2. **Proposed objects of the issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials**

The cost of the project as mentioned in section titled “Object of the issue” beginning on page number 65 is as per Mangement Representation, and the same has not been appraised by any bank or financial Institution Also promoter’s contribution is contemplated to be from internal accurals or short term borrowings. If it does not materialised then it will adversely affect the execution of the project and our financials.

- 3. We have a significant amount of debt, which exposes us to liquidity, refinancing and interest rate risks. Our indebtedness and the restrictive covenants imposed upon us in certain of our debt facilities could restrict our ability to conduct our business and grow our operations.**

As on date our company has a sanctioned secured loan of ₹ 11,564 Lacs from various banks and financial institutions, and unsecured loan ₹ 1,006.36 Lacs from various group entities and related persons, please refer section titled 'Financial Indebtness' beginning on page no 196.

- 4. We rely heavily on our existing brands and quality of services at our hotels. Any dilution of our brand reputation or failure of our quality control systems could adversely affect our business, results of operations and financial condition.**

We operate our hotel under the brands "Holiday Inn" which is focused on catering to guests in the upper-midscale, midscale and economy hotel segments, respectively. Our brand and reputation are among our most important assets and we believe our brands help in attracting guests to our hotels. We believe that continuing to develop awareness of our brands, through focused and consistent branding and marketing initiatives is important to increase our revenues, grow our existing marketshare and expand into new markets.

The performance and quality of services at our hotels are critical to the success of our business. These factors depend significantly on the effectiveness of our quality control systems and standard operating procedures, which in turn, depend on the skills and experience of our personnel, the quality of our training program, and our ability to ensure that such personnel adhere to our policies and guidelines. We may not be able to generate the same experience for our guests and meet our standardized parameters in managed hotels due to different aesthetics and feel. Any decrease in the quality of services rendered by us including due to reasons beyond our control, or allegations of defects, even when false, at of our hotel property could tarnish the image of our brands, result in negative reviews and feedback from our guests on online travel portals and may cause guests to choose the services of our competitors. We are also dependent on third party service providers for providing some of the services to our guests such as spas and laundry, among others, and any failure or deficiency on the part of such service providers may adversely effect our reputation and brand perception. Any adverse development or decline in quality involving our brands may impair our reputation, dilute the impact of our branding and marketing initiatives and adversely affect our business, results of operations and financial condition.

- 5. A slowdown in economic growth in India could have an adverse effect on our business, results of operations and financial condition.**

We operate in the mid-priced hotel sector in India, where consumer demand for our services is highly dependent on the general economic performance in India. There is a history of increases and decreases in demand for hotel rooms, in occupancy levels and in rates realized by owners and operators of hotels through economic cycles, according to the Horwath Report. Variability of results through some of the cycles in the past has been more severe due to changes in the supply of hotel rooms in given markets or in given categories of hotels. A slowdown in economic growth could affect business and personal discretionary spending levels and lead to a decrease in demand for our services for prolonged periods

Such events could lead to a reduction in our revenue from the hotels we own and operate, our leased hotels as well as the hotels that we manage. Further, we operate in the mid-priced hotel sector, and do not have presence in the luxury or upscale sectors. This makes us more susceptible to adverse changes affecting demographic and economic strata of our guests. During periods of such economic contraction, our ongoing investments in developing new properties may not yield results that we anticipated. We cannot assure you that such macroeconomic and other factors, which are beyond our control would not significantly affect demand for our services. Consequently, the occurrence of such events could have an adverse effect on our business, results of operations and financial condition.

- 6. Operational risks are inherent in our business as it includes rendering services at high quality standards at our hotel. A failure to manage such risks could have an adverse impact on our business, results of operations and financial condition.**

Certain operational risks are inherent in our businesses due to the nature of the industry in which we operate. Our hotels are subject to various operating and business risks common to the hotel and hospitality industry, including the impact of security issues on the quantity of travelers and destinations of business travel; the financial condition of third-party property owners of our hotels; and the financial situation of the aviation industry and its impact on the hotels and hospitality industry. Changes in any of these conditions could adversely affect our occupancy rates or room rates or otherwise adversely affect our results of operations and financial condition. For example, the global financial crisis

coupled with the terror attacks in Mumbai in November 2008 led to a decline in foreign tourist arrivals in the fiscal year 2009, while foreign tourist arrival growth was slower in the fiscal year 2013 due to security concerns around women's safety, combined with a slowing economy, according to the Horwath Report.

Further, we render hospitality services, including food and beverage, cleaning and housekeeping, and security services, at our hotels. In rendering such services our personnel are required to adhere to regulatory requirements and our internal standard operating procedures with regard to health, safety and hygiene and in their interaction with our guests and other members of the public. Food and beverage services require proper packaging and labelling and the careful and hygienic handling of food products, which if improperly packaged or handled may have an adverse impact on the health of our guests.

Failure to effectively implement our corporate, crisis response, training and management policies and protocols and to adequately address and manage risks inherent in our business, or a failure to meet the requirements of our guests, or a failure to develop effective risk mitigation measures, could have an adverse effect on our reputation, guest loyalty and consequently, our business, results of operations and financial condition.

7. Our operations are dependent on our ability to attract and retain qualified personnel, including our key senior management and any inability on our part to do so, could adversely affect our business, results of operations and financial condition.

Our operations are dependent on our ability to attract and retain qualified personnel since we aim to provide our guests with high levels of service. While we believe that we currently have adequate qualified personnel for our operations, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. Competition for qualified personnel with relevant industry expertise in India is intense and the loss of the services of our key personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires.

8. We enter into hotel management agreement for our Hotel and are subject to risks related to such hotel operation agreements.

We have entered into management agreement dated 19th October' 2013 with InterContinental Hotels Group (IHG)

There are restrictive and termination clauses, due to failure to meet specified criteria. Our inability to meet such criteria may trigger such events and that could have a material effect on our operations and financials.

9. Our residential and commercial projects are exposed to various implementation and other risks and uncertainties.

Some of our residential and commercial projects are under construction or development stage. The construction or development of these new projects involves various implementation risks including construction delays, delay or disruption in supply of raw materials, delays in acquisition of land, unanticipated cost increases, force majeure events, cost overruns or disputes with our joint venture partners. We may be further subject to regulatory risks, financing risks and the risks that these projects may ultimately prove to be unprofitable. In particular:

- ✓ Delays in completion could increase the financing costs associated with the construction.
- ✓ we may encounter unforeseen engineering problems, disputes with workers, force majeure events and unanticipated costs due to defective plans and specifications;
- ✓ we may not be able to obtain adequate capital or other financing at affordable costs or obtain any financing at all to complete construction of and to commence operations of these projects;
- ✓ we may not receive timely regulatory approvals and/or permits for development and operation of our projects, such as environmental clearances, height approval or other approvals from the regulatory
- ✓ we may experience shortages of, and price increases in, materials and skilled and unskilled labour, and inflation in key supply markets;
- ✓ we may experience adverse changes in market demand or prices for the services that our projects are expected to provide;
- ✓ Other unanticipated circumstances or cost increases.

If any of above risks materialize, they could adversely affect our profitability, which may in turn have an adverse effect on our overall results of operation.

10. We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for our business to operate. Although we believe that we have obtained required license for carrying our business activity, there may be certain approval/licenses which has not been taken. Additionally in our construction business, delays in obtaining approvals may result in cost increases in the price of construction materials from original estimates which cannot generally be passed on to customers and may also adversely affect our Projects. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. As a result, we may not be able to execute our business plan as planned. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure. Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at State Government levels. If we fail to comply, or regulator claims that we have not complied, with these conditions, we may not be able to commence or continue with work or operate these projects. For further information on various approvals or licenses required in connection with our operations, please see the section entitled “Government and other Approvals” on page 232 of this Prospectus.

11. The hotel industry is intensely competitive and our inability to compete effectively may adversely affect our business, results of operations and financial condition.

The hotel industry in India is intensely competitive and we compete with large multinational and Indian companies, as well as regional and local companies in each of the regions that we operate. Some of our competitors may be larger than us or develop alliances to compete against us, have more financial and other resources or have greater brand recognition than ours. Some of the major international hotel chains may have certain competitive advantages over us due to their global spread of operations, greater brand recognition and greater marketing and distribution networks. We cannot assure you that new or existing competitors will not significantly lower rates or offer greater convenience, services or amenities or significantly expand or improve facilities in a market in which we operate.

Our success is largely dependent upon our ability to compete in areas such as room rates, quality of accommodation, brand recognition, service level, and location of the property and the quality and scope of other amenities, including food and beverage facilities. In addition, our competitors may significantly increase their advertising expenses to promote their hotels, which may require us to similarly increase our advertising and marketing expenses and change our pricing strategies, which may have an adverse effect on our business, results of operations and financial condition. As a result, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition.

12. We may be affected by delays in the collection of receivables from our customers and may not be able to recover adequately on our claims.

There may be delays in the collection of receivables from our customers. Also, we may claim for more payments from our customers for additional work and costs incurred in excess of the actual price or amounts not included in the total flat price. These claims typically arise from changes in the initial scope of work and increase in area of flat originally booked at a time of booking of flats. The costs associated with these changes include additional direct costs, such as labour and material costs associated with the performance of the additional work, such as increased labour costs resulting from changes in labour markets. However, our customers may interpret such clauses restrictively and dispute our claims. These claims are thus often subject to lengthy arbitration, litigation or other dispute resolution proceedings. We cannot assure you that we can recover adequately on our claims. Our customers may have insufficient assets to pay the amounts owed to us even if we win our cases. In addition, we may incur substantial costs in collecting against our customers and such costs may not be recovered in full or at all from the customers. We often require significant amount of working capital requirements in our operations, any delayed collection of receivables or inadequate recovery on our claims could materially and adversely affect our business, cash flows, financial condition and results of operations.

