The same is obtained on leave and license basis from 1st November, 2015 for a period of twenty-four (24) months. Any discontinuance of facility to use the office will lead us to locate any other premises. Our inability to identify the new premises may adversely affect the operations, finances and profitability of our Company.

2. Our top 5 customers contribute approximately 82% of our revenues for the financial year ending March 31, 2017. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Our top 5 customers have contributed over 82% of our revenues for the financial year ended March 31, 2017. Any decline in our quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

Our business requires a significant amount of working capital for smooth functioning. We meet our requirement for working capital majorly through banking facilities or fresh infusion of funds by way of issue of shares or internal accruals. Our inability, if any to meet our working capital requirements through banking/other arrangements can adversely impact our business operations and financial position.

5. We have in the past entered into related party transactions and may continue to do so in the future.

We have entered into transactions with our promoters and group companies. While we believe that all such transactions have been conducted on an arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. There can be no assurance that the current levels of capital investment and construction activity in the infrastructure sector will grow, be maintained or not be reduced in the future. In particular, some of our customers may have trouble funding their capital expenditure or growth plans as funding may be dependent upon currency fluctuations, changes in fiscal and government policy and debt and equity market conditions, which may adversely impact these customers' ability to invest. Any failure to maintain, or a reduction in, the current levels of capital investment and construction activity in the infrastructure sector or any changes or delays in the timeline for the construction or completion of infrastructure projects may reduce the demand for our services and materially and adversely affect our revenue, profitability and growth.

7. If we are not able to obtain, renew or maintain the statutory and regulatory permits and approvals required to operate our business it may have a material adverse effect on our business.

Our Company is required to obtain, renew and maintain certain statutory and regulatory permits and approvals from time to time to operate our business. Any failure to obtain such registrations and approvals with statutory time frame may result in the interruption of our operations and may have a material adverse effect on our revenues, profits and operations.

8. Our Company does not have any long-term contracts with our clients and suppliers, which may adversely affect our results of operations.

Our Company neither has any long-term contract with any of our clients and suppliers nor we have any marketing tie up for our services. However the Company has short term Contracts with our clients. Our inability to cater our services to the clients, may adversely affect our business and profitability in future.

9. Delays or defaults in client payments could result in a reduction of our profits.

We may be subject to working capital shortages due to delays or defaults in payments by clients. 10. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and cause serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

11. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

Modernization and technology up gradation is essential to reduce costs and increase the efficiency. Our technology may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have already started utilizing latest technology by using latest equipments, we shall continue to strive to keep our technology updated. In case of a new found technology in the infrastructure sector, we may be required to implement new technology employed by us. Further, the cost in upgrading our technology is significant which could substantially affect our finances and operations.

14. Our operations are considerably located in Mumbai, Maharashtra and failure to expand our operations may restrict our growth and adversely affect our business.

Currently, we are carrying our business mainly in the Mumbai and adjacent areas in Maharashtra and hence our major revenues are generated from operations in these regions only. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus, we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues, our operating results and financial conditions.

15. Our business is subject to various operating risks at Project sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.

Our business operations are subject to operating risks, such as breakdown or failure of our equipments used at the project sites, weather conditions, shortage of consumables, performance below expected levels of efficiency, natural disasters, obsolescence, accidents, our inability to respond to technological advancements and emerging material handling industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

16. Rise in input costs including fuel prices may affect our profitability.

The input costs of the services of the Company may increase due to various reasons. The prices of fuel may increase due to change in government policies and other global factors, which are not within our

control. In case the Company is not able to pass on such increase to the consumers because of competition or otherwise, it may affect the profitability of the Company and can have an adverse impact on our business, financial conditions and results of operations.

17. Our success depends largely on our senior management and our ability to attract and retain our key personnel.

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

18. We operate in a significantly fragmented and competitive market and any failure on our part to compete effectively may adversely affect our business, results of operation and prospects.

The Infrastructure market is highly competitive and fragmented, and we face competition from various domestic Contractors. Some of our competitors have greater financial, marketing, sales and other resources than we do. Moreover, as we seek to diversify into new geographical areas, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. Competitive overbuilding in certain markets may have a material adverse effect on our operations in that market. We may also face competition from new entrants.

We may not be able to compete successfully against current or future competitors and may have to increase our spending in order to retain or attract clients and to pursue new market opportunities. This may have an adverse impact on our revenues and profitability.

19. We have substantial indebtedness and will continue to have debt service obligations following the Issue.

Our long-term debts Rs. 133.00 Lacs and short term debts were Rs. 230.12 Lacs as on 31st March, 2017 based on our restated financial statements. Our indebtedness could:

- Require us to dedicate a substantial portion of our cash flow from operations to payments in respect of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures;
- Increase our vulnerability to adverse general economic or industry conditions;
- Limit our flexibility in planning for, or reacting to, competition and/or changes in our business or our industry;
- Limit our ability to borrow additional funds;
- Place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

There can be no assurance that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt. For further information on the Financial Indebtedness please refer to the Annexure 9 and Annexure 10 in chapter titled “Financial Statements” beginning on page 148 of this Prospectus.

20. Our indebtedness and the conditions and restrictions imposed by our financing arrangements could adversely affect our ability to conduct our business and operations.

