hundred individuals living within an area of 142.39%, the same number for the rural area was only 44.32%, as of September 2014.

Users accessing the Internet through their mobile devices have become a key driver for the increase in overall Internet subscriber base in the country. As of February 2015, only 13% of subscribers in India were using 3G and 4G networks. Based on Cisco’s 2014 VNI Mobile Forecast, India is at the lower-end of global use of data, in that mobile users average 149 MB per month, this data average is reflective of conditions where, 47% of network capacity is driven by streaming audio and video and 15.3% of connections are via smartphones. The increase in Internet users is mainly driven by a significant growth in smartphone subscription in India that witnessed a growth of 55% to reach 140 million subscriptions for the year. Smartphones account for around 15% of the total mobile subscriptions in India and 11% of Indian population is smartphone users as on now. 65% of India’s Internet traffic as of May 2015 was driven by mobile devices.

Expected Growth in Number of Internet Users

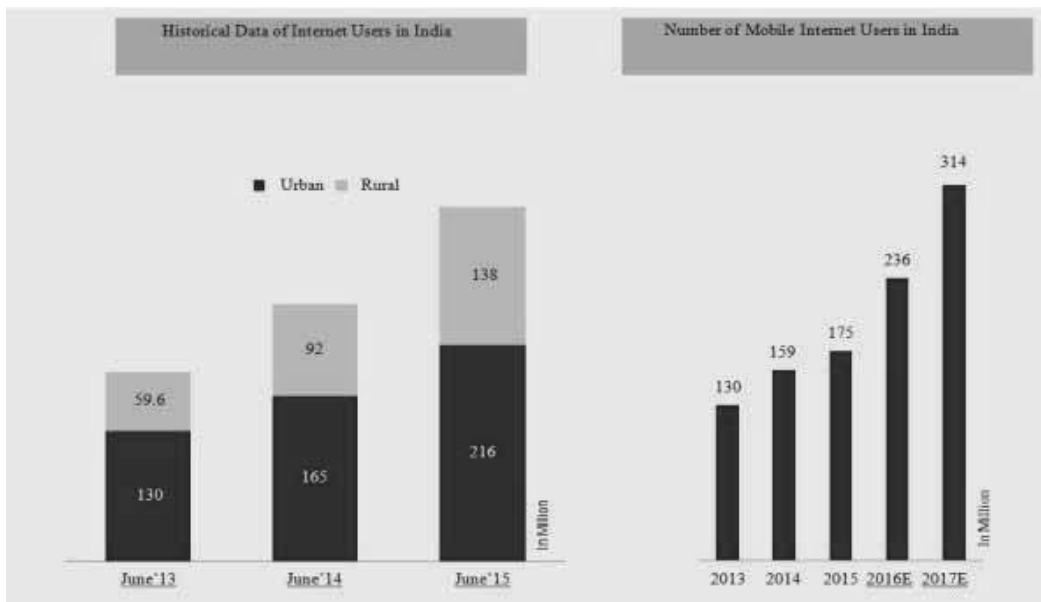

Growth in Smartphone Subscription

India has a large personal computer installed base of 55-60 million, growing at a rate of over 9% and is expected to reach around 70 million by 2017. Out of the total number of PCs installed, 55% are used by individual consumers and the remaining 45% by businesses and institutions.

The number of mobile Internet users in India is expected to rise to 314 million by 2017, nearly double the 159 million it had at the end of 2014.

Need for IT Security

The number of cyber-attacks in India was nearly 50,000 during the first five months of 2015. The trend in increase in cyber-attacks is similar to that worldwide. A total of 27,605 and 28,481 websites were hacked during the year 2012 and 2013, respectively in India. In the year 2014 and 2015 (up to May), the number was 32,323 and 9,057, respectively. India is also in the Top 10 countries with the largest number of reported attacks involving Trojans capable of sending SMS to premium short numbers.

Cyber security threats today have become increasingly sophisticated and complex. Organisations, however, have not been able to evolve at the same pace. As organisations move ahead and embrace new technologies without fully comprehending the implications these have on the entire enterprise, they are rendering themselves vulnerable to an array of cyber security threats. The need for securing the IT infrastructure has been of prime importance for many organisations. While threats like malware / virus / phishing / trojans continue to pose a threat, organisations as well as individuals have plenty of options to secure their offices and homes from such attacks. The cyber security market is currently undergoing unprecedented growth and development due to a wide variety of internal and external factors.

Product Segments – IT Security Market

The IT security market comprising of MDM, UTM, EPS and Retail (as defined below) segments is expected to be around ₹ 1,500-1,800 Crore with the Retail segment contributing the largest share to the overall market. Quick Heal Technologies Limited offers solutions across all four of these segments and is a market leader in the Retail segment with over 30% market share.

Retail Market

The Retail market standing at around ₹ 600-800 Crore comprises of the antivirus products meant for the home user. Retail offerings have a plethora of features apart from the usual virus and spyware scan. They enable safer online transactions for the home users, allow the users to plug and scan mobile devices and also offers stealth

mode surfing along with the traditional firewall. Cloud based email security monitors all email activity to and from the system. Real time cloud-based antivirus restricts access to malware infected, fraudulent and phishing websites and also protects against data theft. The solution offers parental control to monitor child Internet access. This segment is expected to grow at a rate of 20-25% YoY.

End Point Security (EPS)

The second largest contribution comes from the EPS segment which is around ₹ 400-500 Crore and is expected to grow at 10-15% YoY. It includes features for advanced device control; the administrators have access to comprehensive knowledge about the hardware and software configuration of every endpoint. It also includes an intelligent firewall, application control advanced detection of threats and empowers the administrator to have centralised control for updating all connected systems.

Unified Threat Management (UTM)

The UTM market is around ₹ 300-350 Crore, witnessing a growth of 15-20% YoY. It not only protects against intrusion but also enables content/spam filtering, intrusion prevention plus the traditional anti-virus protection. The UTM solution empowers the administrator to block or allow protocols for individual users as well as user groups. The solution also includes features like email traffic monitoring, content filtering, and virtual networking enablement (site to site, user to site). At the management level, the solution offers bandwidth management, load balancing and automatic link failover and also facilitates comprehensive IT policy management.

Mobile Device Management (MDM)

The MDM segment is the fastest growing segment among the four segments. Witnessing a YoY growth of 25-30%, the MDM market is currently valued around ₹ 80-110 Crore. Mobile security offers protection against virus attacks, theft and unwanted contacts. Features include device scan, privacy setting option with call and message filter, intrusion detection and remote device management to track lost devices. It also incorporates a personal security feature to send SOS messages in time of need.

With the rapid adoption of smartphones in India and the growing trend of BYOD at workplaces, this segment is considered to be of key strategic importance among the IT players in the market.

The SMB Story in India

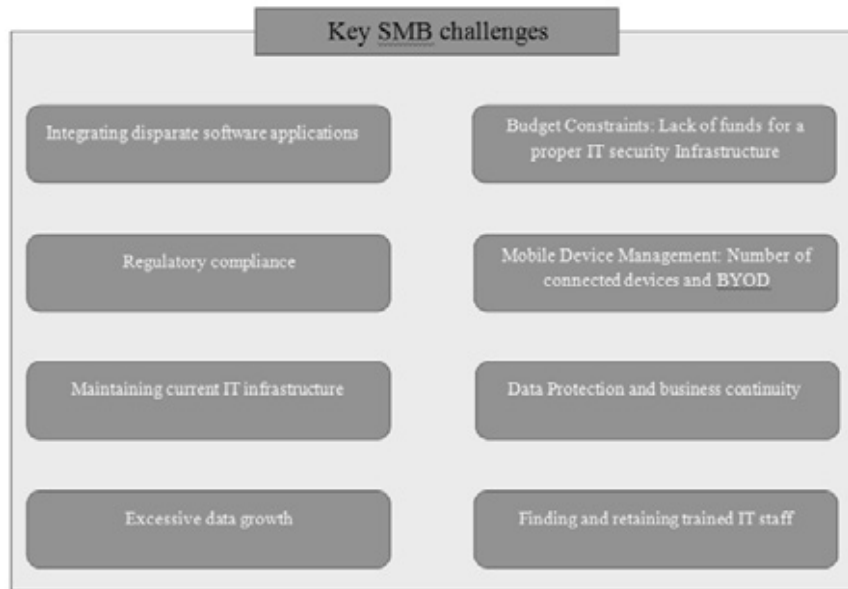

SMB Landscape:

India is currently home to 51 million SMBs, employing over 40% of India's workforce amounting to about 116 million people. The SMB sector contributes 38% of the national gross domestic product and comprises 40% of India's total exports. In terms of technology adoption, SMBs are likely to spend around ₹ 71,300 crore in 2015 on IT products like Social, Mobility, Analytic and Cloud (SMAC) etc. By 2020 this expenditure is expected to rise to ₹ 154,800 crore with a CAGR of over 16%.

Out of the base of 51 million SMBs, around 12 million have high degree of technology influence and are looking to adopt new IT products.

The SMB segment is a key driver for the Indian IT sector. Players from various industry verticals are gearing up to be technology-ready and are heavily investing in latest technology. By the end of 2015, 40% of SMBs will be technology-influenced which is expected to increase to ~90% by 2020. Professional services will be the biggest contributor in the total base of technology-influenced SMBs in 2015 with a share of around 19% followed by the Retail vertical with 18%, and Manufacturing and Travel & Logistics with 14% each. Restaurants & Hospitality, Education, Real-Estate and Auto & Auto Ancillaries will contribute 10%, 9%, 8% and 4%, respectively.

Regardless of various initiatives and strategies adopted to promote the small and medium enterprise segment, Indian SMBs are forced to tackle multiple challenges to nurture their business which leads to IT security issues. Internet connectivity is the easiest way to breach any organisation's premises and hamper its day-to-day functionality. Secondly, to process in an efficient manner, it's very important for SMBs to use technology which requires implementation of various software and hardware products. Integrating disparate products can also create risks for the in-house IT infrastructure and loss of valuable information. Lack of funds is another big concern for SMBs which restricts them to use unauthenticated products which is also a key reason behind cyber-attacks. As adoption of mobile devices and BYOD policies become basic necessities to run businesses, they have also allowed unwanted malwares from other networks to enter the in-house networks of SMBs.

Emerging Opportunities

Digital India

This aims at the creation of a robust IT infrastructure and the delivery of all services digitally thus reducing paperwork. It also plans to connect rural areas with high speed Internet networks. At the start of this project top CEOs from India and abroad committed to invest ₹ 7,100 Crore towards the initiative.

As Digital India and the concept of Smart Cities takes shape, security needs to be considered as integral part rather than an afterthought. The increasing synchronisation and interpretation of existing digital data and processes within government departments will require greater security postures while keeping critical data flowing in such a discouraging threat environment.

100 Smart City Plan

This plan aims at developing 100 smart cities as satellite towns or larger cities. Over the span of next three years, the central government plans to recognise 100 cities and in collaboration with the state governments fund these cities, aiming for better infrastructure which includes robust IT connectivity and digitisation. A total of ₹ 48,000 crore will be spent on this project by the central government and an equivalent amount by the state government over the next five years.

Internet of Things & Home Automation

By 2020, India is expected to have 2.7 billion connected devices comprising of 5-6% of the global IoT industry. The recent IoT policy drafted by the department of electronics and information technology has aimed to create an IoT industry in the country worth ₹ 90,000 crore by 2020. IoT is a seamless connected network of embedded

objects/devices, with identifiers, in which M2M (Machine to Machine) communication without any human intervention is possible using standard and interoperable communication protocols. Interestingly phones, tablets and PCs are not included as part of IoT. Home automation segment includes centralised control of lighting, HVAC (heating, ventilation and air conditioning), appliances and security locks. The home automation segment has the potential to grow at 30% CAGR in the next five years.

As IoT is pushing the connectivity of everyday items, conceptual hacks against refrigerators and cars have been reported. As per a study, the real threat from IoT will likely occur in the business segment. Every new Internet-connected device in a business environment uses new protocols, presenting new ways to hide malicious activity and thus increasing the business attack surface. The basic idea is to use control of a simple connected device to move laterally within an organisation to steal valuable data. The study also predicts that in the coming years, manufacturing and industrial environments, in particular, are likely to see an increase in attack volume.

In order to maintain a healthy relationship with our channel partners and coordinate business development activities effectively, we host regular meetings with our channel partners to discuss the challenges encountered by them, and find suitable solutions. These solutions are aimed at enhancing overall channel partner satisfaction and may address issues like pricing, our channel partner rewards system, end user satisfaction and business development policies. We believe these meetings foster effective dialogue between our channel partners and us, and among the channel partners themselves, increase channel partner satisfaction and retention, and enhance our understanding of users' requirements as well as improve our market intelligence. We often organise and attend industry conferences and organise technical training programmes for our channel partners that provide support tools

including lead generation support. For more details on our channel partners, please see “*Our Business — Sales and Distribution*” on page 148.

Significant R&D and Technology Capabilities

We believe our R&D and technology capabilities represent our core competency and a key competitive advantage.

Our R&D division consists of various teams including Threat Research & Response team, Business Logic team, Development team, Incidence Response team, IoT security team and the Quality Assurance team, all of which have specific pre-defined roles, and enable us to comprehensively integrate and manage the entire R&D value chain from conceptualisation, design and prototyping, to testing, development and commercial release. We have devoted considerable resources to R&D, including our investment in anti-ransomware technology, behavioural detection system as well as antivirus technology for mobiles and tablets.

The technology used in our solutions is typically developed in-house, though we may license certain technology or other software and integrate that with our solutions as well. We have been granted four patents in the United States and we have one pending patent application in the United States. Further, we have five pending patent applications in India, of which two have been published, which relate to various aspects of our products and technology. For example, our Advanced DNAScan technology uses behaviour-based detection method to determine whether a computer program is malicious or not based on its behavioural characteristics. It is effective against latest and emerging threats, and protects users against zero-day attacks. For instance, the recently discovered “CryptoLocker” family uses various advance obfuscation techniques to evade detection. Quick Heal’s behaviour detection module successfully detects and blocks most of these “CryptoLocker” samples. Our various solutions are available across a wide range of platforms such as Windows, Mac, Linux, Android and iOS. In line with our continued focus on R&D, we have introduced several solutions aimed at our enterprise customers such as gateway virus content filtering and advanced firewall. We are also working on IoT security and home automation security systems.

For the six months period ended September 30, 2015, we expensed ₹ 290.22 million on R&D-related expenses which formed 19.59%, of our revenue from operations (net) in this period. In fiscal years 2015, 2014 and 2013, we expensed ₹459.54 million, ₹ 312.07 million and ₹ 196.87 million, respectively, on R&D-related expenses, which formed 16.06%, 12.85% and 9.60%, respectively, of our revenue from operations (net) in these years. Our in-house R&D team comprised 547 employees, which was 39.18% of our total employees, as of December 31, 2015. Among them, 221 had obtained master’s or higher degrees, and 326 had obtained bachelor’s degrees or other degrees.

Experienced Management Team and Qualified Pool of Employees Backed by a Venture Capital Investor

We are led by a dedicated senior management team with several years of industry experience. We believe our senior management team is able to leverage our market position and their collective experience and knowledge in the security software industry, to execute our business strategies and drive our future growth. Our Promoters, Kailash Sahebrao Katkar and Sanjay Sahebrao Katkar, who serve as Managing Directors, and are the Chief Executive Officer and the Chief Technical Officer, respectively, were early pioneers in the Indian software products industry and devised our Company’s go-to-market strategy and business model, and have more than four decades of collective experience in the industry, in which we operate. In addition, we believe the strength and entrepreneurial vision of our Promoters and senior management has been instrumental in driving our growth and implementing our strategies. Our Managing Director and Chief Technical Officer, Sanjay Sahebrao Katkar, is a qualified computer engineer and heads our R&D and innovation efforts.

In addition, we have an experienced and qualified team of employees. We believe our position as a leading provider of security solutions for detecting, preventing and resolving advanced security threats represents a significant competitive advantage in attracting and retaining high-quality talent. Our personnel policies are also aimed towards recruiting qualified and talented individuals, facilitating their integration into our Company, providing a conducive work environment, and promoting the development of their skills, including through in-house and external training programmes. For details, see “*Management*” on page 168.

