18. *We require certain statutory and regulatory permits and approvals in Stanza Project and Greenpark project and the failure to obtain or maintain them in a timely manner or at all may adversely affect our operations.*

The real estate sector in India is heavily regulated by the central, state and local governments. Real estate developers are required to comply with a number of legal requirements, including policies and procedures established and implemented by local authorities in relation to land acquisition, development of and construction on land transfer of property, registration and use of land, including laws and regulations related to zoning, permitted land uses, environmental approvals in respect of the project, proportion and use of open spaces, building designs, fire safety standards, height of the buildings, access to water and other utilities and water and waste disposal, minimum wages, working hours, health and safety of our labourers and requirements of registration of contract labour. Further, determining the developable area and saleable area of a particular project are subject to municipal planning and land use regulations in effect in the regions in which we operate. These regulations limit the maximum square footage of completed buildings on plots to specified amounts, calculated based on a ratio of maximum floor space of completed buildings to the surface area of each plot of land. Certain other municipal corporations require developers to reserve portions of their projects for economically weaker sections and any such imposition on us could adversely affect our business and prospects.

Our Company is in process to obtain necessary permission and approval for construction and development of Stanza Project with SRA Authority, Mumbai. Any delay / rejection / alteration in approval and changes in regulation from Government Authority, Stanza project may be delay and effect the profitability / cash flow of company.

Our Company has obtained necessary permission and approval for construction and development of Greenpark Project. However any changes in Government policy in future may effect and delay in schedule of completion of project. In turn effect the profitability of company.

Although we believe that have been able to obtain the necessary approvals at various stages of the projects in the past and our contractual arrangements are substantially in compliance with such laws and regulations, statutory authorities may allege non-compliance; we cannot assure you that we will obtain necessary approvals in relation to our new projects, at such times or in such form as we may require, or at all or may not be subject to any such regulatory action in the future, including penalties, seizure of land and other civil or criminal proceedings. In addition, such laws and regulations may change in future requiring the expenditure of resources and changes in development plan amongst other things, which would adversely affect our business, financial conditions and results of operations. Also, the laws and regulations, under which we and our subcontractors operate, may result in delays or stoppage in construction and development, causing us to incur substantial compliance costs and other increased costs, and prohibit or severely restrict our real estate and construction businesses. If we are unable to continue to acquire, construct and develop land and deliver products as a result of these restrictions or if our compliance costs increase substantially, our business, financial condition and results of operations may be adversely affected.

For more information, please refer section “Government and Other Approvals” on page no. 188.

19. *Strong competition and low entry barrier in the real estate sector could decrease the market share and compel us to either reduce the purchase cost or increase the facilities being provided to the potential consumers or increase our market share. If we are unable to do the same in future; our revenues and profitability will be adversely affected.*

The construction and real estate sector is highly fragmented and competitive besides from having low entry barriers. Our Company would not only compete with organized players but with also a high percentage of unorganized entities. These unorganized entities offer their services at highly competitive prices having well established presence in their local markets. Aggressive discounting by competitors, including liquidating excess inventory, may also adversely impact our performance in the short term. This is particularly the case for easily comparable pieces of jewellery, of similar quality, sold through stores that closely resemble to those that we operate.

Less or low fixed capital requirements have led to low entry barriers resulting in a large number of players in the industry. Moreover, due to the less or low fixed capital requirements and lesser requirements of technical expertise in the housing and real estate sector as opposed to the industrial/ infrastructure construction sector, the housing and real estate sector has a larger number of new entrants and existing players from whom we face competition. These new and existing players undertake projects similar to ours in the same regional markets in

which our projects are located. Given the circumstances, we tend to loose the project and our market share thereby our revenues getting affected.

Further, the state or central government may undertake real estate projects similar to ours in the same regional markets in which our projects are located, and offer various incentives which will increase supply of real estate projects in the market, increase competition and adversely affect our business. Further, we compete for land, sale of projects with other private developers. Some of our competitors may have greater resources (including financial, land resources, and other types of infrastructure) to take advantage of efficiencies created by size, and access to capital at lower costs, have a brand recall and relationships with homeowners. Our success in the future will depend significantly on our ability to maintain and increase market share in the face of such competition. Our inability to compete successfully with the existing players in the industry, may affect our business prospects and financial condition.

In addition, there are minimal entry barriers in this sector and hence the may also face competition from new entrants. Some of its employees, who disassociate themselves from the Company, may also compete with the Company. Additionally, the Company may lose its key engineers or contractors if it is unable to match the fees paid or remunerations offered by its competitors. Any reduction or increase in remuneration may have an adverse impact on our cash flows thereby affecting our revenues and profitability.

20. We have entered into certain related party transactions and may continue to do so.

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on the arms length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Prospectus and, also see the section “Related Party Transactions” on page 171.

21. Failure to manage and obtain our inventory relating to construction of Greenpark and Spanza project could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our results of operations are heavily dependent on our ability to effectively manage and receive our inventories on time. In order to do the same, we must be able to accurately estimate the inventory requirements and purchase new inventory accordingly for continuation of the ongoing construction at our Boisar Site- Green Park Project and Stanza Project. If our management has misjudged the necessary inventory requirements as expected, it could adversely impact the results by causing either a temporary stoppage in the construction or delay in progressing the construction or an accumulation of excess inventory. Further, due to the above, the cash flows and liquidity of the company may be adversely impacted thereby affecting the net profits of the company.

22. Our results of operations could be adversely affected by strikes, work stoppages or shortage of labour or increased wage demands or any other labour problems or any other kind of disputes with our employees or contractors.

Our industry and business is highly labour- intensive and we outsource the labour contracts to our third party contractors for the specific projects/ site. If at any point in time, our agreement with the any of the contractors expires or is delayed to be executed or is withdrawn by either of us, our work at the site would stop or result in increased operating costs as a result of higher than anticipated wages or benefits which we may be unable to pass on to our customers. Further, such third party contractors and their employees/ workmen may also be subject to these labour legislations. In addition, we may not be able to procure required contract labour for our Ongoing and Forthcoming projects. These factors could adversely affect our business, financial position, results of operations and cash flows. Moreover, if our employees unionize we may be subject to industrial unrest, slowdowns and increased wage costs.

We are unable to assure you that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock - outs or increased wage demands or inability to access adequate contract labour at reasonable costs at our project sites. Such issues could have an adverse effect on our business prospects and results of operations.

23. *We rely on various contractors or third parties in developing our projects, and factors affecting the performance of their obligations could adversely affect our projects.*

Most of our projects require the services of contractors and various other parties including architects, engineers, consultants and suppliers of labour and materials for our projects. The timing and quality of construction of the projects that we develop depends on the availability and skill of these parties, as well as contingencies affecting them, including labour and construction material shortages and industrial action such as strikes and lockouts. We may not be able to identify appropriately experienced third parties and cannot assure you that skilled third parties will continue to be available at reasonable rates and in the areas in which we undertake our projects, or at all. As a result, we may be required to make additional investments or provide additional services to ensure the adequate performance and delivery of contracted services and any delay in project execution could adversely affect our profitability.

Additionally, we rely on manufacturers and other suppliers and do not have direct control over the quality of the products they supply, which may adversely affect the construction quality of our developments. In addition, if such contractors or third parties do not complete on our orders timely or satisfactorily or match our requirements on quality, our reputation and financial condition could be adversely affected.

24. *We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse affect on our operations, profitability and growth prospects.*

Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse affect on our operations, profitability and growth prospects.

25. *Ineffective execution of marketing programs and reduced marketing expenditure could have an adverse effect on our sales.*

Being a wholesaler in jewellery, our primary factors in determining retailers buying decisions in the wholesale business includes customer confidence, price points for our products, timely delivery of our products, designs together with the level and quality of customer service. The ability to differentiate our products from competitors by its branding, marketing and advertising programs is an important factor in attracting retailers and consumers. As a result, from time to time we will be undertaking brand building exercise and marketing programs to enhance our brand visibility. If these programs are ineffectively executed or the level of support for them is reduced, it could affect our ability to attract customers. Further, we cannot assure you that we will be able to accurately estimate our marketing expenditure for wholesale and or retail operations. In case our marketing expenses are lesser than market standards, our marketing programs may be perceived ineffective. However, if our marketing expenses are higher than the market standards, it may adversely affect our income and results of operations.

26. *Any loss of or breakdown of operations at any of our operational facilities may have a material adverse effect on our business, financial condition and results of operations.*

Our operational facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results.

27. *Our business is dependent on the availability/supply and cost of raw materials. Any significant increase in the prices including the taxes and levies or decrease in the availability of any of the raw materials may adversely affect our results of operations.*

Our major raw materials include cement, bricks, water, wood, iron rods, steel, aluminum and construction equipments besides from the other construction materials. The timely availability, cost and quality of the raw materials being supplied to us plays an important role in constructing strong foundation and long lasting buildings. Any disruption in either of the factors mentioned above are not under our control, including general economic conditions, competition, production levels, transportation costs, government taxes and levies, and

import duties. If, for any reason, our regular/primary suppliers of construction materials refuse or delay or discontinue the delivery of the raw materials to us in the quantities we need and at prices that are competitive, our ability to meet our raw material requirements for our projects shall come to a temporary standstill and our construction schedules could be disrupted, and we may not be able to complete our projects as per schedule or at estimated costs. Further, we may also not be able to pass on any increase in the prices of these raw materials to our customers which could affect our results of operations and impact our financial condition.

Further, we currently do not have any long term tie-ups or agreements for supply of these raw materials. The long duration of our contracts may expose us to the changes in the prices of key raw material. The increase in prices of the raw material increases our expenditure hence our profitability to the extent we are not able to pass the expenses on to our clients. Any decrease in the availability of these raw materials for whatever reason, could adversely affect our execution capacity and profitability.

- 28. We may face uncertainty of title regarding some of the lands that we are currently developing or plan to develop independently. Any irregularities with respect to title over land owned by us may have an adverse effect on our business, financial condition and results of operations.***

Our On-going project- Green Park is under development and construction and is being executed solely by us. This project aims to develop and construct 10 plots including the adjacent area. Currently, we have successfully entered into Conveyance Agreement with the land owners to develop and construct 3 plots. For the remaining 7 plots we are yet to enter into an agreement with the land owners which is our future project. If we are unable to enter into or successfully execute the necessary agreement with the land owners or land owners enter into an agreement with any other real estate developer, we stand to lose our business thereby affecting our business revenues and net profits.