We have entered into agreements with certain banks and financial institutions for short-term and long-term borrowings. Some of these agreements contain restrictive covenants, including, but not limited to, requirements that we obtain written consent from lenders prior to issuing new shares, incurring further debt, creating further encumbrances on our assets, effecting any scheme of amalgamation or restructuring, undertaking guarantee obligations, declaring dividends, undertaking new projects or making investments. There can be no assurance that we will be able to comply with these covenants or that we will be able to obtain the consents necessary to take the actions we believe are required to operate and grow our business. Certain of our loans may be called at any time by our lenders pursuant to terms of the relevant agreements. An event of default under any of these loan arrangements, if not cured or waived, could have a material adverse effect on us.

21. Our lenders have charge over our movable properties in respect of finance availed by us.

We have secured our lenders by creating a charge over our movable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 363.12 Lacs as on 31st March, 2017. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the Financial Indebtedness please refer to the Annexure 9 and Annexure 10 in chapter titled “Financial Statements” beginning on page 148 of this Prospectus.

22. Our Logo is in the process of getting registered. If we fail to obtain trademark registration our brand building efforts may be hampered which might lead to adverse effect on our business.

We have made an application for registration of our Logo/trademark under the Trademarks Act, 1999 and are in the process of getting the same registered. If our Company is unable to obtain registration of trademark, it may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks. This could have a material adverse effect on our business, which in turn could adversely affect our results of operations.

23. Insurance coverage obtained by us may not adequately protect us against unforeseen losses.

We have maintained insurance coverage of our assets and accident policies as specified in section titled Insurance Policies on page 105 of the Prospectus. We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected.

24. Our promoter and promoter group will continue to retain significant control over our Company after the IPO.

After completion of the Issue, our Promoters and Promoter Group will collectively own 73.13% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to

our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

25. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2009 appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lacs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

26. We may not be successful in implementing our business and growth strategies.

The success of our business depends substantially on our ability to implement our business and growth strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Failure to implement our business and growth strategies would have a material adverse effect on our business and results of operations.

27. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed expansion, as detailed in the section titled “*Objects of the Issue*” is to be entirely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

28. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 64 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment

of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

29. We have not independently verified certain data in this Prospectus.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

B. Risk related to this Issue and Investment in our Equity Shares

30. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

31. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

32. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (“STT”), is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

EXTERNAL RISK FACTORS**33. Political, Economic and Social changes in India could adversely affect our business.**

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

34. The Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 have effected significant changes to the existing Indian company law/ listing framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in Issuing documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any non-compliance.

To ensure compliance with the requirements of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. The Companies Act, 2013 introduced certain additional requirements, which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to be notified. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

35. Our business is dependent on economic growth in India.

Our performance is dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. For example, in the monsoon of 2009, several parts of the country experienced below average rainfall, leading to reduce farm output, which impaired economic growth. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

36. The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy.

37. Global economic downturn and adverse market conditions could cause our business to suffer. A slowdown in economic growth in India could cause our business to suffer.

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of a downturn affecting their economic condition and markets general business and consumer sentiment has been adversely affected due to the global slowdown and there can be no assurance whether the developed economies or the emerging market economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets. Our performance and growth is directly related to the performance of the Indian economy. The performance of the Indian economy is dependent among other things on the interest rate, political and regulatory actions, liberalization policies, commodity and energy prices etc. A change in any of the factors would affect the growth prospects of the Indian economy, which may in turn adversely impact our results of operations, and consequently the price of our Equity Shares.

38. Any downgrading of India's debt rating by an independent agency may harm our ability to raise debt financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our capital expenditure plans, business and financial performance.

39. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Some parts of India have experienced communal disturbances, terrorist attacks and riots during recent years. If such events recur, our operational and marketing activities may be adversely affected, resulting in a decline in our income. The Asian region has, from time to time, experienced instances of civil unrest and hostilities among neighboring countries. Since May 1999, military confrontations between countries have occurred in Kashmir. The hostilities between India and its neighboring countries are particularly threatening because India and certain of its neighbors possess nuclear weapons. Hostilities and tensions may occur in the future and on a wider scale. Also, since 2003, there have been military hostilities and continuing civil unrest and instability in Afghanistan. There has also recently been hostility in the Korean Peninsula. In July 2006 and November 2008, terrorist attacks in Mumbai resulted in numerous casualties. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares.

40. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential

impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factor. The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long-term effect of diseases such as the H5N1 –avian flul virus, or H1N1, the swine flu virus, cannot currently be predicted, previous occurrences of avian flu and swine flu had an adverse effect on the economies of those countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

41. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Gol has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is effective from July 1, 2017. While the Gol and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

Further, the General Anti Avoidance Rules ("GAAR") are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, Interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the Gol may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public interest, pursuant to which we may be required to Issue our products and services at discounted rates. This may affect our business and results of operations.

INDUSTRY OVERVIEW

Global Economic Overview

Global output growth is estimated at about 3 percent (at an annualized rate) for the third quarter of 2016—broadly unchanged relative to the first two quarters of the year. This stable average growth rate, however, masks divergent developments in different country groups. There has been a stronger-than-expected pickup in growth in advanced economies, due mostly to a reduced drag from inventories and some recovery in manufacturing output. In contrast, it is matched by an unexpected slowdown in some emerging market economies, mostly reflecting idiosyncratic factors. Forward-looking indicators such as purchasing managers’ indices have remained strong in the fourth quarter in most areas.

