3. *If we are unable to renew our existing leases or secure new leases for our existing or premises, or offices on commercially acceptable terms, or if we fail to comply with the terms and conditions of our leases resulting in termination of our leases, it could have a material adverse effect on our business, financial condition and results of operations.*

All our existing offices are on leased/licensed basis. We typically enter into lease agreements for a period of 3 to 5 years for our delivery centers. For details on the duration of existing leases for our delivery centers, see "Our Business – Immovable Properties" on page 110. In the event that if we fail to comply with the terms and conditions of our lease or that these existing leases are terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations. If alternative premises are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected. In addition, any adverse development relating to the landlord's title or ownership rights to such properties may entail incurring significant legal expenses and adversely affect our operations, a significant interest penalty for any delays in payment of rent and fixed price escalation clauses that provide for a periodic increase in rent. If our sales do not increase in line with our rent and costs, our profitability and results of operations could be adversely affected.

4. *Certain Portion of IPO Proceeds will be used to repay a loan from one of our Promoters, TWSPL and from one of our Promoter Group, Assurvest Capital Advisors LLP.*

We intend to use certain portion of the proceeds from the Issue to repay a loan from one of our Promoters, Tech Worldwide Support Private Limited and from one of our Promoter Group, Assurvest Capital Advisors LLP. As of September 30, 2017, we have availed Rs. 177.98 Lakhs and Rs. 1715.90 Lakhs of unsecured loans from TWSPL and Assurvest Capital Advisors LLP. The purposes of the loan were to fund working capital expenditures and for general business purpose. For details, see "Objects of the Issue" on page 79 of this Prospectus.

5. *The Company has experienced negative cash flows from operating and investing activities in past. Any negative cash flows in the future would adversely affect the results of operations and financial condition of the Company.*

We have in the past experienced negative cash flows from investing activities. The details of our negative cash flows from operating and investing activities for the Fiscal Years 2017, 2016 and 2015 as per Restated Standalone Financial Statements basis are set forth below.

(Rs. In Lakhs)

Particulars	Fiscal 2017	Fiscal 2016	Fiscal 2015
Net cash flow from/used in operating activities	980.80	378.39	(76.20)
Net cash flow from/used in investing activities	(1,705.16)	(1,091.69)	(359.28)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

6. *Our business is subject to volatility due to change in technology and vulnerable to failures of our information technology systems, which may contribute to fluctuations in our results of operations and financial condition.*

Our information technology systems are a critical part of our business and help us managing our core business requirements. Any technical failures associated with our information technology systems, including those caused by power failures and computer viruses and other unauthorized tampering, may cause interruptions in our ability to provide services to our clients and delay the collection of income. In addition, we may be subject to liability as a result of any theft or misuse of personal information stored on our systems. The occurrence of any of these events could result in interruptions, delays, the loss or corruption of data, or cessations in the availability of systems, any of which could have a material adverse effect on our financial position and results of operations and harm our business and reputation.

7. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.*

Our business is working capital intensive. A significant portion of our working capital is utilized towards inventories and trade receivables. Summary of our working capital position is given below:-

(Rs. In Lakhs)

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables and inventories. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled "Objects of the Issue beginning on page 79 of this Prospectus.

8. ***Our results of operations and ability to grow could be materially affected if we cannot successfully keep pace with technological changes in the development and implementation of our services and solutions.***

We require information technology systems to manage our business operations. Our success depends on our ability to keep pace with rapid technological changes in the development and implementation of our services and solutions. There is a risk that we may not sufficiently invest in technology or industry developments, or evolve our business with the right strategic investments, or at sufficient speed and scale, to adapt to changes in our market. Our failure to successfully adopt new technologies in a cost effective and a timely manner could increase our costs and lead to us being less competitive in terms of our prices or quality of services we provide. Further, implementation of new or upgraded technology may not be cost effective, which may adversely affect our business, results of operations, cash flows and financial condition. These and similar risks could have a negative effect on our business operations and financial performance.

9. ***We have a logo which is used for our business purpose. Further the said logo is not applied for registration with the registrar of trademarks, trademark registry, Mumbai.***

There is no guarantee that the application for registration of our logo ^{1POINT} will be accepted in favour of the Company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property.

In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business, financial condition, results of operations and prospects. We cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action.

The material approvals, licenses or permits required for our business include Goods and Service Tax (GST), tax laws, environment laws and shops and establishment licenses, as applicable. See “Government and other Statutory Approvals” on page 179 of this Prospectus for further details on the required material approvals for the operation of our business.

10. ***If we are unable to manage our growth or execute our strategies effectively, our Business and prospects may be materially and adversely affected.***

Though our Company was incorporated in the year 2008, actual operations were started in the year 2014 and since then we have experienced increase in growth and have expanded our operations.. We intend to continue expansion in the foreseeable future to pursue existing and potential market opportunities. The business is largely human centric and hence the challenge is to stabilize the large set of new recruits and align them to the processes. The environment in case of growth is new for the new set of team members and the same time it is new for the new business, hence any delay in the right balance can be failure to effectively transfer new client business to our service delivery centers, properly budget transfer costs or accurately estimate operational costs associated with new contracts could result in delays in executing client contracts, trigger service level penalties, give the client the right to terminate the contract for breach, or cause our profit margins not to meet our expectations or our historical profit margins. Our inability to execute our growth strategy, to ensure the continued adequacy of our current

systems or to manage our expansion effectively could have a material adverse effect on our business, results of operations, financial condition and cash flows.