13. We are exposed to a variety of risks associated with safety, security and crisis management.

We are committed to ensure the safety and security of our guests, employees and assets against natural and man-made threats. These include, but are not limited to, exceptional events such as extreme weather, civil or political unrest, violence and terrorism, serious and organized crime, fraud, employee dishonesty, cyber crime, pandemics, fire and day-to-day accidents, incidents, health crises of guests and petty crime which impact the guest or employee experience, could cause loss of life, sickness or injury and result in compensation claims, fines from regulatory bodies, litigation and impact our reputation. Serious incidents or a combination of events could escalate into a crisis which, if managed poorly, could further expose us and our brands to significant reputational damage.

Further, the occurrence of events such as accidents or any criminal activity at any of our hotel properties may subject us to legal proceedings resulting in adverse publicity and cause a loss of consumer confidence in our business.

14. We are subject to risks relating to owning real estate assets.

We are subject to risks that generally relate to real estate assets because of the hotels we own. Regulations and interest rates can make it more expensive and time-consuming to develop real property or expand, modify or renovate hotels. Changes in local markets or neighborhoods may diminish the value of the real estate assets we hold. Real estate assets may not be as liquid as certain other types of assets, and this lack of liquidity may limit our ability to react promptly to changes in economic, market or other conditions. Our ability to dispose of real estate assets, if required, on advantageous terms depends on factors beyond our control, including competition from other sellers, demand from potential buyers and the availability of attractive financing for potential buyers. We cannot predict the various market conditions affecting real estate assets that may exist at any particular time in the future. Due to the uncertainty of market conditions that may affect the future disposition of our real estate assets, we cannot assure you that we will be able to sell our real estate assets at a profit in the future, if required.

15. Our operations entail certain fixed costs and recurring costs, and our inability to reduce such costs during periods of low demand for our services may have an adverse effect on our business, results of operations and financial condition.

Our operations entail certain fixed costs such as costs incurred towards the maintenance of our hotel properties, employee related costs, property taxes as well as certain significant recurring costs such as utility expenses. We may also have to incur costs towards periodic re-designing, re-structuring, refurbishing or repair of defects at our hotels. The hotel industry experiences periodic changes in demand and supply, which we may not be able to predict accurately. Consequently, we may be unable to reduce fixed and recurring costs in a timely manner, or at all, in response to a reduction in the demand for our services. Further, our hotel properties may be subject to an increase in operating and other expenses in the event of increases in property and other tax rates, increase in utility costs due to increase in electricity or water supply charges, insurance costs, repairs and maintenance and administrative expenses, which may adversely affect our business, results of operations and financial condition.

16. Demand for rooms in our hotels may be adversely affected by the increased use of business-related technology or change in preference of our guests.

The increased use of teleconference and video-conference technology by businesses could result in decreased business travel as companies increase the use of technologies that allow multiple parties from different locations to participate at meetings without traveling to a centralized meeting location, such as our hotels. To the extent that such technologies play an increased role in day-to-day business and the necessity for business-related travel decreases, demand for our hotel rooms may decrease from business travelers. Similarly, changes in domestic tourism and preferences of our guests due to evolving cost of travel, spending habits and consumption patterns may lead to a change in the perceived attractiveness of our hotels, services, the locations at which are hotels are situated. Such changes may impact the demand for our hotel rooms from domestic tourists and guests at our leisure hotels, and our business may be adversely affected.

17. We are exposed to the risk of events that adversely affect domestic or international travel, such as epidemics and terrorism or war.

The room rates and occupancy levels of the hotels in our portfolio could be adversely affected by events that reduce domestic or international travel, such as epidemics and spread of infectious diseases or threats thereof, actual or threatened acts of terrorism or war, political or civil unrest, travel-related accidents or industrial action, natural disasters, or other local factors impacting individual hotels, as well as increased transportation and fuel costs. A decrease in the demand for hotel rooms as a result of such events may have an adverse impact on our operations and financial results. In addition, inadequate planning, preparation, response or recovery in relation to a major incident or crisis may cause loss of life, prevent operational continuity, or result in financial loss and consequently affect our reputation

18. We rely significantly on external design agencies and any inability to retain, such design agencies could affect our ability to undertake our business.

Currently, we use an external agency to complete the designs of the majority of our residential and commercial projects. We may continue to subcontract project designs to external agencies to ensure design quality and cost efficiency. We do not plan to have an internal design department until the scale of our business makes it an effective solution for our growth bottlenecks. As we continue to expand into other business segments or diversify across other states, our dependence on external design agencies may increase. We, currently, do not have any long term contracts with any of design agency. If

we fail to maintain good relationships with such design agencies, or if they are acquired by our competitors or if they fail to deliver quality designs to us on a timely basis, for whatsoever reason, or we are unable to find substitute agencies of a similar caliber we may lose business opportunities or mis-construction deadlines, which will be detrimental to our business. In addition, we may face competition from other construction companies for the services of well-known design agencies and may need to pay substantially higher design fees to obtain their services, in which case our costs will increase and we may not be able to maintain our current cost structure. Any of the above risks may adversely affect our business, financial condition and results of operations.

19.If we are not successful in managing our growth, our business may be disrupted and our profitability may be* reduced.

We have experienced high growth in recent years and expect our businesses to continue to grow significantly. Our future growth is subject to risks arising from a rapid increase in order volume, and inability to retain and recruit skilled staff. Although we plan to continue to expand our scale of operations through organic growth or investments in other entities, we may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit. Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls within our Group. In particular, continued expansion may pose challenges in:

- maintaining high levels of project control and management, and client satisfaction;
- recruiting, training and retaining sufficient skilled management, technical and bidding personnel;
- developing and improving our internal administrative infrastructure, particularly our financial,
- operational, communications, internal control and other internal systems;
- making accurate assessments of the resources;
- adhering to the standards of health, safety and environment and quality and process execution to meet clients' expectations;
- strengthening internal control and ensuring compliance with legal and contractual obligations;
- managing relationships with clients, suppliers, contractors, lenders and service providers

If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Our business, prospects, financial condition and results of operations may be adversely affected.

20. We have entered into and may enter into related party transactions in the future also.

We have in the course of our business entered into, and will continue to enter into, transactions with related parties. Our Company has entered into several related party transactions with our associates, promoter group and relative of our Directors, including in relation to acquisition of projects, construction and development of projects, inter-corporate loans, and rent of property and office space. For more information regarding our related party transactions, see "Financial Information of the Company – Annexure V –Standalone Statement of Related Party Transactions" beginning on page 184 of this Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. Further we cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties and such transactions, individually or in the aggregate, will not have an adverse effect on our reputation, cash flows, business, results of operations and financial condition.

21. We face significant competition and if we fail to compete effectively, our business, prospects, financial condition and results of operations will be adversely affected.

We operate in a competitive environment and our industry has been frequently subject to intense price competition for residential and commercial projects. Our competition varies depending on the size, nature and complexity of the residential and commercial project and on the geographical region in which the project is to be executed. Further, some of our competitors may be larger than us, have stronger financial resources or a more experienced management team, or have stronger engineering capabilities in executing residential and commercial projects. They may also benefit from greater economies of scale and operating efficiencies and may have greater experience in construction business. We cannot assure you that we can continue to compete effectively with our competitors in the future, and failure to compete effectively against our current or future competitors may have an adverse effect on our business, results of operations and financial condition.

22. We rely on contractors and service providers for our construction services, but we cannot guarantee that such contractors and service providers will comply with relevant regulatory requirements or their contractual obligations.

We outsource construction of our Projects and other activities to contractors and service providers. However, we cannot guarantee that our contractors will comply with regulatory requirements or meet their contractual obligations to us in a

timely manner, or at all. Our operations could be delayed or our construction activities could be harmed due to any such event despite having continuity plans in place as required by regulations. In addition, if our contractors fail to operate in compliance with regulations or corporate and societal standards, we could suffer reputational harm, which would likely cause a material adverse effect on our business, financial condition, results of operations and prospects. We cannot assure you that we may not face disruption in our construction activity which may cause delay in completion of our Projects.

23. Our company is dependent on third party marketing agencies for sale of its residential flats. Any disassociation from marketing agency and non-performance of such agency will affect our sales and financial position of the Company.

Our company outsourced to third party marketing agencies for sale of its residential flats and our sales are depend on performance of such marketing agencies. Any disassociation from marketing agency and their non-performance will result in downfall in our sales. Although we have not experienced any disassociation from our marketing agencies but if such situation arises or they are not capable of performing their duties may lead to downfall in our sales which will adversely affect our financial position and future projection of our company.

24. Our projects may be adversely affected by public and political oppositions, conflicting local interests, elections and protests.

The construction and operation of our projects may face objections/oppositions from the local communities where these projects are located. In particular, the public, the municipal authorities and other authorities may oppose our operations due to the perceived negative impact it may have on the environment. Furthermore, if our construction or operation leads to a displacement of people or has an impact on religious sites close to the construction sites, our projects can become functional only after obtaining the consent of such affected persons and the resettlement and rehabilitation of such persons or relocation of such religious sites. There may be objections or disputes in relation to such resettlement, rehabilitation or relocations, which may suspend our construction or operations until the disputes are resolved. In addition, we may be adversely affected by political events such as protests and general strikes in the states where we operate, especially when such events take place on or close to our construction sites. Such events may also disrupt and cause us losses of business or incurrence of significant costs. In these events, our business, financial condition and results of operations may be materially and adversely affected.