- 29. Our sales revenue is dependent on factors affecting prospective consumer's purchasing power that are out of our control***

Our sales revenue is dependent on the financial ability and financial availability of our prospective customers to invest or purchase properties within Maharashtra. Besides this, consumers also have the option of borrowing funds either from the banks or in the form of home loans from secured or unsecured lenders at the current interest rates. Further, the favorable interest rates on financing from banks and housing finance companies, particularly for residential real estate, combined with the tax treatment of loans, has helped the consumers in investing or purchasing properties. However, any changes in the changes in the interest rates, tax treatment with respect to the repayment of principal on housing loans and interest paid on housing loans may further affect demand for residential real estate.

Further, if the interest rate at which our real estate customers may borrow funds for the purchase of our properties affects the affordability of our real estate projects. Any changes in the home loans market, making home loans less attractive to our customers may adversely affect our business, future growth and results of operations.

- 30. Our Company may require additional capital resources to achieve our expansion plans.***

The rate of our expansion will depend to an extent on the availability of adequate debt and equity capital. Further, the actual expenditure incurred may be higher than current estimates owing to but not limited to, implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal generations and in case if the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions and unsecured loans, which may have an adverse effect on our business and results of operations.

- 31. If we are unable to source business opportunities effectively and successfully identify suitable projects, we may not be able to achieve our business prospects, financial conditions and results of operations.***

Our ability to achieve our financial objectives and results of operations will depend on our ability to identify and evaluate suitable projects and thereby accomplishing our business opportunities. To grow our business, availability of suitable land, the willingness of landowners to sell us on attractive terms, the ability to obtain an agreement to sell from all the owners where land has multiple owners, the availability and cost of financing, encumbrances on targeted land, government directives on land use, and the obtaining of permits and approvals

for land acquisition and development is a must. If we fail to acquire the targeted land(s), it may cause us to modify, delay or abandon entire projects, which in turn could cause our business to suffer.

Further, our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

32. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

33. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be largely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

34. *The Company has not appointed any independent agency for the appraisal of the proposed Project.*

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project

35. *Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.*

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

36. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2009 appointment of monitoring agency is required only for Issue size above Rs. 500 Crores. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

37. *We propose to utilize a part of the Net Proceeds for general corporate purpose and our management will have the discretion to deploy the funds.*

We propose to utilize the Net Proceeds for purposes identified in the section titled "*Objects of the Issue*" and we propose to utilize the balance portion of the Net Proceeds towards general corporate purposes, namely, brand building exercises and strengthening of our marketing capabilities. The manner deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

- 38. *Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.***

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 68.16% of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "Capital Structure" and "Our Promoter, Promoter Group and Group Companies" beginning on page no. 47, 142 and 143 respectively, of this Prospectus.

- 39. *We cannot assure you that we will pay dividend in future.***

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

- 40. *Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

- 41. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. For more details, please refer to "Statement of Tax Benefits" on page no.77 of this Prospectus.

- 42. *We cannot assure you that our Equity Shares will be listed on the SME Platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the Equity Shares.***

We have only applied to BSE Limited to use its name as the Stock Exchange in this Offer Document for listing our Equity Shares on the SME Platform of BSE Limited. Permission for listing of the Equity Shares will be

granted only after the Equity Shares offered in this Issue have been allotted. Approval from BSE Limited will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchanges are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 6 Working Days from the Issue Closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose off your Equity Shares.

43. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Monarch Network Capital Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "General Information – Details of the Market Making Arrangement for this Issue" on page no. 44 of this Prospectus.

44. There may be restrictions on daily movements in the price of our Equity Shares, which can adversely affect shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point of time.

Subsequent to listing, our Company may be subject to a daily circuit breaker imposed on listed companies by the BSE, which does not allow transactions having crossed certain volatility limit in the price of its Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's circuit breaker is set by the BSE based on certain factors such as the historical volatility in the price and trading volume of the Equity Shares. The BSE is not required to inform us of the percentage limit of the circuit breaker from time to time and may change it without our knowledge. This circuit breaker, if imposed, would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, we cannot assure that the shareholders will be able to sell the Equity Shares at desired prices.

Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

47. Natural calamities and force majeure events may have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. These natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. Further prolonged spells of deficient or abnormal rainfall or other natural calamities in the future could have a negative impact on the Indian economy, adversely affecting our business and the price of the Equity Shares.

48. Terrorist attacks, civil unrests and other acts of violence in India and around the region could adversely affect the markets, resulting in loss of consumer confidence and adversely affect the business, results of operations, financial condition and cash flows.

Terrorist attacks, civil unrests and other acts of violence or war in India and around the region may adversely affect worldwide financial markets and result in a loss of consumer confidence and ultimately adversely affect the business, results of operations, financial condition and cash flows. The Indian economy: poised for growth

India has emerged as one of the few world economies with a healthy economic outlook, amidst the mood of cynicism and uncertainties that have occupied a number of advanced and emerging economies over the past couple of years.

The gradual recovery of the economy and growth rate has been supported by improving macro-economic fundamentals such as:

- Declining fiscal deficit;
- Reducing inflation; and
- Narrowing Current Account Deficit (CAD).

Overall macro-economic situation and growth prospects are expected to be strong going forward owing to several factors including positive business confidence and reform initiatives by the new government providing a boost to the industrial and investment activity in India. The International Monetary Fund (IMF) projects India to grow at 7.5 per cent in 2015 as against 6.9 per cent in 2014, to become one of the fastest growing major economies in the world. Further, as per the fiscal consolidation roadmap planned by the government, the fiscal deficit is expected to decline from 4.1 per cent of GDP in FY2015 to 3 per cent by FY2018. The above mentioned factors are likely to have a positive compounding effect on the real estate sector in India.

On the investment front, Foreign Direct Investment (FDI) increased by ~24 per cent from USD36 billion in FY2014 to USD45 billion in FY2015. Further, the Foreign Institutional Investors (FIIs) investments in India touched a record high with FIIs having invested USD46 billion in FY2015, which is ~5.3 times the investments made in FY2014 (USD9 billion).

Indian Real Estate Sector

The real estate sector in India has come a long way by becoming one of the fastest growing markets in the world. It is not only successfully attracting domestic real estate developers, but foreign investors as well. The growth of the industry is attributed mainly to a large population base, rising income level, and rapid urbanization.

The sector comprises of four sub-sectors- housing, retail, hospitality and commercial. While housing contributes to five-six percent of the country's gross domestic product (GDP), the remaining three sub-sectors are also growing at a rapid pace, meeting the increasing infrastructural needs.

The real estate sector has transformed from being unorganized to a dynamic and organized sector over the past decade. Government policies have been instrumental in providing support after recognizing the need for infrastructure development in order to ensure better standard of living for its citizen. In addition to this, adequate infrastructure forms a prerequisite for sustaining the long-term growth momentum of the economy.

The Indian real estate sector is one of the most globally recognized sectors. In the country, it is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. It comprises four sub sectors-housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

It is also expected that this sector will incur more non-resident Indian (NRI) investments in the near future, as a survey by an industry body has revealed a 35 per cent surge in the number of enquiries with property dealers. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun. Private equity (PE) funding has picked up in the last one year due to attractive valuations. Furthermore, with the Government of India introducing newer policies helpful to real estate, this sector has garnered sufficient growth in recent times.

Market Players

The Indian real estate sector has traditionally been an unorganized sector but it is slowly evolving into a more organized one. The sector is embracing professional standards and transparency with open arms. The major established domestic players in the sector are DLF, Unitech, Hiranandani Constructions, Tata Housing, Godrej Properties, Omaxe, Parsvanath, Raheja Developers, Ansal Properties and Infrastructure and Mahindra Lifespace Developers Ltd to name a few. International players who have made a name for themselves in India include Hines, Tishman Spysers, Emaar Properties, Ascendas, Capitaland, Portman Holdings and Homex.

Government Initiatives

The Government of India along with the governments of the respective states has taken several initiatives to encourage the development in the sector. The Smart City Project, where there is a plan to build 100 smart cities, is a prime opportunity for the real estate companies. Below are some of the other major Government Initiatives:

- The Make in India initiative has helped to accelerate leasing of commercial property by the manufacturing sector, which has outpaced the Information Technology (IT) sector by registering two-fold increase in office transacted space in the first six months of 2016.
- Brihanmumbai Municipal Corporation (BMC) has introduced a single-window clearance for construction which will cut the time taken for getting approvals for a building project and lead to correction in prices of residential property, thereby giving a fillip to Mumbai realty.
- The Securities and Exchange Board of India (SEBI) has proposed easier regulations for real estate investment trusts (REITs), such as raising the cap of investment of REITs' assets in under-construction projects from 10 per cent to 20 per cent, in order to attract the interest of developers, and also plans to relax the rules for foreign fund managers to relocate to India.
- The Government of India has brought into force the Real Estate (Regulation and Development) Act, 2016 which is aimed at making necessary operational rules and creating an institutional infrastructure for protecting the interests of consumers and promoting growth of the real estate sector in India.
- The Securities and Exchange Board of India (SEBI) has allowed Foreign Portfolio Investors (FPI) to invest in units of Real Estate Investment Trusts (REITs), infrastructure investment trusts (InvITs), category III alternative investment funds (AIFs), and also permitted them to acquire corporate bonds under default.
- The Rajya Sabha or the upper house of the Parliament has passed the Real Estate (Regulation and Development) Bill, 2013, which aims to protect consumer interest, ensure efficiency in all property related transactions, improve accountability of real estate developers, increase transparency and attract more investments into the realty sector in India.
- The Securities and Exchange Board of India (SEBI) has issued the consultation paper for public issue of Real Estate Investment Trusts (REITs), which include provisions such as capping of allocation to qualified institutional buyers (QIBs) at 75 per cent, among other topics.
- The Government of Rajasthan became the first state to initiate private investments in affordable housing by signing four Memoranda of Understanding (MoUs) with private players for an investment of Rs 5,400 crore (US\$ 800.49 million).