We have had positive operating cash flows in each of the last five fiscal years. In addition, as of September 30, 2015, we were completely debt-free. Further, we typically seek to work with creditworthy counterparties which enable us to optimise our cash flow management. We keep regular records of our receivables due, and follow up with our counterparties at regular intervals to ensure timely payments. As at September 30, 2015, March 31, 2015, 2014 and 2013, the ratio of operating cash flow to EBITDA was 0.78, 0.84, 0.58 and 0.64, respectively. As of September 30, 2015, we had current investments totalling ₹959.49 million which comprised investments in mutual funds (quoted), and cash and bank balances of ₹105.21 million.

Strategies

Our aim is to satisfy our end users, by developing compelling, differentiated and cutting-edge solutions that optimise and secure their IT data systems and assets.

Retain and Expand our User Base

We have a large home user base and are actively working to increase our presence in the SMB, enterprises, educational institutions and government customers market. We have separate internal teams that are focused on SMB and enterprise users, educational institutions and government customers. These teams help us in identifying opportunities and lead generation. The number of active licenses installed by our users has increased from 2.5 million as of March 31, 2011 to 7.13 million as of December 31, 2015.

We expect to continue to develop our offerings by adding features and functionalities tailored towards the SMB and enterprise customer segment, such as security and other functionality delivered on demand, or through a software-as-a-service model. We believe that there are significant opportunities in this segment, as these customers may often have little-to-no internal IT support, making them reliant on third-party solutions that are cost effective, high quality and easy to use.

We are working to actively expand the number of channel partners we work with, especially in so-called tier II and tier III cities and towns across India, so as to enhance our geographic penetration and sales in newer towns and cities to leverage the growth opportunities offered by them. We also intend to pursue additional customer acquisition strategies and to increase our sales and marketing efforts to further build brand awareness and accelerate the growth of our customer base. In addition, we expect to invest significantly in building our brand through advertising and sales promotion and intend to deploy ₹ 1,110 million from the Net Proceeds for this purpose. For details, please see “*Objects of the Offer — Advertising and Sales Promotion*” on page 104.

Grow our SMB and Enterprise Business

In fiscal year 2015, we introduced the “Seqrite” range of solutions especially aimed at our SMB and enterprise customers. According to the Zinnov Industry Report, there are nearly 51 million SMBs in India and these employ over 40% of India’s workforce amounting to about 116 million people. The SMB sector contributes to 38% of the national gross domestic product and comprises 40% of India’s total exports. In terms of technology adoption these SMBs are likely to spend around ₹ 71,300 crore in the year 2015 on IT products. By 2020 this expenditure is expected to rise to ₹ 154,800 crore with a CAGR of over 16%.

As IT adoption is on the rise among SMBs and enterprises, we see a greater need for security software solutions. Thus, we believe there exist significant opportunities for us to expand this business across India. We aim to leverage our existing infrastructure, channel partner relationships and market knowledge to provide solutions to such customers and are working closely with our enterprise channel partners to identify and target new SMB and enterprise accounts. We have set up a new sales team internally to exclusively focus on SMBs and enterprises, and in this space, we plan to mainly focus on manufacturing companies, banking, financial and insurance (BFSI) companies, healthcare, hospitality, educational institutions, government customers, emerging e-commerce companies and other services companies. We also intend to focus on SMBs and enterprises in certain geographies internationally such as the United States and Japan, respectively. As of December 31, 2015, we work with 349 enterprise channel partners and 319 government partners and are expanding our sales and distribution reach. We also have an internal team dedicated to identifying new opportunities among SMBs and enterprises which works closely with the dedicated sales team.

Pursue International Growth Opportunities

We are an established company with a proven track record of successful operations in India for over two decades. As of December 31, 2015, we sold our solutions globally and had end users in more than 80 countries. We believe that there exist substantial opportunities to grow our business internationally, especially our SMB and enterprise business. We have been focused on international expansion in recent years and in fiscal year 2012 we opened offices in the United States, in Japan in fiscal year 2013 and in Kenya and Dubai in fiscal year 2014, and expect to expand these offices in the near to medium term. We intend to mainly focus on SMB and enterprise customers in certain geographies internationally such as the United States and Japan. Further, we intend to mainly focus on the home user market in Kenya and Dubai, and may expand into the SMB and enterprise customers market in the future in these geographies. We may further invest in expanding our footprint in Africa (with a special focus on South Africa), the Middle East (including the United Arab Emirates) and South East Asia in the near to medium term. We have, in the past, explored and continue to explore opportunities on our own, through wholly owned subsidiaries, or through tie-ups, acquisitions, strategic alliances, partnerships or joint ventures in these countries and regions. While we are currently evaluating opportunities and speaking to several potential partners, we have not entered into any definitive agreements in relation to this.

We have recently entered into a preliminary term sheet to form a new company for a joint venture to distribute, sell and market our offerings in South Africa. We expect the other party to provide local market insight and currently propose to structure the joint venture company with us as a majority partner. We are currently engaged in legal and financial negotiations and we cannot assure investors that we will proceed with this investment in a timely manner, or at all.

For the six months period ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, we derived 2.66%, 2.69%, 2.36% and 2.17%, respectively, of our total revenue outside India. We plan to continue to market our products and solutions to users located outside India by investing in brand building and advertising and marketing activities in those geographies. Further, we also intend to expand our international sales and distribution network, by increasing the number of experienced sales personnel across geographies and are also working to augment the number of channel partners to strengthen our distribution network. Our R&D team is also focused on customising and localising our solutions to better address the needs of users in various international markets. For example, our solutions for home users are available in several major international languages such as Japanese, Spanish, Polish, Arabic and Italian.

Strengthen our R&D Capabilities and Broaden our Portfolio of Solutions

The security software industry is characterised by continuous advancement in technology. To maintain and advance our position in the market, we intend to continue to strengthen our R&D capabilities, which shall enable us to innovate and develop solutions with the latest technology for existing and upcoming platforms. In addition to continued R&D and technology investments in development of new solutions, we may pursue acquisitions of, or investments in, or licensing of, technologies that complement our portfolio. In our continuing effort to strengthen our R&D abilities, we propose to utilise ₹ 418.80 million of the Net Proceeds towards funding our capital expenditure for R&D activities. For more details, see “*Objects of the Offer — Capital Expenditure on Research and Development*” on page 106.

We believe we have built a strong reputation and brand name in the data security and cyber security industry and most importantly, with our end users, for continuous innovation and technological advances. Our objective is to continue to enhance and broaden our portfolio of solutions to address our customers’ evolving needs, ultimately

driving greater customer growth, increased retention and revenue from new customer adoption. As of December 31, 2015, we had been granted four patents in the United States, have one pending patent application in the United States and have five pending patent applications in India, of which two have been published, which relate to various aspects of our products and technology and are currently working on developing new solutions towards applications like IoT and home automation security solutions.

We had entered into a preliminary term sheet with an entity that is engaged in developing technology for home automation to make an investment not exceeding ₹ 60 million in this entity. We have recently signed definitive documents to proceed with this investment.

Expand our Capabilities for Smartphones/ Mobile Devices

The proliferation of smartphone/ mobile devices has created a diverse computing environment for users. We already offer several solutions, both free and paid, for mobile devices and intend to develop additional solutions that deliver functionality currently available for our desktop and laptop users to mobile devices, particularly smartphones and tablets. For example, we have entered into agreements with certain distributors of branded mobile phones whereby our Quick Heal mobile antivirus solution is offered by these distributors bundled with smartphones sold by them. In addition to mobile security solutions, we are also focussing on insurance for mobile phones. We have entered into an agreement with an insurance company regulated by the Insurance Regulatory and Development Authority (IRDA) and through our product, Quick Heal Gadget Securance, offer a mix of mobile security and handset insurance. In addition to security against viruses and malware, this product provides insurance cover against theft, burglary and physical, liquid and fire damage. We have an agreement with an IRDA regulated insurance broker that has enabled us to design the insurance scheme and implement it in accordance with IRDA guidelines. This insurance broker also handles claims processing and payments for admissible claims, for damages, theft and loss in accordance with the terms of the insurance scheme.

Our solutions are currently available for the Android, Windows, Linux, iOS and Blackberry platforms. As of December 31, 2015, we had more than 1.1 million active licenses for our mobile solutions. We currently offer a freemium product under the brand name Fonetastic Free, and believe there may be opportunities in the future to monetise some of our free solutions for mobile devices.

All of our solutions are based on our patented Advanced DNAScan technology which is a part of the core antivirus engine. The Advanced DNAScan technology uses a combination of sophisticated detection tools for dynamic, speedy and efficient removal and repair of malware threats. It has the ability to detect viruses in the boot records before they have a chance to infect the system. It includes behavioural and characteristic inspection, as well as monitoring of unsafe programmes. This enables detection of zero-day attacks and unknown threats. Thus, a combination of features such as antivirus, antispyware, antimalware, anti-rootkit, IDS/IPS and silent firewall work together to provide maximum protection from security threats.

Quick Heal Total Security and Quick Heal Internet Security also come with the “safe banking” features that are designed to protect online banking activities from fraudulent websites and malicious programmes that steal financial information. These products are also equipped with the “browser sandbox” feature that acts like a screen between the computer and malicious threats. Quick Heal’s “parental control” feature gives parents the freedom to decide when and how their kids should use the Internet, and how much.

The Quick Heal TrackMyLaptop feature helps to track the whereabouts of a lost or stolen laptop, tablet or smartphone. Other features include stealth mode which makes a system invisible in a network thus preventing malware attacks and automatic scans of external storage devices to protect USB drives from auto run infections. Certain of our products also allow users to secure data with Cloud backup. Our products for smartphones also help to set up call forwarding and blocking/filtering calls and messages.

Products for SMBs, Enterprises, Educational Institutions and Government Customers

We provide several products for SMBs, enterprises, educational institutions and government customers. We classify our enterprise security products across the following three main categories:

- *Endpoint Security*

We offer two solutions in this category, Endpoint Security Total and Endpoint Security Business. These products provide protection and control of desktops and laptops with centrally managed consoles and include Cloud-based mobile device management systems. These solutions use multiple inspection technologies and combine integrated protection with the flexibility of managing and controlling virus protection across various network sizes. We also offer mobile device management (MDM) and Seqrite Cloud. Seqrite Cloud is an integrated solution that allows the management and regulation of multiple endpoint security and TERMINATOR products (which are discussed below) deployed at different geographical locations. IT administrators from any location can easily connect to the Seqrite Cloud to view the latest security status, configure product policies, receive notifications and rectify critical network events from one single dashboard. It also facilitates policy configuration, backup and more actions on the Cloud for our enterprise products.

- *Gateway security*

These products are advanced gateway solutions with antivirus, firewall and web filters in one product. Our flagship gateway security product, TERMINATOR, which is a Unified Threat Management (“UTM”) product, provides the first line of defence against all emerging threats including advanced persistent threats. The TERMINATOR combines various proprietary protection technologies including the Quick Heal Core antivirus engine, firewall, web security, VPN, load balancing, web content filters, anti-spam technologies, IDS/IPS (Intrusion Detection/Prevention System) and the bandwidth manager.

- *Server security*

These products provide security solutions for critical servers and are customised to provide maximum security with optimum performance. We provide two main products under this category, antivirus for servers and antivirus for Linux.

Guardian NetSecure

Guardian NetSecure is our antivirus solution for price sensitive end users who only require a basic level of security for their desktops/laptops.

Case Studies

The following case studies are examples of how certain of our end users have deployed and benefited from our solutions.

Gitanjali Gems Limited

Problem: Gitanjali Gems Limited is a part of Gitanjali group, a major diamond and jewellery house in India, with operations across the world. With a growing infrastructure and limited IT staff, the company was in need of a solution that could help avoid high operational costs and protect critical data. The company wanted a solution that could address the following three challenges: (1) avoid complexity in managing security software for remote branches; (2) protect sensitive financial information; and (3) avoid waste of time and costs associated with outsourced support.

Solution and Benefits: In fiscal year 2011, Gitanjali Gems Limited started using our Seqrite Endpoint Security solution. Seqrite Endpoint Security provides visibility of all work stations which made managing remote branches easier. The Powerful Device Control facility restricts unauthorised use of external devices which provides greater protection for critical financial and customer information. The solution provided a centrally managed console that significantly reduced the use of labour and resources. Quick Heal also provided technical support and training across branches which helped to reduce the dependence on, and the cost of, outsourced support. Quick Heal's solution thus enhanced the productivity of employees, reduced incidents of downtime and provided the client with better security coverage and incident management across branches.

Aimil Limited

Problem: Aimil Limited is one of India's leading civil engineering companies with operations spread across the country. The client wanted an integrated solution that would provide consistency and compliance across its many locations. The client wanted a solution that could address the following three challenges: (1) ensure uniformity and consistency across multiple company endpoints; (2) prevent difficulties in managing IT systems and policies across different locations and (3) support from the IT security provider for problems as they arise.

Solution and Benefits: In fiscal year 2015, Aimil Limited adopted Seqrite Cloud to manage and regulate endpoint security from any location. Seqrite Endpoint Security's roaming platform feature allows Aimil Limited to manage endpoints even when they are out of the local network. A dedicated manager was also allocated to the client to address on-demand local and remote support issues.

Sardar Patel University

Problem: Sardar Patel University is a reputable Indian university that is focused on improving rural Indian life by providing study and research in modern global developments. The university wanted a solution that could address the following three challenges: (1) prevent loss of sensitive data; (2) provide adequate and efficient support for IT resource management; and (3) allow multiple policies and rules to be implemented for different student groups.

Solution and Benefits: In fiscal year 2015, Sardar Patel University adopted Seqrite Endpoint Security with advanced browsing protection and spam protection that blocks viruses before they enter the network. This solution incorporates a group policy management feature that allows the university to customise user groups and define individual policies. Quick Heal also provided the university with a dedicated technical account manager which reduced dependency on external resources and support expenses.

Bombay Hospital, Indore

Problem: Bombay Hospital is a 600 bed super-speciality tertiary care referral hospital located at Indore in the state of Madhya Pradesh. The hospital wanted to block access to social media websites and other unwanted website categories as these were consuming precious bandwidth and causing a drop in productivity. The hospital wanted a solution that could address the following three challenges: (1) prevent loss of bandwidth due to employees accessing social media sites; (2) allow the hospital to implement uniform policies across all systems; and (3) prevent slowing down and frequent freezing of systems within the hospital's network.

Solution and Benefits: In fiscal year 2015, Bombay Hospital, Indore adopted Seqrite Endpoint Security solution. This allowed the hospital to implement website filtering to block individual sites or category-based sites. Additionally, this solution included a group policy management feature that allowed the hospital to define user groups and assign policies to them. Quick Heal's solution also cleans up junk files and deletes invalid registry entries so that the system works at optimal speed and there are no unwanted disruptions.

Public Works Department, Dehradun

Problem: The Public Works Department ("PWD") at Dehradun in the state of Uttarakhand is responsible for the construction, maintenance and planning of roads, bridges and government buildings for the state of Uttarakhand. This government department wanted a solution that could address the following three challenges: (1) prevent loss of bandwidth due to employees accessing unwanted websites; (2) allow installation of crucial software without slowing down the network; and (3) provide adequate technical support and services for addressing issues.

Solution and Benefits: In fiscal year 2015, PWD, Dehradun adopted Seqrite Endpoint Security. This allows website filtering to restrict access to unwanted websites to preserve network bandwidth. Additionally, this solution includes an application control feature that blocks categories of applications from functioning within the network. Quick Heal also appointed a technical account manager for the PWD, Dehradun to resolve technical issues from time to time.

Sales and Distribution

Retail Sales Network

For sales to home users, we use a network of retail channel partners spread across the country. We disseminate our stock of products to channel partners from our 64 offices and warehouses across 36 cities in India. As of December 31, 2015, we work with 194 premium partners who generate business for us, and also act as the source for the next level of distribution channel i.e. the elite partners. We enjoy a healthy working relationship with our premium partners through the efforts of our channel sales team which works closely with them to maximise the availability of our solutions and to deliver our solutions with good quality and features in a secure environment. We assign specific territories for our premium partners to sell our products and set minimum sales targets for them which we review annually, and often quarterly. Upon delivery of products to premium partners, the premium partners take possession of the products and are responsible for all risks, including loss, damages and other incidents, and returns are not permitted. While we require our premium partners to provide customer assistance in explaining technical information and related sales assistance to customers, we also directly provide after-sales support to the end users and do not permit our premium partners to offer any assurances or commitments without our approval. Our premium partners are generally required to report on their inventory levels of our products monthly and provide an audited financial report annually or as and when we may request. In case of problems with respect to the credit risk of distributors or customers, we have the ability to obtain the goods back in such cases.