Financial market developments. Long-term nominal and real interest rates have risen substantially since August (the reference period for the October 2016 WEO), particularly in the United Kingdom and in the United States since the November election. As of January 3, nominal yields on 10-year U.S. Treasury bonds have increased by close to one percentage point since August, and 60 basis points since the U.S. election. These changes have been mostly driven by an anticipated shift in the U.S. policy mix. Specifically, U.S. fiscal policy is projected to become more expansionary, with stronger future demand implying more inflationary pressure and a less gradual normalization of U.S. monetary policy. The increase in euro area long-term yields since August was more moderate—some 35 basis points in Germany but 70 basis points in Italy, reflecting elevated political and banking sector uncertainties. The U.S. Federal Reserve raised short-term interest rates in December, as expected, but in most other advanced economies the monetary policy stance has remained broadly unchanged. In emerging market economies, financial conditions were heterogeneous but generally tightened, with higher long-term interest rates on local-currency bonds, especially in emerging Europe and Latin America. Policy rate changes since August also reflected this heterogeneity—with rate hikes in Mexico and Turkey and cuts in Brazil, India, and Russia—as did changes in EMBI (Emerging Market Bond Index) spreads.

Exchange rates and capital flows. The U.S. dollar has appreciated in real effective terms by over 6 percent since August. The currencies of advanced commodity exporters have also strengthened, reflecting the firming of commodity prices, whereas the euro and especially the Japanese yen have weakened. Several emerging market currencies depreciated substantially in recent months—most notably the Turkish lira and the Mexican peso—while the currencies of several commodity exporters—most notably Russia—appreciated. Preliminary data point to sharp nonresident portfolio outflows from emerging markets in the wake of the U.S. election, following a few months of solid inflows.

Global growth for 2016 is now estimated at 3.1 percent, in line with the October 2016 forecast. Economic activity in both advanced economies and EMDEs is forecast to accelerate in 2017-18, with global growth projected to be 3.4 percent and 3.6 percent, respectively, again unchanged from the October forecasts.

Advanced economies are now projected to grow by 1.9 percent in 2017 and 2.0 percent in 2018, 0.1 and 0.2 percentage points more than in the October forecast, respectively. As noted, this forecast is particularly uncertain in light of potential changes in the policy stance of the United States under the incoming administration. The projection for the United States is the one with the highest likelihood among a wide range of possible scenarios. It assumes a fiscal stimulus that leads growth to rise to 2.3 percent in 2017 and 2.5 percent in 2018, a cumulative increase in GDP of ½ percentage point relative to the October forecast. Growth

projections for 2017 have also been revised upward for Germany, Japan, Spain, and the United Kingdom, mostly on account of a stronger-than-expected performance during the latter part of 2016. These upward revisions more than offset the downward revisions to the outlook for Italy and Korea.

The primary factor underlying the strengthening global outlook over 2017-18 is, however, the projected pickup in EMDEs' growth. As discussed in the October WEO, this projection reflects to an important extent a gradual normalization of conditions in a number of large economies that are currently experiencing macroeconomic strains. EMDE growth is currently estimated at 4.1 percent in 2016, and is projected to reach 4.5 percent for 2017, around 0.1 percentage point weaker than the October forecast. A further pickup in growth to 4.8 percent is projected for 2018.

OVERVIEW OF INFRASTRUCTURE SECTOR IN INDIA

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Mr. Nitin Gadkari, Minister of Road Transport and Highways, and Shipping, has announced the government's target of Rs 25 trillion (US\$ 376.53 billion) investment in infrastructure over a period of three years, which will include Rs 8 trillion (US\$ 120.49 billion) for developing 27 industrial clusters and an additional Rs 5 trillion (US\$ 75.30 billion) for road, railway and port connectivity projects.

Infrastructure sector includes power, bridges, dams, roads and urban infrastructure development. In 2016, India jumped 19 places in World Bank's Logistics Performance Index (LPI) 2016, to rank 35th amongst 160 countries.

INFRASTRUCTURE AND PPPS IN INDIA

The high economic growth witnessed by India during the last decade was accompanied by realization of the need for enhanced investment in infrastructure. Rapid urbanization and industrial growth led to demand for basic infrastructure such as water supply and sanitation, transportation and energy. Rapid growth in purchasing power in the rural areas simultaneously meant a need for improving connectivity and services for attaining a seamlessly integrated network of logistics and facilities. In order to augment economic growth, the government

initiated several policy and enabling measures to support the creation of high-quality infrastructure and efficient delivery of services to its citizens.

The Twelfth Five Year Plan (2012-2017) was formulated against the backdrop of a remarkable performance of the infrastructure sector during the Eleventh Plan. The Twelfth Plan projected an investment of Rs.55.75 lakh crores (at current prices) in infrastructure during the Plan period (2012-17), which was more than twice that achieved during the Eleventh Plan period. Furthermore, the Plan adopted a strategy of encouraging higher private investment in infrastructure which was projected to rise substantially from 37% in the Eleventh Plan to approximately 48% in the Twelfth Plan.

INDIAN INFRASTRUCTURE MARKET TO OVERTAKE JAPAN BY 2023: BMI RESEARCH

- ✓ With large residential and non-residential projects in the pipeline, the Indian infrastructure market is forecast to overtake Japan's in next five years.
- ✓ India's infrastructure market is the third-largest in Asia, and is forecast to overtake Japan's in nominal value terms by 2023.
- ✓ Although demonetisation had a negative impact on construction activity in 2016 as most construction workers' wages were paid in cash, the Fitch group company said that it believes that "robust growth will return in 2017 as work resumes on the large pipeline of infrastructure, residential and non-residential projects in the country".
- ✓ At the same time, the operating environment of India's construction industry remains immensely challenging, with major infrastructure projects commonly incurring delays and cost overruns.
- ✓ The Modi government has made some progress in addressing underlying issues in the sector, such as streamlining the land-acquisition process in some states, though the slow pace of reform means that the market remains relatively risky.
- ✓ Industrialisation and urbanisation trends are making India's infrastructure deficit more apparent and increasing demand for investment in roads, railways, ports, power transmission and water utilities.
- ✓ The Narendra Modi-led government at the Centre has initiated several programmes aimed at improving logistics, stimulating investment in manufacturing and building affordable housing, which will contribute to growth in the construction industry over the next 10 years.
- ✓ Reforms to foreign investment laws under Make In India initiative have made it easier for international companies to invest and participate in India's infrastructure projects.
- ✓ The infrastructure market remains dominated by domestic companies which have significant home market advantages owing to their experience with the complex regulatory environment in India.