- The Ministry of Housing and Urban Poverty Alleviation (HUPA) has commissioned a study by Indian Institute of Technology, Kanpur on testing of new construction technologies, with the objective of promoting new housing technologies in the country.
- India's Prime Minister Mr Narendra Modi approved the launch of Housing for All by 2022. Under the Sardar Patel Urban Housing Mission, 30 million houses will be built in India by 2022, mostly for the economically weaker sections and low-income groups, through public-private-partnership (PPP) and interest subsidy.
- The Government of India has relaxed the norms to allow Foreign Direct Investment (FDI) in the construction development sector. This move should boost affordable housing projects and smart cities across the country.
- The Securities and Exchange Board of India (SEBI) has notified final regulations that will govern real estate investment trusts (REITs) and infrastructure investment trusts (InvITs). This move will enable easier access to funds for cash-strapped developers and create a new investment avenue for institutions and high net worth individuals, and eventually ordinary investors.
- The Government of Maharashtra announced a series of measures to bring transparency and increase the ease of doing business in the real estate sector.
- The State Government of Kerala has decided to make the process of securing permits from local bodies for construction of houses smoother, as it plans to make the process online with the launch of software called 'Sanketham'. This will ensure a more standardised procedure, more transparency, and less corruption and bribery.

Challenges

The key challenges that the Indian real estate is facing today are:

- lack of clear land titles,
- absence of title insurance,
- absence of industry status,
- lack of adequate sources of finance,
- shortage of labour,
- rising manpower and material costs,
- approvals and procedural difficulties.

Road Ahead

Responding to an increasingly well-informed consumer base and, bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The growing flow of FDI into Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards.

If only a part of the capital gains is invested, the exemption available shall be in the same proportion as the cost of long term specified assets bears to the whole of the capital gain. Provided that the investment made in the long term specified asset during any financial year does not exceed Fifty Lac rupees. Provided further that the investment made by an assessee in the long-term specified asset, from capital gains arising from transfer of one or more original assets, during the financial year in which the original

asset or assets are transferred and in the subsequent financial year does not exceed fifty lakh rupees. However, if the assessee transfers or converts the long-term specified asset into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long-term capital gains in the year in which the long-term specified asset is transferred or converted into money.

- 8) The tax rates and consequent taxation mentioned above shall be further subject to any benefits available under the Tax Treaty, if any, between India and the country in which the non-resident has fiscal domicile. The above tax rates have to be increased by the applicable surcharge, education cess, and secondary and higher education cess.

- 4) In case of long-term capital gains, (in cases not covered under section 10(38) of the Act), the tax is levied on the capital gains computed without considering the cost indexation and without considering foreign exchange fluctuation.

Provided that the investment made in the long term specified asset during any financial year does not exceed Fifty Lac rupees. Provided further that the investment made by an assessee in the long-term specified asset, from capital gains arising from transfer of one or more original assets, during the financial year in which the original asset or assets are transferred and in the subsequent financial year does not exceed fifty lakh rupees. - 6) The tax rates and consequent taxation mentioned above shall be further subject to any benefits available under the Tax Treaty, if any, between India and the country in which the FII has fiscal domicile. As per the provisions of section 90(2) of the Act, the provisions of the Act would prevail over the provisions of the Tax Treaty to the extent they are more beneficial to the FII.
 - 7) However, where the equity shares form a part of its stock-in-trade, any income realized in the disposition of such equity shares may be treated as business profits, taxable in accordance with the DTAA between India and the country of tax residence of the FII. The nature of the equity shares held by the FII is usually determined on the basis of the substantial nature of the transactions, the manner of maintaining books of account, the magnitude of purchases, sales and the ratio between purchases and sales and the holding etc. If the income realized from the disposition of equity shares is chargeable to tax in India as business income, FII's could claim, STT paid on purchase/sale of equity shares as allowable business expenditure. The Indian economy: poised for growth

India has emerged as one of the few world economies with a healthy economic outlook, amidst the mood of cynicism and uncertainties that have occupied a number of advanced and emerging economies over the past couple of years.

The gradual recovery of the economy and growth rate has been supported by improving macro-economic fundamentals such as:

- Declining fiscal deficit;
- Reducing inflation; and
- Narrowing Current Account Deficit (CAD).

Overall macro-economic situation and growth prospects are expected to be strong going forward owing to several factors including positive business confidence and reform initiatives by the new government providing a boost to the industrial and investment activity in India. The International Monetary Fund (IMF) projects India to grow at 7.5 per cent in 2015 as against 6.9 per cent in 2014, to become one of the fastest growing major economies in the world⁴. Further, as per the fiscal consolidation roadmap planned by the government, the fiscal deficit is expected to decline from 4.1 per cent of GDP in FY2015 to 3 per cent by FY2018⁵. The above mentioned factors are likely to have a positive compounding effect on the real estate sector in India.

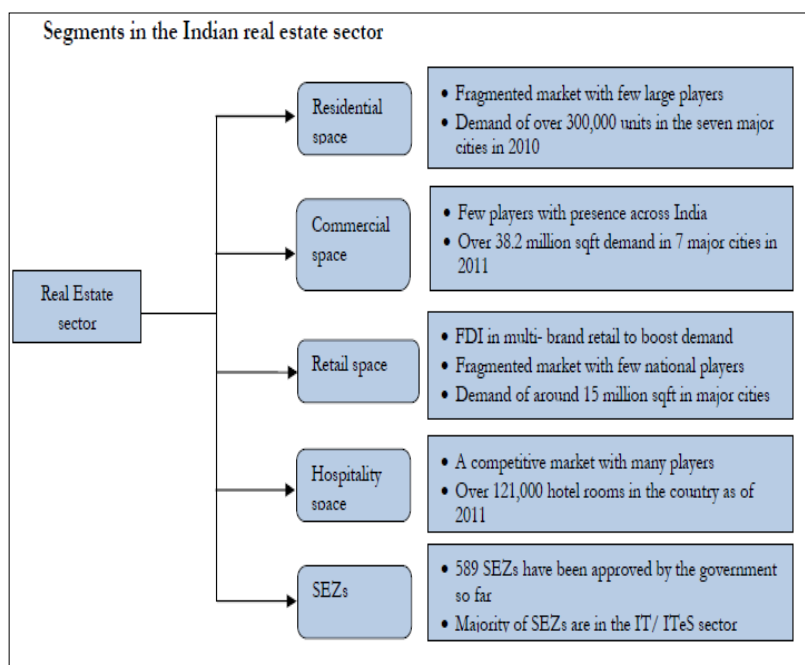

Indian Real Estate Sector

The real estate sector is one of the most globally recognised sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations.

The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy. It is also expected that this sector will incur more non-resident Indian (NRI) investments in both the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun.

India's construction industry will continue to expand over the forecast period (2016–2020), with investments in residential, commercial, infrastructure and energy projects continuing to drive growth.

Various government flagship programs – including 100 Smart Cities Mission, Housing for All, Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Make in India and Power for All – will be the growth drivers.

The industry's output value in real terms is expected to rise at a compound annual growth rate (CAGR) of 5.65% over the forecast period; up from 2.95% during the review period (2011–2015).

For the real estate industry, 2016 saw the biggest changes in decades, especially on the policy front. Some of the biggest game-changing policies like GST and RERA (Real Estate Regulatory Agency) cleared hurdles, and are on their way to full implementation. The demonetization move caused considerable turmoil; however, along with the Benami Transactions Act, it promises to bring greater transparency in the real estate sector.

Affordable housing will come into sharper focus now than in previous years, and REITs promise to open up the real estate market to smaller investors in the coming year. The country's real estate markets are definitely poised for growth in the medium-to-long term on the back of higher transparency and further consolidation. India's Tier-I cities moved up to the 36th rank in JLL's biannual Global Real Estate Transparency Index in 2016 due to improvements in structural reforms and liberalisation of the foreign direct investment (FDI) policy.

India came 4th in developing Asia in terms of FDI inflows as per the World Investment Report 2016 by the United Nations Conference for Trade and Development. Thanks to a proactive government keen on improving India's ranking on different indices and strengthening public institutions, the country is poised to become a modern economy.

Market Size

The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's Gross Domestic Product (GDP).

In the period FY08-20, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

Private Equity (PE) investments by domestic and international investors in the Indian realty market declined 30 per cent year-on-year to US\$ 2.5 billion across 48 deals during January-September 2016. Over April-June 2016, India's office space absorption grew 46 per cent year-on-year to over 10.2 million square feet, primarily led by Delhi

National Capital Region (NCR) and Bangalore, which accounted for almost 50 per cent of the total space take-up. On the supply front, over 7 million square feet of fresh office space was added during April-June 2016, led by Hyderabad and Mumbai, accounting for more than 65 per cent of the total supply of fresh office space across leading cities during the quarter. @ Mumbai is the best city in India for commercial real estate investment, with returns of 12-19 per cent likely in the next five years, followed by Bengaluru and Delhi-National Capital Region (NCR). Sectors such as IT and ITeS, retail, consulting and e-commerce have registered high demand for office space in recent times.

Commercial Real Estate

On the demand side, the office space requirements of sectors such as manufacturing, logistics, FMCG, etc., showed positive signs in 2016, and we expect this to continue in 2017. Office space required by eCommerce/ start-ups and consulting firms rose, as these sectors are expected to continue with headcount addition to accommodate their business growth in the years to come. International banks and financial institutions are under increased cost and compliance pressures and are therefore expected to outsource more jobs to India. Depreciation of the INR versus the USD and Euro is likely to play a major role in this.

That said, the office space needs of technology and outsourcing firms (especially in software development) slowed down in 2016. The pace of growth of top technology firms was in single digits due to global uncertainty and technological disruption. From the next year onward, some of these companies could see some implications from Trump's policies, but it is too early to predict accurately how these could play out. It remains to be seen if Trump's policies could negatively affect lower-grade work carried out by contact centres in India.

Adoption of technology will continue to increase across businesses in 2017. Pertinently, the ratio between growth of a business and its real estate requirements will change, as technology is proving to be a disruptor across sectors. The technology sector is becoming less people-driven and more process-driven. Due to the increasing use of technology, a company witnessing a revenue growth of USD 1 bn could require only 20,000 employees in place of 35,000 it requires now.