As of December 31, 2015, we, through our premium partners, work with 1,242 elite partners who primarily act as resellers and distributors of our products to retailers, who form the last mile of our distribution channel. Elite channel partners purchase our solutions from our premium partners and further sell them to retailers, distributors and our end customers. Our channel sales team, along with the sales team of the premium partners, maintains regular communication with the elite partners and works with them to increase the visibility of our brand and the popularity of our solutions. Similar to our arrangement with our premium partners, we periodically set minimum sales targets and outline other policies, including the area of sales for our elite partners to achieve. Our agreements with elite partners are typically for a period of two years and we require the elite partners to purchase our products on a rolling basis, in the immediate preceding period of 12 months. A failure to meet this requirement may result in termination of the agreement by us.

In addition to our premium and elite partners, we appoint dealers for distributing our products under the trade name “Guardian NetSecure” directly to our end users for specific territories. Under this arrangement, dealers may sell through offline channels and are not permitted to sell Guardian NetSecure products through the Internet, or any online marketing portal, including any unauthorised affiliate Internet page. Similar to our arrangement with other partners, we set minimum sales targets to be achieved by our dealers annually. Similar terms and conditions under our agreements with elite partners are applicable to our dealers including the purchase of our products on a regular basis, payment in full at the time of placing a purchase order, conducting advertising, marketing and selling activities at its own costs, providing customer assistance in technical explanation and sales assistance, furnishing monthly reports on the inventory levels of products and audited financial report annually, or as and when requested by us. Our agreement with our Guardian NetSecure dealers is also valid until we terminate the agreement.

Enterprise Network

We primarily sell to SMBs, enterprises, educational institutions and government customers through our enterprise channel partners from our 64 offices and warehouses across 36 cities in India.

As of December 31, 2015, we work with a total of 349 enterprise channel partners. As of December 31, 2015, we work with 202 platinum partners, who sell and distribute our Seqrite range of solutions to SMBs and enterprise clients, and also act as the source for the next level of distribution channel i.e. the gold partners. Our solutions are delivered in a secure environment with good product features and quality. Gold partners purchase our Seqrite range of solutions from a platinum partner and further resell solutions to end users. As of December 31, 2015, we work with 147 gold partners. In addition, we also work with 319 government channel partners for providing solutions to government customers. SMBs, enterprises, educational institutions and government end users may also purchase our solutions bundled with other products through system integrators, who package our solutions as part of their overall product offering.

We run certifications programmes to empower teams of our channel partners and educate them about our solutions so that they can further sell these to enterprise customers. We also provide training to our channel partners on providing support services to end users.

Mobile Channel

Smartphones are repositories of personal data and information and the accompanying loss or theft of these devices and the increase in mobile malware attacks has emphasised the need for security in these devices. In addition, a large number of people today access the Internet through their smartphones. This is the main impetus behind the growth in sales of our solutions for mobile devices. Our mobile channel is a new initiative and as of December 31, 2015, we work with 41 premium partners and have signed up 903 retail outlets. We have allocated a defined budget to the development of this channel and are investing in marketing and brand building activities as well. Given the increasingly large number of people who buy high-value handsets and smartphones, we have introduced Quick Heal Gadget Securance which provides security and insurance as a combined product. We also offer solutions in the form of mobile applications like Mobile Total Security, an application that provides mobile data security and Fonetastic (available in both free and paid versions) that provides a combination of advanced security and enhances the productivity of mobile devices.

Alternative Sales and Promotion Strategy

We have granted non-exclusive distribution and marketing rights to certain distributors and resellers, who typically purchase our solutions from our channel partners, to market and sell our solutions to end users in India through online e-commerce websites. As India is experiencing a growth in online sales, we expect to see increased sales from this platform. We are also promoting the sale and renewal of our solutions through our own websites.

As an alternative sales strategy, we have associated ourselves with various parties to sell our solutions to end users. For example, we have entered into an agreement with a software development company whereby we provide our Internet security six-month trial version for desktop computers and six-month trial version for mobile security bundled with this company’s software products to the end users in parts of southern India.

Advertising and Brand Building

We have an in-house team that focuses on advertising and brand building activities. This team has clearly delineated responsibilities and functions, and works closely with external agencies to create strategies for

increasing our visibility in our core markets. For the six months period ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, our expenses on advertising and sales promotion were ₹ 90.20 million, ₹ 288.09 million, ₹ 223.10 million and ₹ 190.28 million, respectively.

We conduct online advertising on various search engines such as Google, Yahoo and MSN and direct emails, and offline advertising using print or broadcast media to conduct mass media campaigns including television, print and radio. We use digital marketing tools, such as virtual marketing, including video and meme image, and online display banners, and have presence in social media, including Facebook, Twitter and YouTube. For more details of our advertising and brand building initiatives, see “*Our Business — Strengths — Recognised Brand Name and Positive Reputation*” on page 140.

We also invest in activities such as business promotion, customer schemes and contests to motivate our channel partners and increase sales. For the six months period ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, we incurred ₹ 54.58 million, ₹ 134.53 million, ₹ 109.70 million and ₹ 70.48 million, respectively, on business promotion expenses. We have also engaged a public relation company to provide services in public relations consultancy and analysis, including research, media coverage, targeting appropriate media and developing communication packages and media monitoring.

We believe that our investment in advertising and brand building will enhance our brand profile, visibility and exposure in the market, as well as create a pull effect for our products, leading to increased sales.

Sales Incentive

We also introduce incentive programmes from time to time for our channel partners and thus provide them an incentive to achieve the performance based targets, which include sales and collection targets. For example, we may provide an additional discount to channel partners that meet certain predefined target milestones and also provide vouchers that may be redeemed for various solutions of our Company. For the six months period ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, we incurred ₹ 105.37 million, ₹ 223.67 million, ₹ 145.84 million and ₹ 103.85 million, respectively, on sales incentive.

Research and Development

The market for security software solutions has low barriers to entry but is subject to rapid technological change and is highly competitive with respect to timely product introductions and continuous upgrades. We believe that our ability to maintain competitiveness largely depends upon our ability to develop, integrate and launch new solutions, and to proactively enhance / upgrade our existing offerings.

Our R&D efforts support all of our product offerings. Our R&D efforts enable us to improve our product design and usability and keep us at the forefront of antivirus and anti-malware research. For example, our antivirus products are based on the DNAScan technology which was upgraded, and is referred to as Advanced DNAScan. Advanced DNAScan technology uses behaviour-based detection method to determine whether a computer program is malicious. It is effective against latest and emerging threats, and protects users against zero-day attacks. Most importantly, our R&D helps us better protect our end users by making the identification of newer viruses and malware more predictive. In addition to developing new offerings, our R&D team also focuses on continuous upgrades and updates to existing products, aimed at protecting our users from evolving threats. Future upgrades and updates may include additional functionality to respond to market needs and changing environment, while assuring compatibility with new systems and technologies.

For the six months period ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, we expensed ₹ 290.22 million, ₹ 459.54 million, ₹ 312.07 million and ₹ 196.87 million, respectively, on R&D-related expenses, which formed 19.59%, 16.06%, 12.85% and 9.60%, respectively of our revenue from operations (net) in these periods. Technical leadership is essential to our success and we expect to continue devoting substantial resources to further developing and enhancing our R&D and technology capabilities. In our continuing effort to strengthen our R&D abilities, we propose to utilise ₹ 418.80 million of the Net Proceeds towards funding our capital expenditure for R&D activities. For more details, see “*Objects of the Offer — Capital Expenditure on Research and Development*” on page 106.

Our R&D team comprises of the following sub-teams:

Business Logic Team: The business logic team is responsible for analysing the ecosystem for our solutions, i.e., the industry, technology, competition, market size and segmentation, with feedback and input from our sales team and customers. Based on the information gathered, this team helps in building product roadmaps and devising appropriate strategies.

Product Development Team: The product development team is responsible for the design and development of various products and solutions. It supports our R&D activities on various Operating Systems (OS) and multiple platforms that can be supported through Cloud.

Internet of Things (IoT) Security Team: This team is responsible for the identification of opportunities in this emerging area and to create products and solutions for home automation security.

Quality Assurance Team: The quality assurance team provides systematic measurement, standard evaluation, monitoring of processes, and an associated feedback loop that helps prevent errors in our products. The team studies each product in a systematic and comprehensive manner, before the same is released to our customers.

Incidence Response Team: The incidence response team includes two sub teams: Technical Account Managers team and Technical Professionals (Software Developers and Software Quality Assurance Engineers) team. These teams contribute to our rapid response to any emergency situation/incident at an enterprise security infrastructure.

Threat Research and Response Team: The threat research and response team provides proactive response to reported threats. This team takes part in detection of and removal of reported viruses and malwares. This team also focuses on product testing for antivirus certifications and on false positive collection.

Technology and Intellectual Property

Our success depends to a great extent on our proprietary technology. We believe that we are not dependent on any of our intellectual property rights individually, although, they may collectively be of material significance to our business.

In the course of our R&D activities, we create a range of intellectual property which we attempt to protect through patent and copyright protection, confidentiality procedures and contractual provisions. We seek patent protection for certain of the key inventions which we develop. Our success and ability to compete depend in part upon our ability to protect our technology and to establish and adequately protect our intellectual property rights. To accomplish these objectives, we rely on a combination of trademark and copyright laws in India and other jurisdictions, as well as license agreements and other contractual protections.

We have registered 10 trademarks in India and eight trademarks internationally relating to our name and several of our products, including “Quick Heal” and “Seqrite”. The registered trademarks are valid for a period of 10 years from the date of application or renewal, as the case may be. For further details, see “*Government and Other Approvals*” on page 337.

We have four patents issued in the United States and one pending patent application in the United States. Further, we have five pending patent applications in India, of which two have been published, which relate to various aspects of our products and technology. The duration of our patents in the United States is typically 20 years from the date of the filing of the earliest application. The duration of our patents in India is 20 years from the date of filing of the patent application resulting in the patent, which we believe is adequate relative to the expected lives of our products.

Our products are protected under India and international copyright laws, and laws related to the protection of intellectual property and proprietary information. We have two registered copyrights and four pending copyright applications in India. We take measures to label such products with the appropriate proprietary rights notices, and we actively enforce such rights in India and abroad.

We also incorporate software and technology developed by third parties in our products. We typically do this by obtaining a license from the relevant party and are required to pay them royalties or license fees. We may also, from time to time, explore opportunities to invest in companies or products or technologies that we believe could provide synergies to our core business. While we are currently evaluating certain opportunities, we have not signed any definitive agreements. Typically we license technology, software documentation and related materials and are permitted, under the terms of use of license to reproduce, modify, create or develop derivative works based on

or incorporating the licensed materials, and distribute, sell or offer to sell any products containing the licensed materials in connection with our Company's business. Further, typically, we obtain exclusive rights, title and interest to such derivative or enhanced works created by our Company.

Agreements with NovaShield, Inc.

We have been granted a sub-license of a licensed patent under U.S. Patent No. 8,065,728 by NovaShield, Inc. ("**NovaShield**"). NovaShield had been previously granted an exclusive license with a right to sub-license by Wisconsin Alumni Research Foundation ("**WARF**"), the owner of the licensed patent. NovaShield further assigned its rights and obligations under the license agreement with WARF to BullGuard Limited. In connection with this assignment and the granting of an exclusive license to the licensed patent to BullGuard Limited, the Company and WARF entered into a "covenant not to sue" agreement on April 22, 2013 pursuant to which WARF agreed to release and discharge and not to sue our Company or any end user of our Company from any and all claims of liability for past, present and future infringement of such licensed patent connection with the utilisation of our Company's license of such licensed patent under the agreement between our Company and NovaShield. This agreement shall remain in effect until terminated in accordance with the conditions provided in the agreement or the date such licensed patent is no longer an enforceable patent, whichever is earlier.

Pursuant to this agreement, we obtained rights to the NovaShield behaviour-based anti-malware engine which is a signature-less, behaviour-based, real-time anti-malware system designed to detect and stop zero-day malware that try to infect a user's computer. Unlike traditional signature-based antivirus technology, this technology does not use any signatures for detection. Instead, it monitors and tracks run-time activities performed by each running process in real time, and compares these activities against a set of security specifications (i.e. policies) to determine whether these activities are deemed to be malicious and therefore should be stopped and users alerted. We have incorporated NovaShield's behaviour-based anti-malware engine in Quick Heal's Advanced DNA Scan technology.

We have also entered into a sales and service agreement dated August 28, 2012 with NovaShield pursuant to which NovaShield has agreed to sell a software development kit, grant license of intellectual property rights in its software development kit and grant sub-license of certain licensed patents owned by WARF. Our Company may use, utilise and/or incorporate part of source code from NovaShield's software development kit, its associated intellectual property rights, and WARF licensed patents to develop and sell its anti-malware software program. This agreement is effective from August 28, 2012 until the expiration, revocation by law, invalidation or abandonment of any patents or copyrights associated with NovaShield intellectual property rights or WARF licensed patents.

Agreement with SP Software Private Limited

We have also entered into a master development agreement on June 24, 2013 with SP Software Technologies (I) Private Limited ("**SP Software**"), a company engaging in providing onsite and offshore software development and consultancy services in mobile, system engineering, storage technologies and internet technology space. As per the terms of the agreement, we may request SP Software to perform certain programming services and software development work based on specific written statement of works to be entered pursuant to this agreement. We have in the past outsourced certain services to SP Software and may again do so in the future.

Protection of Intellectual Property and Non-Disclosure Agreements

We generally enter into non-disclosure agreements with our employees and channel partners, and we enter into license agreements with our customers with respect to our software and other proprietary information. However, the steps taken by us to protect our proprietary software technology may be inadequate to deter misuse or theft of this technology. Also see "*Risk Factors — Any inability to protect our proprietary technology and intellectual property rights may adversely affect our business and growth prospects*" on page 27.

In addition, we seek to protect our intellectual property rights by generally requiring our employees involved in R&D to enter into agreements assigning to us all rights, title and interest in all inventions, works of authorship, developments, ideas, improvements and other works generated by them during their period of employment with us and relinquishing any and claims to such work.

International Operations

Through our Subsidiaries we are present in Japan, Dubai, the United States and Kenya. We are also actively evaluating opportunities in these markets and other markets in South Africa, the Middle East and South East Asia. In addition, we also market and sell our solutions in 80 countries across the world.

Suppliers

We rely on third party suppliers for manufacturing and packaging as well as support services for our business, including some of our call centres. We also rely on third parties for hosting our website and on external servers for regular updates to our offerings.

For home users, we typically provide our security software solutions on CDs and DVDs. A third party vendor manufactures CDs and DVDs without security software solutions at Rudrapur in the state of Uttarakhand. This approach allows us to reduce our costs as it reduces the manufacturing overhead and inventory and also allows us to adjust more quickly to changing customer demand. Our manufacturing partner assembles our products using design specifications, quality assurance programmes, and standards that we establish, and procures components and assembles our products based on our demand forecasts. These forecasts represent our estimates of future demand for our products based upon historical trends and analysis from our sales team as adjusted for overall market conditions.

Our Company also maintains two in-house technical support centres in Nashik and Pune. While the Nashik centre handles domestic technical support, the Pune centre handles international technical support. We have outsourced the management of a technical support centre at Coimbatore in Tamil Nadu that handles technical support queries from customers located in southern India.

Competition

The markets for our solutions are intensely competitive and are subject to rapid changes in technology. Many of our competitors have longer operating histories, greater brand recognition, stronger relationships with strategic channel partners, larger technical staffs, established relationships with hardware vendors / system integrators and/or greater financial, technical and marketing resources and other market advantages. We face competition from both international and Indian companies such as Symantec, Trend Micro, Kaspersky, McAfee, Sophos, Fortinet, Watchguard, Apps Daily, Syska and K7.

Insurance

We have taken insurance policies with various insurance companies covering certain risks in relation to our business and our people. We have obtained directors' and officers' liability cover. We also maintain a mediclaim policy for our employees and their spouses and dependent children. We have also taken personal accident insurance cover for our employees.

To control our product liability risk, we place significant emphasis on quality assurance. As of December 31, 2015 we have not experienced any material product liability claim from our end users arising from or relating to the use of our solutions.

There can be no assurance that our insurance coverage will be sufficient to cover the losses we may incur. For further details in relation to risks associated with insurance policies of our Company, see "*Risk Factors — Our insurance coverage may be inadequate to cover all possible economic losses and liabilities associated with our business*" on page 30.