INDUSTRY OVERVIEW

Global Economic Overview

Global output growth is estimated at about 3 percent (at an annualized rate) for the third quarter of 2016—broadly unchanged relative to the first two quarters of the year. This stable average growth rate, however, masks divergent developments in different country groups. There has been a stronger-than-expected pickup in growth in advanced economies, due mostly to a reduced drag from inventories and some recovery in manufacturing output. In contrast, it is matched by an unexpected slowdown in some emerging market economies, mostly reflecting idiosyncratic factors. Forward-looking indicators such as purchasing managers’ indices have remained strong in the fourth quarter in most areas.

Financial market developments. Long-term nominal and real interest rates have risen substantially since August (the reference period for the October 2016 WEO), particularly in the United Kingdom and in the United States since the November election. As of January 3, nominal yields on 10-year U.S. Treasury bonds have increased by close to one percentage point since August, and 60 basis points since the U.S. election. These changes have been mostly driven by an anticipated shift in the U.S. policy mix. Specifically, U.S. fiscal policy is projected to become more expansionary, with stronger future demand implying more inflationary pressure and a less gradual normalization of U.S. monetary policy. The increase in euro area long-term yields since August was more moderate—some 35 basis points in Germany but 70 basis points in Italy, reflecting elevated political and banking sector uncertainties. The U.S. Federal Reserve raised short-term interest rates in December, as expected, but in most other advanced economies the monetary policy stance has remained broadly unchanged. In emerging market economies, financial conditions were heterogeneous but generally tightened, with higher long-term interest rates on local-currency bonds, especially in emerging Europe and Latin America. Policy rate changes since August also reflected this heterogeneity—with rate hikes in Mexico and Turkey and cuts in Brazil, India, and Russia—as did changes in EMBI (Emerging Market Bond Index) spreads.

Exchange rates and capital flows. The U.S. dollar has appreciated in real effective terms by over 6 percent since August. The currencies of advanced commodity exporters have also strengthened, reflecting the firming of commodity prices, whereas the euro and especially the Japanese yen have weakened. Several emerging market currencies depreciated substantially in recent months—most notably the Turkish lira and the Mexican peso—while the currencies of several commodity exporters—most notably Russia—appreciated. Preliminary data point to sharp nonresident portfolio outflows from emerging markets in the wake of the U.S. election, following a few months of solid inflows.

Global growth for 2016 is now estimated at 3.1 percent, in line with the October 2016 forecast. Economic activity in both advanced economies and EMDEs is forecast to accelerate in 2017-18, with global growth projected to be 3.4 percent and 3.6 percent, respectively, again unchanged from the October forecasts.

Advanced economies are now projected to grow by 1.9 percent in 2017 and 2.0 percent in 2018, 0.1 and 0.2 percentage points more than in the October forecast, respectively. As noted, this forecast is particularly

uncertain in light of potential changes in the policy stance of the United States under the incoming administration. The projection for the United States is the one with the highest likelihood among a wide range of possible scenarios. It assumes a fiscal stimulus that leads growth to rise to 2.3 percent in 2017 and 2.5 percent in 2018, a cumulative increase in GDP of ½ percentage point relative to the October forecast. Growth projections for 2017 have also been revised upward for Germany, Japan, Spain, and the United Kingdom, mostly on account of a stronger-than-expected performance during the latter part of 2016. These upward revisions more than offset the downward revisions to the outlook for Italy and Korea.

The primary factor underlying the strengthening global outlook over 2017-18 is, however, the projected pickup in EMDEs' growth. As discussed in the October WEO, this projection reflects to an important extent a gradual normalization of conditions in a number of large economies that are currently experiencing macroeconomic strains. EMDE growth is currently estimated at 4.1 percent in 2016, and is projected to reach 4.5 percent for 2017, around 0.1 percentage point weaker than the October forecast. A further pickup in growth to 4.8 percent is projected for 2018.

Overview of the Indian Economy

The Indian economy is ranked fourth in the world, on purchasing power parity basis, after United States, European Union and China (Source: <https://www.cia.gov/library/publications/the-world-factbook/geos/in.html>). For the fiscal year 2016, the forecast for real GDP growth rate in India is estimated to achieve a marginally higher rate of 7.6% than last year (7.5%). by the National Council of Applied Economic Research ("NCAER") in their 'Quarterly Review of the Economy' on August 04, 2016. (Source: NCAER's Quarterly Review of the Indian Economy, Quarter 2, 2016-17).