- 11. We derive significant portion of our revenue from a few customers and our clients are largely concentrated in few industries, a loss of one or more such significant customers or loss of clients from particular industry or a reduction in their demand for our services could adversely affect our business, financial conditions and results of operations.***

We were dependent on a limited number of customers for a significant portion of our income for Fiscal 2017 where our top ten customers contributed 70.54% of our total revenue. We enter into agreements with our Customer which range from 1-3 years which are renewed in the normal course of business. Further, our clients are largely concentrated in few industries. Hence, a loss of one or more such significant customers or loss of clients from particular industry or a reduction in their demand for our services could adversely affect our business, financial conditions and results of operations.

- 12. Increase in wages in India***

Our Company has 3301 employees as on July 31, 2017. Further, The Minimum Wages Act is applicable to the company and in case of change in policy or regulations or amendment in the said act, it may significantly impact the revenue of the Company.

- 13. We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is intense and we experience significant employee turnover rates.***

Our industry is highly Manpower intensive and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employees, including our ability to attract employees with needed skills in the geographic areas in which we operate. Our offices are primarily chosen to be in the places where there is a good availability of talent pool and easy recruitment. The industry, including our Company, experiences high employee turnover. There is significant competition for professionals in India with skills necessary to perform the services we offer to our clients. Increased competition for these professionals, in the BPM industry or otherwise, could have an adverse effect on us. The ever-changing requirements on the minimum wages with the directives on P.F and ESIC are becoming a deterrent to operate business with the cost efficiency edge. A significant increase in the turnover rate among our employees in India, particularly among the highly skilled workforce needed to provide BPM services, would increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins and could lead to a decline in demand for our services. High turnover rates increase our expenditures and therefore impact our profit margins due to higher recruitment, training and retention costs as a result of maintaining larger hiring, training and human resources departments and higher operating costs due to having to reallocate certain business processes among our operating facilities where we have access to the skilled workforce needed for the business. Our ability to maintain and renew existing engagements and obtain new business will depend, in large part, on our ability to attract, train and retain personnel with skills that keep pace with the demand for outsourcing, evolving industry standards and changing client preferences. A lack of sufficiently qualified personnel could also inhibit our ability to establish operations in new markets and our efforts to expand geographically. Our failure to attract, train and retain personnel with the qualifications necessary to fulfill the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows.

14. Our Sales cycle in relation to certain services offered to clients may require significant investments of management time and capital resources in addition to significant commitments during the implementation cycle.

The services we provide to our clients require significant investment of resources and time by both our clients and us. Our potential clients may require us to provide pilot studies to assess the feasibility of integrating with our systems. In addition, implementing our services involves a significant commitment of resources over an extended period of time from both our clients and us. Our clients (including future clients) may not be willing or able to invest the time and resources necessary to implement our services, and we may fail to close sales with potential clients (on whom we would have devoted significant time and resources), which could have a material adverse effect on our business, results of operations, financial condition and cash flows. Implementation processes, including integration of the client's systems with ours, are subject to a number of potential delays similar to those affecting our Sales. Revenues are recognized only on actual provision of services and the benefit of a client acquisition may be delayed in case of any delay in implementation or ramp up.

15. We operate in a highly competitive environment and if we are not able to compete effectively, our income and profitability will be adversely affected.

The market for our service offerings may evolve and may become highly competitive in the future. We face competition from Indian service providers, BPO divisions of large multinational technology firms. We compete with other service providers on the basis of, *inter alia*, quality, sector-specific knowledge, methodologies, client service, range of offerings and market perception. The competition we face may continue to intensify. A number of multi-national corporations are setting up their captive units in India. Further, service providers with existing operations in India may expand their operations in India. These new players may introduce new products and services and sophisticated technological advancements to anticipate customer requirements and provide innovative solutions to our clients. Further Companies, including certain of our clients, may choose to perform their own business processes internally through business processing units. We cannot assure you that we will be able to retain our clients in the face of such competition. If we lose clients as a result of competition, our market share will decline, would have a material adverse effect on our business and profitability.

16. Quality Check of the Calls

We follow the Transaction monitoring Process. This Process is a method of sampling off calls from the entire population of voice calls and represents the correctness of the information provided. Quality call monitoring is essential for us to improve services on regular basis. However, we cannot assure that the quality of the services provided by our employees to the client's customer would be as per customer satisfaction.

17. Continuity of services for I.T :

Our business is connected to multiple sites and provides Business Continuity Plan (BCP) for I.T. between the locations offered. However this process has its limitations of volume and time. The BCP plan is built at 30 % of the business call volumes and for limited period depending upon the process to process. The Maximum built out process is for 24 hour to 48 hours. Beyond the permissible range, the continuity of services of I.T is not guaranteed which could have material adverse effect on our business, results of operations, financial condition and cash flows

18. Our total employees are more than 3000 which could affect us if from any of the delivery centres, the group of employees refuse to work for a particular demand

Our Company has 5 location centres located between Mumbai, Gurgaon, Indore and Bangalore and the total strength of our employees are more than 3000 on which we are dependent for the services to be rendered to our client's customers. Further, all the employees do not work on the same project or are shared between the projects. We have placement agreements with various parties in place which helps us in recruiting mass employees who are experienced in the particular industries in the services we offered. However, if certain group of employees refuses to work for some reason could have adverse impact on our business including disruption of business and will have an impact on revenue and penalty for that month with respect to the client.

19. Security breaches and any disruption to our information technology could adversely impact our business

Our business involves the processing, storage and transmission of large amounts of data including personnel and payment information, about our Associate Employees, clients, a portion of which is confidential and/ or potentially sensitive. In doing so, we rely on our own technology and systems, and those of third party vendors for a variety of processes. Cyber-attacks, including attacks against our industry and against us in particular, may disable or damage our systems.