Employees

As of December 31, 2015, we had 1,396 full-time employees, including 547 employees in the R&D team and 400 employees in our Sales & Marketing team.

We do not have any employees that are covered by a collective bargaining agreement, and we believe our overall relations with our employees are good.

The level of competition among employers in India for skilled personnel is high and we believe that our leading

industry position, brand recognition and positive reputation are key advantages in attracting qualified and talented candidates. We recruit candidates from premier universities, colleges and institutes in India, including the Indian Institutes of Technology, regional engineering colleges (RECs) as well as from some of the leading IT companies in India and overseas. Our rigorous selection process includes technical tests, programming tasks and interviews. We have a similarly competitive recruitment programme for our lateral hires. All new hires are inducted into our organisation through a structured programme, which involves extensive training as well as mentoring.

Health, Safety and Environment

We are committed to complying with applicable health and safety regulations and other requirements in our operations and also maintaining adequate workmen's compensation policies.

Facilities

Our primary business operations and material properties are located in India. Our registered office is located in Pune. We own this office premises. We lease office and warehouse spaces for our offices and warehouses in various locations, including Ahmedabad, Aurangabad, Bangalore, Bhiwandi, Bhopal, Bhubaneswar, Chennai and New Delhi. Our lease terms typically range from between 11 months to five years. These lease agreements typically permit us to renew our lease agreements upon the end of the term. Some of these lease agreements require the rental price to be adjusted upwards by certain percentage points after the completion of a certain term or when we renew the lease. We separately engage facility managers to provide security and housekeeping services for our various premises.

We believe that our properties, taken as a whole, are in good operating condition and are suitable for our business operations.

Corporate Social Responsibility

We recognise our role and responsibility to deliver superior and sustainable value to our customers, channel partners, employees as well as the community in which we operate. With that aim, we are committed to contributing positively towards the social and economic development of the community as a whole, and specifically for the cause of economically challenged groups.

As part of our commitment to our social obligations, we created a charitable trust, the Quick Heal Foundation, in August 2014. We typically donate a significant portion of the funds allocated for corporate social responsibility expenses ("CSR") to the Quick Heal Foundation. The activities of this charitable trust are monitored by a committee of our Board of Directors.

In April 2015, the Quick Heal Foundation donated a new ambulance vehicle to the Shree Sadguru Vishwanath Maharaj Rukadikar Trust that works to provide emergency medical care to the underprivileged residing in remote locations of the state of Maharashtra. We are also working towards providing basic facilities and infrastructure such as community hall, lavatories and libraries for underprivileged communities. We believe in crime prevention through education and counselling and towards this aim, we organise cyber safety workshops in association with universities for students, parents and teachers as well as legal authorities.

We intend to constantly participate in the development of the communities near our facilities and contribute to social stability in the areas where we operate, through the Quick Heal Foundation as well as directly where our Board of Directors deem suitable.

Legal Proceedings

We are party to legal proceedings incidental to our business. Were an unfavourable ruling to occur in any or all of these litigations, there exists the possibility of a material adverse impact on our financial condition, results of operations and cash flows. For details, see "*Outstanding Litigation and Material Developments*" on page 330.

REGULATIONS AND POLICIES

The following is an overview of the relevant regulations and policies in India which are applicable to our business and operations in India. The information detailed below has been obtained from publications available in the public domain. The regulations set out below are not exhaustive and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice.

The Information Technology Act, 2000

The Information Technology Act, 2000, as amended (the “**Information Technology Act**”) was enacted with the purpose of providing legal recognition to electronic transactions. In addition to providing for the recognition of electronic records, creating a mechanism for the authentication of electronic documentation through digital signatures, the Information Technology Act also provides for civil and criminal liability including fines and imprisonment for various computer related offenses. These include offenses relating to unauthorized access to computer systems, modifying the contents of such computer systems without authorization, damaging computer systems, the unauthorized disclosure of confidential information and computer fraud. Further, it recognizes contracts concluded through electronic means, creates liability for failure to protect sensitive personal data and gives protection to intermediaries in respect of third party information liability. The Information Technology Act and the rules made thereunder regulate information technology i.e. it governs information storage, processing and communication of electronic information and data. Penalties are provided for cyber crimes which include tampering with computer source document and electronic publishing of obscene information, in addition to provision of compensation in certain cases. The Information Technology Act also provides punishment for offences committed outside India if the act involves a computer system or computer network outside India.

Pursuant to the Information Technology Act, the Department of Information Technology under the Ministry of Communications & Information Technology, Government of India, has notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 (the “**Personal Data Protection Rules**”) which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The Personal Data Protection Rules require the body corporate to provide a privacy policy for handling and dealing on personal information, including sensitive personal data. Such policy is required to be published on the website of the body corporate. In addition, the information or data so collected is required to be kept secured and used for the purposes for which it has been collected. Further, the disclosure of such information to any third party requires the prior consent of the provider of the information, unless such disclosure has been contractually agreed upon between the body corporate and the provider of information or in the event such disclosure is necessary for the purposes of legal compliance. Additionally, the body corporate is required to put in place a security programme and information security policy, so as to ensure compliance with reasonable securities practices and procedures, as prescribed under the Personal Data Protection Rules.

Other service provider registration

Other service providers (“**OSPs**”) refer to companies providing services like tele-banking, tele-medicine, tele-education, tele-trading, e-commerce, call centre, network operation centre and other IT Enabled Services. The New Telecom Policy, 1999 requires registration of OSPs with the Department of Telecommunications, Ministry of Communications and Information Technology, GoI (“**DoT**”). The OSP Registration is valid for 20 years. An OSP is subject to the terms and conditions set out in the “Terms and Conditions - Other Service Provider Category” dated August 5, 2008 issued by the DoT (“**OSP Terms and Conditions**”). The OSP Registration may be cancelled by DoT upon breach of OSP Terms and Conditions or if it is so required in the public interest.

Intellectual property laws

Intellectual property in India enjoys protection under both common law and statute. Under statute, India provides for the patent protection under the Patents Act, 1970, as amended (the “**Patents Act**”). The Patents Act governs the patent regime in India and recognises process patents as well as product patents. The form and manner of application for patents is set out under Chapter III and Chapter VIII deals with the grant of patents. Patents obtained in India are valid for a period of 20 years from the date of filing the application. In addition to broad requirement that an invention satisfy the requirements of novelty, utility and non-obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria.

Trademark protection is provided under the Trade Marks Act, 1999, as amended (the “**Trade Marks Act**”). The Trade Marks Act governs the statutory protection of trademarks and for the prevention of the use of fraudulent marks in India. The purpose of the Trademarks Act is to grant exclusive rights to marks such as a brand, label, heading and to obtain relief in case of infringement for commercial purposes as a trade description. It prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely applying trademarks. Once a mark is registered, it is valid in India only, for a period of 10 years and can be renewed from time to time in perpetuity. In India, trademarks enjoy protection under both statutory and common law. Indian trademark law permits the registration of trademarks for goods and services. Certification marks and collective marks can also be registered under the Trademarks Act. Trademarks are granted to marks capable of being represented graphically and which are capable of distinguishing the goods or services of one person from those of others. While both registered and unregistered trademarks are protected under Indian law, the registration of trademarks offers significant advantages to the registered owner. Registered trademarks may be protected by means of an action for infringement and unregistered trademarks may only be protected by means of the common law remedy of passing off.

The Copyright Act, 1957 (“**Copyright Act**”) governs copyright protection in India. Under the Copyright Act, copyright may subsist in original literary, dramatic, musical or artistic works, cinematograph films, and sound recordings. Software, both in source and object code, constitutes a literary work under Indian law and is afforded copyright protection. While copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Once registered, copyright protection of a work lasts for a period of 60 years following the demise of the author. Reproduction of a copyrighted work for sale or hire, issuing of copies to the public, performance or exhibition in public, making a translation of the work, making an adaptation of the work and making a cinematograph film of the work without consent of the owner of the copyright are all acts which expressly amount to an infringement of copyright. With respect to computer software, in addition to the above, any unauthorised sale or commercial rental of software also amount to infringement of copyright. However, the Copyright Act prescribes certain fair use exceptions which permit certain acts, which are otherwise considered copyright infringement.

Shops and establishments legislation

The provisions of shops and establishments legislations, as may be applicable in a state in which establishments are set up, regulate the conditions of work and employment and generally prescribe obligations in respect of inter alia registration, opening and closing hours, daily and weekly working hours, holidays, leave, health and safety measures and wages for overtime work. Some of the shops and establishments legislations which our Company is subject to include The Bombay Shops and Establishments Act, 1948, as amended, The Punjab Shop and Commercial Establishment Act, 1958, as amended, The Andhra Pradesh Shops and Establishments Act, 1988, as amended, The Delhi Shops and Establishments Act, 1954, as amended and Karnataka Shops and Commercial Establishments Act, 1961.

Importer exporter code

The main objective of the Foreign Trade (Development and Regulation) Act, 1992 as amended (the “**FTDR Act**”), is to develop and regulate foreign trade by facilitating imports into India and augmenting exports from India. Under the FTDR Act, an importer- exporter code (“**IEC**”) granted by the Director General of Foreign Trade is required to be obtained in the event any import or export of the product is envisaged. Failure to obtain the IEC number shall attract penalty under the FTDR Act.

Foreign direct investment

Foreign investment in India is primarily governed by the provisions of the Foreign Exchange Management Act, 1999 (“**FEMA**”) and the rules and regulations promulgated thereunder. The RBI, in exercise of its powers under FEMA, has notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 (“**FEMA20**”) pursuant to which, no prior consent or approval is required from the RBI for foreign direct investment under the “automatic route” within the specified sectoral caps prescribed for various industrial sectors. In respect of all industries not specified under the automatic route, and in respect of investments in excess of the specified sectoral limits under the automatic route, approval for such investment shall be required from the FIPB and/or the RBI. 100% foreign direct investment is permitted in information technology sector, under automatic route.

Overseas Direct Investment

An Indian entity is allowed to make Overseas Direct Investment (“**ODI**”) under the automatic route up to limits prescribed by the RBI, which currently should not exceed 400% of its net worth. ODI can be made by investing in either joint ventures or wholly owned subsidiaries outside India. Any financial commitment exceeding USD one billion (or its equivalent) in a financial year would require prior approval of the RBI.

Labour laws

We are subject to various labour laws for the safety, protection, condition of working, employment terms and welfare of labourers and/or employees of our Company. The Industrial Disputes Act, 1947, as amended, provides for statutory mechanism of settlement of all industrial disputes, a term which primarily refers to a dispute or difference between employers and workmen concerning employment or the terms of employment or with the conditions of labour of any person.

Our Company uses the services of certain licensed contractors who in turn employ contract labour whose number exceeds 20 in respect of each facility. Accordingly, our Company is regulated by the provisions of the Contract Labour (Regulation and Abolition) Act, 1970, as amended (the “**CLRA Act**”), and the rules framed thereunder which requires our Company to be registered as a principal employer and prescribes certain obligations with respect to welfare and health of contract labour. The CLRA Act imposes certain obligations on the contractor in relation to establishment of canteens, rest rooms, drinking water, washing facilities, first aid, other facilities and payment of wages. However, in the event the contractor fails to provide these amenities, the principal employer is under an obligation to provide these facilities within a prescribed time period. Penalties, including both fines and imprisonment, may be levied for contravention of the provisions of the CLRA Act.

Our Company is subject to other laws concerning condition of working, benefit and welfare of our labourers and employees such as The Employees State Insurance Act 1948, as amended, The Employees (Provident Fund and Miscellaneous Provisions) Act, 1952, as amended, The Payment of Gratuity Act, 1972, as amended, The Payment of Bonus Act, 1965, as amended, The Minimum Wages Act, 1948, as amended, The Payment of Wages Act, 1936, as amended, The Payment of Bonus Act, 1965 The Maternity Benefit Act, 1961, as amended and The Equal Remuneration Act, 1976, as amended.

Other laws

In addition to the above, our Company is also required to comply with the provisions of the Companies Act, 2013, Companies Act, 1956, to the extent applicable, and rules framed thereunder and other applicable statutes imposed by the Centre or the State Government and authorities for our day-to-day business and operations. Our Company is also subject to various central and state tax laws.

1) The above statement should be read with the notes to restated unconsolidated summary statements of assets and liabilities, profits and losses and cash flows as appearing in Annexure IV and V.

2a) Change in the estimated useful lives of the fixed assets

During the year ended March 31, 2015, the Company revised the estimated useful life of building, computers, office equipment, electrical installations, furniture and fixture and vehicles, which has resulted in additional charge of depreciation amounting to Rs. 38.30 million in that year. These changes are considered as a change in the estimates and consequently no retrospective adjustments have been made.

2b) Depreciation on assets costing less than Rs. 5,000

Till the year ended March 31, 2014, to comply with the requirements of Schedule XIV to the Companies Act, 1956, the Company was charging 100% depreciation on the assets costing less than Rs. 5,000 in the year of purchase. However, Schedule II to the Companies Act 2013, applicable from the current year does not recognize such practices. Hence to comply with the requirement of Schedule II to the Companies Act 2013, the Company has changed its accounting policy for depreciation of assets costing less than Rs. 5,000. As per revised policy, the Company is depreciating such assets over their useful life as estimated by the management. The management has decided to apply the revised accounting policy prospectively from accounting periods commencing on or after April 1, 2014.

The change in accounting policy for depreciation of assets costing less than Rs. 5,000 did not have any market impact on restated unconsolidated summary statements of the Company for the year ended March 31, 2015.

3) Material regrouping

With effect from April 1, 2011, revised Schedule VI notified under the Companies Act, 1956 has become applicable to the Company for preparation and presentation of its financial statements. The adoption of revised Schedule VI did not impact recognition and measurement principles followed for preparation of financial statements. However, it had significant impact on presentation and disclosures made in the financial statements. The Company has also reclassified the figures for the previous years ended March 31, 2011 in accordance with the requirements applicable for the year ended March 31, 2012.

Appropriate adjustments have been made in the Restated Unconsolidated Summary Statements of Assets and Liabilities, Profit and Losses and Cash Flows, wherever required, by a reclassification of the corresponding items of income, expenses, assets, liabilities and cash flows in order to bring them in line with the groupings as per the audited financials of the Company as at and for the year ended March 31, 2015, prepared in accordance with Schedule III and the requirements of the Securities and Exchange Board of India (Issue of Capital & Disclosure Requirements) Regulations, 2009 (as amended).

The Company has prepared the audited unconsolidated financial statements to comply in all material respects with the accounting standards specified under the Companies Act, 1956 and as per section 133 of the Companies Act, 2013 (read with rule 7 of the Companies (Accounts) Rules, 2014) and other accounting principles generally accepted in India. The audited unconsolidated financial statements have been prepared under the historical cost convention on an accrual basis. The accounting policies have been consistently applied by the company and, except for changes as detailed in 2.1(c)(iii) in significant accounting policies.

The Restated Unconsolidated Summary Statements have been prepared to comply in all material respects with the requirements of Sub-clause (i), (ii) and (iii) of clause (b) of Sub-section (1) of Section 26 of Chapter III of the Companies Act, 2013, as amended read with rules 4 of Companies (Prospectus and Allotment of Securities) Rules, 2014, as amended and the relevant provisions of Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 ("the SEBI Guidelines") issued by SEBI on August 26, 2009 as amended from time to time.

2.1 Summary of significant accounting policies

(a) Use of estimates

The preparation of the Restated Unconsolidated Summary Statements requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and disclosure of contingent liabilities at the end of reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

(b) Tangible fixed assets

Tangible fixed assets are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises of purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price. Capital work-in-progress includes cost of fixed assets that are not ready to be put to use.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the Statement of Profit and Loss for the period during which such expenses are incurred.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

(c) Depreciation on tangible fixed assets

i) Depreciation on fixed assets

Till the year ended March 31, 2014, Schedule XIV to the Companies Act, 1956, prescribed requirement concerning depreciation of fixed assets. From the current year, Schedule XIV has been replaced by Schedule II to the Companies Act, 2013. The applicability of Schedule II has resulted in the following changes related to depreciation of fixed assets.

a) Useful lives/ depreciation rates

Till the year ended March 31, 2014, the depreciation rates prescribed under Schedule XIV were treated as minimum rates and the company was not allowed to charge depreciation at lower rates even if such lower rate were justified considering the estimated useful life of the asset. Schedule II to the Companies Act, 2013 prescribes useful life for fixed assets which in many cases are different from lives prescribed under the erstwhile Schedule XIV. However, Schedule II allows companies to use higher/ lower useful lives and residual values if such useful lives and residual values can be technically supported and justification for difference is disclosed in the Restated Unconsolidated Summary Statements.