Unlike earlier, Indian corporates – including historically lease-averse companies like Infosys and TCS – have started showing a propensity towards leasing versus buying. Earlier, many Indian IT firms preferred constructing their own campuses. Now, as the contracts of many of these companies get shorter, they prefer to lease. For many companies, especially in non-technology sectors, money saved through leasing is reinvested in business.

Newer Fortune 1000 companies are already looking to increase their exposure in India. Higher FDI is expected to flow into India as it improves on the 'ease of doing business' rankings and policies are made more investor-friendly. The Modi government's focus on wooing foreign investment is helping. Demand has been steady so far – and if GDP growth sustains, demand will start looking healthier.

Figure 1: Steady absorption projected for the forecast period of 2016-18

Demand for office space is evolving, and more corporates across industries will adopt innovative workplaces in the near future. Collaborative office spaces with open areas to boost employee productivity geared to attract and retain talent will gain importance from 2017. Going ahead, tech-enhanced offices with a focus on sustainability and energy-efficiency will command higher rents.

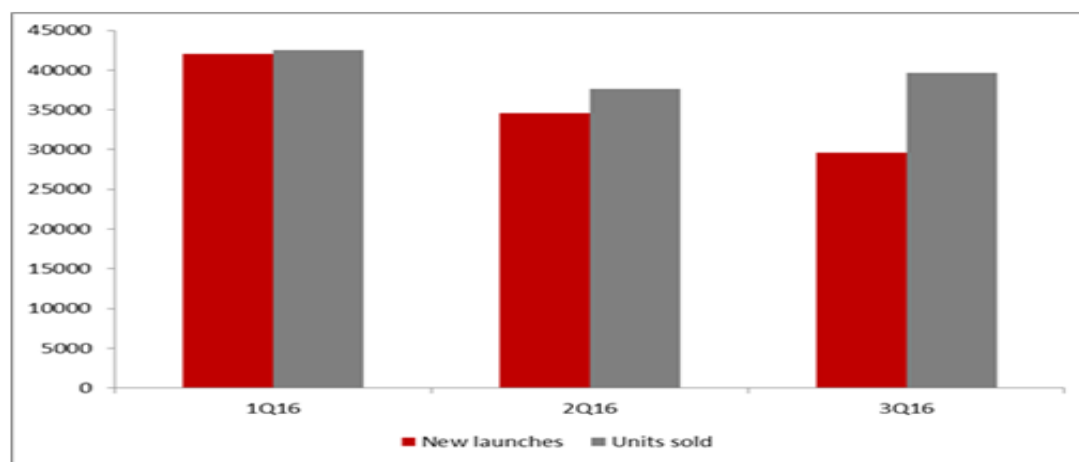

To reduce their financial burden and also to motivate and retain talent, more corporates could turn towards co-working spaces. There is currently very limited supply of co-working spaces; however, once that situation improves, the demand for them will be considerable. As bigger co-working players enter India and more such facilities emerge across cities, this category will prove to be a disruptor.

Developers, private equity funds and REITs will continue to invest in premium office assets, and in upgradation of existing buildings that they own into higher-quality ones. With the implementation of RERA, there will be standardization of space standards. This will, in turn, help these stakeholders to render their assets REIT-compliant. Due to RERA, REITs and demonetization, more and more office assets will become institutionalized. The demand for strata-sales will also decline, especially in Delhi-NCR and Mumbai.

Residential Real Estate

A Pan-India trend that emerged in 2016 was that a higher number of units were sold every quarter (1Q16-3Q16) than new project launches in the same period. A slowing number of new launches helped reduce the inventory overhang. Demonetization will result in the fourth quarter readings being drastically different from the first three quarters once they come in.

Given that old currency notes are no longer valid, home buyers/ investors using unaccounted wealth to carry out transactions in cash are facing a tough time, and developers accepting cash components are facing a higher liquidity crunch than those accepting all payments through cheque/ bank transfer. Overall, it will be interesting to see if 2016 sets a new benchmark in units launched versus units sold, surpassing the historic year of 2008 for good.

Source: JLL REIS

Capital Values (CVs) across cities, especially in Hyderabad, Pune and Bengaluru, saw gentle appreciation in 2016 and this trend is expected to continue in 2017 as the residential markets mature and become more end-user-driven than ever before. Sales' momentum continued to remain steady throughout the year. It is likely to pick up from 2H2017 after the dust has settled on demonetization, which has made many buyers hold on to their purchase decisions in anticipation of some easing in residential CVs.

Even as the inventory overhang reduces, the three biggest markets in terms of volumes of unsold units (including under-construction) are NCR, Mumbai and Bangalore. By volume, NCR stands 37%, which is more than a third of India's unsold (including under-construction) residential inventory.

Less than 5% units among the total unsold inventory across the three metros are ready for possession. Bengaluru, a largely end-user-driven market, has the lowest unsold inventory in project launches up to the year 2010. It is selling almost all units by completion of construction.

In Mumbai, the percentage is higher, but if we discount the longer timelines it takes for large projects to complete, it would fall under 5%. There are many large projects, high-rises, slum rehabilitation and other redevelopment projects that take a longer time to get completed, prolonging the overall project timelines in the city. Delhi-NCR is burdened with oversupply and dead stock of delayed and stalled projects.

The Modi government's focus on affordable housing has helped in making the term more acceptable to developers. From the previous fear of being tagged as developers who build affordable homes, the community is now not only entering this segment with confidence but also talking about it openly. There is now considerable goodwill attached to such a move, and affordable housing obviously makes eminent business sense. There has been an overwhelming historic deficit of affordable housing projects. Moreover, in the face of slowing sales in the luxury and premium categories, affordable housing can open up a new revenue source for those entering this segment.

Across India, more and more developers are entering this important segment to tap into a huge latent demand. Mahindra Lifespace, Tata Housing, Shapoorji Pallonji Group, Assetz Property Group, Puravankara Projects, Maple Group, VBHC Value Homes, etc., are either entering this segment or expanding their affordable housing portfolios. Some more like Emgee Group plan to enter this segment and invest INR 1,600 crore over the next five years.

Apart from developers, private equity players are also partnering with developers active in this space to fund such projects. Nisus Finance Services, Brick Eagle Capital, Avenue Venture Partners Real Estate, Carlyle, Essel Finance Advisors & Managers LLP, Provident Housing and International Finance Corp are some PE firms helping developers with their affordable housing projects across the country.

Retail Real Estate

On the supply front, a couple of malls which were to be operational in 2016 are now expected to be completed in 2017. Coupled with the malls withdrawn up to 3Q16, 2016 will have seen a net supply of 2 mn square feet and absorption of 3.4 mn square feet. If the malls withdrawn are not factored in, 2016 will have seen a gross supply of 4.4 mn square feet, with 3 mn square feet of mall space already added up to 3Q16.

Absorption was nearly twice the supply in 2016, thanks mainly to quality vacant spaces being absorbed quickly. With 14 poor malls getting shut in the past few quarters or getting refurbished into office buildings and shopping centers in Delhi-NCR and Mumbai, the retail space across key Indian cities stood at 75.8 million square feet as of 3Q16.

2017 is likely to see the highest mall space becoming operational, second to 2011. High levels of activity are expected 2017 onwards, after a prolonged slowdown from 2014 that lasted through 2016. This slowdown was the result of very few malls getting completed in these three years, and also due to poorly-performing malls shutting down.

All three segments of retail – apparel, F&B (food and beverage) and entertainment & cinema – did well in 2016. High streets and malls saw more and more people eating out, which helped the F&B category. Delhi and Mumbai led this growth. Entertainment and cinema also saw a good momentum.

A relatively new format of retailing – the Office-Retail Complex (ORCs) – found favour from retailers and developers in 2016. ORCs offer retailers a higher bang for their buck with comparatively lower rents for prime ground floor spaces in comparison to what premium malls charge, along with guaranteed viewership and higher weekday footfalls than comparable malls. This format offers developers potentially higher revenue across a diversified tenant base. It also provides them a key differentiator, which may be the ultimate weapon in commercial occupier retention and future rental upside potential.

Various brands like LeEco have filed applications with the Foreign Investment Promotion Board to set up their company-owned stores across India. Brands are also looking at expanding their production activity in the country – one of the various requirements of the government, in line with the Prime Minister's Make in India initiative.

The domestic consumption story was impacted by demonetization in the last two months of 2016. It led to a 25% hit being taken by retailers, especially in the tier-II, III cities, where the volume of cash transactions is higher. Business is expected to normalize from 2Q17, unless a new policy is announced. GST's implementation, if well-planned, will prove to be very beneficial to the retail sector. However, if GST's implementation is poor, it could result in chaos and affect consumption again. Retailers would get intensely involved in sorting out the issues that would ensue with a poorly-planned GST rollout, and thereby lose focus on their core business.

Hotels & Hospitality Real Estate

All major markets across India, with the exception of Ahmedabad, saw revenue per available room (RPAR) rise in 2016. Players are confident that room rates will continue to inch upwards through 2017 thanks to declining hotel supply and the increasing potential of the domestic travel industry. The Pan-India RPAR has gone up by 5% (y-o-y), led by the leisure markets. Two of these markets, Goa and Jaipur, outshone commercial markets in the country – in fact, Goa is becoming the most expensive market in India today in terms of average daily room rate (ADR), and matches Mumbai's ADR. Pune, Kochi, Chandigarh have also shown excellent growth.

Overall, the outlook for this industry looks bullish because demand will keep increasing while hotel realty supply will continue to remain limited. This is because demonetization has pushed further the deadlines for any new supply that would have come in the next few months. Ahmedabad is an aberration to the India-wide RPAR growth story because hotels in this city consolidated room rates in a knee-jerk reaction to the key demand generators not materializing.

Industrial Warehousing & Logistics

The Global Manufacturing Competitiveness Index 2016 ranked India at number 11 in 2015, and predicts it likely to rank at number 5 in 2020. The country is now becoming an attractive destination for manufacturing, not only thanks to the 'Make in India' programme but also because of the large consumer base and growing middle class. This makes India attractive for manufacturers to set up production here in order to serve the domestic demand.