We seek to protect our computer systems and network infrastructure from security breaches and other disruptive problems caused by our increased internet connectivity. We employ security systems, including firewalls and password encryption, designed to minimize the risk of security breaches but there can be no assurance that these security measures will be successful. Breaches of our security 24 measures could affect the security of information stored in and transmitted through these computer systems and network infrastructure. A failure in security measures could have a material adverse effect on our business and our future financial performance. Our business relies on information technology to operate on a daily basis. Further, the Data storage is for specific periods and purged as per the information security policy. The success of our businesses depends in part upon the ability to store, retrieve, process and manage substantial amounts of information. Any disruption in our information technology systems could render us unable to operate our business. This could adversely affect our business, reputation and revenues.

20. Unauthorized disclosure of sensitive or confidential client and client's customer data, whether through a breach of our computer systems or otherwise, could expose us to protracted and/or costly litigation and cause us to lose clients.

We are typically required to collect and store sensitive data in connection with our services. We take precautions to protect confidential client and client's customer data. However, if any person, including any of our employees, penetrates our network security or otherwise misappropriates sensitive data, we could be subject to significant liability claims from our clients or their own customers for breaching contractual confidentiality provisions or privacy laws. Further, penetration of the network security of our data centers could have a negative impact on our reputation, which could harm our business.

21. We may not be fully insured for all losses we may incur.

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, limitations of liability set forth in our contracts may not be enforceable in all instances or may not otherwise protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. Although we believe we have adequate insurance coverage but that coverage may not continue to be available on reasonable terms or to be available in sufficient amounts to cover one or more large claims,

and our insurers may disclaim coverage as to any future claim. Insurance coverage may be an inadequate remedy where the loss suffered is not easily quantifiable, for example, in the event of severe damage to our reputation. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

- 22. The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds in the project is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”. Any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings.***

Our funding requirements and the deployment of the Net Issue proceeds are based on management estimates and have not been appraised by any bank or financial institution. It cannot be assured that these estimates are accurate. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. Our estimates may exceed the value that would have been determined by third party appraisals and may require us to reschedule our projected expenditure, which may have a bearing on our expected revenues and earnings.

Further, if the actual expenditure for the “*Objects of the Issue*” exceeds the estimates of our management, we may be required to raise additional debt, on terms that may not be totally favourable to our Company, which may in turn affect our profitability. Further, the deployment of the funds towards the “*Objects of the Issue*” is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our audit committee. However, in accordance with Section 27 of the Companies Act, 2013, our Company shall not vary the objects of the Issue without our Company being authorized to do so by the Shareholders by way of a special resolution and other applicable compliances.

- 23. We face substantial competition in the BPM services business, both from Indian and international companies, which may adversely affect our revenues.***

We face significant competition from existing players and potential entrants in the BPM services business. We will face competition mainly from large vertically integrated and diversified companies as well as new companies. Increased competition could result in price reductions, decreased sales, lower profit margins or losses in market share, any of which could have an adverse effect on our business, results of operations and financial condition.

- 24. Our Promoters will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.***

Upon completion of the Issue, our Promoter will own 59.61% of the post-issue Equity Share capital of the Company. As a result, the Promoter will have the ability to exercise significant influence over all matters requiring shareholders’ approval, including the election of directors and approval of significant corporate transactions. For further details of Promoters’ shareholding, please refer to section titled “Capital Structure” beginning on page 65 of this Prospectus.

25. We are dependent on our Directors and key managerial personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our Directors and Key Managerial Personnel collectively have vast experience in the industry and are difficult to replace. They provide expertise, which enables us to make well informed decisions in relation to our business and our future prospects. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of our Directors and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Also, the loss of any of the management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability expand our business.

Further, our future performance will depend upon the skills, efforts, expertise, and continued services of these persons and our ability to attract and retain qualified senior and mid-level managers. The loss of their services or those of any other members of management could impair our ability to implement our strategy and may have a material adverse effect on our business, financial condition and results of operations. For further details of our Directors and key managerial personnel, please refer to section titled "Our Management" beginning on page 133 of this Prospectus.

There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

28. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Modernization and technology up gradation is essential to reduce costs and increase the output.

Our technology may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed upgraded technology in form of International Business Machines (IBM) servers with latest configurations, Efficient IP based Outbound Dialers, Inbound dialer and CRM suitable for BPO, blended solution for dialing and that the chances of a technological innovation are very high in our sector. 31. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at

the discretion of the Government. Other Risks

32. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realized on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of shares on a stock exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. By way of the Finance Bill, 2017, the Government of India has proposed to introduce certain anti-abuse measures, pursuant to which, the aforesaid exemption from payment of capital gains tax for income arising on transfer of equity shares shall only be available if STT was paid at the time of acquisition of the equity shares. While the said provision has not been notified as on date, it is expected to take effect from April 1, 2018 and will, accordingly, apply in relation to the assessment year 2018-19 and subsequent assessment years. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

36. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

37. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of

shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

38. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

39. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

40. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

41. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INTRODUCTION TO BUSINESS PROCESS MANAGEMENT

India is the world's largest sourcing destination, accounting for approximately 55 per cent of the US\$ 146 billion market. The country's cost competitiveness in providing Information Technology (IT) services, which is approximately 3-4 times cheaper than the US, continues to be its Unique Selling Proposition (USP) in the global sourcing market. India's highly qualified talent pool of technical graduates is one of the largest in the world and is available at a cost saving of 60-70 per cent to source countries. This large pool of qualified skilled workforce has enabled Indian IT companies to help clients to save US\$ 200 billion in the last five years. India's IT industry amounts to 12.3 per cent of the global market, largely due to exports. Export of IT services accounted for 56.12 per cent of total IT exports (including hardware) from India. The Business Process Management (BPM) segment accounted for 23.46 per cent of total IT exports during FY15. The IT-BPM sector is estimated to expand at a CAGR of 9.5 per cent to US\$ 300 billion by 2020. The Government of India has extended tax holidays to the IT sector for software technology parks of India (STPI) and Special Economic Zones (SEZs). Further, the country is providing procedural ease and single window clearance for setting up facilities.