Considering applicability of Schedule II, the management has re-estimated useful lives and residual values of all its fixed assets. The management believes that the rates as prescribed under Schedule II reflect its estimate of useful lives and residual values of fixed assets. Hence the Company has aligned the estimated useful life and residual values with the lives prescribed under Schedule II. The Company has used the transitional provision of Schedule II to adjust the impact of change in the useful lives arising on its first application in the statement of profit and loss. Had the Company continued its earlier policy of depreciating the fixed assets, the profit for the year ended March 31, 2015 (being the first year of application of Schedule II) would have been higher by Rs. 38.30 million and fixed assets would correspondingly been higher by Rs. 38.30 million.

b) Depreciation on assets costing less than Rs. 5,000

Till the year ended March 31, 2014, to comply with the requirements of Schedule XIV to the Companies Act, 1956, the Company was charging 100% depreciation on the assets costing less than Rs. 5,000 in the year of purchase. However, Schedule II to the Companies Act 2013, applicable from the April 1, 2015 does not recognize such practices. Hence to comply with the requirement of Schedule II to the Companies Act 2013, the Company has changed its accounting policy for depreciation of assets costing less than Rs. 5,000. As per revised policy, the Company is depreciating such assets over their useful life as estimated by the management. The management has decided to apply the revised accounting policy prospectively from accounting periods commencing on or after April 1, 2014.

The change in accounting for depreciation of assets costing less than Rs. 5,000, did not have any material impact on Restated Unconsolidated Summary Statements of the Company for the year ended March 31, 2015.

Depreciation on fixed assets is calculated on a WDV basis using the rates arrived at based on the useful lives estimated by the management. The Company has used the following rates to provide depreciation on its fixed assets.

Type of assets	<i>(Life in years)</i>					
	September 30, 2015	March 31, 2015	March 31, 2014	March 31, 2013	March 31, 2012	March 31, 2011

Computers	3	3	6	6	6	6
Electrical Installations	10	10	12	12	12	12
Furniture and Fixtures	10	10	16	16	16	16
Office equipments	5	5	21	21	21	21
Servers	6	6	3	3	3	3
Vehicle	8	8	11	11	11	11

Leasehold premises are amortized on a straight line basis over the period of lease, i.e. 30 years.

(d) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Intangible assets i.e. softwares are amortized on a straight line basis over the period of expected future benefits i.e. over their estimated useful lives of three years. Intangible assets and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with AS 5 "Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies."

	<i>Life (years)</i>					
	September 30, 2015	March 31, 2015	March 31, 2014	March 31, 2013	March 31, 2012	March 31, 2011
Computer software	3	3	3	3	3	3

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

Research and development costs

Research costs are expensed as incurred. Development expenditure incurred on an individual project is recognized as an intangible asset when the Company can demonstrate all the following:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale
- Its intention to complete the asset
- Its ability to use or sell the asset
- How the asset will generate future economic benefits

- The availability of adequate resources to complete the development and to use or sell the asset
- The ability to measure reliably the expenditure attributable to the intangible asset during development.

Following the initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized on a straight line basis over the period of expected future benefit from the related project, i.e., the estimated useful life. Amortization is recognized in the Statement of Profit and Loss. During the period of development, the asset is tested for impairment annually.

(e) Impairment of tangible and intangible assets

The carrying amounts of assets are reviewed at each Balance Sheet if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the Company makes a reasonable estimate of value in use.

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

(f) Leases

Where the Company is a lessee

Finance leases, which effectively transfer to the company substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in the statement of profit and loss. Lease management fees, legal charges and other initial direct costs of lease are capitalized.

A leased asset is depreciated on a straight-line basis over the useful life of the asset. However, if there is no reasonable certainty that the company will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

(g) Investments

Investments which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the Restated Unconsolidated Summary Statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

(h) Inventories

Raw materials are valued at lower of cost and net realizable value. However, materials and other items held for use in the production of inventories is not written down below cost of the finished product in which they will be incorporated are expected to be sold at or above cost. Cost of raw material is determined on a weighted average basis.

Finished goods are valued at lower of cost and net realizable value. Cost includes direct material and labour and a proportion of manufacturing overhead based on normal operating capacity. Cost of finished goods includes excise duty, whenever applicable. Cost is determined on a weighted average basis.

Traded goods are valued at lower of cost and net realizable value. Cost included cost of purchase and other costs incurred in bringing the inventories to present location and condition. Cost is determined on weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

(i) Revenue recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

(i) Sale of security software products and devices

Revenue from sale of security software products and devices is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on dispatch of the goods to its customers. The Company collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year.

(ii) Sale of mobile software product with insurance

Revenue from sale of mobile security products is recognized (net of insurance premium collected on behalf of insurer agency) when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on dispatch of the goods to its customers. The Company collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to

the Company. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year.

(iii) Income from services

Revenues from support services are recognized as and when services are rendered. The Company collects service tax on behalf of the government and, therefore, it is not an economic benefit flowing to the Company. Hence, it is excluded from revenue.

(iv) Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate of applicable interest rate. Interest income is included under the head “other income” in the Statement of Profit and Loss.

(v) Dividends

Dividend income is recognized when the Company’s right to receive dividend is established by the reporting date. Dividend income is included under the head “other income” in the Statement of Profit and Loss.

(j) Foreign currency translation

Foreign currency transactions and balances

(i) Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(ii) Conversion

Foreign currency monetary items are re-translated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rates at the date when the values were determined.

(iii) Exchange differences

Exchange differences arising on conversion / settlement of foreign currency monetary items are recognized as income or expenses in the year in which they arise.

(k) Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognize contribution payable to the provident fund scheme as an expenditure, when an employee renders the related services. If the contribution payable to the scheme for services received before Balance Sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contributions already paid exceeds the contribution due for services received before the Balance Sheet date, then the excess recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or cash refund.

The Company operates a defined benefit plan for its employees, viz. gratuity. The cost of providing benefits under the plan is determined on the basis of actuarial valuation at each year-end. Actuarial valuation is carried out for the plan using the projected unit credit method. Actuarial gain and losses for the defined benefit plan is recognized in full in the period in which it occurred in the Statement of Profit and Loss.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that

it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year end. Actuarial gains/losses are immediately taken to the Statement of Profit and Loss and are not deferred. The Company presents the leave as a current liability in the Balance Sheet to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

(l) Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the Statement of Profit and Loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the Statement of Profit and Loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the same taxable entity and the same taxation authority.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

(m) Employee stock compensation cost

Employees of the Company receive remuneration in the form of share based payment transactions, whereby employees render services as consideration for equity instruments (equity-settled transactions).

In accordance with the Guidance Note on Accounting for Employee Share-based Payments issued by Institute of Chartered Accountants of India (ICAI), the cost of equity-settled transactions is measured using the intrinsic value method and recognized, together with a corresponding increase in the “Stock options outstanding account” in reserves. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company’s best estimate of the number of equity instruments that will ultimately vest. The expense or credit recognized in the Statement of Profit and Loss for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and is recognized in employee benefits expense.

The expense or credit recognized in the statement of profit and loss for a year represents the movement in cumulative expense recognized as at the beginning and end of that year and is recognized in employee benefits expense. In case of the employee stock option schemes having a graded vesting schedule, each vesting tranche having different vesting period has been considered as a separate option grant and accounted for accordingly.

Where the terms of an equity-settled transaction award are modified, the minimum expense recognized is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognized for any modification that increase the total intrinsic value of the share-based payment transaction, or otherwise beneficial to the employee as measured at the date of modification.

(n) Segment reporting

Identification of segments

The Company’s operating businesses are organized and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of geographical segments is based on the areas in which major operating divisions of the Company operate.

(o) Earnings per share (EPS)

Basic earnings per share are calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year, are adjusted for the effects of all dilutive potential equity shares.

(p) Provisions

A provision is recognized when the Company has a present obligation as a result of past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to its present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate assets but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the Statement of Profit and Loss net of any reimbursement.

(q) Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not

recognize a contingent liability but discloses its existence in the Restated Unconsolidated Summary Statements.

(r) Cash and cash equivalents

Cash and cash equivalents for the purpose of Restated Unconsolidated Summary Statement of Cash Flows comprise cash at bank and in hand and short term investment with an original maturity period of three months or less.

(b) Use of estimates

The preparation of consolidated financial statements requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and disclosure of contingent liabilities at the end of reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or

liabilities in future periods.

(c) Tangible fixed assets

Tangible fixed assets are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price. Capital work-in-progress includes cost of fixed assets that are not ready to be put to use.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to consolidated statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

(d) Depreciation on tangible fixed assets

In the case of Holding Company:

a) Depreciation on fixed assets

Till the year ended March 31, 2014, Schedule XIV to the Companies Act, 1956, prescribed requirement concerning depreciation of fixed assets. From the current year, Schedule XIV has been replaced by Schedule II to the Companies Act, 2013. The applicability of Schedule II has resulted in the following changes related to depreciation of fixed assets.

b) Useful lives / depreciation rates

Till the year ended March 31, 2014, the depreciation rates prescribed under Schedule XIV were treated as minimum rates and the Company was not allowed to charge depreciation at lower rates even if such lower rate were justified the estimated useful life of the asset. Schedule II to the Companies Act, 2013 prescribes useful life for fixed assets which in many cases are different from lives prescribed under the erstwhile Schedule XIV. However, Schedule II allows companies to use higher/ lower useful lives and residual values if such useful lives and residual values can be technically supported and justification for difference is disclosed in the financial statements.

Considering applicability of Schedule II, the management has re-estimated useful lives and residual values of all its fixed assets. The management believes that the rates as prescribed under Schedule II reflect its estimate of useful lives and residual values of fixed assets. Hence the Company has aligned the estimated useful life and residual values with the lives prescribed under Schedule II. The Company has used the transitional provision of Schedule II to adjust the impact of change in the useful lives arising on its first application in the statement of profit and loss. Had the Company continued its earlier policy of depreciating the fixed assets, the profit for the year ended March 31, 2015 would have been higher by Rs. 38.30 million and fixed assets would correspondingly been higher by Rs. 38.30 million.

c) Depreciation on assets costing less than Rs. 5,000

Till the year ended March 31, 2014, to comply with the requirements of Schedule XIV to the Companies Act, 1956, the Company was charging 100% depreciation on the assets costing less than Rs. 5,000 in the year of purchase. However, Schedule II to the Companies Act 2013, applicable from the current year does not recognize such practices. Hence to comply with the requirement of Schedule II to the Companies Act 2013, the Company has changed its accounting policy for depreciation of assets costing less than Rs. 5,000. As per revised policy, the Company is depreciating such assets over their useful life as estimated by the management. The management has decided to apply the revised accounting policy prospectively

from accounting periods commencing on or after April 1, 2014.

The change in accounting for depreciation of assets costing less than Rs. 5,000, did not have any material impact on consolidated financial statement of the Group for the year ended March 31, 2015.

In the case of Group:

Depreciation on fixed assets is calculated on a WDV basis using the rates arrived at based on the useful lives estimated by the management supported by technical evaluation. The Group has used the following lives to provide depreciation on its fixed assets.

Type of assets	<i>(Life in years)</i>				
	September 30, 2015	March 31, 2015	March 31, 2014	March 31, 2013	March 31, 2012
Buildings	60	60	61	61	61
Computers	3	3	6	6	6
Electrical Installations	10	10	12	12	12
Furniture and Fixtures	10-18	10-18	16-18	16	16
Office equipments	5-15	5-15	15-21	21	21
Servers	6	6	3	3	3
Vehicle	8	8	11	11	11

Leasehold premises are amortized on a straight line basis over the period of lease, i.e. 30 years.

d) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for intended use.

Intangible assets i.e. softwares are amortized on a straight line basis over the period of expected future benefits i.e. over their estimated useful lives of three years. Such intangible assets and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with “AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies”.

Type of asset	September 30, 2015	March 31, 2015	March 31, 2014	March 31, 2013	March 31, 2012
Computer software	3	3	3	3	3

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of profit and loss when the asset is disposed.

Research and development costs

Research costs are expensed as incurred. Development expenditure incurred on an individual project is recognized as an intangible asset when the Group can demonstrate all the following:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale
- Its intention to complete the asset

- Its ability to use or sell the asset
- How the asset will generate future economic benefits
- The availability of adequate resources to complete the development and to use or sell the asset
- The ability to measure reliably the expenditure attributable to the intangible asset during development.

Following the initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized on a straight line basis over the period of expected future benefit from the related project, i.e., the estimated useful life. Amortization is recognized in the consolidated statement of profit and loss. During the period of development, the asset is tested for impairment annually.

e) Impairment of tangible and intangible assets

The carrying amounts of assets are reviewed at each Balance Sheet if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the Group makes a reasonable estimate of value in use.

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if transactions can be identified, an appropriate valuation model is used.

The Group bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Group's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of profit and loss unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

f) Leases

Where the Company within the Group is a lessee

Finance leases, which effectively transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in the consolidated statement of profit and loss. Lease management fees, legal charges and other initial direct costs of lease are capitalized.

A leased asset is depreciated on a straight-line basis over the useful life of the asset. However, if there is no

reasonable certainty that the company will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the consolidated statement of profit and loss on a straight-line basis over the lease term.

g) Investments

Investments which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the consolidated statement of profit and loss.

h) Inventories

Raw materials are valued at lower of cost and net realizable value. However, materials and other items held for use in the production of inventories is not written down below cost of the finished product in which they will be incorporated are expected to be sold at or above cost. Cost of raw material is determined on a weighted average basis.

Finished goods are valued at lower of cost and net realizable value. Cost includes direct material and labour and a proportion of manufacturing overhead based on normal operating capacity. Cost of finished goods includes excise duty, whenever applicable. Cost is determined on a weighted average basis.

Traded goods are valued at lower of cost and net realizable value. Cost included cost of purchase and other costs incurred in bringing the inventories to present location and condition. Cost is determined on weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

i) Revenue recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

(i) Sale of security software products and devices

Revenue from sale of security software products is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on dispatch of the goods to its customers. The Group collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the Group. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year.

(ii) Sale of mobile software product with insurance

Revenue from sale of mobile security products is recognized (net of insurance premium collected on behalf of insurer agency) when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on dispatch of the goods to its customers. The Group collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the Group. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year.

(iii) Income from services

Revenues from support services are recognized as and when services are rendered. The Group collects service tax on behalf of the government and, therefore, it is not an economic benefit flowing to the Group. Hence, it is excluded from revenue.

(iv) Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate of applicable interest rate. Interest income is included under the head “other income” in the consolidated statement of profit and loss.

(v) Dividends

Dividend income is recognized when the Group’s right to receive dividend is established by the reporting date. Dividend income is included under the head “other income” in the consolidated statement of profit and loss.

j) Foreign currency translation

Foreign currency transactions and balances

(i) Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(ii) Conversion

Foreign currency monetary items are re-translated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rates at the date when the values were determined.

(iii) Exchange differences

Exchange differences arising on conversion / settlement of foreign currency monetary items are recognized as income or expenses in the year in which they arise.

(iv) Foreign operations

The assets and liabilities of a non-integral foreign operation are translated into the reporting currency at exchange rate prevailing at the reporting date. Their statement of profit and loss are translated at exchange rates prevailing at the dates of transactions or average rates, where such rates approximate the exchange rate at the date of transaction. The exchange differences arising on translation are accumulated in the foreign currency translation reserve.

When there is change in the classification of foreign operation, the translation procedures applicable to the revised classification are applied from the date of change in classification.

k) Retirement and other employee benefits

In case of Holding Company:

The Company operates a defined benefit plan for its employees, viz. gratuity. The cost of providing benefits under the plan is determined on the basis of actuarial valuation at each year-end. Actuarial valuation is carried out for the plan using the projected unit credit method. Actuarial gain and losses for the defined benefit plan is recognized in full in the period in which it occurred in the consolidated statement of profit and loss.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year end. Actuarial gains/losses are immediately taken to the consolidated statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the Balance Sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

In case of Subsidiary:

Retirement benefit in the form of provident fund and National Social Security Fund (NSSF - Kenya) is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund and NSSF - Kenya. The Group recognizes contribution payable to the provident fund scheme and NSSF - Kenya as an expenditure, when an employee renders the related services. If the contribution payable to the scheme for services received before Balance Sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contributions already paid exceeds the contribution due for services received before the Balance Sheet date, then the excess recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or cash refund.