25. There cannot be any assurance as to when we will be able to successfully realize the sale proceeds in respect of the real estate projects for which construction has been completed as also whether the proceeds would be in line with our expectations /estimates. We may find it difficult or not be able to market our developed / proposed to be developed real estate.

Our Company has completed the construction of Dream Exotica comprising of 154 residential flats respectively, which are ready for sale. As on date, around 125 of these residential flats have already been sold. Our ability to realize the expected / estimated proceeds from these flats may be affected due to various factors like Housing Loan approvals, disposable income in the hands of the buyers to pay the remaining EMIs, etc. Further, amongst other factors, we also depend on cash flows estimated to be generated from the advances and sale proceeds of developments that are ready-for-sale, for our current working capital requirement, which could have an adverse effect on the remaining phases of our on-going development due to shortage of finance. We may not be able to realize the expected / estimated proceeds from the sale of the remaining flats since our ability to sell is dependent on various factors outside our control including, but not limited to:

- Economic changes nationally or in our local markets
- Volatility of Housing Loan interest rates and inflation
- Changing customer preference
- Price escalations of properties
- Change in Government policies pertaining to the real estate industry

These factors can adversely affect the overall demand for and the valuation of our completed developments, work under construction, planned projects, the value of our land reserves, and, as a result, may materially and adversely affect our financial condition and results of operations.

26. Our business is subject to seasonal and cyclical variations that could result in fluctuations in our results of Operations.

The hotel and hospitality industry in India is subject to seasonal variations. The periods during which our hotel properties experience higher revenues vary from property to property, depending principally upon location and the

guests served. Seasonality affects leisure travel and the MICE sector (meetings, incentives, conferences and events). According to the Horwath Report, the winter months are preferred for travel in India, for leisure, MICE events, management or business travel and more recently for destination weddings. Further, foreign leisure travel occurs primarily between October and March and to a lesser extent during the summer and monsoon seasons, as per the Horwath Report. This seasonality can be expected to cause quarterly fluctuations in revenue, profit margins and net earnings.

Further, the timing of opening of newly constructed or franchised hotels and the timing of any hotel acquisitions or dispositions may cause a variation of revenue and earnings from quarter to quarter. Further, the hospitality industry is cyclical and demand generally follows, on a lagged basis, key macroeconomic indicators. There is a history of increases and decreases in demand for hotel rooms, in occupancy levels and in room rates realized by owners of hotels through economic cycles. The combination of changes in economic conditions and in the supply of hotel rooms, including periods of excess supply, can result in significant volatility in results for owners and managers of hotel properties. The costs of running a hotel tend to be more fixed than variable. As a result, in an environment of declining revenues the rate of decline in profits can be higher than the rate of decline in revenues.

As a result of such seasonal fluctuations, our room rates, sales and results of operations of a given half of the fiscal year may not be reliable indicators of the sales or results of operations of the other half of the fiscal year or of our future performance.

27. Our Company's construction activities are labour intensive and depend on availability of laborers in large numbers. In case of unavailability of such laborers, our business operations could be affected.

Our operations and performance are labour intensive and depends on our ability to hire labour. In case such labour is unavailable or we are unable to identify and hire such laborers our business could be adversely affected. Though we may entered into various agreements for hiring laborers on a contractual basis but we cannot guarantee that we may be able to renew these contracts timely or on favorable terms or at all. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

Also our company may be subject to Contract Labour (Regulation and Abolition) Act, 1970 for hiring contract laborers at our construction sites. Any non-compliance may render us liable to penalties and other regulatory actions under the Contract Labour (Regulation and Abolition) Act, 1970.

28. We are dependent on a number of key personnel, including our senior management, and the loss of or our inability to attract or retain such persons could adversely affect our cash flows, business, results of operations and financial condition.

Our performance depends largely on the efforts and abilities of our senior management and other key personnel, including our present officers. The inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic decisions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. Competition for qualified personnel with relevant industry expertise in India is intense due to the scarcity of qualified individuals in the construction and hotel business. A loss of the services of our key personnel could adversely affect our cash flows, business, results of operations and financial condition.

29. Any shortfall in the supply of our raw materials or an increase in raw material costs or other input costs may adversely impact on our business.

Our Construction and Hotel business require raw materials which is subject to supply disruptions and price volatility caused by various factors, including commodity market fluctuations, the quality and availability of supply, changes in government programs and regulatory sanctions. Our suppliers may be unable to provide us with a sufficient quantity of our raw materials at a suitable price for us to meet the demand for our products. Additionally there is a risk that one or more of these existing suppliers could discontinue their operations, which could adversely impact our ability to source raw materials at a suitable price and meet our order requirements. Any increase in raw material prices will result in corresponding increases in our product costs. Increase in prices of, shortages of, or delays or disruptions in the supply of materials could adversely affect our business and results of operations.

30. The cost of implementing new technologies for construction business and monitoring our projects could be significant and could adversely affect our results of operations, cash flows and financial condition.

Our business depends on the continued performance of our information technology systems for construction of residential and commercial Projects. Our technological systems are potentially vulnerable to physical or electronic break-ins, computer viruses and similar disruptions. Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we use upgraded technology for construction of flats that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology updated. In case of a new found technology in the construction business, we may be required to use new technology employed by us. Further, the cost in upgrading our technology is significant which could substantially affect our finances and operations. For further details, kindly refer section titled “Our Business” beginning on page no. 88 of this Prospectus

31. Fluctuations in market conditions between the time we acquire land or obtain development rights and sell developed projects on such land may affect our ability to sell our projects at expected prices, which may adversely affect our revenues and profit margins.

We have already acquired certain land parcels for development of on-going and forthcoming projects. For details, please see “Properties” in the chapter titled “Our Business” beginning on page 88 of this Prospectus. We may be subject to significant fluctuations in the market value of our land and inventories. We may be adversely affected if market conditions deteriorate and if we have to sell our developed projects during weaker economic periods, since we have purchased land during stronger economic periods. We cannot assure you that prices will increase or that the price of real estate in eastern India or India as a whole will not continue to experience declines. These factors can negatively affect the demand for and pricing of our developed and undeveloped projects and, as a result, may negatively affect our revenues and profit margins

32. We conduct due diligence and assessment exercises prior to acquisition of land for undertaking development, but we may not be able to assess or identify certain risks and liabilities

We constantly acquire land or development rights for our projects. We have an internal assessment process on land selection and acquisition which includes a due diligence exercise to assess the title of the land to assess its financial viability. Our internal assessment process is based on information that is available or accessible by us. There can be no assurance that such information is accurate, complete or current. Any decision based on inaccurate, incomplete or outdated information may result in risks and liabilities associated with such projects. This may adversely affect our business, financial condition and results of operations.

33. If we are unable to raise additional capital, our business prospects could be adversely affected.

We intend to fund our growth and expansion plans through our cash on hand, cash flow from operations. We will continue to incur significant expenditure in maintaining and growing our existing Construction & Hotel business. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our cash on hand and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, if we are unable to arrange adequate financing on timely basis, it could adversely affect our ability to complete our projects plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, the continued success of our operations and regulatory framework that allows us to raise capital. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

34. If we are unable to establish and maintain an effective internal controls and compliance system, our business and reputation could be materially and adversely affected.

We take steps to establish and maintain compliance and disclosure procedures, systems and controls, and to maintain internal controls over financial reporting in order to produce reliable financial reports and prevent financial fraud. However, internal controls over financial reporting must be reviewed on an ongoing basis as risks evolve, and the processes to maintain such internal controls involve human diligence and compliance and are subject to lapses in judgment and breakdowns resulting from human error. To the extent that there are lapses in judgment or breakdowns resulting from human error, the accuracy of our financial reporting could be affected which may adversely affect our business and financial position of our company.

However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SME Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

40. Any customer dispute regarding our performance or workmanship in our Hotel and Real Estate business may amount in delay or withholding of payment to us.

41. We may not be able to sustain effective implementation of our business and growth strategies

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook.

42. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed fund requirement, as detailed in the section titled "**Objects of the Issue**" is to be Partial funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe.

43. We have not independently verified certain data in this Draft Prospectus.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

44. Our ability to pay any dividends in future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditure.

Our Company has not been paying dividend, although there is no policy of the Company for declaring dividend. The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends or not in the foreseeable future.

45. We have high working capital requirements. If we experience insufficient cash flows to enable us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.

Our business requires a substantial amount of working capital for our business operations. We would require additional working capital facilities in the future to satisfy our working capital need. In case of our inability to obtain the requisite additional working capital finance, our internal accruals/cash flows would be adversely affected to that extent, and consequently affect our operations, revenue and profitability.

46. Any increase in or enforcement of our contingent liabilities may adversely affect our financial condition.

47. We cannot assure you that our equity shares will be listed on the SME platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the equity shares.

48. The requirements of being a listed company may strain our resources.

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely effect the financial position of the Company

49. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

Prior to the Issue, there has not been a public market for our Equity Shares. We cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling our Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of our Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors.

50. Economic developments and volatility in securities markets in other countries may cause the price of our Equity Shares to decline.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

51. There are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies.

Transfer details pertaining to financial year 2015-2016 as not reported in Annual Return

52. Demand for rooms in our hotels may be adversely affected by the increased use of business-related technology or change in preference of our guests.