GVA growth for 2016-17 is projected at 6.9 per cent with risks evenly balanced around it. Growth is expected to recover sharply in 2017-18 on account of several factors. First, discretionary consumer demand held back by demonetisation is expected to bounce back beginning in the closing months of 2016-17. Second, economic activity in cash-intensive sectors such as retail trade, hotels and restaurants, and transportation, as well as in the unorganised sector, is expected to be rapidly restored. Third, demonetisation-induced ease in bank funding

conditions has led to a sharp improvement in transmission of past policy rate reductions into marginal cost-based lending rates (MCLR), and in turn, to lending rates for healthy borrowers, which should spur a pick-up in both consumption and investment demand. Fourth, the emphasis in the Union Budget for 2017-18 on stepping up capital expenditure, and boosting the rural economy and affordable housing should contribute to growth. Accordingly, GVA growth for 2017-18 is projected at 7.4 per cent, with risks evenly balanced.

OVERVIEW OF GDP GROWTH IN INDIA

India is one of the fastest-growing large economies worldwide. The Indian macroeconomic situation has improved appreciably in the recent years, with increased pace in economic expansion, moderation in retail inflation and narrowing of the current account and fiscal deficits. The pace of Indian GDP growth has recovered from a modest 5.6% in FY 2013 to 7.6% in FY 2016, led by fast-growing sectors such as industries with mixed trends across various states.

GLOBAL GROWTH TRENDS

The global economic growth eased to 3.2% in 2015 from 3.4% in 2014, with similar trend expected to persist in 2016 followed by modest improvement in 2017. (Source: IMF Report) Specifically, the rate of expansion of economic activity in China, the Euro Area, the United States and the United Kingdom is expected to moderate in 2016 relative to the previous year, whereas the rate in India, the ASEAN-5 countries and Japan is expected to remain steady. OVERVIEW OF INFRASTRUCTURE SECTOR IN INDIA

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Mr. Nitin Gadkari, Minister of Road Transport and Highways, and Shipping, has announced the government's target of Rs 25 trillion (US\$ 376.53 billion) investment in infrastructure over a period of three years, which will include Rs 8 trillion (US\$ 120.49 billion) for developing 27 industrial clusters and an additional Rs 5 trillion (US\$ 75.30 billion) for road, railway and port connectivity projects.

Infrastructure sector includes power, bridges, dams, roads and urban infrastructure development. In 2016, India jumped 19 places in World Bank's Logistics Performance Index (LPI) 2016, to rank 35th amongst 160 countries.

OVERVIEW OF THE ROAD SECTOR IN INDIA

India has the second largest road network across the world at 4.7 million km. This road network transports more than 60 per cent of all goods in the country and 85 per cent of India's total passenger traffic. Road transportation has gradually increased over the years with the improvement in connectivity between cities, towns and villages in the country.

The Indian roads carry almost 90 per cent of the country's passenger traffic and around 65 per cent of its freight. In India sales of automobiles and movement of freight by roads is growing at a rapid rate. Cognizant of the need to create an adequate road network to cater to the increased traffic and movement of goods, Government of India has set earmarked 20 per cent of the investment of US\$ 1 trillion reserved for infrastructure during the 12th Five-Year Plan (2012-17) to develop the country's roads.

(Source: <https://www.ibef.org/industry/roads-india.aspx>)

Transportation sector accounts for around 6.5% of India's GDP. Road transportation, dominant of the transportation sector, accounts for approximately 4.7% of India's GDP and has deep linkages with the rest of the economy. (Source: ICRA Report)

Road Networks in India:

Road network in india is sub-divided into three categories:

(Source: Ministry of Road Transport and Highways (MoRTH) Annual Report 2016-17, TechSci Research, Note: 1- Data as of FY17)

Evolution of India's Road Network

- India has the second largest road network in the world (4.87 million kilometres)
- Roads constitutes about 80 per cent of the country's passenger traffic and 65 per cent of freight traffic

(Source: National Highway Authority of India (NHA), National Highway Builders Foundation, Reserve Bank of India (RBI) Notes: FY - Indian Financial Year (April-March), NHDP - National Highway Development Project, TechSci Research, FY16¹ : Till December 2015, FY17¹ : Till May 2016)

- ✓ The Government has proposed to upgrade 2 lane national highways into 4 lane national highways for

which USD65 billion has been allocated. This step is expected to reduce the passenger car units to 10000 per day

- ✓ The Government of India approved US\$1.04 billion project for construction & upgrading 558 kms of roads to link India with Bangladesh, Bhutan & Nepal. The project will ease the movement of passengers, cargo & increase trade by 60 per cent. Around 50 per cent of the project would be funded by Asian Development Bank.
- ✓ State of Telangana is expected to have a network of national highways of 5,303 kms in length by 2017.
- ✓ In January 2017, Government of Assam announced investment of US\$2.23 billion for developing 1253 kms of roads into national highways
- ✓ In February 2017 NHAI floated bids to monetise 10 national highway projects in India, in response institutional investors from Canada, Middle East & US

- ✓ The government is planning to monetise 105 highway projects, worth US\$21.57 billion as a part of innovative models of financing. This was declared during an event held on India Integrated Transport & Logistics Summit in Delhi in May 2017.

INFRASTRUCTURE AND PPPS IN INDIA

The high economic growth witnessed by India during the last decade was accompanied by realization of the need for enhanced investment in infrastructure. Rapid urbanization and industrial growth led to demand for basic infrastructure such as water supply and sanitation, transportation and energy. Rapid growth in purchasing power in the rural areas simultaneously meant a need for improving connectivity and services for attaining a seamlessly integrated network of logistics and facilities. In order to augment economic growth, the government initiated several policy and enabling measures to support the creation of high-quality infrastructure and efficient delivery of services to its citizens.