Moreover, the labour cost in India, at USD 1.72/hour, is cheaper than China, which is at USD 3.28/hour. The only challenge is scarcity of quality / skilled labour force. The current government's focus on upskilling and re-skilling is helping. Under the 'Skill India' programme, 300 mn youth will be trained in different skills by 2022. Big-time investments, setting up of labour exchange programmes, simulated laboratories, etc. are some examples that show the government's seriousness in this direction.

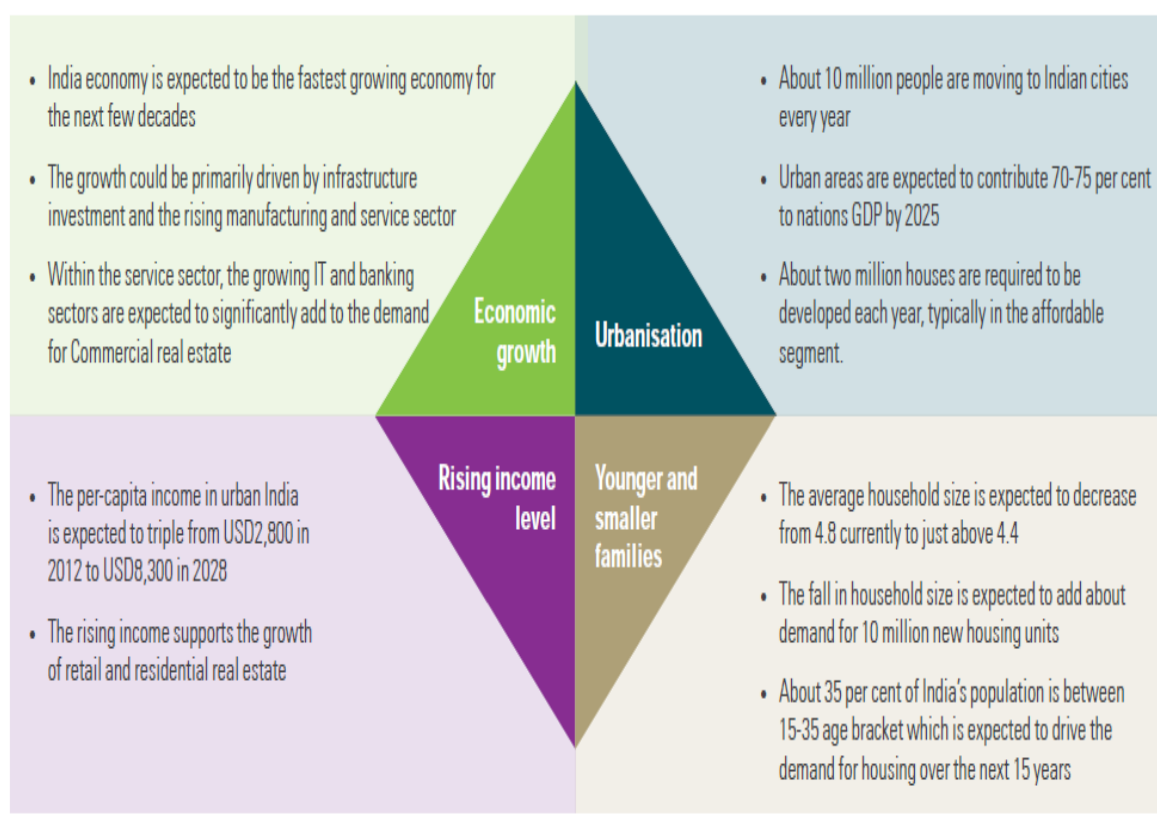

Private parties such as CFLD (China Fortune Land Development), the Wanda Group, and Japanese investments in an industrial node along the DMIC (Delhi-Mumbai Industrial Corridor) show the level of interest from overseas players in developing large-scale industrial parks in India. There is very evidently growing interest from foreign investors and funds in the logistics and warehousing industry.

Some serious players are already on an acquisition spree. According to a recent report in the Economic Times, the largest commercial deal in India – pegged at INR 15,000 crore – is in the making between IndoSpace (an industrial and logistics real estate development platform between Everstone Group and Realterm) and Canada Pension Plan Investment Board.

In 2016, India jumped 19 positions in the bi-annual Logistics Performance Index (LPI) released by the World Bank. The country ranks 35th among 160 countries, up from the 54th position in 2014. Regulatory hindrances are being addressed, and GST will definitely prove to be most beneficial to the logistics and warehousing sector.

Over 12 new warehousing hubs would emerge thanks to GST, apart from an increase in warehousing supply within the existing eight hubs. As the rents charged by organized warehouses reduce, the price advantage that unorganized warehouses presently enjoy will shrink. Demand for organised warehouses will go up and resultantly, more developers could get into the business. Overall, infrastructure development and policies such as Make in India, Digital India and Skill India will help in this sector's growth in 2017 and beyond.

FDI in Real Estate Industry

India's real estate market is expected to reach US\$ 180 billion by 2020 from US\$ 93.8 billion in 2014. Emergence of nuclear families, rapid urbanisation and rising household income are likely to remain the key drivers for growth in all spheres of real estate, including residential, commercial and retail.

Real estate is currently the fourth-largest sector in the country in terms of Foreign Direct Investment (FDI) inflows. Total FDI in the construction development sector during April 2000–May 2015 stood at around US\$ 24.07 billion.

The Government of India has been supportive to the real estate sector. In August 2015, the Union Cabinet approved 100 Smart City Projects in India. The Government has also raised FDI limits for townships and settlements development projects to 100 per cent. Real estate projects within the Special Economic Zone (SEZ) are also permitted 100 per cent FDI. In Union Budget 2015-16, the government allocated US\$ 3.72 billion for housing and urban development. The government has also released guidelines for investments by Real Estate Investment Trusts (REITs) in non-residential segment.

FDI in Real Estate on an upward trend

- Total FDI in the construction sector, from April 2000-March 2016 stood at US\$ 24.188 billion.
- During April 2000-March 2016, total cumulative inflows in the construction development sector accounted for 8.4 per cent of total inflows into the country.

Market Players

The Indian real estate sector has traditionally been an unorganized sector but it is slowly evolving into a more organized one. The sector is embracing professional standards and transparency with open arms. The major established domestic players in the sector are DLF, Unitech, Hiranandani Constructions, Tata Housing, Godrej Properties, Omaxe, Parsvanath, Raheja Developers, Ansal Properties and Infrastructure and Mahindra Lifespace Developers Ltd to name a few. International players who have made a name for themselves in India include Hines, Tishman Spysers, Emaar Properties, Ascendas, Capitaland, Portman Holdings and Homex.

Government Initiatives

The Government of India along with the governments of the respective states has taken several initiatives to encourage the development in the sector. The Smart City Project, where there is a plan to build 100 smart cities, is a prime opportunity for the real estate companies. Below are some of the other major Government Initiatives:

- The Make in India initiative has helped to accelerate leasing of commercial property by the manufacturing sector, which has outpaced the Information Technology (IT) sector by registering two-fold increase in office transacted space in the first six months of 2016.
- Brihanmumbai Municipal Corporation (BMC) has introduced a single-window clearance for construction which will cut the time taken for getting approvals for a building project and lead to correction in prices of residential property, thereby giving a fillip to Mumbai realty.
- The Securities and Exchange Board of India (SEBI) has proposed easier regulations for real estate investment trusts (REITs), such as raising the cap of investment of REITs' assets in under-construction projects from 10 per cent to 20 per cent, in order to attract the interest of developers, and also plans to relax the rules for foreign fund managers to relocate to India.

- The Government of India has brought into force the Real Estate (Regulation and Development) Act, 2016 which is aimed at making necessary operational rules and creating an institutional infrastructure for protecting the interests of consumers and promoting growth of the real estate sector in India.
- The Securities and Exchange Board of India (SEBI) has allowed Foreign Portfolio Investors (FPI) to invest in units of Real Estate Investment Trusts (REITs), infrastructure investment trusts (InvITs), category III alternative investment funds (AIFs), and also permitted them to acquire corporate bonds under default.
- The Rajya Sabha or the upper house of the Parliament has passed the Real Estate (Regulation and Development) Bill, 2013, which aims to protect consumer interest, ensure efficiency in all property related transactions, improve accountability of real estate developers, increase transparency and attract more investments into the realty sector in India.
- The Securities and Exchange Board of India (SEBI) has issued the consultation paper for public issue of Real Estate Investment Trusts (REITs), which include provisions such as capping of allocation to qualified institutional buyers (QIBs) at 75 per cent, among other topics.
- The Government of Rajasthan became the first state to initiate private investments in affordable housing by signing four Memoranda of Understanding (MoUs) with private players for an investment of Rs 5,400 crore (US\$ 800.49 million).
- The Ministry of Housing and Urban Poverty Alleviation (HUPA) has commissioned a study by Indian Institute of Technology, Kanpur on testing of new construction technologies, with the objective of promoting new housing technologies in the country.
- India's Prime Minister Mr Narendra Modi approved the launch of Housing for All by 2022. Under the Sardar Patel Urban Housing Mission, 30 million houses will be built in India by 2022, mostly for the economically weaker sections and low-income groups, through public-private-partnership (PPP) and interest subsidy.
- The Government of India has relaxed the norms to allow Foreign Direct Investment (FDI) in the construction development sector. This move should boost affordable housing projects and smart cities across the country.
- The Securities and Exchange Board of India (SEBI) has notified final regulations that will govern real estate investment trusts (REITs) and infrastructure investment trusts (InvITs). This move will enable easier access to funds for cash-strapped developers and create a new investment avenue for institutions and high net worth individuals, and eventually ordinary investors.
- The Government of Maharashtra announced a series of measures to bring transparency and increase the ease of doing business in the real estate sector.
- The State Government of Kerala has decided to make the process of securing permits from local bodies for construction of houses smoother, as it plans to make the process online with the launch of software called 'Sanketham'. This will ensure a more standardised procedure, more transparency, and less corruption and bribery.