The increased use of teleconference and video-conference technology by businesses could result in decreased business

travel as companies increase the use of technologies that allow multiple parties from different locations to participate at meetings without traveling to a centralized meeting location, such as our hotels. To the extent that such technologies play an increased role in day-to-day business and the necessity for business-related travel decreases, demand for our hotel rooms may decrease from business travelers. Similarly, changes in domestic tourism and preferences of our guests due to evolving cost of travel, spending habits and consumption patterns may lead to a change in the perceived attractiveness of our hotels, services, the locations at which are hotels are situated. Such changes may impact the demand for our hotel rooms from domestic tourists and guests at our leisure hotels, and our business may be adversely affected.

53. If we pursue a strategy of expansion through acquisition of hotels or properties, we may not be able to successfully consummate favorable transactions or such transactions may not yield intended results or achieve expected returns and other benefits.

From time to time, we may evaluate potential acquisition of hotels or properties that would further our strategic objectives. However, we may not be able to identify suitable hotels or properties, consummate a transaction on terms that are favourable to us, or achieve expected returns and other benefits. Hotels or properties acquired by us may not be profitable or may not achieve sales levels and profitability that justify the investments made. Our acquisitions may entail financial and operational risks, including diversion of management attention from its existing core businesses. Future acquisitions could also result in the incurrence of debt, contingent liabilities and increased operating expenses, all of which could adversely affect our business, financial condition and results of operations

54. Disruptions or lack of basic infrastructure such as electricity and water supply could adversely affect our operations.

We require a significant amount and continuous supply of electricity and water and any disruption in the supply thereof could affect the operations of our hotels and the services to our guests. We currently source our water requirements from governmental water supply undertakings and water tankers and depend on state electricity boards and private suppliers for our energy requirements. Although we have diesel generators to meet exigencies at our hotel, we cannot assure you that our hotels will have sufficient power during power failures.

We operate from our registered office situated at 44/2A, Hazra Road Kolkata-700019 which is owned by Growwell Vyapaar Pvt Ltd (Group Company). The same is obtained on the basis of a no objection letter for using the space as registered office. Any discontinuance of facility to use the office will lead us to locate any other premises. Our inability to identify the new premises may adversely affect the operations, finances and profitability of our company. Our registered office from where our operations are carried out is shared between our Company and with our Group Companies.

Risks related to our projects:

1. Land for proposed Project

Total land requirement is 32.67 Cottahs, however 6.67 Cottahs is already bought and balance is under process of negotiation. If our company is not able to procure additional land for the proposed project then it will adversely affect the execution of the project and our financials.

2. Our proposed expansion plans are financially dependent on the Issue proceeds and delay in the same may result in escalation of project cost thereby impacting the operations and financials of our Company

Our proposed expansion plans are dependent on the proceeds of this Issue. Any delay in the proposed Issue may increase the project cost and also result in delay in project implementation. This may adversely affect our operations and profitability.

3. If the rate of Indian price inflation increases, our results of operations and financial condition may be adversely affected.

4. The extent and reliability of India's infrastructure could adversely impact our results of operations and financial conditions. Any disruption in the supply of power, raw materials and telecommunication or other services could disrupt our business process or subject us to additional costs.

5. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

Majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in offering documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any noncompliance. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited prudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps.

Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

6. Our operations have been concentrated in the State of West Bengal in India. Our growth strategy to expand into new geographic areas poses risks. A. EXTERNAL RISK FACTORS

5. *The Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 have effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*
6. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*
7. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian*

economy and the real estate sector contained in this Draft Prospectus.

8. ***Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.***
9. ***Instability in financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index & NIFTY, NSE Benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

10. ***Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.***

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

11. ***Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition.***

Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP. GAAP and IFRS differ in significant respects from Indian GAAP.

12. ***Political, Economic and Social changes in India could adversely affect our business.***

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

13. ***Our business is dependent on economic growth in India.***

Our performance is dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. For example, in the monsoon of 2009, several parts of the country experienced below average rainfall, leading to reduce farm output, which impaired economic growth. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

14. The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy.

15. Global economic downturn and adverse market conditions could cause our business to suffer. A slowdown in economic growth in India could cause our business to suffer.

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of a downturn affecting their economic condition and markets general business and consumer sentiment has been adversely affected due to the global slowdown and there can be no assurance whether the developed economies or the emerging market economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets. Our performance and growth is directly related to the performance of the Indian economy. The performance of the Indian economy is dependent among other things on the interest rate, political and regulatory actions, liberalization policies, commodity and energy prices etc. A change in any of the factors would affect the growth prospects of the Indian economy, which may in turn adversely impact our results of operations, and consequently the price of our Equity Shares.

16. Implementation of The West Bengal Housing Industry Regulation Act, 2017

The West Bengal Housing Industry Regulation Act, 2017 has been passed by the West Bengal Legislature and assent of the Governor was first published in the Kolkata Gazette, Extraordinary, of the 17th October, 2017. This is an Act to establish the Housing Industry Regulatory Authority for regulation and promotion of the housing sector and to ensure sale of plot, apartment or building, as the case may be, or sale of real estate project, in an efficient and transparent manner and to protect the interest of the consumers in the real estate sector and to establish a mechanism for speedy dispute redressal and for matters connected therewith or incidental thereto.

The said regulations are applicable to our company. This may affect our Business and results of operations.

17. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The GoI has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is effective from July 1, 2017. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

18. Our performance is linked to the stability of policies and the political situation in India

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies. However there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations.

19. Any downgrading of India's debt rating by a domestic or international rating agency could have a negative impact on our business.

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

20. If communal disturbances or riots erupt in India, or if regional hostilities increase, this would adversely affect the Indian economy and our business.

Some parts of India have experienced communal disturbances, terrorist attacks and riots during recent years. If such events recur, our operational and marketing activities may be adversely affected, resulting in a decline in our income. The Asian region has, from time to time, experienced instances of civil unrest and hostilities among neighboring countries. Since May 1999, military confrontations between countries have occurred in Kashmir. The hostilities between India and its neighboring countries are particularly threatening because India and certain of its neighbors possess nuclear weapons. Hostilities and tensions may occur in the future and on a wider scale. Also, since 2003, there have been military hostilities and continuing civil unrest and instability in Afghanistan. There has also recently been hostility in the Korean Peninsula. In July 2006 and November 2008, terrorist attacks in Mumbai resulted in numerous casualties. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares.

21. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition:

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition, including in the following respects: Catastrophic loss of life due to natural or man-made disasters could cause us to pay benefits at higher levels and/or materially earlier than anticipated and could lead to unexpected changes in persistency rates. Natural or man-made disaster, could result in losses in our projects, or the failure of our counterparties to perform, or cause significant volatility in global financial markets.

Pandemic disease, caused by a virus such as the "Ebola" virus, H5N1, the "avian flu" virus, or H1N1, the "swine flu" virus, could have a severe adverse effect on our business. The potential impact of a pandemic on our results of operations and financial position is highly speculative, and would depend on numerous factors, including: the probability of the virus mutating to a form that can be passed from human to human; the rate of contagion if and when that occurs; the regions of the world most affected; the effectiveness of treatment of the infected population; the rates of mortality and morbidity among various segments of the insured versus the uninsured population; our insurance coverage and related exclusions; and many other variables.

22. Terrorist attacks and other acts of violence or war involving India and other countries could adversely affect the financial markets, result in a loss of business confidence and adversely affect our business, prospects, financial condition and results of operations.

There has recently been an increase in the frequency and scale of terrorism in India and globally. In November 2008, terrorists attacked two hotels, a railway station, restaurant, hospital, and other locations in Mumbai causing casualties. In July 2006, a series of seven explosions were launched by extremists on commuter trains and stations in India. Though our factory is situated at remote rural areas which are typically not the target of terrorism, our business, like other businesses, is vulnerable to terrorism, whether due to physical damage, reduced usage or increased fuel, insurance or other costs. Terrorism is inherently unpredictable and difficult to protect against.

Moreover, even the threat or perception of terrorism can have devastating economic consequences. Almost all of our insurance policies specifically exclude recovery for damage that results from terrorism. Any damage to any of our businesses as a result of actual or perceived terrorist activities could reduce our revenues and/or increase our costs, which would adversely affect our business, results of operations and financial condition.

SECTION-III INTRODUCTION

SUMMARY OF INDUSTRY

OVERVIEW OF INDIAN ECONOMY

India, the world's third largest economy in terms of its PPP (purchasing power parity) and with a population of over 1.2 billion, has witnessed significant economic growth since the country was liberalized in early 1990s. Industrial deregulation, divestment of state-owned enterprises, and reduced Governmental controls on foreign trade and investment, served to accelerate the country's growth and India has posted an average of 7% GDP growth since the beginning of this millennium. According to IMF, India's GDP was estimated at 6.7% in 2017 and it is projected to jump to 7.4% in 2018 and 7.8% in 2019.

India Ratings (Ind-Ra) expects economic recovery to become more broad-based in FY19 with both consumption and investment providing support to economic growth. The four GDP growth drivers from the demand side are private final consumption expenditure (PFCE), government final consumption expenditure (GFCE), gross fixed capital formation (GFCF) and net exports (NE). In the last few years, only PFCE and GFCE have demonstrated sustained and robust growth. Although exports growth picked up in FY18 (till December, 2017), hardening of commodity prices, particularly crude, has led to imports growth outpacing exports growth in FY18.