The Twelfth Five Year Plan (2012-2017) was formulated against the backdrop of a remarkable performance of the infrastructure sector during the Eleventh Plan. The Twelfth Plan projected an investment of Rs.55.75 lakh crores (at current prices) in infrastructure during the Plan period (2012-17), which was more than twice that achieved during the Eleventh Plan period. Furthermore, the Plan adopted a strategy of encouraging higher private investment in infrastructure which was projected to rise substantially from 37% in the Eleventh Plan to approximately 48% in the Twelfth Plan.

Infrastructure is the backbone for economies to develop and remain competitive:

The need for infrastructure investment is a never ending cycle. Investment in infrastructure helps stimulate sustainable long-term economic growth which then creates a further need for infrastructure. Ultimately, infrastructure promotes higher living standards as it fosters economic growth and creates jobs.

The World Economic Forum estimates that every dollar spent on infrastructure generates an economic return of between 5 to 25%. Infrastructure is the backbone for economies to develop and remain competitive. The future growth in infrastructure will not only be driven by the need for new infrastructure, particularly in developing economies, but also to replace existing ageing infrastructure, perhaps first constructed decades ago in developed economies.

The need for infrastructure investment is dominated by the core industry sectors

1. **Water:** Demand is expected to exceed supply
2. **Energy:** Investments in energy efficiency will be important
3. **Transport:** Many forms of transport are set to double or triple in demand
4. **Communication:** Global mobile traffic is expected to rise nearly 10-fold between 2014 and 2019

RECENT TRENDS OF INFLATION

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2014-15 is Rs 113.5 trillion (US\$ 1.69 trillion), as against Rs 105.52 trillion (US\$ 1.57 trillion) in 2014-15, registering a growth rate of 7.6 per cent. The economic activities which witnessed significant growth were 'financial, real estate and professional services' (10.3 percent), manufacturing (9.3 percent), 'trade, hotels, transport, communication and services related to broadcasting' (9.0 percent), and 'mining and quarrying' (7.4 percent).

As per the quarterly estimates of Gross Domestic Product (GDP) released by the Central Statistics Office (CSO) on 30th November 2016, the growth rate of GDP at constant (2011-12) market prices for the second quarter (Q2) (July- September) of 2016-17 is estimated at 7.3 per cent as compared to the growth of 7.1 per cent in Q2 of 2015-16. The WPI headline inflation increased to 3.7 per cent in August 2016 from 3.5 per cent in July 2016. Conversely, CPI (New Series) inflation decreased to 5.0 per cent in August 2016 from 6.1 per cent in July 2016. Gross tax revenue during April- July 2016-17 recorded a growth of 26.7 per cent over April-July 2015-16. Tax revenue (net to the Centre) increased by 44.1 per cent during April-July 2016-17.

Market Size

The value of roads and bridges infrastructure in India is projected to grow at a Compound Annual Growth Rate (CAGR) of 17.4 per cent over FY12-17. The country's roads and bridges infrastructure, which was valued at US\$ 6.9 billion in 2009, is expected to touch US\$ 19.2 billion by 2017.

The construction of highways had reached an all-time high of 6,029 km during FY 2015-16, and the increased pace of construction is expected to continue for the coming years.

Under the Pradhan Mantri Gram Sadak Yojana (PMGSY), 133-km roads per day in 2016-17 were constructed as against a 2011-14 average of 73-km per day.

(Source: <https://www.ibef.org/industry/roads-india.aspx>)

India needs Rs 31 trillion (US\$ 454.83 billion) to be spent on infrastructure development over the next five years, with 70 per cent of funds needed for power, roads and urban infrastructure segments.

The Indian power sector itself has an investment potential of US\$ 250 billion in the next 4-5 years, providing immense opportunities in power generation, distribution, transmission and equipment, according to Mr Piyush Goyal, Union Minister of Coal, Power and Renewable Energy.

India's core sector growth rose 3.4 per cent in January 2017, on the back of robust natural gas and steel output, which recorded a year-on-year growth of 11.9 per cent and 11.4 per cent respectively, according to data from the Ministry of Commerce & Industry.

The Indian construction equipment industry is reviving after a gap of four years and is expected to grow to US\$ 5 billion by FY2019-20 from current size of US\$ 2.8 billion. @ Foreign Direct Investment (FDI) received in Construction Development sector (townships, housing, built up infrastructure and construction development projects) from April 2000 to December 2016 stood at US\$ 24.3 billion, according to the Department of Industrial Policy and Promotion (DIPP).

INVESTMENTS

India is witnessing significant interest from international investors in the infrastructure space. Many Spanish companies are keen on collaborating with India on infrastructure, high speed trains, renewable energy and developing smart cities.

Total infrastructure spending is expected to be about 10 per cent of Gross Domestic Product (GDP) during the 12th Five-Year Plan (2012-17), up from 7.6 per cent during the previous plan (2007-12).

Increased impetus to develop infrastructure in the country is attracting both domestic and international players. Private sector is emerging as a key player across various infrastructure segments, ranging from roads and communications to power and airports.

In order to boost the construction of buildings in the country, the Government of India has decided to come up with a single window clearance facility to accord speedy approval of construction projects.

Significant allocation to the infrastructure sector in the 12th Five-Year Plan, and investment requirement of US\$ 1 trillion is expected to create huge demand for construction equipment in India. In the road's sector, the government's policy to increase private sector participation has proved to be a boon for the infrastructure

industry with a large number of private players entering the business through the public-private partnership (PPP) model. During the next five years, investment through PPP is expected to be US\$ 31 billion. Some key investments in the sector are listed below.