There are no other long term benefits payable to employees of any of the overseas subsidiaries.

l) Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the subsidiaries operate. The tax rates and tax laws used to compute the amount are those that are enacted at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Group has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the Group re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be,

that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Group writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the same taxable entity and the same taxation authority.

Minimum alternate tax (MAT) paid in a year is charged to the consolidated statement of profit and loss as current tax. MAT credit available is recognized as an asset only to the extent that there is convincing evidence that the Group will pay normal income tax during the period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Group recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the consolidated statement of profit and loss and shown as “MAT Credit Entitlement.” The Group reviews the “MAT credit entitlement” asset at each reporting date and writes down the asset to the extent the group does not have convincing evidence that it will pay normal tax during the specified period.

m) Employee stock compensation cost

Employees of the Group receive remuneration in the form of share based payment transactions, whereby employees render services as consideration for equity instruments (equity-settled transactions).

In accordance with the *Guidance Note on Accounting for Employee Share-based Payments* issued by Institute of Chartered Accountants of India (ICAI), the cost of equity-settled transactions is measured using the intrinsic value method and recognized, together with a corresponding increase in the “Stock options outstanding account” in reserves. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company’s best estimate of the number of equity instruments that will ultimately vest.

The expense or credit recognized in the consolidated statement of profit and loss for a year represents the movement in cumulative expense recognized as at the beginning and end of that year and is recognized in employee benefits expense. In case of the employee stock option schemes having a graded vesting schedule, each vesting tranche having different vesting period has been considered as a separate option grant and accounted for accordingly.

Where the terms of an equity-settled transaction award are modified, the minimum expense recognized is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognized for any modification that increase the total intrinsic value of the share-based payment transaction, or otherwise beneficial to the employee as measured at the date of modification.

There are no such schemes of stock compensation in any of the Company’s subsidiaries.

n) Segment reporting

Identification of segments

The Group’s operating businesses are organized and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of geographical segments is based on the areas in which major operating areas of the Group operate.

o) Earnings per share (EPS)

Basic earnings per share are calculated by dividing the net profit for the period attributable to equity

shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year, are adjusted for the effects of all dilutive potential equity shares.

p) Provisions

A provision is recognized when the Group has a present obligation as a result of past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to its present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate assets but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated statement of profit and loss net of any reimbursement.

q) Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Group does not recognize a contingent liability but discloses its existence in the financial statements.

r) Cash and cash equivalents

Cash and cash equivalents for the purpose of Restated Consolidated Summary Statement of Cash Flows comprise cash at bank and in hand and short term investment with an original maturity period of three months or less.

Our proprietary antivirus technology, which is based on an innovative behaviour and threat detection system, works to detect security threats including virus and malware attacks in real time to protect our users' IT assets across platforms, including Windows, Mac, Android, iOS and Linux, and across devices, including desktops, laptops, mobile/ smartphones and tablets, while aiming to ensure resource availability, business continuity and an uninterrupted digital experience. Our portfolio includes solutions under the widely recognised brand names "Quick Heal" and "Seqrite" for desktop and laptop security, mobile / smartphone security, endpoint security, gateway security, network security, cloud-based mobile device management (MDM) systems, data loss prevention (DLP) systems and family safety software. Since our incorporation, more than 24.5 million licenses of our products have been installed and as of December 31, 2015, we had over 7.13 million active licenses spread across more than 80 countries.

Our security software solutions are structured to be user friendly and can be accessed, installed and used with minimal effort and limited technical knowledge. We provide support services to our end users in English, Hindi and several other major regional Indian languages. Our home users are usually required to purchase an annual or multi-year license. Our SMB, enterprise users, educational institutions and government customers may purchase single or multiple user licenses which may be renewed annually or every three years. We take regular feedback from our large user base which enables us to understand the needs of our users better and helps us to innovate and design improved solutions. Our sales and marketing activities benefit from word-of-mouth recommendations from our large user network to create a viral marketing effect, which is amplified by the speed, ease of use and quality of our solutions, and allows us to gain new customers at a low acquisition cost. We also invest in advertising and sales promotion activities across various media channels that further increase our brand recognition among our existing and potential users.

We sell our solutions directly and through distributors, whom we refer to as channel partners, who in turn distribute our solutions through resellers. We have established strong, sustainable and long-term relationships with our channel partners. Our home users and other users including SMBs may purchase our solutions in stores, online and through our retail channel partners. End users such as enterprises, educational institutions and government customers may purchase our solutions directly from us, through our enterprise channel partners as well as through

system integrators who package our solutions as part of their overall product offering. Our internal sales team and channel partners collaborate to identify new sales prospects, sell solutions, and provide after-sale support.

We believe this distribution model helps us to deliver our solutions to a large addressable market, distributed across a broad geographic spectrum, at low costs. As at December 31, 2015, we have a network of over 19,000 retail channel partners, 349 enterprise channel partners, 319 government partners and 944 mobile channel partners. This approach also allows us to maintain connectivity with our end users, including key enterprise accounts, and helps us support our channel partners, while leveraging their distribution reach and capabilities. For more details, see “*Our Business — Sales and Distribution*” on page 148.

We have been successful in augmenting our portfolio of solutions over time through continuous R&D and in-house development which we believe is a key differentiator of our business model. As of December 31, 2015, we had 1,396 employees, including 547 employees who comprise our R&D team. Over the three fiscal years ended March 31, 2015, we have introduced solutions for mobile and tablet security, as well as MDM and DLP systems. We continue to invest in our existing solutions and for developing new solutions towards applications like Internet of Things (IoT) security and home automation security systems.

Our Company was incorporated in 1995 and our registered office is located in Pune, India. As of December 31, 2015, we conduct our sales and marketing activities out of 64 offices and warehouses across 36 cities in India and, through our Subsidiaries, that are present in Japan, Dubai, the United States and Kenya. Our technical innovation and business achievements have earned us multiple industry awards including the CRN Channel Champion Award for Client Security in 2014 and 2015 and the DQChannels Channel Satisfaction Survey 2015 in the category of antivirus vendors. In 2010, we were awarded the Deloitte Fast 50 award which recognised us as one of India’s 50 fastest growing and dynamic technology companies (based on revenue growth over the past three years as of then). In addition, Kailash Sahebrao Katkar, our Promoter, Managing Director and Chief Executive Officer, was honoured with SME Channels’ “IT Entrepreneur of the Year” award in 2014. On August 18, 2015, our Company was awarded the “Make in India Excellence 2015” award for its contribution towards the economic growth of the country. Our solutions have also been certified by AV-Test and AVComparatives.

For the six months ended September 30, we generated total revenue of ₹ 1,522.74 million, Gross Profit ₹1,358.16 million, EBITDA of ₹439.99 million and restated profit for the period of ₹ 242.24 million. For the fiscal year ended March 31, 2015, we generated total revenue of ₹ 2,943.37 million, Gross Profit ₹ 2,606.19 million, EBITDA of ₹ 918.03 million and restated profit for the year of ₹ 538.04 million. For the five fiscal years ended March 31, 2015, our total revenue, Gross Profit, EBITDA and restated profit for the year grew at a CAGR of 21.94%, 20.97%, 13.07% and 8.67%, respectively.

We currently report our results across two segments, within India and outside India, based on the geographic areas in which we have major operations. For the six months ended September 30, 2015, we derived 97.34% and 2.66% of our revenue from sales to users within India and outside India, respectively. For fiscal year 2015, we derived 97.31% and 2.69% of our revenue from sales to users within India and outside India, respectively.

We categorise our sales as retail sales and other sales. We define retail sales as all sales, other than those through our enterprise channel partners, government partners, mobile channel partners and sales outside India. Based on this definition, other sales refers to sales where our sales team works closely with the enterprise, government and mobile channel partners, as well as the eventual end users, such as enterprises and government customers, to sell our solutions. For the six months ended September 30, 2015, we derived 86.76% and 13.24% of our revenue from retail sales and other sales, respectively. For fiscal year 2015, we derived 86.67% and 13.33% of our revenue from retail sales and other sales, respectively.

Key Factors Affecting Our Results of Operations and Financial Condition

The following are key factors that have affected, and are expected to affect, our results of operations and financial condition:

Growth of Our User Base and Retention of Existing Users

The growth of our user base is a primary driver of our revenue. While home users continue to be our principal user base, we are working to expand our user base amongst SMBs, enterprises, educational institutions and

government customers. One of the main drivers of growth of our active user base has been the introduction of new and upgraded solutions. In addition, we believe we provide a user-friendly, efficient and effective user experience that helps us to retain existing users and acquire new users. We have been increasing our efforts to penetrate new markets in India and drive awareness and market adoption in the international markets. Our efforts to grow our user base, both in India and overseas, have occurred in the context of increasing awareness and concern among individuals, businesses and governments of cyber security threats. For example, according to the Zinnov Industry Report, the number of cyber-crimes in India is expected to reach 300,000 in 2015; almost double the level of last year. This demonstrates the growing market for security software solutions in India. Additionally, according to the Zinnov Industry Report, the number of SMBs in India is 51 million for fiscal year 2015 and the number of SMBs is expected to grow at 15% year-on-year and constitute 30% of the Indian IT market. In terms of technology adoption, SMBs are likely to spend around ₹ 71,300 crore in 2015 on IT products and by 2020, this expenditure is expected to rise to ₹ 154,800 crore with a CAGR of over 16%. We expect to continue our focus on SMBs and enterprise customers, and expand our user base amongst them.

Brand Reputation and Value

The recognition and reputation of our “Quick Heal” and “Seqrite” brands among end users have significantly contributed to the growth of our business and hence maintaining and enhancing these brands is critical to our business. We believe we have a high degree of brand recall, which plays a key role in distinguishing our solutions from those of our competitors.

Our efforts to grow our user base have driven growth in our advertising and sales promotion, as well as business promotion expenses. We have invested in brand building, including through the development and promotion of our “Quick Heal” and “Seqrite” brands, and our advertising and sales promotion activities include print, television and radio marketing, online marketing, blogs and other media referrals. For the six months ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, expenditure on advertising and sales promotion was ₹ 90.20 million, ₹ 288.09 million, ₹ 223.10 million and ₹ 190.28 million, respectively.

We also participate in several industry conferences and provide sponsorships for various events related to security solutions and developments in the industry that help us gather market intelligence, increase our visibility and allow us to interact with key stakeholders. For the six months ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, we incurred ₹ 54.58 million, ₹ 134.53 million, ₹ 109.70 million and ₹ 70.48 million, respectively, on business promotion expenses.

We expect our advertising and sales promotion, as well as business promotion expenses to continue to increase in the future as we continue to build our brands, to expand our user base. Accordingly, our EBITDA margins have been impacted in the past, and may continue to be adversely impacted in the future as well. For the six months ended September 30, 2015, our EBITDA margin was 29.69%, while in fiscal years 2015, 2014 and 2013, our EBITDA margins were 32.09%, 42.98% and 51.30%, respectively.

We expect to invest significantly in building our brand through advertising and sales promotion and intend to deploy ₹ 1,110 million from the Net Proceeds for this purpose. For details, please see “*Objects of the Offer — Advertising and Sales Promotion*” on page 104.

R&D and Product Development

The market for security software is intensely competitive and characterised by rapid changes in technology, user requirements, industry standards and frequent new product introductions and improvements. As a result, our revenue growth has been steered by our R&D efforts to design and develop new solutions with the latest technology that can respond to our end users need. Constant innovation and customisation of our solutions to meet user requirements and updates to existing products, aimed at protecting our users from evolving threats has helped us to grow the number of new users and retain existing users, which drives our revenue, while also constituting a major and growing component of our costs. We seek to strengthen our R&D capability continuously by expanding our R&D team with relevant skills and expertise. For the six months ended September 30, 2015, we expensed ₹ 290.22 million on R&D-related expenses which formed 19.59%, of our revenue from operations (net) in this period. For fiscal years 2015, 2014 and 2013, we expensed ₹ 459.54 million, ₹ 312.07 million and ₹ 196.87 million, respectively on R&D-related expenses which formed 16.06%, 12.85% and 9.60%, respectively, of our revenue from operations (net) in these years.

As we continue to incur R&D-related expenses and make further investments in R&D, our EBITDA margins have been impacted in the past, and may continue to be adversely impacted in the future as well. For the six months ended September 30, 2015, our EBITDA margin was 29.69%, while in fiscal years 2015, 2014 and 2013, our EBITDA margins were 32.09%, 42.98% and 51.30%, respectively.

The number of our R&D employees increased from 191 employees as of March 31, 2013 to 433 employees as of March 31, 2015. As at December 31, 2015, our R&D team comprised 547 employees. Among them, 221 had obtained masters or higher degrees, and 326 had obtained bachelor's degrees or other degrees. We expect that our ability to anticipate technological advances, retain and recruit qualified and talented R&D staff and develop innovative solutions for our users to meet their requirements in a timely and cost-effective manner will have a significant effect on our results of operations.

Channel Network and Sales Productivity

We sell our solutions directly and through distributors, whom we refer to as channel partners, who in turn distribute our solutions through resellers. Our home users and other users including SMBs may purchase our solutions in stores, online and through our retail channel partners. End users such as enterprises, educational institutions and government customers may purchase our solutions directly from us, through our enterprise channel partners as well as through system integrators who package our solutions as part of their overall product offering. We believe that our distribution reach and the selling capabilities of our extensive channel network will continue to be a key factor to drive our business growth. We have invested, and intend to continue to invest, in expanding our sales capacity and improving our sales operations to drive additional revenue and support the growth of our user base. We work with our channel partners to secure prospects, convert prospects to users, and pursue sales opportunities. We began by targeting home users but have in recent years increased our focus on SMBs, enterprises, educational institutions as well as government customers. We are continuing to develop and expand our channel partner community and sales team to supplement our sales and support operations through system integrators, resellers and other partners to drive adoption of our solutions.

We also introduce performance based incentive programmes from time to time for our channel partners to encourage them to achieve their sales and collection targets. For the six months ended September 30, 2015 and in fiscal years 2015, 2014 and 2013, we incurred ₹ 105.37 million, ₹ 223.67 million, ₹ 145.84 million and ₹ 103.85 million, respectively, on sales incentive which we define as the incentive paid to our channel partners on achieving sales targets.

Competition and Pricing

Our business is highly competitive, and our success is dependent upon our ability to compete against other security software developers, including some that have greater resources than we have. Some of our global competitors have longer operating histories, greater financial, technical, product development and marketing resources and greater name recognition. Such competitors could use these resources to market or develop solutions that are more effective or less costly than our solutions or that could render any or all of our solutions obsolete.

Competitive pressures could also affect the pricing of our solutions. Greater competition for particular solutions could have a negative impact on pricing. We will continue to seek to distinguish our offerings by providing quality solutions at competitive prices. In addition, we may face pressure to provide higher sales incentive to our channel partners or increase our advertising and sales promotion expenses significantly, which would adversely affect our profitability.

Employee Benefits Expense

Employee benefits expense constitutes a substantial component of our costs and is an important factor in determining our profitability. Our employee headcount has grown with the expansion of our business. Employee benefits expense for fiscal years 2015, 2014 and 2013, was ₹ 641.10 million, ₹ 434.07 million and ₹ 285.57 million, respectively, and our employee headcount figures as on March 31, 2015, 2014 and 2013 were 1,173, 935 and 644, respectively. Employee benefits expense for the six months ended September 30, 2015, was ₹ 417.12 million and our employee headcount figures as on December 31, 2015, was 1,396.

We expect that our employee benefits expense will continue to increase over the coming years due to continued increase in salaries and benefits as well as headcount growth, especially as we continue to expand our R&D and Sales & Marketing teams.

Growth of International Markets

Our growth strategy, in addition to continued focus on India, contemplates increased sales and marketing presence in international markets for the expansion of our user base. As of December 31, 2015, we had end users in more than 80 countries. Through our Subsidiaries, we are present in Japan, Dubai, the United States and Kenya and are considering expanding our footprint in Africa (with a special focus on South Africa), the Middle East (including the United Arab Emirates) and South East Asia in the near to medium term.

Newly hired sales and marketing resources typically require few months to establish customer relationships and drive overall sales productivity. In addition, sales teams in international regions will face local market competition which may present challenges for us. All of these factors will influence timing and overall levels of sales productivity, impacting the rate at which we will be able to convert prospects to sales and drive revenue growth. We have steadily increased our focus on channel partner efforts to drive new user acquisitions outside India. All of these factors will impact our sales and drive our revenue growth in international markets. Further, we may also need to invest additional resources, including capital and senior management attention, in these markets over the next few years to support the growth and expansion plans of our Subsidiaries. We may not be successful in our overseas strategy in the short term, or at all. For details, see “*Risk Factors — All of our Subsidiaries have incurred losses in their respective preceding fiscal year, which may have an adverse effect on our business, results of operations and financial position*” on page 26.