Ind-Ra expects PFCE to grow at 6.8% in FY19. PFCE grew at an average rate of 6.9% during FY14-FY18, despite two consecutive years of monsoon failure in 2014 and 2015, due to favourable demographic and inflation factors. Given the demographic composition, a large number of people are entering the workforce every year. Assuming only a fraction of them get gainful employment (anecdotal evidence suggests that while about 10-12 million people are entering working-age population every year, only about 3.7 million jobs are created annually), the numbers are still staggering, resulting in a significant impact on consumption. Moreover, sustained expansion of the middle class in India is fuelling growth in consumption. Also, consumer price index (CPI) based inflation, which averaged 9.8% during FY12-FY14, plunged to 5.9% in FY15, and since then has declined to 4.9% in FY16 and 4.5% in FY17; it is expected to decline further to 3.6% in FY18. Such a sharp decline in the CPI inflation is largely driven by collapse of global commodity prices, particularly crude.

Ind-Ra expects GFCE to grow at 8.1% in FY19. Given the size of the government machinery, a significant proportion of demand in the economy is created/generated on account of government expenditure. Also, governments across the globe have been found to step up their expenditure, if need arises, to boost the aggregate demand in the economy. As this was the case in the aftermath of 2008 global financial crisis, even in India, government consumption expenditure grew at an average 11.3% during FY08-FY10 vis-à-vis an average of 4.9% during FY04-FY07. With private investment faltering, the government has again stepped up its

spending to support growth. As a result, GFCE grew at an average 10.6% during FY15-FY18 compared to 0.6% during FY14. However, capex spending by the government alone will not be sufficient to step-up investment/GDP ratio in the economy.

Ind-Ra expects investment as measured by GFCF to grow at 6.5% in FY19. This certainly is an improvement over GFCF growth of 2.4% in FY17 and 4.5% in FY18, but is nowhere close to GFCF growth of 16.2% witnessed during FY04-FY08. There is a strong correlation between the GDP growth and investment. With GFCF growth faltering and clocking an average growth of 3.7% during FY14-FY18, the GDP growth during the same period averaged 7.1%. In fact, due to the slowdown in GFCF growth, particularly private corporates and households, the GDP growth has failed to accelerate and sustain itself close to or in excess of 8.0%. Private corporate sector investment grew at an average 48.1% during FY05-FY08. Ind-Ra's study of top 200 listed and unlisted non-financial asset-heavy corporates suggests that private sector capex revival is likely to remain muted till FY20.

Although the Indian economy has largely been driven by domestic demand, external demand played a vital role in pushing the GDP growth during FY04-FY10. The share of exports (goods and services) in India's GDP increased to 25.4% in FY14 from 12.8% in FY01, but thereafter declined sharply to 19.2% in FY17. A reduction in exports contribution to GDP and a plunge in exports growth have been a cause of concern lately. Exports growth of goods and services plummeted to 6.7% in FY17 from average exports growth of 26.3% during FY05-FY09. With the popular sentiment in developed economies turning against globalization of which the Brexit vote and Donald Trump's surprise victory in the US presidential election are testimonies, India is likely to face continued headwinds on the exports front.

From the supply side, all major sectors namely agriculture, industry and services are expected to contribute to FY19 gross value-added (GVA) growth, but the most significant rebound will come from the industrial sector, which reeled under the twin impact of the demonetization and GST in FY18. Ind-Ra therefore sees industrial GVA growing at 6.2% in FY19 as against 4.4% in FY18. Even agriculture and services sectors are expected to grow 2.7% and 8.5% in FY19, a tad higher than 2.1% and 8.3% in FY18, respectively. This will translate into an overall GVA growth of 6.9% in FY19 (FY18: 6.1%).

OVERVIEW ON INDIAN REAL ESTATE

Overview of Indian Real Estate Industry

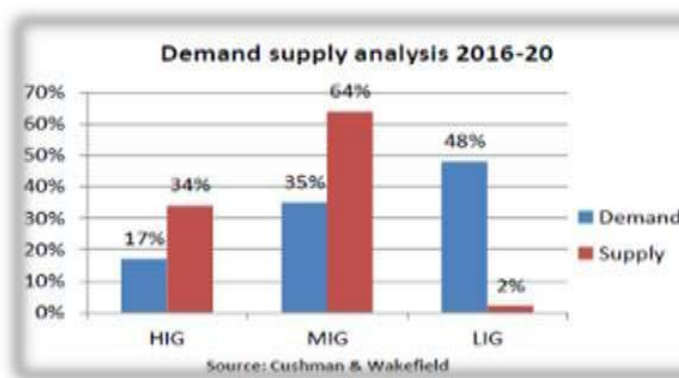

The real estate sector in India is one of the fastest growing sectors in the world. The growth of this sector is mainly attributed to the emergence of nuclear families, rising income level and rapid urbanization. It is the second largest employer after agriculture and almost constitutes 6% of GDP in India. India's real estate sector is the 4th largest in terms of FDI inflows. As per the latest

GoI estimates the FDI in this sector stood at USD 24.66 billion from April 2000 to September 2017 and accounted for 7% of total FDI inflows into the country. The Government of India is backing this sector with several initiatives like allowing FDI up to 100% for townships and settlement development projects and 'Housing for All by 2022 with concessions including lower Goods and Services Tax rate and paying out subsidies promptly.

The real estate sector in India can be broadly divided into 5 segments: Residential Space; Commercial Space; Retail Space; Hospitality Space; and Special Economic Zone. There are eight major real estate markets in the country with Mumbai, Delhi NCR, Bangalore followed by Pune, Hyderabad, Chennai, Kolkata and Ahmedabad.

Residential Space: This sector is highly fragmented sector with dominant regional players and very few players have a pan-India presence. At present this sector contributes 60 % of the total real estate sector. The residential real estate market in our country is plagued by excess inventory and predominantly caters to High-Income Group (HIG) and Middle-Income Group (MIG) where purchase of property is seen as an investment avenue. This investment demand is drying up now in the absence of any visible price appreciation which results in lower returns to the investors. However, there is a huge demand for housing in the Low-Income Group segment (LIG) which has been neglected till date. GoI's recent initiative on Affordable Housing will give impetus to low-income group segment. In addition to granting infrastructure status to Affordable Housing, the government has expanded the Pradhan Mantri Awas Yojana (PMAY) benefits to push its vision of "Housing for All by 2022". The government's decision to offer Credit-Linked Subsidy Scheme (CLSS) under the PMAY (Urban) has been helping MIG

home buyers significantly. As per the latest Ministry of Housing estimates, the urban housing shortage is estimated at 10 million units and rural housing shortage is at 48.8 million as of 2017. This provides immense opportunities for the growth of residential space in the LIG segment in the coming years. As per a study done by Cushman and Wakefield on the forecasted demand for housing segment wise for the period 2016-20, it can be clearly seen that the demand in HIG and MIG segment is 52% of the total demand for housing in the market, while supply is 98%, thus adding to the inventory level. The total demand for LIG housing is 48% of the total demand across segments, but new inventory added in this segment constitutes only 2% of the total new inventory added.

Affordable Housing is also attracting the interest of private equity firms driven by macro data points that indicate pent-up demand and government incentives. At the national level, the demand for Affordable Housing alone could be 25 million homes by 2022, which is four times the current housing stock as per an India Rating forecast. This provides an immense opportunity for the private equity firms.

GoI has reiterated its commitment to Affordable Housing by allocating INR 210,000 million in the latest budget for building 5.1 million rural homes in FY19 apart from the 5.1 million being constructed this year under the PMAY. GoI has also proposed to establish a dedicated affordable housing fund under the National Housing Bank which will give further impetus to Affordable Housing. An interest subsidy will be provided to rural households that are not covered under PMAY. The government will also provide INR 1.20 lakh as assistance to every unit in the plains and INR 75000-1.30 lakh to those in hilly and difficult terrains.

Commercial Space: Commercial real estate operates much contrary to the residential segment and has witnessed sustained demand during 2017, primarily from industries like IT, Consulting, BFSI, Telecom and eCommerce, etc. This sector is dominated by few large players with a pan-India presence. Mumbai, Bangalore and Delhi NCR region accounted for 60% of the total office space in the year 2017. Mumbai will continue to be the best city in India for commercial real estate investment with returns ranging between 12-19 % for the next 5 years followed by Bangalore and Delhi NCR region. The Government's initiative of "Make in India" is providing a major boost to real estate assets like warehouses, industrial assets and logistical assets which form part of the commercial real estate. As per the JLL report of December 2017, approximately 192 million square feet is under construction and announced till 2022. Near 60% of this upcoming supply is lease-only in nature with over 83% of this stock geared towards IT and SEZ development. This sector attracts major realty funds and private equity funds due to attractive returns and demand for commercial space in the market. GoI's recent initiative on Real Estate Investment Trust (REIT) which is modelled

on mutual fund will attract a lot of investors. REIT allows investors to invest in portfolios of large scale properties and in turn they can earn a share of the income produced through rentals generated on these properties without having to go out and buy or finance a property.

Retail Space: The retail sector accounts for the small portion of the Indian real estate market. There were 720 malls (approx.) operational in India by the second-quarter of 2016. The organized retail space developers are few and mostly dominated by residential/office space developers. High urbanisation rate, rising young population base, increasing disposable income levels, rising aspirations and increasing proportion of nuclear families which influence urban consumption base and subsequent rapid growth of retail industry drives the market for retail space in India. The demand for the retail space is high and increase in FDI limit for the multi-brand retail will fuel the demand for retail space in India. As a result, retail space is also attracting PE investors driven by better returns and valuations. As per JLL report December 2017, PE investors have invested over USD 724 million in Indian retail reality till September 2017 as against USD 846 million invested in two years between 2015 and 2016. Retail Investors are increasingly focusing on emerging retail destinations (Tier II & III) over metros due to better growth prospects. Over INR 100,000 million has been invested in the construction of retail malls in the last 3 years, out of which INR 59,000 million was invested in the malls in the Tier-II cities. This is mainly driven by increasing retail consumption in the smaller cities and the quality of assets is much better in the Tier II cities which result in better valuations.