- Abertis Infraestructuras SA, a Spanish infrastructure firm, has agreed to buy two toll road assets in operation in South India from Macquarie Group for Rs 1,000 crore (US\$ 151 million) to scale up its presence in India.
- GVK Power & Infrastructure Ltd won the bid to develop Mumbai's second airport in Navi Mumbai for Rs 16,000 crore (US\$ 2.39 billion).
- UAE-based Gamma Group, outlined plans of investing around Rs 3,000 crore (US\$ 453 million) in the infrastructure, health and education sectors of Kerala.
- skyTran Inc., a NASA technology partner specialising in developing pod car systems for urban transport, plans to build a one-kilometre pilot track in India at its own cost as per the requirement of the government, which has shortlisted skyTran as one of the three companies chosen to build pod cars on trial basis.
- Infrastructure Leasing and Financial Services Ltd (IL&FS) and global private equity (PE) firm Lone Star plan to jointly invest US\$ 550 million in stressed infrastructure projects in India.
- Silver Spring Capital Management, a Hong Kong-based equity hedge fund, plans to invest over Rs 2,000 crore (US\$ 306 million) in Hyderabad-based infrastructure developer Transstroy India Ltd, for construction of highways in the country.
- Altico Capital, the non-banking finance company (NBFC) of Clearwater Capital Partners LLC, plans to invest around US\$150 million in the commercial office properties and infrastructure sector over the next 12-18 months.
- Sovereign wealth funds and global pension funds plan to invest up to US\$ 50 billion in Indian infrastructure sector over the next five years.
- The Asian Development Bank (ADB) and Government of India signed a loan agreement of US\$ 80 million, which is the third tranche of a US\$ 200 million financing facility under the North Eastern Region Capital Cities Development Investment Programme, and will be invested for improving water supply, solid waste management and sanitation in the cities of Agartala and Aizwal, the capital cities of Tripura and Mizoram respectively.
- Private equity giant Carlyle Group is planning to invest Rs 500 crore (US\$ 73.36 million) in Feedback Infra, which could make the US firm a major shareholder in the Gurgaon-based infrastructure services company.
- PTC India Financial Services (PFS) and India Infrastructure Finance Company Limited (IIFCL) have signed a Memorandum of Understanding (MoU) to jointly provide funding for infrastructure projects in India, particularly in the energy sector.

ROAD AHEAD

INDIAN INFRASTRUCTURE MARKET TO OVERTAKE JAPAN BY 2023: BMI RESEARCH

- ✓ With large residential and non-residential projects in the pipeline, the Indian infrastructure market is forecast to overtake Japan's in next five years.
- ✓ India's infrastructure market is the third-largest in Asia, and is forecast to overtake Japan's in nominal value terms by 2023.
- ✓ Although demonetisation had a negative impact on construction activity in 2016 as most construction workers' wages were paid in cash, the Fitch group company said that it believes that "robust growth will return in 2017 as work resumes on the large pipeline of infrastructure, residential and non-residential projects in the country".
- ✓ At the same time, the operating environment of India's construction industry remains immensely challenging, with major infrastructure projects commonly incurring delays and cost overruns.
- ✓ The Modi government has made some progress in addressing underlying issues in the sector, such as streamlining the land-acquisition process in some states, though the slow pace of reform means that the market remains relatively risky.
- ✓ Industrialisation and urbanisation trends are making India's infrastructure deficit more apparent and increasing demand for investment in roads, railways, ports, power transmission and water utilities.
- ✓ The Narendra Modi-led government at the Centre has initiated several programmes aimed at improving logistics, stimulating investment in manufacturing and building affordable housing, which will contribute to growth in the construction industry over the next 10 years.
- ✓ Reforms to foreign investment laws under Make In India initiative have made it easier for international companies to invest and participate in India's infrastructure projects.
- ✓ The infrastructure market remains dominated by domestic companies which have significant home market advantages owing to their experience with the complex regulatory environment in India.

COMPETITION

The Infrastructure market is highly competitive and fragmented, and we face competition from various domestic Contractors. Some of our competitors have greater financial, marketing, sales and other resources than we do. Moreover, as we seek to diversify into new geographical areas, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. Competitive overbuilding in certain markets may have a material adverse effect on our operations in that market.

We believe that we compete favorably with our principal competitors in each of these areas. We also believe that our impeccable track record provides us with a competitive advantage that enables us to compete effectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following discussion of our financial condition and results of operations should be read in conjunction with our audited restated financial statements for the financial years ended March 2017, 2016, 2015, 2014 and 2013 prepared in accordance with the Companies Act and Indian GAAP and restated in accordance with the SEBI ICDR Regulations, including the schedules, annexure and notes thereto and the reports thereon, included in the section titled "*Financial Information*" on page 136 of this Prospectus. The following discussion relates to our Company, is based on our restated financial statements, which have been prepared in accordance with Indian GAAP, the Accounting Standards and other applicable provisions of the Companies Act and the SEBI (ICDR) Regulations. Our fiscal year ends on March 31 of each year so accordingly all references to a particular financial year are to the twelve months ended March 31 of that year.

Indian GAAP differs in certain material aspects from U.S. GAAP and IFRS. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide reconciliation of our financial statements to those under U.S. GAAP or IFRS. Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with the Companies Act, Indian GAAP and SEBI ICDR Regulations.

This discussion contains forward-looking statements and reflects our current views with respect to future events and financial performance. Actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors such as those set forth in "*Risk Factors*" and "*Forward-Looking Statements*" on pages 14 and 13, of this Prospectus beginning respectively.