Illustration of Book Building and Price Discovery Process (Investors should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes bidding by Anchor Investors). Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20 to Rs. 24 per equity share, Issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centers during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to Issue the desired number of shares is the price at which the book cuts off, i.e., Rs. 22 in the above example. The issuer, in consultation with the Book Running Lead Manager will finalize the Issue price at or below such cut-off price, i.e., at or below Rs. 22/-. All bids at or above this Issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

INTRODUCTION TO BUSINESS PROCESS MANAGEMENT

India is the world's largest sourcing destination, accounting for approximately 55 per cent of the US\$ 146 billion market. The country's cost competitiveness in providing Information Technology (IT) services, which is approximately 3-4 times cheaper than the US, continues to be its Unique Selling Proposition (USP) in the global sourcing market. India's highly qualified talent pool of technical graduates is one of the largest in the world and is available at a cost saving of 60-70 per cent to source countries. This large pool of qualified skilled workforce has enabled Indian IT companies to help clients to save US\$ 200 billion in the last five years. India's IT industry amounts to 12.3 per cent of the global market, largely due to exports. Export of IT services accounted for 56.12 per cent of total IT exports (including hardware) from India. The Business Process Management (BPM) segment accounted for 23.46 per cent of total IT exports during FY15. The IT-BPM sector is estimated to expand at a CAGR of 9.5 per cent to US\$ 300 billion by 2020. The Government of India has extended tax holidays to the IT sector for software technology parks of India (STPI) and Special Economic Zones (SEZs). Further, the country is providing procedural ease and single window clearance for setting up facilities.

APPROACH TO BUSINESS PROGRESS MANAGEMENT INDUSTRY ANALYSIS

Analysis of Business Process Management industry needs to be approached at both macro and micro levels, whether for domestic or global markets. Business Process Management industry forms part of Service Sector at a macro level. Hence, broad picture of Service Sector should be at preface while analysing the Business Process Management Industry.

Service sector comprises various industries, which in turn, have numerous sub-classes or products. One such major industry in the overall Service sector is Information Technology industry, which in turn encompasses various components one of them being Business Process Management Industry.

Thus, Business Process Management Industry should be analyzed in the light of Information Technology industry at large. An appropriate view on Information Technology, then, calls for the overall economy outlook, performance and expectations of Service Sector, position and outlook of Business Process Management segment micro analysis.

GLOBAL ECONOMIC OVERVIEW

For India, three external developments are of significant consequence. In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India’s capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight. Second, the medium-term political outlook for globalisation and in particular for the world’s “political carrying capacity for globalisation” may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on on-going trends—documented widely—about stagnant or declining trade at the global level. This changed outlook will affect India’s export and growth prospects.

Third, developments in the US, especially the rise of the dollar, will have implications for China’s currency and currency policy. If China is able to successfully re-balance its economy, the spill over effects on India and the rest of the world will be positive. On, the other hand, further declines in the Yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill overs for India. For China, there are at least two difficult balancing acts with respect to the currency. Domestically, a declining currency (and credit expansion) props up

the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China's ambitions to establish the Yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms' spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were: (i) moderation in industrial and nongovernment service sectors; (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and (iii) strong growth in public administration and defence services—dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 percent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1b).

Inflation this year has been characterized by two distinctive features. The Consumer Price Index (CPI)-New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful. The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at end-December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-)5.1 percent in August 2015 to 3.4 percent at end-December 2016, on the back of rising international oil prices. The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP discussed in MYEA (Box 3, Chapter 1, MYEA 2015-16), has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation.

External Sector

Similarly, the external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election and demonetisation. The current account deficit has declined to reach about 0.3 percent of GDP

in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at end-January 2016 to US\$ 360 billion at end-December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term. Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016-17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region.

Fiscal Position

Trends in the fiscal sector in the first half have been unexceptional and the central government is committed to achieving its fiscal deficit target of 3.5 percent of GDP this year. Excise duties and services taxes have benefitted from the additional revenue measures introduced last year. The most notable feature has been the over-performance (even relative to budget estimates) of excise duties in turn based on buoyant petroleum consumption: real consumption of petroleum products (petrol) increased by 11.2 percent during April-December 2016 compared to same period in the previous year. Indirect taxes, especially petroleum excises, have held up even after demonetisation in part due to the exemption of petroleum products from its scope. More broadly, tax collections have held up to a greater extent than expected possibly because of payment of dues in demonetised notes was permitted. Non-tax revenues have been challenged owing to shortfall in spectrum and disinvestment receipts but also to forecast optimism; the stress in public sector enterprises has also reduced dividend payments.

State government finances are under stress. The consolidated deficit of the states has increased steadily in recent years, rising from 2.5 percent of GDP in 2014-15 to 3.6 percent of GDP in 2015-16, in part because of the UDAY scheme. The budgeted numbers suggest there will be an improvement this year. However, markets are anticipating some slippage, on account of the expected growth slowdown, reduced revenues from stamp duties, and implementation of their own Pay Commissions. For these reasons, the spread on state bonds over government securities jumped to 75 basis points in the January 2017 auction from 45 basis points in October 2016. For the general government as a whole, there is an improvement in the fiscal deficit with and without UDAY scheme.