Hospitality Space: This space consists of hotels, service apartments and convention centres. This is a competitive sector dominated by many large players. Delhi NCR and Mumbai are the biggest hospitality market in India followed by Bangalore, Hyderabad and Chennai. The key demand drivers for this industry is globalization of Indian businesses, increasing domestic tourism, increasing inbound foreign tourists and medical tourism. This sector is plagued by excess capacity and occupancy rate had come down as the hospitality market in India has gone through a full economic cycle of strong growth followed by a severe downturn. The period 2004 - 2010 witnessed a four-fold increase in supply. The onset of the Global Financial Crisis in 2008 and the addition of large inventory impacted the market severely. From 2009 to 2014, hotel markets witnessed decline in both hotel occupancy and average daily rates, though demand grew at an average rate of 7.8% in the same period. Since 2015 market has shown recovery with a steady economy and increased business travel, demand from domestic and foreign tourists and the government's push to tourism through the e-visa program.

Special Economic Zone: India was one of the first in Asia to recognize the effectiveness of the Export Processing Zone (EPZ) model in promoting exports, with Asia's first EPZ set up in Kandla in 1965. With a view to overcome the shortcomings experienced on account of the multiplicity of controls and clearances; absence of world-class infrastructure; and an unstable fiscal regime and with a view to attract larger foreign investments in India, the Special Economic Zones (SEZs) Policy was announced in April 2000. In FY16, exports from SEZs accounted for 27% of total exports. As per Ministry of Commerce estimates exports from SEZs reached INR 5.24 trillion (USD 78.1 billion) in FY17 and INR 1.35 trillion (USD 20.9 billion) in Q1 FY18. Currently, 100 % FDI is permitted in the real estate projects within the SEZ; 100% FDI permitted for developing townships within SEZs with residential areas, markets, playgrounds, clubs, recreation centres, etc. Minimum land requirement has been brought down from 1000 hectares to 500 hectares for multi-product SEZ and for sector-specific SEZs to 50 hectares. There are currently 211 operational SEZ within the country with majority located in the states of Tamil Nadu, Telangana & Maharashtra. GoI has given approval for as many as 424 SEZ across sectors till September 2017. With the government thrust on kick starting the economy, the setting up of SEZ will give an additional impetus to the growth of the real estate sector.

SECTION V: ABOUT OUR COMPANY AND THE INDUSTRY

OVERVIEW OF INDIAN ECONOMY

India, the world's third largest economy in terms of its PPP (purchasing power parity) and with a population of over 1.2 billion, has witnessed significant economic growth since the country was liberalized in early 1990s. Industrial deregulation, divestment of state-owned enterprises, and reduced Governmental controls on foreign trade and investment, served to accelerate the country's growth and India has posted an average of 7% GDP growth since the beginning of this millennium. According to IMF, India's GDP was estimated at 6.7% in 2017 and it is projected to jump to 7.4% in 2018 and 7.8% in 2019.

India Ratings (Ind-Ra) expects economic recovery to become more broad-based in FY19 with both consumption and investment providing support to economic growth. The four GDP growth drivers from the demand side are private final consumption expenditure (PFCE), government final consumption expenditure (GFCE), gross fixed capital formation (GFCF) and net exports (NE). In the last few years, only PFCE and GFCE have demonstrated sustained and robust growth. Although exports growth picked up in FY18 (till December, 2017), hardening of commodity prices, particularly crude, has led to imports growth outpacing exports growth in FY18.

Ind-Ra expects PFCE to grow at 6.8% in FY19. PFCE grew at an average rate of 6.9% during FY14-FY18, despite two consecutive years of monsoon failure in 2014 and 2015, due to favourable demographic and inflation factors. Given the demographic composition, a large number of people are entering the workforce every year. Assuming only a fraction of them get gainful employment (anecdotal evidence suggests that while about 10-12 million people are entering working-age population every year, only about 3.7 million jobs are created annually), the numbers are still staggering, resulting in a significant impact on consumption. Moreover, sustained expansion of the middle class in India is fuelling growth in consumption. Also, consumer price index (CPI) based inflation, which averaged 9.8% during FY12-FY14, plunged to 5.9% in FY15, and since then has declined to 4.9% in FY16 and 4.5% in FY17; it is expected to decline further to 3.6% in FY18. Such a sharp decline in the CPI inflation is largely driven by collapse of global commodity prices, particularly crude.

Ind-Ra expects GFCE to grow at 8.1% in FY19. Given the size of the government machinery, a significant proportion of demand in the economy is created/generated on account of government expenditure. Also, governments across the globe have been found to step up their expenditure, if need arises, to boost the aggregate demand in the economy. As this was the case in the aftermath of 2008 global financial crisis, even in India, government consumption expenditure grew at an average 11.3% during FY08-FY10

vis-à-vis an average of 4.9% during FY04-FY07. With private investment faltering, the government has again stepped up its spending to support growth. As a result, GFCE grew at an average 10.6% during FY15-FY18 compared to 0.6% during FY14. However, capex spending by the government alone will not be sufficient to step-up investment/GDP ratio in the economy.

Ind-Ra expects investment as measured by GFCF to grow at 6.5% in FY19. This certainly is an improvement over GFCF growth of 2.4% in FY17 and 4.5% in FY18, but is nowhere close to GFCF growth of 16.2% witnessed during FY04-FY08. There is a strong correlation between the GDP growth and investment. With GFCF growth faltering and clocking an average growth of 3.7% during FY14-FY18, the GDP growth during the same period averaged 7.1%. In fact, due to the slowdown in GFCF growth, particularly private corporates and households, the GDP growth has failed to accelerate and sustain itself close to or in excess of 8.0%. Private corporate sector investment grew at an average 48.1% during FY05-FY08. Ind-Ra's study of top 200 listed and unlisted non-financial asset-heavy corporates suggests that private sector capex revival is likely to remain muted till FY20.

Although the Indian economy has largely been driven by domestic demand, external demand played a vital role in pushing the GDP growth during FY04-FY10. The share of exports (goods and services) in India's GDP increased to 25.4% in FY14 from 12.8% in FY01, but thereafter declined sharply to 19.2% in FY17. A reduction in exports contribution to GDP and a plunge in exports growth have been a cause of concern lately. Exports growth of goods and services plummeted to 6.7% in FY17 from average exports growth of 26.3% during FY05-FY09. With the popular sentiment in developed economies turning against globalization of which the Brexit vote and Donald Trump's surprise victory in the US presidential election are testimonies, India is likely to face continued headwinds on the exports front.

From the supply side, all major sectors namely agriculture, industry and services are expected to contribute to FY19 gross value-added (GVA) growth, but the most significant rebound will come from the industrial sector, which reeled under the twin impact of the demonetization and GST in FY18. Ind-Ra therefore sees industrial GVA growing at 6.2% in FY19 as against 4.4% in FY18. Even agriculture and services sectors are expected to grow 2.7% and 8.5% in FY19, a tad higher than 2.1% and 8.3% in FY18, respectively. This will translate into an overall GVA growth of 6.9% in FY19 (FY18: 6.1%).

India now stands at a critical juncture. It needs massive investments to create the jobs, housing, and infrastructure to meet its people's aspirations. GoI has set development of infrastructure as one of the prime objective to accelerate the growth momentum

and has initiated a host of bold new initiatives to address these and other challenges. For instance, the country's flagship 'Skill India' initiative seeks to equip India's growing young workforce with the skills needed to compete in today's rapidly changing workplace. The skills program is complemented by the 'Make in India' initiative, as well as with efforts to ease the process of doing business. The 'Smart Cities' and 'Atal Mission for Rejuvenation and Urban Transportation' (AMRUT) programs focus on creating dynamic urban centres in towns and cities across the country. Thus, India's gross domestic product (GDP) is expected to reach USD 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms.

India: The Fastest Growing Major Economy Over the Next Decade

On the basis of the economic growth projection observed in 700 locations globally, a recent study estimated that the epicentre of global economy by FY25 will lie in India and China. This is also corroborated by the past decadal and last year's growth rate in select regions.

Given the global scenario, independent third-party external forecasters such as IMF and OECD believe India will be the fastest growing major economy in the world over the next decade. The key factors supporting India's growth include favourable age demographics, income dynamics and growing urbanization.

India benefits from a large and growing population in the working age group, as also a relatively young population. This is in sharp contrast to the developed countries – for example, the US, Japan, Germany, France, Italy, etc. – which has seen a sharp fall in working age population growth and which is expected to become lower over the next decades, which will significantly impact their growth prospects. 63.3% of India's population is below 34 years of age (advanced economy: 41.9%) in 2015 and India is expected to ride this demographic advantage for the next three decades.

The other key factor is the income dynamics which saw a rapidly rising middle-class and increased growth in high-income categories. This is an outcome of liberalization post which the Indian economy grew at an annual growth rate exceeding 7% while population growth slowed down to a CAGR of 1.5%. This saw per capita GDP (GDP at market prices) rising strongly over the past decade

Meanwhile, urbanization is taking place at a fast pace in India. As the stride of migration from rural to urban areas continues, about 40% of India's population will be living in urban areas by 2030. By 2050, it is estimated that the number of people living in Indian cities will exceed 800 million – double the current population of the US -- and India will need about 500 new cities to accommodate the influx. India's continuing pattern of urbanization is expected to further increase the need for infrastructure development in the country.