Challenges

The key challenges that the Indian real estate is facing today are:

- lack of clear land titles,
- absence of title insurance,
- absence of industry status,

- lack of adequate sources of finance,
- shortage of labour,
- rising manpower and material costs,
- approvals and procedural difficulties.

Expected growth in the Indian real estate sector

The real estate sector which is deeply linked to the economic performance is expected to be a major beneficiary in the expected strong Indian economic growth. The major drivers supporting real estate sector include urbanization, rising income level, young population and growing number of nuclear families and strong expected growth in the manufacturing and service sector. The share of real estate sector in national GDP is expected to increase from 6.3 per cent in 2013 to 13 per cent in 2028. In absolute terms, the size of the sector is expected to increase seven times to USD853 billion in 2028 from USD 121billion in 2013.

Emerging Trends in the Real Estate Sector

Affordable housing

With the urban population expected to reach ~81 crore by 2050, India is on the verge of large scale urbanisation over the next few decades. The government has proposed an initiative 'Housing for all by 2022' which entails a development of ~11 crore housing units, including closing the current gap of ~6 crore units in urban and rural areas. A projected investment of more than USD2 trillion or ~USD250- 260 billion annual investment is required to achieve the proposed mission by 2022. The mission on low cost affordable housing is proposed to be anchored by National Housing Bank (NHB) and a sum of USD667 million has been earmarked with a view to increase the flow of cheaper credit for affordable housing to the urban poor/Economically Weaker Section (EWS)/Low Income Group (LIG) segment. The government has identified 305 cities and towns across the states of Madhya Pradesh, Odisha, Rajasthan, Chhattisgarh, Gujarat, Telangana, Jammu and Kashmir, Kerala and Jharkhand, among others, for constructing homes for the urban poor under this scheme.

Particulars	Urban (Crore units)	Rural (Crore units)	Total (Crore Units)
Current Housing Shortage	1.9	4.0	5.9
Required Housing Units by 2022	2.6 – 2.9	2.3 – 2.5	4.9 – 5.4
Total Housing Need	4.4 – 4.8	6.3 – 6.5	10.7 – 11.3

Heritage and pilgrimage Cities

The government proposes to develop heritage cities in order to explore the full potential that lies within the diverse historic, cultural and natural resources in India. It has announced the Heritage City Development and Augmentation Yojana (HRIDAY) in order to preserve and rejuvenate the rich cultural character of initially 12 cities in India with a total outlay of USD83.3 million for this project, completely funded by the central government. The scheme would

be implemented for cities of Ajmer, Amritsar, Amravati, Badami, Dwarka, Gaya, Warangal, Puri, Kanchipuram, Mathura, Varanasi and Vellankanni. The scheme will broadly focus on four core areas i.e. physical infrastructure, institutional infrastructure, economic infrastructure and social infrastructure for reviving and revitalising the Heritage City. The duration of the scheme will be four years starting from December 2014. The scheme would be merged along with the tourism ministry's Pilgrimage Rejuvenation and Spiritual Augmentation Drive (PRASAD) scheme which has an outlay of USD16.6 million (for the current year) in order to augment infrastructure at pilgrim sites across the country.

These schemes are inclined towards facilitating inclusive heritage linked urban development by enhancing the infrastructure through various avenues including private participation. Inclusive urban planning targeting infrastructural development, could eventually aid tourism and benefit the overall hospitality sector in the region. This initiative would help to promote tourist in these historic and pilgrimage locations, in turn increasing the spending in these locations, fueling trade and commerce and creating an opportunity for real estate.

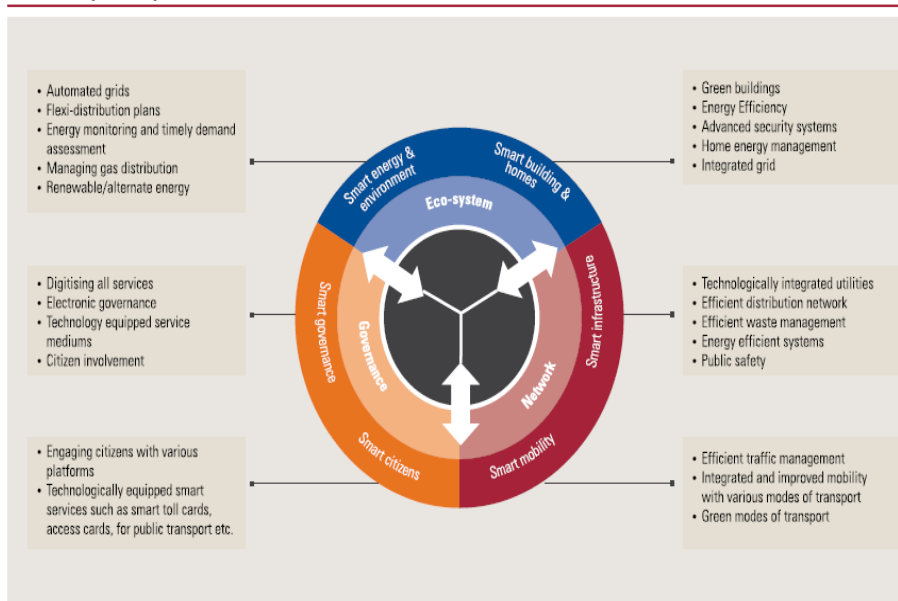

Smart cities

Smart Cities is a Government of India's initiative which aims to cater to the growing needs of the population in the country and to ease the pressure on the existing metropolitan cities. The smart city initiative is planned with an investment of USD 8,000 million over a period of five years and intends to drive development of 100 cities, drawing the existing focus from major metropolitan cities to a number of untapped cities. These smart cities are expected to cover ~35 per cent of the urban area and benefit ~13 crore population by improving the infrastructure and service delivery through application of better technology and e-governance. Out of these 100 smart cities, 24 are capital cities, another 24 are business and industry centres, 18 are cultural and tourist influenced areas, five are port cities and three are education and health care hubs.

A smart city is typically a self-sustaining urban ecosystem with advanced institutional, physical, social and economic infrastructure. These cities are envisaged to provide core infrastructure and give a decent quality of life to its citizens, and a clean and sustainable environment along with application of smart solutions. The concept is built around collaborating Information and Communication Technology (ICT) services along with urban planning and real estate solutions within the city, in order to create sustainable developments with enhanced living quotient. Key features of smart cities include:

- Mixed use developments and walkable communities
- Preservation and development of open spaces
- Transit oriented development
- Smart governance by making governance citizen-friendly and cost effective
- Utilising ICT services to apply smart solutions to infrastructure and services in area-based development.

The initiative is expected to have induced implications on the real estate sector. Smart city establishment would contribute towards high-quality infrastructure in the selected cities which would further drive several industrial and technological establishments in these identified regions. These industrial and business establishments would lead to higher levels of employment opportunities which could drive the ancillary demand for residential, retail and commercial asset classes in these cities.

Real Estate Investment Trusts (REITs)

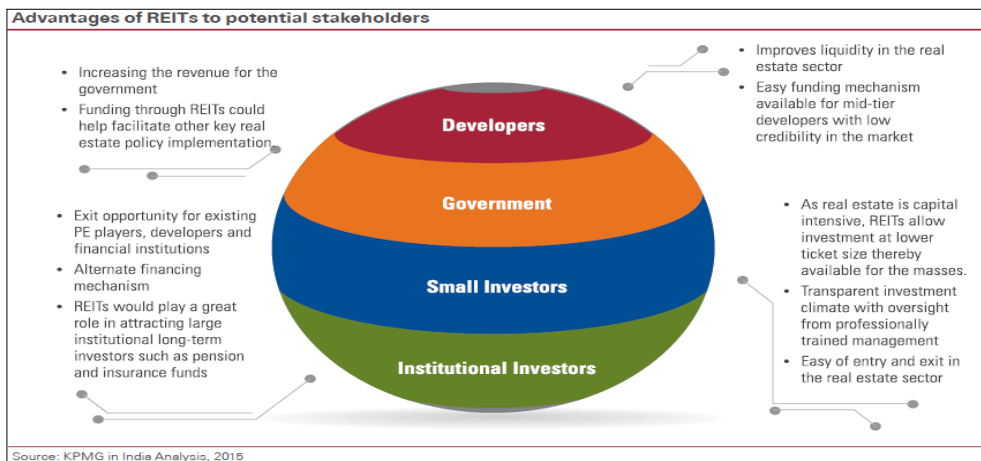

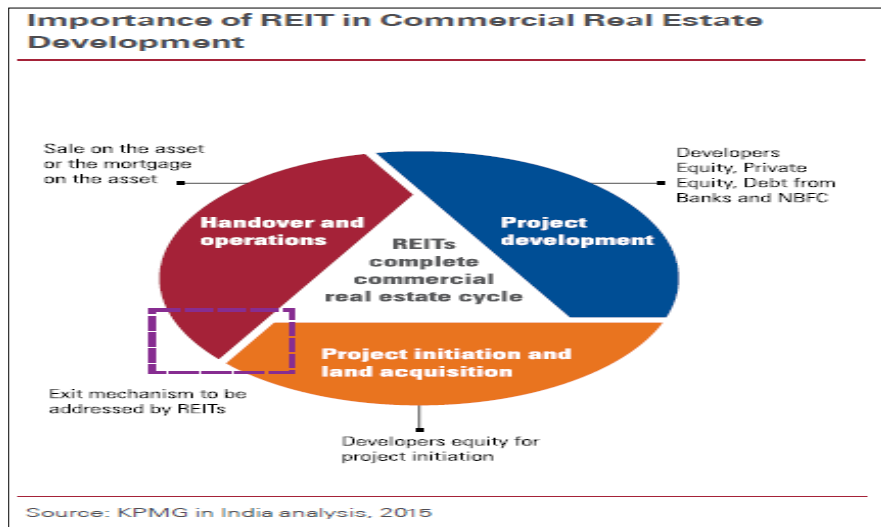

REITs is an investment vehicle which invests in income producing completed real estate assets. The developers in the commercial office space incur huge capital expenditure on project construction which remains locked for several years until the property stabilises and attains sufficient returns to break-even.