OUTLOOK FOR 2016-17

This year's outlook must be evaluated in the wake of the November 8 action to demonetize the high denomination notes. But it is first important to understand the analytics of the demonetisation shock in the short run. Demonetisation affects the economy through three different channels. It is potentially: 1) an aggregate demand shock because it reduces the supply of money and affects private wealth, especially of those holding unaccounted money; 2) an aggregate supply shock to the extent that economic activity relies on cash as an input (for example, agricultural production might be affected since sowing requires the use of labour traditionally paid in cash); and 3) an uncertainty shock because economic agents face imponderables related to the magnitude and duration of the cash shortage and the policy responses (perhaps causing consumers to defer or reduce discretionary consumption and firms to scale back investments).

Demonetisation is also very unusual in its monetary consequences. It has reduced sharply, the supply of one type of money— cash—while increasing almost to the same extent another type of money— demand deposits. This is because the demonetized cash was required to be deposited in the banking

system. In the third quarter of FY2017 (when demonetisation was introduced), cash declined by 9.4 percent, demand deposits increased by 43 percent, and growth in the sum of the two by 11.3 percent.

The price counterparts of this unusual aspect of demonetisation are the surge in the price of cash (inferred largely through queues and restrictions), on the one hand; and the decline in interest rates on the lending rate (based on the marginal cost of funds) by 90 basis points since November 9; on deposits (by about 25 basis points); and on g-secs on the other (by about 32 basis points).

There is yet another dimension of demonetisation that must be kept in mind. By definition, all these quantity and price impacts will self-correct by amounts that will depend on the pace at which the economy is remonetized and policy restrictions eased. As this occurs, consumers will run down their bank deposits and increase their cash holdings. Of course, it is possible, even likely that the self-correction will not be complete because in the new equilibrium, aggregate cash holdings (as a share of banking deposits and GDP) are likely to be lower than before.

Anecdotal and other survey data abound on the impact of demonetisation. But we are interested in a macro-assessment and hence focus on five broad indicators: Agricultural (Rabi) sowing; Indirect tax revenue, as a broad gauge of production and sales; Auto sales, as a measure of discretionary consumer spending and two-wheelers, as the best indicator of both rural and less affluent demand; Real credit growth; and Real estate prices. Contrary to early fears, as of January 15, 2017 aggregate sowing of the two major rabi crops—wheat and pulses (gram)—exceeded last year's planting by 7.1 percent and 10.7 percent, respectively. Favourable weather and moisture conditions presage an increase in production. To what extent these favourable factors will be attenuated will depend on whether farmers' access to inputs—fertilizer, credit, and labour—was affected by the cash shortage.

To estimate a demonetisation effect, one needs to start with the counterfactual. Our best estimate of growth in the absence of demonetisation is 11¼ percent in nominal terms (slightly higher than last year's Survey forecast because of the faster rebound in WPI inflation, but lower than the CSO's advance estimate of 11.9 percent) and 7 percent in real terms (in line with both projections).

Finally, demonetisation will afford an interesting natural experiment on the substitutability between cash and other forms of money. Demonetisation has driven a sharp and dramatic wedge in the supply of these two: if cash and other forms are substitutable, the impact will be relatively muted; if, on the other hand, cash is not substitutable the impact will be greater.

OUTLOOK FOR 2017-18

Turning to the outlook for 2017-18, we need to examine each of the components of aggregate demand: exports, consumption, private investment and government.

As discussed earlier, India's exports appear to be recovering, based on an uptick in global economic activity. This is expected to continue in the aftermath of the US elections and expectations of a fiscal stimulus. The IMF's January update of its World Economic Outlook forecast is projecting an increase in global growth from 3.1 percent in 2016 to 3.4 percent in 2017, with a corresponding increase in growth for advanced economies from 1.6 percent to 1.9 percent. Given the high elasticity of Indian real export growth to global GDP, exports could contribute to higher growth next year, by as much as 1 percentage point.

The outlook for private consumption is less clear. International oil prices are expected to be about 10-15 percent higher in 2017 compared to 2016, which would create a drag of about 0.5 percentage points. On the other hand, consumption is expected to receive a boost from two sources: catch-up after the demonetization-induced reduction in the last two quarters of 2016-17; and cheaper borrowing costs, which are likely to be lower in 2017 than 2016 by as much as 75 to 100 basis points. As a result, spending on housing and consumer durables and semi-durables could rise smartly. It is too early to predict prospects for the monsoon in 2017 and hence agricultural production. But the higher is agricultural growth this year, the less likely that there would be an extra boost to GDP growth next year.

Since no clear progress is yet visible in tackling the twin balance sheet problem, private investment is unlikely to recover significantly from the levels of FY2017. Some of this weakness could be offset through higher public investment, but that would depend on the stance of fiscal policy next year, which has to balance the short-term requirements of an economy recovering from demonetization against the medium-term necessity of adhering to fiscal discipline—and the need to be seen as doing so. Putting these factors together, we expect real GDP growth to be in the 6¾ to 7½ percent range in FY2018. Even under this forecast, India would remain the fastest growing major economy in the world.

There are three main downside risks to the forecast. First, the extent to which the effects of demonetization could linger into next year, especially if uncertainty remains on the policy response. Currency shortages also affect supplies of certain agricultural products, especially milk (where procurement has been low), sugar (where cane availability and drought in the southern states will restrict production), and potatoes and onions (where sowings have been low). Vigilance is essential to prevent other agricultural products becoming in 2017-18 what pulses were in 2015-16.

Second, geopolitics could take oil prices up further than forecast. The ability of shale oil production to respond quickly should contain the risks of a sharp increase, but even if prices rose merely to \$60-65/barrel the Indian economy would nonetheless be affected by way of reduced consumption; less room for public investment; and lower corporate margins, further denting private investment. The scope for monetary easing might also narrow, if higher oil prices stoked inflationary pressure.