Further, as we expand our business overseas, we expect to earn more revenue in currencies other than the Indian Rupee, and this may increase our vulnerability to foreign exchange fluctuations.

Tax Incentives

We typically provide home users with CDs and DVDs of our security software solutions. A third-party vendor manufactures CDs and DVDs with our security software solutions at its manufacturing facility located at Rudrapur in the state of Uttarakhand. This manufacturing facility is currently exempt from the payment of excise duty pursuant to a central government notification that provides for an exemption from payment of excise duty for a period of 10 years from the date of the government notification or the commencement of commercial production, whichever is later, and the facility is exempt from excise duty on the goods manufactured during this period of time. We understand that the exemption from payment of excise duty at this manufacturing facility is available until June 20, 2018. However, at the end of the excise exemption period, the cost of manufacturing these CDs and DVDs will rise, and we may not be able to benefit from this excise exemption. The loss of this tax incentive will have an adverse impact on our Gross Margins, and consequently may affect our results of operation and profitability. For more details on Gross Margins, see “— *Gross Profit, Gross Margin, EBITDA and EBITDA Margin*” on page 323.

Further, the central government has proposed a GST regime that will eliminate excise duties and, depending on the rates proposed under the GST regime, may also increase the cost of manufacturing of these CDs and DVDs. For more details on GST, see “*Risk Factors — We benefit from the tax incentives available to the third party manufacturer of our CDs and DVDs and any loss of this benefit may impact our financial performance and results of operations*” on page 23.

Significant Accounting Policies

In preparing our financial statements in conformity with Indian GAAP, we make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. We base these judgments, estimates and assumptions on our historical experience and on various assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our financial performance may differ if prepared under different assumptions or conditions. For additional information, see Annexure V to our Restated Financial Statements.

Set forth below are certain significant accounting policies.

Principles of consolidation

These consolidated financial statements of the Group are prepared in accordance with the Accounting Standard 21 “Consolidated Financial Statements” as notified.

These consolidated financial statements are presented, to the extent possible, in the same format as that adopted by the Company for its unconsolidated financial statements. The financial statements of all the subsidiaries have been drawn up to the same date as that of Holding Company.

The financial statements of Quick Heal Technologies Inc. have been prepared in accordance with Accounting Principles Generally Accepted in India (Indian GAAP). The financial statements of Quick Heal Technologies Africa Limited and Quick Heal Technologies (MENA) FZE have been prepared in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities’ (IFRS for SMEs) adopted as per International Accounting Standards Board (IASB). The financial statements of Quick Heal Technologies Japan K.K. have been prepared in Generally Accepted Accounting Policies in Japan (JGAAP). The Group has converted these audited financial information and financial statements, as the case may be, to the accounting principles generally accepted in India, wherever required, for the purpose of preparation of Group’s consolidated financial statements under accounting principles generally accepted in India.

Subsidiaries

Subsidiaries are fully consolidated from the date of acquisition, being the date on which Group obtains control, and continues to be consolidated until date of that such control ceases to exist.

The financial statements of the Company and its subsidiary companies have been combined on line by line basis by adding together the book values of like items of assets and liabilities, income and expenses after eliminating intra group balances and intra group transactions except where cost cannot be recovered. The unrealised profits or losses resulting from intra group transactions and intra group balances have been eliminated in full. Unrealised losses resulting from intragroup transactions are also eliminated unless cost cannot be recovered.

The excess of the cost to the Company of its investment in the subsidiaries are the Company’s portion of equity on the acquisition date, is recognized in the consolidated financial statements as goodwill and is tested for impairment annually. The excess of Company’s portion of equity of the subsidiary over the cost of investment therein is treated as capital reserve.

The consolidated financial statements are prepared using uniform accounting policies for like transactions and events in similar circumstances and necessary adjustments required for deviations, if any to the extent possible unless otherwise stated, are made in the consolidated financial statements and are presented in the same manner as Company’s standalone financial statements.

Share of minority in the net profit is adjusted against the income to arrive at the net income attributable to the shareholders of the Holding Company. Minority interest’s share of net assets/liability is presented separately in the balance sheet.

If the losses attributable to the minority in a subsidiary exceed the minority’s share in equity of the subsidiary, then the excess, and any further losses applicable to the minority, are adjusted against Group’s interest except to the extent that the minority has binding obligation to, and is able to, make good the losses. If the subsidiary subsequently reports profits, all such profits are allocated to Group’s interest until the minority’s share of losses previously absorbed by the Group has been adjusted.

Use of estimates

The preparation of restated consolidated financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and disclosure of contingent liabilities at the end of reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or

liabilities in future periods.

Tangible fixed assets

Tangible fixed assets are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price. Capital work-in-progress includes cost of fixed assets that are not ready to be put to use.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to consolidated statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

Depreciation on tangible fixed assets

In the case of Holding Company:

(i) Depreciation on fixed assets

Till the year ended March 31, 2014, Schedule XIV to the Companies Act, 1956, prescribed requirement concerning depreciation of fixed assets. From the current year, Schedule XIV has been replaced by Schedule II to the Companies Act, 2013. The applicability of Schedule II has resulted in the following changes related to depreciation of fixed assets.

(ii) Useful lives / depreciation rates

Till the year ended March 31, 2014, the depreciation rates prescribed under Schedule XIV were treated as minimum rates and the Company was not allowed to charge depreciation at lower rates even if such lower rate were justified considering the estimated useful life of the asset. Schedule II to the Companies Act, 2013 prescribes useful life for fixed assets which in many cases are different from lives prescribed under the erstwhile Schedule XIV. However, Schedule II allows companies to use higher/ lower useful lives and residual values if such useful lives and residual values can be technically supported and justification for difference is disclosed in the financial statements.

Considering applicability of Schedule II, the management has re-estimated useful lives and residual values of all its fixed assets. The management believes that the rates as prescribed under Schedule II reflect its estimate of useful lives and residual values of fixed assets. Hence the Company has aligned the estimated useful life and residual values with the lives prescribed under Schedule II. The Company has used the transitional provision of Schedule II to adjust the impact of change in the useful lives arising on its first application in the statement of profit and loss. Had the Company continued its earlier policy of depreciating the fixed assets, the profit for the year ended March 31, 2015 would have been higher by ₹ 38.30 million and fixed assets would correspondingly been higher by ₹ 38.30 million.

(iii) Depreciation on assets costing less than ₹ 5,000

Till the year ended March 31, 2014, to comply with the requirements of Schedule XIV to the Companies Act, 1956, the Company was charging 100% depreciation on the assets costing less than ₹ 5,000 in the year of purchase. However, Schedule II to the Companies Act 2013, applicable from the current year does not recognise such practices. Hence to comply with the requirement of Schedule II to the Companies Act 2013, the Company has changed its accounting policy for depreciation of assets costing less than ₹ 5,000. As per revised policy, the Company is depreciating such assets over their useful life as assisted by the management. The management has decided to apply the revised accounting policy prospectively from accounting periods commencing on or after

April 1, 2014.

The change in accounting for depreciation of assets costing less than ₹ 5,000, did not have any material impact on consolidated financial statement of the Group for the current year.

In the case of Group:

Depreciation on fixed assets is calculated on a WDV basis using the rates arrived at based on the useful lives estimated by the management supported by technical evaluation. The Group has used the following rates to provide depreciation on its fixed assets.

Type of assets	March 31, 2015	March 31, 2014	March 31, 2013	March 31, 2012
<i>(Life in Years)</i>

Leasehold premises are amortized on a straight line basis over the period of lease, i.e. 30 years.

Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for intended use.

Intangible assets i.e. softwares are amortized on a straight line basis over the period of expected future benefits i.e. over their estimated useful lives of three years. Such intangible assets and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with "AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies".

Type of asset	March 31, 2015	March 31, 2014	March 31, 2013	March 31, 2012
<i>(Life in Years)</i>				
Computer software	3	3	3	3

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of profit and loss when the asset is disposed.

Research and development costs

Research costs are expensed as incurred. Development expenditure incurred on an individual project is recognized as an intangible asset when the Group can demonstrate all the following:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale

- Its intention to complete the asset
- Its ability to use or sell the asset
- How the asset will generate future economic benefits
- The availability of adequate resources to complete the development and to use or sell the asset
- The ability to measure reliably the expenditure attributable to the intangible asset during development.

Following the initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized on a straight line basis over the period of expected future benefit from the related project, i.e., the estimated useful life. Amortization is recognized in the consolidated statement of profit and loss. During the period of development, the asset is tested for impairment annually.

A summary of the amortization policy applied to the Group's intangible assets is as below:

Impairment of tangible and intangible assets

The carrying amounts of assets are reviewed at each Balance Sheet if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the Group makes a reasonable estimate of value in use.

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if transactions can be identified, an appropriate valuation model is used.

The Group bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Group's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of profit and loss unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

Leases

Where the Company within the Group is a lessee

Finance leases, which effectively transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the

leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in the consolidated statement of profit and loss. Lease management fees, legal charges and other initial direct costs of lease are capitalized.

A leased asset is depreciated on a straight-line basis over the useful life of the asset. However, if there is no reasonable certainty that the company will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the consolidated statement of profit and loss on a straight-line basis over the lease term.

Investments

Investments which are readily realisable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the consolidated statement of profit and loss.

Inventories

Raw materials are valued at lower of cost and net realisable value. However, materials and other items held for use in the production of inventories is not written down below cost of the finished product in which they will be incorporated are expected to be sold at or above cost. Cost of raw material is determined on a weighted average basis.

Finished goods are valued at lower of cost and net realisable value. Cost includes direct material and labour and a proportion of manufacturing overhead based on normal operating capacity. Cost of finished goods includes excise duty, whenever applicable. Cost is determined on a weighted average basis. Traded goods are valued at lower of cost and net realisable value. Cost included cost of purchase and other costs incurred in bringing the inventories to present location and condition. Cost is determined on weighted average basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

Revenue recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

- (i) Sale of security software products and devices

Revenue from sale of security products is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on dispatch of the goods to its customers. The Group collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the Group. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year.

(ii) Sale of mobile software product with insurance

Revenue from sale of mobile security products is recognized (net of insurance premium collected on behalf of insurer agency) when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on dispatch of the goods to its customers. The Company collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the year.

(iii) Income from services

Revenues from support services are recognized as and when services are rendered. The Group collects service tax on behalf of the government and, therefore, it is not an economic benefit flowing to the Group. Hence, it is excluded from revenue.

(iv) Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate of applicable interest rate. Interest income is included under the head “other income” in the consolidated statement of profit and loss.

(v) Dividends

Dividend income is recognized when the Group’s right to receive dividend is established by the reporting date. Dividend income is included under the head “other income” in the consolidated statement of profit and loss.

Foreign currency translation

Foreign currency transactions and balances

(i) Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(ii) Conversion

Foreign currency monetary items are re-translated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rates at the date when the values were determined.

(iii) Exchange differences

Exchange differences arising on conversion / settlement of foreign currency monetary items are recognized as income or expenses in the year in which they arise.

(iv) Foreign operations

The assets and liabilities of a non-integral foreign operation are translated into the reporting currency at exchange rate prevailing at the reporting date. Their statement of profit and loss are translated at exchange rates prevailing at the dates of transactions or average rates, where such rates approximate the exchange rate at the date of transaction. The exchange differences arising on translation are accumulated in the foreign currency translation reserve.

When there is change in the classification of foreign operation, the translation procedures applicable to the revised classification are applied from the date of change in classification.

Retirement and other employee benefits

In case of Holding Company:

The Company operates a defined benefit plan for its employees, viz. gratuity. The cost of providing benefits under the plan is determined on the basis of actuarial valuation at each year-end. Actuarial valuation is carried out for the plan using the projected unit credit method. Actuarial gain and losses for the defined benefit plan is recognized in full in the period in which it occurred in the consolidated statement of profit and loss.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year end. Actuarial gains/losses are immediately taken to the consolidated statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the Balance Sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

In case of Group:

Retirement benefit in the form of provident fund and National Social Security Fund (NSSF - Kenya) is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund and NSSF - Kenya. The Group recognizes contribution payable to the provident fund scheme and NSSF - Kenya as an expenditure, when an employee renders the related services. If the contribution payable to the scheme for services received before Balance Sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contributions already paid exceeds the contribution due for services received before the Balance Sheet date, then the excess recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or cash refund.

There are no other long term benefits payable to employees of any of the overseas subsidiaries.

Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the subsidiaries operate. The tax rates and tax laws used to compute the amount are those that are enacted at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Group has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the Group re-assesses unrecognised deferred tax assets. It recognizes unrecognised deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Group writes-down the carrying

amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the same taxable entity and the same taxation authority.

Minimum alternate tax (MAT) paid in a year is charged to the consolidated statement of profit and loss as current tax. MAT credit available is recognized as an asset only to the extent that there is convincing evidence that the Group will pay normal income tax during the period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Group recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the consolidated statement of profit and loss and shown as "MAT Credit Entitlement." The Group reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the group does not have convincing evidence that it will pay normal tax during the specified period.

Employee stock compensation cost

Employees of the Group receive remuneration in the form of share based payment transactions, whereby employees render services as consideration for equity instruments (equity-settled transactions).

In accordance with the *Guidance Note on Accounting for Employee Share-based Payments* issued by Institute of Chartered Accountants of India (ICAI), the cost of equity-settled transactions is measured using the intrinsic value method and recognized, together with a corresponding increase in the "Stock options outstanding account" in reserves. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest.

The expense or credit recognized in the consolidated statement of profit and loss for a year represents the movement in cumulative expense recognized as at the beginning and end of that year and is recognized in employee benefits expense. In case of the employee stock option schemes having a graded vesting schedule, each vesting tranche having different vesting period has been considered as a separate option grant and accounted for accordingly.

Where the terms of an equity-settled transaction award are modified, the minimum expense recognized is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognized for any modification that increase the total intrinsic value of the share-based payment transaction, or otherwise beneficial to the employee as measured at the date of modification.

There are no such schemes of stock compensation in any of the Company's subsidiaries.

Segment reporting

Identification of segments

The Group's operating businesses are organised and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of geographical segments is based on the areas in which major operating areas of the Group operate.

Earnings per share (EPS)

Basic earnings per share are calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue that have changed the number

of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year, are adjusted for the effects of all dilutive potential equity shares.

Provisions

A provision is recognized when the Group has a present obligation as a result of past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to its present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate assets but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated statement of profit and loss net of any reimbursement.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Group does not recognise a contingent liability but discloses its existence in the financial statements.

Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement comprise cash at bank and in hand and short term investment with an original maturity period of three months or less.

Gross Profit, Gross Margin, EBITDA and EBITDA Margin

We monitor certain key business metrics to help us evaluate growth trends, establish budgets, measure the effectiveness of our sales and marketing efforts, and assess operational efficiencies. We have presented Gross Profit, Gross Margin, EBITDA and EBITDA Margin, all of which are non-GAAP financial measures below.

We define Gross Profit as revenue from operations (net) less raw materials consumed, purchase of security software products, (increase)/decrease in security software products, web publishing expenses and freight and forwarding expenses. We define Gross Margin as Gross Profit divided by revenue from operations (net).

We define EBITDA as earnings before interest, tax, depreciation and amortisation being earning before finance cost, tax and depreciation and amortisation and exceptional items, calculated as revenue from operations (net) less total expenses (expenses other than depreciation and amortisation, exceptional items, finance cost and tax). We define our EBITDA Margin as EBITDA divided by revenue from operations (net).

We make no representations as to the methodologies used to define and/or calculate Gross Profit, Gross Margin, EBITDA and EBITDA Margin or whether these reflect an appropriate measure of our Company's operating performance.

In addition, these are not standardised terms, hence a direct comparison between companies using such a term may not be possible. Our use of Gross Profit, Gross Margin, EBITDA and EBITDA Margin thus has limitations as an analytical tool, and you should not consider them either in isolation or as a substitute for analysis of our

financial results as reported under Indian GAAP. Because of these and other limitations, you should consider Gross Profit, Gross Margins, EBITDA and EBITDA Margin along with other GAAP-based financial performance measures, including various cash flow metrics, profit or loss after tax, and our Indian GAAP financial results.