REITs would allow the availability of funds to real estate developers against their completed assets by means of sale and help them offload their current assets. It is not only expected to attract long-term financing from domestic sources and enable investments from small scale investors, but could also attract investments from foreign sources.

REITs pose a large opportunity in the Indian real estate market which is backed by a growing economy and more importantly by a large existing Grade-A REITable commercial real estate portfolio. India potentially has about 375 million sq.ft. of Grade-A office space which is valued at USD 65-70 billion.

Out of this, 80-100 million sq.ft. is estimated to be eligible for REITs in the coming two to three years and would be valued at USD15-20 billion. Apart from these Grade-A office spaces, there are other commercial assets such as shopping centers, hospitality and industrial warehouses which might come under the purview of REITable space, thereby presenting a potential for increasing the overall stock.

Globally, there are about 500 REITs in 22 countries which have a market capitalisation of USD800 billion. Of the 22 countries, nine are emerging real estate markets. The leading REIT markets are USA, France, United Kingdom, Australia and Japan which account for 84 per cent of the global REIT market share. The last decade has witnessed returns on equity of traded REITs over-performing the returns on leading stock market indexes across the globe. REITs across the world have provided five year returns in the range of 10 per cent to 22 per cent. With the Japanese, Singapore and Hong Kong REITs providing returns of 13.45 per cent, 12.94 per cent and 22.52 per cent respectively, REITs in the emerging Asian markets are expected to perform on similar lines.

Road Ahead

Responding to an increasingly well-informed consumer base and, bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The growing flow of FDI into Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards.

TRADE AND INDUSTRY RELATED LEGISLATIONS

Infrastructure sector includes power, airport, water, railway, dams, bridges, roads and urban infrastructure development. Since the Company is focussed on roads and bridges development, we have mentioned the key industry regulations relating to roads development.

Key Regulations in relation to the Real Estate Sector

The laws related to Property and Land Acquisitions are as follows:

CENTRAL LAW

Transfer of Property Act, 1882 (the “TP Act”)

The transfer of property, including immovable property, between living persons, as opposed to the transfer of property by operation of law, is governed by the Transfer of Property Act, 1882. This Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. The Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- **Sale:** the transfer of ownership in property for a price paid or promised to be paid.

- **Mortgage:** the transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The Act recognizes several forms of mortgages over a property.
- **Charges:** transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- **Leases:** the transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.

Registration Act, 1908 (the “Registration Act”)

The Registration Act has been enacted with the objective of providing public notice of the execution of documents affecting, *inter alia*, the transfer of interest in immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title and publication of documents and prevention of fraud. It details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in any immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. A document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the TP Act or as collateral), unless it has been registered. Evidence of registration is normally available through an inspection of the relevant land records, which usually contains details of the registered property. Further, registration of a document does not guarantee title of land.

Indian Stamp Act, 1899 (the “Stamp Act”)

Under the Stamp Act, stamp duty is payable on instruments evidencing a transfer or creation or extinguishment of any right, title or interest in immovable property. Stamp duty must be paid on all instruments specified under the Stamp Act at the rates specified in the schedules to the Stamp Act. The applicable rates for stamp duty on instruments chargeable with duty vary from state to state. Instruments chargeable to duty under the Stamp Act, which are not duly stamped, are incapable of being admitted in court as evidence of the transaction contained therein and it also provides for impounding of instruments that are not sufficiently stamped or not stamped at all. However, the instruments which have not been properly stamped can, in certain cases, be validated by paying a penalty of up to 10 times of the proper duty or deficient portion thereof payable on such instruments.

Indian Easements Act, 1882 (the “Easement Act”)

An easement is a right which the owner or occupier of land possesses for the beneficial enjoyment of that land and which permits him to do or to prevent something from being done, in or upon, other land not his own. Under the Easements Act, a license is defined as a right to use property without any interest in favour of the licensee. The period and incident may be revoked and grounds for the same may be provided in the license agreement entered in between the licensee and the licensor.

Indian Contract Act, 1872

Any commercial activity requires ‘under standing’ among people concerned. This understanding is often reduced into writing to give effect to the intention of the parties. Such formal versions are known as contracts. These contracts define the rights and obligations of various parties to facilitate easy performance of the contractual obligations.

The Indian Contract Act, 1872 codifies the legal principles that govern such ‘contracts’. The Act basically identifies the ingredients of a legally enforceable valid contract in addition to dealing with certain special type of contractual relationships like indemnity, guarantee, bailment, pledge, quasi contracts, contingent contracts etc.

In India, Indian Contract Act, 1872 governs the Contract and its applicability extends to whole of India except State of Jammu and Kashmir. It came into force on First day of September 1872. Section 2(h) defines “Contract as an agreement enforceable by law”; in other words it is a) A Contract is an agreement; an agreement is a promise and a promise is an accepted proposal; b) An Agreement which is legally enforceable alone is a contract. Section 2(e) of the act defines the term ‘Agreement’ as ‘every promise or every set of promises forming consideration for each

other'. An Agreement is a promise or a commitment or set of reciprocal promises or commitments. An agreement involves an offer or proposal by one person and acceptance of such offer or proposal by another person. Section 2(b) defines term Promise i.e., "When a person to whom proposal is made signifies his assent thereto, the proposal is said to be accepted. Proposal when accepted becomes a promise". Section 2(d) defines Lawful Consideration as a mean for 'compensation' for doing or omitting to do an act or deed. It is also referred to as 'quid pro quo' viz 'something in return for another thing'. Section 2(b) defines Promise as "A Proposal when accepted becomes a promise." In simple words, when an offer is accepted it becomes promise. Section 2(c) defines Promisor and promisee as "When the proposal is accepted, the person making the proposal is called as promisor and the person accepting the proposal is called as promisee." An agreement enforceable by law is a valid contract. In other words it satisfies all the requirements of a valid contract as laid down in section 10. If any of the essential requirements is missing it becomes a void contract.

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 ("2013 Land Acquisition Act")

The 2013 Land Acquisition Act has replaced the Land Acquisition Act, 1894 and aims at establishing a participative, informed and transparent process for land acquisition for industrialization, development of essential infrastructural facilities and urbanization. While aiming to cause least disturbance to land owners and other affected families, it contains provisions aimed at ensuring just and fair compensation to the affected families whose land has been acquired or is proposed to be acquired. It provides for rehabilitation and resettlement of such affected persons. Under the 2013 Land Acquisition Act, the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (Maharashtra) Rules, 2014 have been notified which frame rules in relation to *inter alia* the consent process, the compensation mechanism and rehabilitation and resettlement.

The Real Estate (Regulation and Development) Act, 2016

This Act was notified by the Parliament on 25th March, 2016 and extends to the whole of India except the State of Jammu and Kashmir. It establishes the Real Estate Regulatory Authority for regulations and promotions of the real estate sector and to ensure sale of plot, apartment or building, as the case may be, or sale of real estate project, in an efficient and transparent manner and to protect the interest of consumers in the real estate sector and to establish an adjudicating mechanism for speedy dispute redressal and also to establish the Appellate Tribunal to hear appeals from the decisions, directions or orders of the Real Estate Regulatory Authority and the adjudicating officer and for matters connected therewith or incidental thereto. The salient features of the Act are as following:

- Under the Act, instead of a regular forum of consumers, the purchasers of real estate units from a developer would have a specialised forum called the "Real Estate Regulatory Authority" which will be set up within one year from the date of coming into force of the Act. In the interim, the appropriate Government (i.e., the Central or State Government) shall designate any other regulatory authority or any officer preferably the Secretary of the department dealing with Housing, as the Regulatory Authority.
- The promoter has to register their project (residential as well as commercial) with the Regulatory Authority before booking, selling or offering apartments for sale in such projects. In case a project is to be promoted in phases, then each phase shall be considered as a standalone project, and the promoter shall obtain registration for each phase.
- Under the Act, developers can sell units only on carpet area, which means the net usable floor area of an apartment. This excludes the area covered by the external walls, areas under services shafts, exclusive balcony or verandah area and exclusive open terrace area, but includes the area covered by the internal partition walls of the apartment.
- The Act mandates that a promoter shall deposit 70% of the amount realised from the allottees, from time to time, in a separate account to be maintained in a scheduled bank. This is intended to cover the cost of construction and the land cost and the amount deposited shall be used only for the concerned project.
- Stringent penal provisions have been prescribed under the Act against the promoter in case of any contravention or non-compliance of the provisions of the Act or the orders, decisions or directions of the Regulatory Authority or the Appellate Tribunal which are the following: a) If promoter does not register its project with the Regulatory Authority – the penalty may be up to 10% of the estimated cost of the project as determined by the Regulatory Authority; b) If promoter does not comply with the aforesaid order of the Regulatory Authority - imprisonment of up to three years and a further penalty of up to 10% of the estimated cost, or both; and c) In case the promoter

provides any false information while making an application to the Regulatory Authority or contravenes any other provision of the Act – the penalty may be up to 5% of the estimated cost of the project or construction.

STATE LAW

Maharashtra Housing (Regulation and Development) Act, 2012 (the “MH Act”)

The MH Act regulates the promotion, construction, sale, management and transfer of flats sold on an ownership basis in the state of Maharashtra. The MH Act defines promoter as a person who constructs flats or apartments for the purpose of selling them to other persons, or to a company or co-operative society. It lays down the responsibilities of promoter with respect to flats sold by it. The promoter is required to make a full and true disclosure of their title to the land, disclose the building-wise time schedule of completion of each phase of the project, all encumbrances on the land, all outgoings for the property like rates, municipal taxes, cess, etc., the nature of materials used in construction of the building, date by which possession of the flat would be handed over, maintain a list of flats taken or agreed to be taken with prescribed details and not give possession of flats until a completion certificate is received from the municipal corporation. Promoter is also required to register the project with the housing regulatory authority and such project shall be displayed on the website of the housing regulatory authority. Further the promoter is prohibited from creating any mortgage or charge on flats after execution of the agreement for sale, except with the consent of the flat purchaser.

Maharashtra Regional and Town Planning Act, 1966 (the “MRTP Act”)

The MRTP Act has been enacted with the object of establishing local development authorities in Maharashtra to ensure efficient town planning and development of lands within their jurisdiction. It provides for the creation of new towns and compulsory acquisition of land required for public purposes. It provides a mechanism for the better preparation of planning proposal and their effective execution.