OVERVIEW ON INDIAN REAL ESTATE

Overview of Indian Real Estate Industry

The real estate sector in India is one of the fastest growing sectors in the world. The growth of this sector is mainly attributed to the emergence of nuclear families, rising income level and rapid urbanization. It is the second largest employer after agriculture and almost constitutes 6% of GDP in India. India's real estate sector is the 4th largest in terms of FDI inflows. As per the latest GoI estimates the FDI in this sector stood at USD 24.66 billion from April 2000 to September 2017 and accounted for 7% of total FDI inflows into the country. The Government of India is backing this sector with several initiatives like allowing FDI up to 100% for townships and settlement development projects and 'Housing for All by 2022' with concessions including lower Goods and Services Tax rate and paying out subsidies promptly.

The real estate sector in India can be broadly divided into 5 segments: Residential Space; Commercial Space; Retail Space; Hospitality Space; and Special Economic Zone. There are eight major real estate markets in the country with Mumbai, Delhi NCR, Bangalore followed by Pune, Hyderabad, Chennai, Kolkata and Ahmedabad.

Residential Space: This sector is highly fragmented sector with dominant regional players and very few players have a pan-India presence. At present this sector contributes 60 % of the total real estate sector. The residential real estate market in our country is plagued by excess inventory and predominantly caters to High-Income Group (HIG) and Middle-Income Group (MIG) where purchase of property is seen as an investment avenue. This investment demand is drying up now in the absence of any visible price appreciation which results in lower returns to the investors. However, there is a huge demand for housing in the Low-Income Group segment (LIG) which has been neglected till date. GoI's recent initiative on Affordable Housing will give impetus to low-income group segment. In addition to granting infrastructure status to Affordable Housing, the government has expanded the Pradhan Mantri Awas Yojana (PMAY) benefits to push its vision of "Housing for All by 2022". The government's decision to offer Credit-Linked Subsidy Scheme (CLSS) under the PMAY (Urban) has been helping MIG

home buyers significantly. As per the latest Ministry of Housing estimates, the urban housing shortage is estimated at 10 million units and rural housing shortage is at 48.8 million as of 2017. This provides immense opportunities for the growth of residential space in the LIG segment in the coming years. As per a study done by Cushman and Wakefield on the forecasted demand for housing segment wise for the period 2016-20, it can be clearly seen that the demand in HIG and MIG segment is 52% of the total demand for housing in the market, while supply is 98%, thus adding to the inventory level. The total demand for LIG housing is 48% of the total demand across segments, but new inventory added in this segment constitutes only 2% of the total new inventory added.

Affordable Housing is also attracting the interest of private equity firms driven by macro data points that indicate pent-up demand and government incentives. At the national level, the demand for Affordable Housing alone could be 25 million homes by 2022, which is four times the current housing stock as per an India Rating forecast. This provides an immense opportunity for the private equity firms.

GoI has reiterated its commitment to Affordable Housing by allocating INR 210,000 million in the latest budget for building 5.1 million rural homes in FY19 apart from the 5.1 million being constructed this year under the PMAY. GoI has also proposed to establish a dedicated affordable housing fund under the National Housing Bank which will give further impetus to Affordable Housing. An interest subsidy will be provided to rural households that are not covered under PMAY. The government will also provide INR 1.20 lakh as assistance to every unit in the plains and INR 75000-1.30 lakh to those in hilly and difficult terrains.

Commercial Space: Commercial real estate operates much contrary to the residential segment and has witnessed sustained demand during 2017, primarily from industries like IT, Consulting, BFSI, Telecom and eCommerce, etc. This sector is dominated

by few large players with a pan-India presence. Mumbai, Bangalore and Delhi NCR region accounted for 60% of the total office space in the year 2017. Mumbai will continue to be the best city in India for commercial real estate investment with returns ranging between 12-19 % for the next 5 years followed by Bangalore and Delhi NCR region. The Government's initiative of "Make in India" is providing a major boost to real estate assets like warehouses, industrial assets and logistical assets which form part of the commercial real estate. As per the JLL report of December 2017, approximately 192 million square feet is under construction and announced till 2022. Near 60% of this upcoming supply is lease-only in nature with over 83% of this stock geared towards IT and SEZ development. This sector attracts major realty funds and private equity funds due to attractive returns and demand for commercial space in the market. GoI's recent initiative on Real Estate Investment Trust (REIT) which is modelled on mutual fund will attract a lot of investors. REIT allows investors to invest in portfolios of large scale properties and in turn they can earn a share of the income produced through rentals generated on these properties without having to go out and buy or finance a property.

Retail Space: The retail sector accounts for the small portion of the Indian real estate market. There were 720 malls (approx.) operational in India by the second-quarter of 2016. The organized retail space developers are few and mostly dominated by residential/office space developers. High urbanisation rate, rising young population base, increasing disposable income levels, rising aspirations and increasing proportion of nuclear families which influence urban consumption base and subsequent rapid growth of retail industry drives the market for retail space in India. The demand for the retail space is high and increase in FDI limit for the multi-brand retail will fuel the demand for retail space in India. As a result, retail space is also attracting PE investors driven by better returns and valuations. As per JLL report December 2017, PE investors have invested over USD 724 million in Indian retail realty till September 2017 as against USD 846 million invested in two years between 2015 and 2016. Retail Investors are increasingly focusing on emerging retail destinations (Tier II & III) over metros due to better growth prospects. Over INR 100,000 million has been invested in the construction of retail malls in the last 3 years, out of which INR 59,000 million was invested in the malls in the Tier-II cities. This is mainly driven by increasing retail consumption in the smaller cities and the quality of assets is much better in the Tier II cities which result in better valuations.

Hospitality Space: This space consists of hotels, service apartments and convention centres. This is a competitive sector dominated by many large players. Delhi NCR and Mumbai are the biggest hospitality market in India followed by Bangalore, Hyderabad and Chennai. The key demand drivers for this industry is globalization of Indian businesses, increasing domestic tourism, increasing inbound foreign tourists and medical tourism. This sector is plagued by excess capacity and occupancy rate had come down as the hospitality market in India has gone through a full economic cycle of strong growth followed by a severe downturn. The period 2004 - 2010 witnessed a four-fold increase in supply. The onset of the Global Financial Crisis in 2008 and the addition of large inventory impacted the market severely. From 2009 to 2014, hotel markets witnessed decline in both hotel occupancy and average daily rates, though demand grew at an average rate of 7.8% in the same period. Since 2015 market has shown recovery with a steady economy and increased business travel, demand from domestic and foreign tourists and the government's push to tourism through the e-visa program.

Special Economic Zone: India was one of the first in Asia to recognize the effectiveness of the Export Processing Zone (EPZ) model in promoting exports, with Asia's first EPZ set up in Kandla in 1965. With a view to overcome the shortcomings experienced on account of the multiplicity of controls and clearances; absence of world-class infrastructure; and an unstable fiscal regime and with a view to attract larger foreign investments in India, the Special Economic Zones (SEZs) Policy was announced in April 2000. In FY16, exports from SEZs accounted for 27% of total exports. As per Ministry of Commerce estimates exports from SEZs reached INR 5.24 trillion (USD 78.1 billion) in FY17 and INR 1.35 trillion (USD 20.9 billion) in Q1 FY18. Currently, 100 % FDI is permitted in the real estate projects within the SEZ; 100% FDI permitted for developing townships within SEZs with residential areas, markets, playgrounds, clubs, recreation centres, etc. Minimum land requirement has been brought down from 1000 hectares to 500 hectares for multi-product SEZ and for sector-specific SEZs to 50 hectares. There are currently 211 operational SEZ within the country with majority located in the states of Tamil Nadu, Telangana & Maharashtra. GoI has given approval for as many as 424 SEZ across sectors till September 2017. With the government thrust on kick starting the economy, the setting up of SEZ will give an additional impetus to the growth of the real estate sector.

Market Size of Real Estate Sector in India

The growth of real estate sector in India is primarily driven by increasing urbanization, growth in tourism, government initiatives, growing economy and epidemiological changes. As per the census and World Bank estimates the number of Indians residing in urban areas will increase from 434 million in 2015 to 600 million by 2031. As per Central Statistical Office estimates, more than 70% of India's GDP will be contributed by urban areas in the year 2020. As per a study conducted by Urban Land Institute and PriceWaterHouse, Mumbai and Bangalore have been rated as the top real estate investment destinations in Asia. As per industry estimates, real estate is expected to grow at 15.2% CAGR till 2028 and is estimated to be USD 853 billion by 2028. This growth will be primarily driven by booming Indian economy, rising private consumption expenditure, government initiative to develop 100 smart cities, infrastructure status to Affordable Housing and government thrust on improving the roads and highways which will lead to the creation of newer urban towns. Improved regulatory environment due to enactment of RERA act will throw up right development partners who will be able to inspire confidence in the business and attract fresh investments in the residential sector by both the domestic and foreign investors.

Newer asset categories will be created like student housing and senior living due to inherent demand. Government's initiative on 'Make In India' will generate demand for commercial space. The retail real estate sector will grow due to increasing urbanization and domestic private consumption in the Tier II and Tier III cities. Hospitality sector will grow due to increasing domestic tourism, increasing inbound foreign tourism and GoI initiative on UDAN scheme for developing regional airports which will increase both domestic and foreign travel thereby giving fresh impetus to hospitality sector.

Overview of Real Estate in the state of West Bengal

West Bengal is one of the most densely populated states of India with a population of 913.48 Lakh. West Bengal is India's sixth largest economy and recorded a gross state domestic product (GSDP) of US\$ 140.56 billion in 2015-16. West Bengal acts as natural corridor to North East states of India. West Bengal serves as a gateway for South East Asian countries. Due to increased trade with countries such as China, Japan, Thailand, Singapore and Indonesia, the ports of West Bengal have become active in recent times.