Liquidity and Capital Resources

Our primary liquidity and funding needs have been for working capital and capital expenditures. To fund these requirements in recent periods, we have primarily relied on our cash flow from operations.

We believe that our current cash and cash equivalents and the cash flow from operations, along with the expected net proceeds from this Issue, will be sufficient to meet our anticipated working capital and capital expenditure requirements, as well as other operating needs under our current business plans for the next 12 – 24 months. However, we cannot assure you that our anticipated capital requirements will not increase or that the expected

cash flow from operations will not decrease from our current expectations over the next 12 – 24 months. In such an event, we may also source additional funds from external sources such as bank loans and debt.

Our anticipated cash flow from operations depends on several factors beyond our control, such as the competitive landscape, pricing of our solutions, the demand and supply for our solutions, inflation and foreign currency exchange rates. Our ability to obtain adequate financing to satisfy demands on liquidity may be limited by our financial condition and results of operations and liquidity of international and domestic financial markets. In the event that we cannot meet our liquidity and funding requirements with internally generated cash flows, we may seek other external sources of funding. We cannot assure you that we will be able to obtain suitable financing arrangements for our future liquidity and funding needs.

As of September 30, 2015, we had current investments totalling ₹ 959.49 million which comprised investments in mutual funds (quoted). As of September 30, 2015, we had cash and bank balances of ₹ 105.21 million. As of September 30, 2015, our net working capital, defined as the difference between current assets and current liabilities, was ₹ 1,362.41 million.

As of March 31, 2015, we had current investments totalling ₹ 1,296.08 million which comprised investments in mutual funds (quoted). As of March 31, 2015, we had cash and bank balances of ₹ 126.40 million. As of March 31, 2015, our net working capital, defined as the difference between current assets and current liabilities, was ₹ 1,240.19 million.

Cash flows

We derive revenue from the sale of security software products such as packaged antivirus and anti-malware products on CDs and DVDs and sale of manufactured products such as UTM, in line with our main business activity, and the sale of services such as customised software. We recognise such revenue as income in the books of accounts in accordance with accepted revenue recognition norms. See “—*Significant Accounting Policies*” beginning on page 303.

We have had positive cash flows in each of the last five fiscal years. In addition, our cash flow streams result in us making certain short term and long-term investments, which we utilise to meet our liquidity requirements from time to time.

The table below summarises our cash flows for the six months ended September 30, 2015 and fiscal years 2015, 2014 and 2013:

	Six months Ended (₹ in millions)	Year Ended (₹ in millions)

Operating activities

Our operating activities have consistently generated cash on a net basis in recent periods. Our net cash flow from operating activities in recent periods largely reflects the growth in our operating profit, as supplemented or offset (depending on the period) by changes in working capital and direct taxes paid (net of refunds). For the six months ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, our operating profit before working capital changes was ₹ 448.48 million, ₹ 939.69 million, ₹ 1,062.86 million and ₹ 1,075.88 million, respectively.

We expect to continue generating positive cash flow from our operations. However, we cannot predict whether current trends and conditions will continue or what the effect on our business might be from the competitive environment in which we operate.

Investing activities

Our investing activities in recent periods have, on a net basis, used cash. Net cash used in investing activity has been driven to a large extent by consistent and growing purchases of tangible and intangible assets, as well as due to increase in current investments. For the six months ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, our payments for the purchases of tangible assets and intangible assets (including capital work in progress and capital advances) totalled ₹ 250.94 million, ₹ 660.98 million, ₹ 772.01 million and ₹ 332.56 million, respectively. For the six months ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, our payments for purchases of current investments, consisting primarily of debt mutual funds, in those periods totalled ₹ 1,035.06 million, ₹ 167.79 million, ₹ 3,732.61 million and ₹ 3,046.70 million, respectively, and our proceeds from the sale of current investments totalled ₹ 1,379.00 million, ₹ 199.21 million, ₹ 3,829.54 million and ₹ 2,669.08 million, respectively.

Financing activities

Net cash flow from financing activities in recent periods has been negative and reflects the dividends paid by the Company, and taxes on dividends paid. In fiscal years 2015, 2014 and 2013, dividend paid on equity shares was ₹ 149.55 million, ₹ 19.08 million and ₹ 11.45 million, respectively. Capital expenditures

Our capital expenditures are mainly related to the purchase of real estate, fixed assets and intangibles, principally plant and machinery, office equipment, furniture and fixtures, computer and network equipment. The primary source of financing for our capital expenditures has been our cash from operations.

The table below provides details of our net cash outflow or inflow on capital expenditures for the periods stated:

Particulars	Six months ended September 30, 2015	Fiscal year 2015	Fiscal year 2014	Fiscal year 2013

Our historical capital expenditure has been primarily towards purchase of software and equipment such as computers and servers as well as acquisition of land, office space and fixtures. The primary source of financing for our capital expenditures has been our cash from operations.

Quantitative and Qualitative Disclosure about Market Risk

The following discussion summarises our exposure to certain market risks and the steps we have taken to address these risks. It is difficult to accurately predict changes in economic or market conditions and anticipate the effects of such changes.

Market price risk

A portion of our current assets has in recent periods been invested in mutual fund units, which subjects us to market price risk based principally on the net asset value of these funds' portfolio investments and interest rate movement. As of September 30, 2015, March 31, 2015, 2014 and 2013, our investment in mutual funds (quoted) totalled ₹ 959.49 million, ₹ 1,296.08 million, ₹ 1,313.76 million and ₹ 1,393.77 million, respectively. The assets of the funds we invest in are principally comprised of Indian debt instruments. Debt instruments are subject to risks, including fluctuation in market prices and interest rates and creditworthiness of the underlying debt.

Counterparty Credit Risk

We are exposed to the credit risk of our clients. We seek to minimise credit risk by limiting business dealings to business partners of high creditworthiness. We also monitor our receivables on a monthly basis. As of September 30, 2015 and March 31, 2015 we had current trade receivables of ₹ 575.42 million and ₹ 647.56 million, respectively. We make doubtful debt provisions for trade receivables that are due for more than one year in accordance with our policies. For the six months ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, we made provisions for doubtful debts and advances of ₹ 3.36 million, ₹ 15.14 million, ₹ 17.21 million and ₹ 12.73 million, respectively. For the six months ended September 30, 2015 and for fiscal years 2015, 2014 and 2013, we had bad debts of ₹ 0.05 million, ₹ 3.00 million, nil and ₹ 3.59 million, respectively.

During the year ended March 31, 2014, one of our distributors (which we refer to as our channel partners) defaulted in making payments and we initiated legal proceedings against him. We made a provision for ₹ 163.79 million for fiscal year 2014.

Foreign currency exchange rate risk

We face foreign currency exchange rate risk because revenues of our international Subsidiaries are denominated in foreign currencies such as the U.S. Dollar, the Japanese Yen, the Kenyan Shilling and the UAE Dirham. To

date, foreign currency transaction gains and losses and exchange rate fluctuations have not been material to our financial statements, and we have not engaged in any foreign currency hedging transactions.

As our international operations grow, our risks associated with fluctuation in currency rates will become greater, and we may consider hedging arrangements.

Interest rate risk

We may become subject to interest risk if we undertake debt financing. Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of the RBI, domestic and international economic and political conditions, inflation and other factors. Upward fluctuations in interest rates increase the cost of servicing existing and new debts, which may affect our results of operations.

Our cash and cash equivalents are placed with banks and mutual funds schemes that the management believes to be of high quality.

Transactions with Related Parties

From time to time, we enter into transactions with companies which are controlled by members of our Promoter Group and other related parties in the ordinary course of our business. For six months ended September 30, 2015 and for the fiscal year 2015, we did not earn any revenue from related parties as defined under Accounting Standard — 18. For further details on our related party transactions, see “*Related Party Transactions*” on page 189.

Inflation and Seasonality

According to data from the RBI, the average annual rate of inflation as measured by changes in the wholesale price index was 7.4% in fiscal year 2013 and 5.9% in fiscal year 2014 and 3.4% in fiscal year 2015. High fluctuation in inflation rates may make it more difficult for us to accurately estimate or control our costs.

Our quarterly operating results have been, and will continue to be, subject to variation, depending on several factors that may cause us to record higher revenue in some quarters compared with others. In addition, if our rate of growth slows over time, our operating and net profit margins and our operating and net income may decline, our EBITDA and EBITDA margins may be adversely affected and seasonal or cyclical variations in our operations may become more pronounced, and our business, results of operations and financial position may be adversely affected. For details, see “*Risk Factors — Our quarterly operating results vary and hence a comparison of our quarterly results may not be meaningful*” on page 21.

Litigation against our Company

Criminal proceedings

1. Our Company, on behalf of our Directors Kailash Sahebrao Katkar and Mehul Mulchand Savla, had received two letters from the Special Investigation Unit of Police Station at Baddi, Himachal Pradesh in July 2014 to provide certain documents and join in investigation in relation to the first information report filed by Umesh Gupta, director of Softalk Technologies Limited (“**SFL**”) with Baddi Police Station, Himachal Pradesh against Kailash Sahebrao Katkar, Sanjay Sahebrao Katkar, Mehul Mulchand Savla and others (the “**Accused**”) (the “**FIR**”). The FIR alleges cheating, forgery and criminal conspiracy by the Accused in relation to a business arrangement of manufacturing of CDs/DVDs by SFL for our Company. Umesh Gupta has further alleged in the FIR that i) our Company has misrepresented SFL as the manufacturer of our Company's anti-virus software CDs/DVDs manufactured in Pune; ii) our Company has evaded tax; and iii) an amount of ₹ 6,500,000 million is recoverable from our Company. However, in the Writ Petition (defined hereinbelow), the amount stated by Umesh Gupta as recoverable from our Company is ₹ 65.6 million. The Accused are in the process of filing a quashing petition before High Court of Himachal Pradesh at Shimla (the “**High Court**”) against the FIR.

Umesh Gupta has further filed a writ petition before the High Court against State of Himachal Pradesh, Director General of Police, Himachal Pradesh, Superintendent of Police, Baddi District, Himachal Pradesh, our Company, Kailash Sahebrao Katkar, Sanjay Sahebrao Katkar, Mehul Mulchand Savla and others against the decision of the police to prepare and submit a cancellation report for closure of the FIR

without proper investigation (the “**Writ Petition**”). Umesh Gupta has sought for direction against the State of Himachal Pradesh to hand over the investigation of the FIR to Central Bureau of Investigation or a special investigation team constituted by the High Court. These matters are pending.

The Writ Petition also refers to i) a complaint dated September 14, 2012 filed by Umesh Gupta before the Joint Commissioner of Police, Economic Offence Wing, Delhi Police alleging the Accused of cheating and forgery; ii) a complaint dated August 11, 2014 filed by Umesh Gupta before the C.R Park Police Station, New Delhi alleging threats from the Accused to withdraw the FIR; iii) first information reports filed by Umesh Gupta with the Surajpur Police Station alleging undue pressure by the Accused to withdraw the FIR; and iv) letters/emails written to various authorities by Umesh Gupta in relation to the complaints and first information reports aforesaid. Tax proceedings

2. Additional Director General, Directorate General of Central Excise Intelligence, New Delhi (“**ADG**”) has issued a show cause cum demand notice dated February 2, 2015 (the “**SCN**”) to our Company seeking a response, inter alia, as to why service tax of ₹ 627.30 million and interest should not be demanded and recovered from our Company for the period March 1, 2011 to March 31, 2014 along with imposition of penalties under the applicable provisions of the Finance Act, 1994 for alleged failure to pay due service tax, non-filing of proper service tax returns, wilful suppression of material facts and contravention of provisions of the Finance Act, 1994 with the intent to evade payment of service tax.

The SCN is in relation to applicability of service tax on anti-virus software in CDs supplied by our Company through distributors. In the SCN, the ADG has alleged, inter alia, that: (i) supplying the anti-virus software replicated CD in retail packs along with the license key amounts to provision of service and accordingly, our Company is liable to pay service tax for such supply; (ii) since our Company has been paying service tax for the anti-virus software sold by it online, our Company ought to have paid service tax for the anti-virus software replicated CDs supplied in retail packs through distributors; (iii) the area based exemption on excise duty available at Baddi in Himachal Pradesh and Rudrapur in Uttarakhand is applicable on the basic cost of manufacturing CD only and hence, service tax would be applicable on the value of the licence key; and (iv) the major component of the price of the software replicated on CD is for the licence key which enables the end user to upgrade the software, which is not covered under excise duty and hence, service tax is payable on the amount charged for the license key.

Our Company has responded to the SCN denying the allegations, through a letter dated June 15, 2015. The matter is currently pending.

For details, see "Offer Procedure" on page 363.

^{*} Subject to valid Bids being received at or above the Offer Price pursuant to Rule 19 (2) (b) (ii) of the SCRR, the Offer is being made for at least such percentage of the post-Offer paid-up Equity Share capital of our Company which will be equivalent to ₹ 4,000 million calculated at the Offer Price. Pursuant to the resolution of the Board dated September 24, 2015 and special resolution of the Shareholders in the AGM held on September 24, 2015, the aggregate limit of total holdings of all FPIs put together has been increased to 49%. The proposed increase in the said aggregate limit shall be effective from the date RBI takes note of the same.

Certain details pertaining to the percentage of Offer size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP / Prospectus. For details in relation to allocation, the Bidder/ Applicant may refer to the RHP / Prospectus.

- (b) Under-subscription in Retail Portion is allowed to be met with spill-over from any other category or combination of categories at the discretion of the Company and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Portion is not available for subscription to other categories.

Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Company at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Company is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.0 in the above example. The Company, in consultation with the BRLMs, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.0. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

(e) Alternate Method of Book Building

In case of FPOs, companies may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“**Alternate Book Building Process**”).

The company may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/ Offer Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the allotment may be done on a proportionate basis. Further, the company may place a cap either in terms of number of specified securities or percentage of issued capital of the Company that may be allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/ or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.

Applicants may submit an Application Form either in physical form to the Designated Intermediaries or in the electronic form to the Designated Branches of the SCSBs authorising blocking of funds that are available in the

bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/ Issue Opening Date.

In a fixed price Issue, allocation in the net offer to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

If the aggregate demand in this category is greater than the allocation to in the Retail Portion at or above the Offer Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“Maximum RII Allottees”). The Allotment to the RIIs will then be made in the following manner:

- (a) In the event the number of RIIs who have submitted valid Bids in the Offer is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Portion shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Offer Price may be grouped together to determine the total demand under this category. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Offer Price, allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/ Applicants may refer to the SEBI ICDR Regulations, 2009 or RHP / Prospectus. The QIB Portion may be available for allotment to QIBs who have Bid at a price that is equal to or greater than the Offer Price. Allotment may be undertaken in the following manner:

- (a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Portion may be determined as follows:

- (b) In the second instance, allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Portion, all QIBs who have submitted Bids above the Offer Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Portion; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Portion, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

- (c) In the event that the Offer Price is higher than the Anchor Investor Offer Price: Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Offer Price and the Anchor Investor Offer Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors
- (d) In the event the Offer Price is lower than the Anchor Investor Offer Price: Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Offer being over-subscribed, the Company may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- (a) Bidders may be categorized according to the number of Equity Shares applied for;
- (b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- (c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- (d) In all Bids where the proportionate allotment is less than the minimum bid lot decided per Bidder, the allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Company;
- (e) If the proportionate allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all bidders in such categories may be arrived at after such rounding off; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment may be added to the category comprising Bidders applying for minimum number of Equity Shares.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP, issued D/o IPP F. No. 5(1)/2015-FC-1 dated May 12, 2015 (“FDI Policy”), which with effect from May 12, 2015, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on May 11, 2015. However, Press Note 4 of 2015 dated April 24, 2015 regarding policy on foreign investment in pension sector, will remain effective. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and transfer does not attract the provisions of the Takeovers Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.

The Equity Shares have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the “Securities Act”) or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable state securities laws. Accordingly, the Equity Shares are only being offered and sold (i) within the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the Securities Act and referred to in this Prospectus as “U.S. QIBs”, for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Prospectus as “QIBs”) in transactions exempt from, or not subject to, the registration requirements of the Securities Act, and (ii) outside the United States in reliance on Regulation S under the Securities Act.

The above information is given for the benefit of the Bidders. Our Company, the Selling Shareholders and the BRLMs are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Red Herring Prospectus. Bidders are advised to make their independent investigations and ensure that the number of Equity Shares Bid for do not exceed the applicable limits under laws or regulations.