INDUSTRY OVERVIEW

Global Economic Overview

Global output growth is estimated at about 3 percent (at an annualized rate) for the third quarter of 2016—broadly unchanged relative to the first two quarters of the year. This stable average growth rate, however, masks divergent developments in different country groups. There has been a stronger-than-expected pickup in growth in advanced economies, mostly due to a reduced drag from inventories and some recovery in manufacturing output. In contrast, it is matched by an unexpected slowdown in some emerging market economies, mostly reflecting idiosyncratic factors. Forward-looking indicators such as purchasing managers' indices have remained strong in the fourth quarter in most areas.

Financial market developments: Long-term nominal and real interest rates have risen substantially since August (the reference period for the October 2016 WEO), particularly in the United Kingdom and in the United States since the November election. As of January 3, nominal yields on 10-year U.S. Treasury bonds have increased by close to one percentage point since August, and 60 basis points since the U.S. election. These changes have been mostly driven by an anticipated shift in the U.S. policy mix. Specifically, U.S. fiscal policy is projected to become more expansionary, with stronger future demand implying more inflationary pressure and a less gradual normalization of U.S. monetary policy. The increase in euro area long-term yields since August was more moderate—some 35 basis points in Germany but 70 basis points in Italy, reflecting elevated political and banking sector uncertainties. The U.S. Federal Reserve raised short-term interest rates in December, as expected, but in most other advanced economies the monetary policy stance has remained broadly unchanged. In emerging market economies, financial conditions were heterogeneous but generally tightened, with higher long-term interest rates on local-currency bonds, especially in emerging Europe and Latin America. Policy rate changes since August also reflected this heterogeneity—with rate hikes in Mexico and Turkey and cuts in Brazil, India, and Russia—as did changes in EMBI (Emerging Market Bond Index) spreads.

Exchange rates and capital flows: The U.S. dollar has appreciated in real effective terms by over 6 percent since August. The currencies of advanced commodity exporters have also strengthened, reflecting the firming of commodity prices, whereas the euro and especially the Japanese yen have weakened. Several emerging market currencies depreciated substantially in recent months—most notably the Turkish lira and the Mexican peso—while the currencies of several commodity exporters—most notably Russia—appreciated. Preliminary data point to sharp nonresident portfolio outflows from emerging markets in the wake of the U.S. election, following a few months of solid inflows.

Global growth for 2016 is now estimated at 3.1 percent, in line with the October 2016 forecast. Economic activity in both advanced economies and EMDEs is forecast to accelerate in 2017-18, with global growth projected to be 3.4 percent and 3.6 percent, respectively, again unchanged from the October forecasts.

Advanced economies are now projected to grow by 1.9 percent in 2017 and 2.0 percent in 2018, 0.1 and 0.2 percentage points more than in the October forecast, respectively. As noted, this forecast is particularly uncertain in light of potential changes in the policy stance of the United States under the incoming administration. The projection for the United States is the one with the highest likelihood among a wide range of possible scenarios. It assumes a fiscal stimulus that leads growth to rise to 2.3 percent in 2017 and 2.5 percent in 2018, a cumulative increase in GDP of ½ percentage point relative to the October forecast. Growth projections for 2017 have also been revised upward for Germany, Japan, Spain, and the United Kingdom, mostly on account of a stronger-than-expected performance during the latter part of 2016. These upward revisions more than offset the downward revisions to the outlook for Italy and Korea.

The primary factor underlying the strengthening global outlook over 2017-18 is, however, the projected pickup in EMDEs' growth. As discussed in the October WEO, this projection reflects to an important extent a gradual normalization of conditions in a number of large economies that are currently experiencing macroeconomic strains. EMDE growth is currently estimated at 4.1 percent in 2016, and is projected to reach 4.5 percent for 2017, around 0.1 percentage point weaker than the October forecast. A further pickup in growth to 4.8 percent is projected for 2018.

OVERVIEW OF INFRASTRUCTURE SECTOR IN INDIA

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Mr. Nitin Gadkari, Minister of Road Transport and Highways, and Shipping, has announced the government's target of Rs 25 trillion (US\$ 376.53 billion) investment in infrastructure over a period of three years, which will include Rs 8 trillion (US\$ 120.49 billion) for developing 27 industrial clusters and an additional Rs 5 trillion (US\$ 75.30 billion) for road, railway and port connectivity projects.

Infrastructure sector includes power, bridges, dams, roads and urban infrastructure development. In 2016, India jumped 19 places in World Bank's Logistics Performance Index (LPI) 2016, to rank 35th amongst 160 countries.

OVERVIEW OF THE ROAD SECTOR IN INDIA

India has the second largest road network across the world at 4.7 million km. This road network transports more than 60 per cent of all goods in the country and 85 per cent of India's total passenger traffic. Road transportation has gradually increased over the years with the improvement in connectivity between cities, towns and villages in the country.

The Indian roads carry almost 90 per cent of the country's passenger traffic and around 65 per cent of its freight. In India sales of automobiles and movement of freight by roads is growing at a rapid rate. Cognizant of the need to create an adequate road network to cater to the increased traffic and movement of goods, Government of India has set earmarked 20 per cent of the investment of US\$ 1 trillion reserved for infrastructure during the 12th Five-Year Plan (2012-17) to develop the country's roads.

(Source: <https://www.ibef.org/industry/roads-india.aspx>)

Transportation sector accounts for around 6.5% of India's GDP. Road transportation, dominant of the transportation sector, accounts for approximately 4.7% of India's GDP and has deep linkages with the rest of the economy. (Source: ICRA Report)