The Special Planning Authority (“SPA”)

The State Government may appoint a company as a SPA for planning the development of any undeveloped area notified under the MRTP Act. A planning proposal is to be prepared by the SPA indicating the manner in which the land is going to be developed by a planning authority, which includes a SPA. The SPA, in furtherance of the approved planning proposal, has the power to hold, manage and dispose of the land and other property, to carry out buildings and other operations, to provide water, electricity, gas, sewerage and other services, amenities and facilities and generally do anything which is necessary and expedient to give effect to the development of the area as planned subject to the directions of the State Government.

The planning proposal shall contain details regarding land use, construction and all other civic amenities and services intended to be provided by that authority. The tax is primarily leviable from the actual occupier of the building or land, if such occupier is the owner of the building or land. Value Added Tax (“VAT”) Act and Rules, 2008

The levy of Sales Tax within the state is governed by the Value Added Tax Act and Rules 2008 (—the VAT Act) of the respective states. The VAT Act has addressed the problem of Cascading effect (double taxation) that were being levied under the hitherto system of sales tax. Under the current regime of VAT the trader of goods has to pay the tax (VAT) only on the Value added on the goods sold. Hence, VAT is a multi-point levy on each of the entities in the supply chain with the facility of set-off of input tax—that is the tax paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. Only the value addition in the hands of each of the entities is subject to tax. Periodical returns are required to be filed with the VAT Department of the respective States by the company.

Central Sales Tax Act, 1956

In accordance with the Central Sales Tax Act, every dealer registered under the Act shall be required to furnish a return in Form I (Monthly/ Quarterly/ Annually) as required by the State sale Tax laws of the assessee authority together with treasury challan or bank receipt in token of the payment of taxes due.

Further under Rule 7 (1) of Service Tax Rules, the company is required to file a half yearly return in Form ST 3 by twenty fifth of the month immediately following the half year to which the return relates.

INTELLECTUAL PROPERTY RIGHTS LEGISLATIONS

The laws relating to intellectual property will also apply to the Company.

The Trade Marks Act, 1999

The Trade Marks Act, 1999 (“Trademark Act”) governs the statutory protection of trademarks in India. In India, trademarks enjoy protection under both statutory and common law. Indian trademarks law permits the registration of trademarks for goods and services. Certification trademarks and collective marks are also registrable under the Trade Mark Act. An application for trademark registration may be made by any person claiming to be the proprietor of a trademark and can be made on the basis of either current use or intention to use a trademark in the future. The registration of certain types of trademarks is absolutely prohibited, including trademarks that are not distinctive and which indicate the kind or quality of the goods.

Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for 10 years unless cancelled. If not renewed after 10 years, the mark lapses and the registration for such mark has to be obtained afresh.

While both registered and unregistered trademarks are protected under Indian law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. Registered trademarks may be protected by means of an action for infringement, whereas unregistered trademarks may only be protected by means of the common law remedy of passing off. In case of the latter, the plaintiff must, prior to proving passing off, first prove that he is the owner of the trademark concerned. In contrast, the owner of a registered trademark is prima facie regarded as the owner of the mark by virtue of the registration obtained.

The Patents Act, 1970

The Patents Act, 1970 (‘Patents Act’) is the primary legislation governing patent protection in India. In addition to broadly requiring that an invention satisfy the requirements of novelty, utility and non obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. The term of a patent granted under the Patents Act is for a period of twenty years from the date of filing of application for the patent. The Patents Act deems that computer programs per se are not ‘inventions’ and are therefore, not entitled to patent protection. This position was diluted by The Patents Amendment Ordinance, 2004, which included as patentable subject matter:

1. Technical applications of computer programs to industry; and
2. Combinations of computer programs with the hardware.

However, the Patents Amendment Act, 2005, does not include this specific amendment and consequently, the Patents Act, as it currently stands, disentitles computer programs per se from patent, may disentitle the said invention to patent protection on grounds of lack of novelty. Under the Patents Act, an invention will be regarded as having ceased to be novel (and hence not patentable), inter alia, by the existence of:

1. Any earlier patent on such invention in any country;
2. Prior publication of information relating to such invention;
3. An earlier product showing the same invention; or
4. A prior disclosure or use of the invention that is sought to be patented.

Following its amendment by the Patents Amendment Act, 2005, the Patents Act permits opposition to grant of a patent to be made, both pre-grant and post-grant. The grounds for such patent opposition proceedings, inter alia, include lack of novelty, inventiveness and industrial applicability, non-disclosure or incorrect mention of source and geographical origin of biological material used in the invention and anticipation of invention by knowledge (oral or otherwise) available within any local or indigenous community in India or elsewhere. The Patents Act also prohibits any person resident in India from applying for patent for an invention outside India without making an application for the invention in India. Following a patent application in India, a resident must wait for six weeks prior to making a foreign application or may obtain the written permission of the Controller of Patents to make foreign applications prior to this six week period. The Controller of Patents is required to obtain the prior consent of the Central Government before granting any such permission in respect of inventions relevant for defense purpose or atomic energy. This prohibition on foreign applications does not apply, however, to an invention for which a patent application has first been filed in a country outside India by a person resident outside India.

Copyright Act, 1957

The Copyright Act, 1957 (“Copyright Act”) protects original literary, dramatic, musical and artistic works, Cinematographic films and sound recordings from unauthorized use of such works. Unlike the case with patents,

copyright protects the expressions and not the ideas. There is no copyright in an idea. The object of copyright law is to encourage authors, artists and composers to create original works by rewarding them with exclusive right for a fixed period to reproduce the works for commercial exploitation. Copyrights subsist in following class of works:

- a) Original literary, musical, dramatic and artistic works
- b) Cinematograph films
- c) Sound recordings

Under the copyright law the creator of the original expression in a work is its author who is vested with a set of exclusive rights with respect to the use and exploitation of the work. The author is also the owner of the copyright, unless there is a written agreement by which the author assigns the copyright to another person or entity, such as a publisher, where work is done under a 'work for hire' agreement, the copyright vests with the hirer, i.e., the person providing the work. The owner of copyright in a work can assign or license his copyright to any person, such as publisher, under a written agreement. Copyright subsists in a work since the time it comes into being. Therefore, registration of copyright neither creates any rights nor precludes enforcement of the existing ones. However, owing to its evidentiary value, a registered copyright is easier to establish in the court of law. The term of copyright varies across different types of works. In the case of broadcasts, the Act grants "broadcast reproduction rights" to broadcasting organizations which subsist for 25 years.

SIGNIFICANT ACCOUNTING POLICIES AND NOTES ON ACCOUNT FOR PREPARATION OF RESTATED FINANCIAL STATEMENT

A. SIGNIFICANT ACCOUNTING POLICIES:

1. Basis of Preparation of Financial Statements

The financial statements have been prepared and presented under the historical cost convention, on accrual basis of accounting in accordance with generally accepted accounting principles in India and the provisions of the Companies Act, 2013. They are prepared in accordance with the Accounting Standards specified under section 133 of the Companies Act, 2013 ('the Act') read with Rule 7 of Companies (Accounts) Rules, 2014 and other relevant provisions to the extent applicable.

2. Use of Estimates

The preparation of Financial Statements in conformity with generally accepted accounting principles requires estimates and assumptions to be made, that affects the reported amounts of assets and liabilities on the date of the Financial Statements and the reported amounts of revenue and expenses during the reporting period. Differences between the actual results and estimates are recognized in the period in which the results are known / materialized.

3. Fixed Assets

Fixed assets are stated at cost of acquisition or construction, net of recoverable taxes including any cost attributable for bringing the asset to its working condition for its intended use less accumulated depreciation and impairment loss, if any.

4. Depreciation / Amortization

Depreciation on fixed assets is provided on Straight Line Method at the rates and in the manner prescribed in Schedule II to the Companies Act, 2013.

5. Inventories

Work in progress is valued at cost including material cost and attributable overheads. Provision is made when expected realisation is lesser than the carrying cost.

6. Revenue Recognition

Consultancy Income: The revenue is recognised on the completion of rendering of service and on raising of Invoice.

7. Borrowing Costs

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are recognised as expenses in the period in which they are incurred.

8. Taxation

Current tax is measured at the amount expected to be paid/recovered from the taxation authorities, using the applicable tax rates and tax law.

The tax effect of the timing differences that result between taxable income and accounting income and are capable of reversal in one or more subsequent period are recognized as deferred tax assets or deferred tax liability. They are measured using the substantively enacted tax rates and tax regulations. Deferred tax assets are recognized only to the extent there is reasonable certainty that sufficient future taxable income will be available against which such deferred assets can be realized. Deferred tax assets are recognized on carried forward of unabsorbed depreciation and tax losses only if there is virtual certainty that such deferred tax assets can be realized against future taxable profits.

9. Leases

Operating Lease

Lease payments are recognised as expense in the Statement of Profit and Loss on straight line basis over the term of the lease.

Assets given on operating lease are included in fixed assets. Lease income is recognised in the Statement of Profit and Loss on straight line basis over the term of the lease.

10. Impairment of Assets

Consideration is given at each balance sheet date to determine whether there is any indication of impairment of the carrying amount of the Company's fixed assets. If any such indication exists, then recoverable amount of the asset is estimated. An impairment loss, if any, is recognised whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is greater of the net selling price and the value in use. In assessing value in use, the estimated future cash flows are discounted to their present value based on an appropriate discount factor. The impairment loss recognised in a prior accounting period is reversed, if there has been a change in the estimate of recoverable amount.

11. Earnings per Share

In The basic earnings per share is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity shares outstanding during the reporting period. Diluted earnings per share is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity and dilutive equity equivalent shares outstanding during the year, except where the results would be anti dilutive.

12. Contingent Liabilities& Provisions

- a) A provision is recognised when there is a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.
- b) A disclosure for a contingent liability is made when there is a possible or present obligation that may but probably will not require an outflow of resources. When there is a possible obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

B. CHANGES IN ACCOUNTING POLICIES IN THE YEARS/PERIODS COVERED IN THE RESTATED FINANCIALS