Third, there are risks from the possible eruption of trade tensions amongst the major countries, triggered by geo-politics or currency movements. This could reduce global growth and trigger capital flight from emerging markets. The one significant upside possibility is a strong rebound in global demand and hence in India's exports. There are some nascent signs of that in the last two quarters. A strong export recovery would have broader spill over effects to investment.

Fiscal outlook

The fiscal outlook for the central government for next year will be marked by three factors. First, the increase in the tax to GDP ratio of about 0.5 percentage points in each of the last two years, owing to the oil windfall will disappear. In fact, excise-related taxes will decline by about 0.1 percentage point of GDP, a swing of about 0.6 percentage points relative to FY2017.

Second, there will be a fiscal windfall both from the high denomination notes that are not returned to the RBI and from higher tax collections as a result of increased disclosure under the Pradhan Mantra Garib Kalyan Yojana (PMGKY). Both of these are likely to be one-off in nature, and in both cases the magnitudes are uncertain.

A third factor will be the implementation of the GST. It appears that the GST will probably be implemented later in the fiscal year. The transition to the GST is so complicated from an administrative and technology perspective that revenue collection will take some time to reach full potential. Combined with the government's commitment to compensating the states for any shortfall in their own GST collections (relative to a baseline of 14 percent increase), the outlook must be cautious with respect to revenue collections. The fiscal gains from implementing the GST and demonetisation, while almost certain to occur, will probably take time to be fully realized. In addition, muted non-tax revenues and allowances granted under the 7th Pay Commission could add to pressures on the deficit.

The macroeconomic policy stance for 2017-18

An economy recovering from demonetisation will need policy support. On the assumption that the equilibrium cash-GDP ratio will be lower than before November 8, the banking system will benefit from a higher level of deposits. Thus, market interest rates—deposits, lending, and yields on g-secs—should be lower in 2017-18 than 2016-17. This will provide a boost to the economy (provided, of course, liquidity is no longer a binding constraint). A corollary is that policy rates can be lower not necessarily to lead and nudge market rates but to validate them. Of course, any sharp uptick in oil prices and those of agricultural products, would limit the scope for monetary easing.

Fiscal policy is another potential source of policy support. This year the arguments may be slightly different from those of last year in two respects. Unlike last year, there is more cyclical weakness on

account of demonetisation. Moreover, the government has acquired more credibility because of posting steady and consistent improvements in the fiscal situation for three consecutive years, the central government fiscal deficit declining from 4.5 percent of GDP in 2013-14 to 4.1 percent, 3.9 percent, and 3.5 percent in the following three years. But fiscal policy needs to balance the cyclical imperatives with medium term issues relating to prudence and credibility.

One key question will be the use of the fiscal windfall (comprising the unreturned cash and additional receipts under the PMGKY) which is still uncertain. Since the windfall to the public sector is both one off and a wealth gain not an income gain, it should be deployed to strengthening the government's balance sheet rather than being used for government consumption, especially in the form of programs that create permanent entitlements. In this light, the best use of the windfall would be to create a public sector asset reconstruction company so that the twin balance sheet problem can be addressed, facilitating credit and investment revival; or toward the compensation fund for the GST that would allow the rates to be lowered and simplified; or toward debt reduction. The windfall should not influence decisions about the conduct of fiscal policy going forward.

Perhaps the most important reforms to boost growth will be structural. In addition to those spelt out in Section 1—strategic disinvestment, tax reform, subsidy rationalization—it is imperative to address directly the twin balance sheet problem. The problem is large, persistent and difficult, will not correct itself even if growth picks up and interest rates decline, and current attempts have proved grossly inadequate. It may be time to consider something like a public sector asset reconstruction company.

Another area of reform relates to labour. Given the difficulty of reforming labor laws per se, the thrust could be to move towards affording greater choice to workers which would foster competition amongst service providers. Choices would relate to: whether they want to make their own contribution to the Employees' Provident Fund Organisation (EPFO); whether the employers' contribution should go to the EPFO or the National Pension Scheme; and whether to contribute to the Employee State Insurance (ESI) or an alternative medical insurance program. At the same time, there could be a gradual move to ensure that at least compliance with the central labour laws is made paperless, presence less, and cashless. One radical idea to consider is the provision of a universal basic income. But another more modest proposal worth embracing is procedural: a standstill on new government programs, a commitment to assess every new program only if it can be shown to demonstrably address the limitations of an existing one that is similar to the proposed one; and a commitment to evaluate and phase down existing programs that are not serving their purpose.

SERVICE INDUSTRY: INDIAN OVERVIEW

Introduction

The services sector is not only the dominant sector in India's GDP, but has also attracted significant foreign investment flows, contributed significantly to exports as well as provided large-scale employment. India's services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction.

Market Size

The services sector is the key driver of India's economic growth. The Nikkei India Services Purchasing Managers' Index (PMI) rose to 52.2 in May 2017. The sector contributed around 66.1 per cent of its Gross Value Added growth in 2015-16, thereby becoming an important net foreign exchange earner and the most attractive sector for FDI (Foreign Direct Investment) inflows.

The Central Statistics Office's (CSO) provisional estimates of Gross Value Added (GVA) in FY 2016-17 (PE) indicate that the service sector grew 7.74 per cent year-on-year to Rs 21.43 trillion (US\$ 332.74 billion)

According to a report called ‘The India Opportunity’ by leading research firm Market Research Store, the Indian mobile services market is expected to reach \$37 billion in 2017 and grow by 10.3 per cent year-on-year to reach US\$ 103.9 billion by 2020.

The Indian digital classifieds industry is expected to grow three-fold to reach US\$ 1.2 billion by 2020, driven by growth in horizontal classifieds like online services, real estate and automobiles.#

Out of overall services sector, the sub-sector comprising financial services, real estate and professional services contributed US\$ 305.8 billion or 20.5 per cent to the GDP. The sub-sector of community, social and personal services contributed US\$ 188.2 billion or 12.6 per cent to the GDP.

Investments

The Indian services sector which includes financial, banking, insurance, non-financial/business, outsourcing, research and development, courier and technical test analysis, has attracted FDI equity inflows in the period April 2000-March 2017, amounting to about US\$ 59.47 billion which is about 17.92 per cent of the total foreign inflows, according to the Department of Industrial Policy and Promotion (DIPP).

Some of the developments and major investments by companies in the services sector in the recent past are as follows:

- Mpaani Solutions Pvt. Ltd, a consumer and retailer data analytics start-up, has raised US\$ 1.35 million in a pre-series A funding round led by IDG Ventures with the aim of deploying capital for scaling technology and data science functions along with spending on marketing and sales.

- Reliance Jio Infocomm Ltd. and Uber have announced a strategic partnership, which will enable Uber riders to pay for their rides using JioMoney.
- The domestic and foreign logistic companies are optimistic about prospects in the logistics sector in India, and are actively making investments plans to improve earnings and streamline operations.

Government Initiatives

The Government of India recognises the importance of promoting growth in services sectors and provides several incentives in wide variety of sectors such as health care, tourism, education,

engineering, communications, transportation, information technology, banking, finance, management, among others.

Prime Minister Narendra Modi has stated that India's priority will be to work towards trade facilitation agreement (TFA) for services, which is expected to help in the smooth movement of professionals.

The Government of India has adopted a few initiatives in the recent past. Some of these are as follows:

- Ministry of Civil Aviation, Government of India, launched 'DigiYatra', a digital platform for air travellers that aims to develop a digital ecosystem providing consistent service and a delightful experience at every touch point of the journey.
- Mr Nitin Gadkari, Minister of Road Transport and Highways and Shipping, Government of India, launched INAM-Pro's upgraded version, INAM-Pro +, an online platform to bring together buyers and sellers of construction materials, equipment/machinery and services.
- The Indian service sector is expected to facilitate a knowledge based economy, and the manufacturing sector will be dominated by services as a result of servicification of manufacturing, said Ms Nirmala Sitharaman, Minister of Commerce and Industry, Government of India.
- The Ministry of Electronics and Information Technology has launched a services portal, which aims to provide seamless access to government services related to education, health, electricity, water and local services, justice and law, pensions and benefits, through a single window.

Road Ahead

Services sector growth is governed by both domestic and global factors. The Indian facilities management market is expected to grow at 17 per cent CAGR between 2015 and 2020 and surpass the \$19 billion mark supported by booming real estate, retail, and hospitality sectors. The performance of trade, hotels and restaurants, and transport, storage and communication sectors are expected to improve in FY17. The financing, insurance, real estate, and business services sectors are also expected to continue their good run in FY17.

The implementation of the Goods and Services Tax (GST) would create a common national market and reduce the overall tax burden on goods. It is expected to reduce costs in the long run on account of availability of GST input credit, which will result in the reduction in prices of services.

Information Technology Industry: Indian Overview

Introduction

India is the world's largest sourcing destination for the information technology (IT) industry, accounting for approximately 67 per cent of the US\$ 124-130 billion market. The industry employs about 10 million workforces. More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy. India's cost competitiveness in providing IT services, which is approximately 3-4 times cheaper than the US, continues to be the mainstay of its Unique Selling Proposition (USP) in the global sourcing market. However, India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centres in India.

The IT industry has also created significant demand in the Indian education sector, especially for engineering and computer science. The Indian IT and ITeS industry is divided into four major segments – IT services, Business Process Management (BPM), software products and engineering services, and hardware.

Market Size

India's IT market size growing

- India's technology and BPM sector (including hardware) is likely to generate revenues of US\$ 160 billion during FY16 compared to US\$ 146.5 billion in FY15, implying a growth rate of 9.2 per cent
- The contribution of the IT sector to India's GDP rose to approximately 9.5 per cent in FY15 from 1.2 per cent in FY98
- TCS is the market leader, accounting for about 10.4 per cent of India's total IT & ITeS sector revenue in FY16
- The top five IT firms contribute over 25 per cent to the total industry revenue, indicating the market is fairly competitive

The Indian IT sector is expected to grow at a rate of 12-14 per cent for FY2016-17 in constant currency terms. The sector is also expected to triple its current annual revenue to reach US\$ 350 billion by FY 2025

Employees from 12 Indian start-ups, such as Flipkart, Snapdeal, Makemytrip, Naukri, Ola, and others, have gone on to form 700 start-ups on their own, thus expanding the Indian start-up ecosystem. India ranks third among global start-up ecosystems with more than 4,200 start-ups

Total spending on IT by banking and security firms in India is expected to grow 8.6 per cent year-on-year to US\$ 7.8 billion by 2017.

The public cloud services market in India is slated to grow 35.9 per cent to reach US\$ 1.3 billion according to IT consultancy, Gartner. Increased penetration of internet (including in rural areas) and rapid emergence of e-commerce are the main drivers for continued growth of data centre co-location and hosting market in India. The Indian Healthcare Information Technology (IT) market is valued at US\$ 1 billion currently and is expected to grow 1.5 times by 2020. India's business to business (B2B) e-commerce market is expected to reach US\$ 700 billion by 2020 whereas the business to consumer (B2C) e-commerce market is expected to reach US\$ 102 billion by 2020

Cross-border online shopping by Indians is expected to increase 85 per cent in 2017, and total online spending is projected to rise 31 per cent to Rs 8.75 lakh crore (US\$ 128 billion) by 2018.

Post the government's announcement of demonetisation of specific currency denominations, digital payment platforms such as Paytm, MobiKwik, Oxigen witnessed a sharp spike in user transactions, app downloads and merchant enquiries, thereby indicating a greater demand towards digital payments by consumers.

India ranks among the top five countries in terms of digitalisation maturity as per Accenture's Platform Readiness Index, and is expected to be among the top countries with the opportunity to grow and scale up digital platforms by 2020.

Investments/ Developments

Indian IT's core competencies and strengths have attracted significant investments from major countries. The computer software and hardware sector in India attracted cumulative Foreign Direct Investment (FDI) inflows worth US\$ 22.83 billion between April 2000 and December 2016, according to data released by the Department of Industrial Policy and Promotion (DIPP).

Leading Indian IT firms like Infosys, Wipro, TCS and Tech Mahindra, are diversifying their offerings and showcasing leading ideas in blockchain, artificial intelligence to clients using innovation hubs, research and development centres, in order to create differentiated offerings.

Some of the major developments in the Indian IT and ITeS sector are as follows:

NOTES TO RESTATED FINANCIAL STATEMENTS FOR THE YEAR/PERIOD ENDED 31st MARCH 2013, 31st MARCH 2014, 31st MARCH 2015, 31st MARCH 2016, 31st MARCH 2017 AND 30th JUNE 2017

In the year in which the Company recognize the MAT credit as an asset in accordance with the Guidance Note on accounting for credit available in respect of Minimum Alternative Tax under the Income Tax Act, 1961 the said asset is created by way of Credit to the Statement of Profit and Loss shown as "MAT Credit Entitlement". In the year in which the company uses "MAT Credit Entitlement" against the normal tax liability, it reverses the same in Statement of Profit and Loss and reduces the amount shown as the said asset to the extent of utilization.

The company reviews the MAT Credit Entitlement asset as each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

A present obligation that arises from past events whether it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is disclosed as a contingent liability. Contingent Liabilities are also disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company.

Claims against the Company where the possibility of any outflow of resources in settlement is remote, are not disclosed as contingent liabilities. Contingent liabilities are not recognized but are disclosed and contingent assets are neither recognized nor disclosed, in the financial statements.

o) Business Segments

m) Income Taxes

Income tax expenses comprise current tax and deferred tax charged or credit.

Current tax is measured on the basis of estimated taxable income for the current accounting period in accordance with the provisions of the Income Tax Act, 1961.

Deferred Tax is recognized, on timing differences, being the difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

Deferred Tax assets in respect of unabsorbed depreciation and carry forward of losses are recognized only if there is virtual certainty that there will be sufficient future taxable income available to realize such losses.

In the year in which the company uses "MAT Credit Entitlement" against the normal tax liability, it reverses the same in Statement of Profit and Loss and reduces the amount shown as the said asset to the extent of utilization.

The company reviews the MAT Credit Entitlement asset as each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

n) Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized when there is a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimate.

A present obligation that arises from past events whether it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is disclosed as a contingent liability. Contingent Liabilities are also disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company.

Claims against the Company where the possibility of any outflow of resources in settlement is remote, are not disclosed as contingent liabilities. Contingent liabilities are not recognized but are disclosed and contingent assets are neither recognized nor disclosed, in the financial statements.

For example, if a Bidder has Bid for three options in the Bid cum Application Form and such Bidder is changing only one of the options in the Revision Form, the Bidder must still fill the details of the other two options that are not being revised, in the Revision Form. - (b) In case of revision, Bid options should be provided by Bidders in the same order as provided in the Bid cum Application Form.
- (c) In case of revision of Bids by RIIs, Employees and Retail Individual Shareholders, such Bidders should ensure that the Bid Amount, subsequent to revision, does not exceed Rs. 200,000. In case the Bid Amount exceeds Rs. 200,000 due to revision of the Bid or for any other reason, the Bid may be considered, subject to eligibility, for allocation under the Non-Institutional Category, not being eligible for Discount (if applicable) and such Bid may be rejected if it is at the Cut-off Price. The Cut-off Price option is given only to the RIIs, Employees and Retail Individual Shareholders indicating their agreement to Bid for and purchase the Equity Shares at the Issue Price as determined at the end of the Book Building Process.
- (d) In case the total amount (i.e., original Bid Amount plus additional payment) exceeds Rs. 200,000, the Bid will be considered for allocation under the Non-Institutional Category in terms of the RHP. - a) All Bidders are required to make payment of the full Bid Amount (less Discount, if applicable) along with the Bid Revision Form. In case of Bidders specifying more than one Bid Option in the Bid cum Application Form, the total Bid Amount may be calculated for the highest of three options at net price, i.e. Bid price less discount offered, if any.
- b) Bidder may Issue instructions to block the revised amount based on cap of the revised Price Band (adjusted for the Discount (if applicable) in the ASBA Account, to the same Designated Intermediary through whom such Bidder had placed the original Bid to enable the relevant SCSB to block the additional Bid Amount, if any.
- c) In case the total amount (i.e., original Bid Amount less discount (if applicable) plus additional payment) exceeds Rs. 200,000, the Bid may be considered for allocation under the Non-Institutional Category in terms of the RHP. If, however, the Bidder does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for may be adjusted

downwards for the purpose of Allotment, such that additional amount is required blocked and the Bidder is deemed to have approved such revised Bid at the Cut-off Price.

- Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs.20 to Rs. 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs.

22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), has issued consolidated FDI Policy Circular of 2017("FDI Policy 2017"), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India ("RBI") also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore, applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by Reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any 'fit and proper/due diligence' requirements as regards the non-resident investor as stipulated by the

respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