The State's GSDP expanded at a compound annual growth rate (CAGR) of 10.57% for the period from 2004-05 to 2015-16. Agriculture is the chief occupation in the state and contributed 18.8% to the GSDP in 2014-15. Traditionally, the State was an agrarian economy with over two-thirds of the populations living in rural areas. However, in recent years the service sectors have gained prominence in West Bengal, there are over 550 IT and ITeS companies operating in the state which has employed 135,000 professionals as of 2014-15. The state has identified IT as a priority focus sector to be developed as a growth engine in the future. As a result, a number of new towns such as Durgapur, Siliguri and Haldia are emerging as suitable IT destinations with appropriate infrastructure in the form of software technology parks.

Residential Space: West Bengal is a power surplus state where cost of living is low. It has a high literacy rate of 77% with an excellent talent pool. The residential housing prices are low compared to the other Indian cities and commercial real estate rents are low with adequate supply and connectivity. The West Bengal government plans to invest USD 15 billion in the next 5 years to improve the infrastructure by building new ports, roads, and power projects, etc., which will boost the economy of the state and create demand for residential and commercial complexes. The city of Kolkata is fast becoming a hub of residential and commercial complexes, high-rises and malls. The growth of residential real estate is an indicator of the growing capability of the population residing in the Bengal region. Both affordable and luxurious housing segments in Kolkata are showing a stable growth. The boom of IT industry in Sector-V of Salt Lake has resulted in substantial absorption of a large pool of qualified engineers in private firms.

This has created a large demand for housing in Kolkata and surrounding regions. The government's thrust to develop satellite cities like Dankuni & New town and encouraging IT & ITeS to set up shop in the satellite cities have fuelled the demand for housing in the state of West Bengal. The government of West Bengal has recently ratified RERA Act by approving West Bengal Housing Industry Regulation Bill in August 2017.

This legislation will go a long way in making the housing sector transparent and more organized. Over the years the developers in West Bengal have given increasing thrust to Affordable Housing. In the year 2017, nearly 70% of new launches have been in Affordable Housing which was 42% in 2016. The share has been increasing as seen below as the developers have taken cognizance of the pent-up demand. Further, the GoI has recently reduced

the GST from 12 % to 8 % in the Affordable Housing from January 25. This will give a boost to Affordable Housing as the potential buyer in this segment are extremely price-sensitive and are impacted by even a small change in the overall outlay towards home purchases. This reduction in tax is applicable to up to 645 square feet homes purchased by availing the Credit Linked Subsidy Scheme (CLSS) under the Prime Minister Awas Yojana (PMAY). This drop in GST rates will benefit developers too as the higher Input Tax Credit that they can avail on construction material and services can be used to offset GST that a buyer may pay further incentivizing the pricing of homes and buying activity.

The state Government of West Bengal has also taken measures to boost the housing sector by reducing the stamp duty from 5-7% to 2%. The government has also reduced the registration fees by 20% if done within one year from completion of property. The Government has also launched 'Banglar Bari Scheme' where in it will built 4 storied building in the municipal plot to ensure permanent shelter to people from financially weaker sections. The buildings will be constructed by the State Urban Development Agency. The priority will be given to families headed by Women and financially weaker families whose monthly income is less than INR 10,000.

Commercial Space: The commercial real estate market in west Bengal is largely an untapped market for MNC and large corporates. It is the least volatile of all the contemporary markets in India. It is neither predominantly driven by investors nor by end users. There is a lot more value in pricing than some of the similar sized markets in India.

As per the latest report of Cushman and Wakefield (December 2017), there is approximately 24 million square feet of commercial space inventory available in Kolkata and the vacant space is approximately 38%. The commercial space in Kolkata is witnessing a low growth due to slow down in industrial growth and lack of employment opportunities in the state of West Bengal. As a result, this has led realty developers to focus on residential complexes. The commercial real estate in Kolkata predominantly driven by IT/ITeS companies located in Rajarhat and Salt Lake where 90 % of the IT and IT-SEZ hubs are located here.

However, the completion of Metro line from Garia to the airport which will pass through Salt Lake and Rajarhat will improve the connectivity in the southern and eastern parts of the city making these markets more attractive to commercial and residential real estate. Rajarhat has also been included as a Smart City which will boost the demand for commercial space.

The GoI's plan to develop Eastern Dedicated Freight Corridor (route length 1856 Km) as a part of a dedicated Freight Corridor project will led to urbanization in the cities of Haldia, Durgapur & Siliguri. These cities have large population and the proposed setting up of multi-modal logistics park in these cities will generate demand for commercial and residential space.

BUSINESS PROCESS:-

The process of real estate development can be divided into distinct stages of activity. These stages are as follows:

a. Land Identification and Acquisition:

One of the key factors in land identification is the ability to assess the development potential of a location after evaluating the demographic, economic and regulatory factors, and customer feedback. We rely on the experience and ability of our senior management to identify and evaluate potential locations.

We also have a team of professionals who are continuously seeking to acquire developable land in desirable locations on which to construct projects. This team closely works with the various property consultants, advisory bodies, local architects and consultants who provide information regarding the availability of land, development restrictions, planned developments and market trends specific to the location.

The processes involved in the legal feasibility survey like the examination of copies of the relevant title deeds, the examination off corroborative documents including tax and revenue related documentation, etc. is done through independent lawyers. Once the title clearance is obtained, based on the feasibility figures, we acquire the land on various terms or enter into a joint development arrangement with group companies.

b. Project Planning, Designing and Approvals:

Project planning process requires skills of many professionals such as architects, landscape architects, civil engineers and site planners to address project design. Market consultants determine demand and other factors of market demand and specifications. At this stage the plan layout and Designs of the property are prepared and approved by our teams of engineers. The project planning process commences with obtaining the requisite regulatory approvals, environmental clearances and location specific approvals.

c. Project Execution:

We have an integrated in-house project management and execution process team, which focuses on effective supervision of development activities to ensure efficient and timely project execution. After a detailed review of the site parameters, we formalize an architectural brief based of the project concept which is subsequently finalized with selected architects and other external consultants. For construction and for the supply of labour and material, we enter into service/supply orders with various service providers and suppliers. We are not dependent upon any single contractor, builder or supplier for our construction activities. We seek to ensure that our raw material requirements for each project are satisfied on timely manner. We closely monitor the development process, construction quality, actual and estimated project costs and construction schedules.

d. Project Completion:

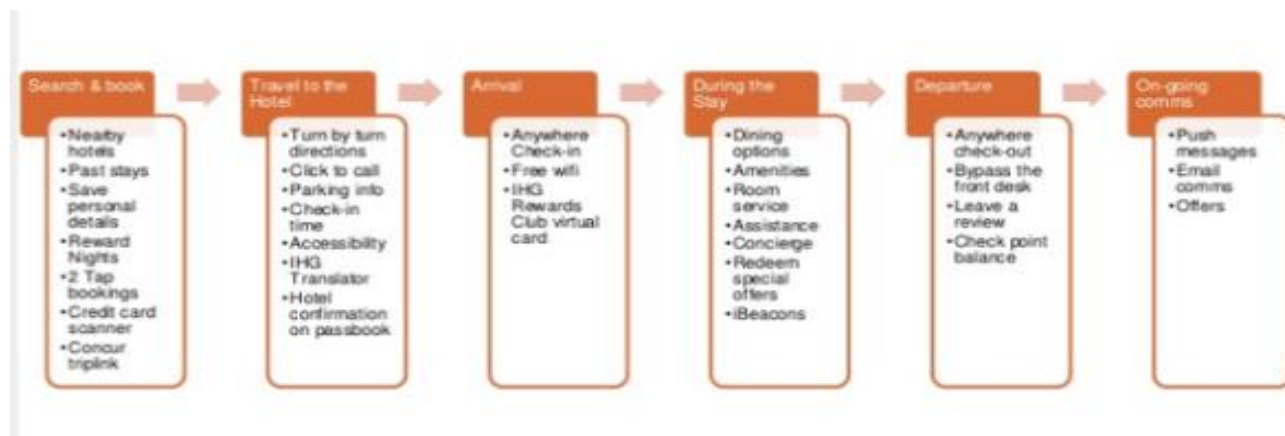

This is final completion stage of our Projects and the buyers are informed during the various stages of construction and the buyers receive advance notice in anticipation of final possession. We register the sale documents and transfer title to the customer upon the completion of the project and the receipt of the building completion certificate from the appropriate authorities. We ensure the entire consideration is paid to us prior to the transfer of title or before possession is handed over, whichever is earlier.

After handing over of the Property, we encourage continuous feedback from our buyers and have a team in place that collates all issues pertaining to customer needs to ensure appropriate action on our part and to ensure customer satisfaction.

e. Sales and Marketing:

The efficiency of the marketing and sales network is critical success of our Company. We market our flats by marketing agencies that looks after marketing operation of our Projects. The sales and marketing begins with project comes in execution till the completion of Projects and handed over the possession to the Customers.

Modes of Acquisition of Interest and Development Rights in Property:

Due to the constraints under the laws prescribing a ceiling on the acquisition of land, a real estate development company may enter into a range of agreements in order to acquire interests in land. Brief details of the most common arrangements are provided herein below:

- Agreements for acquisition of land – A company enters into agreements with third parties which may be in the form of an agreement to sell or a memorandum of understanding for the acquisition of land and pooling of land resources, for the purpose of the development of specified projects such as integrated townships. Under such agreements, the contracting parties agree to acquire land in certain areas selected by a company which agrees to provide an interest-free fund to such contracting parties for meeting the costs of the acquisitions. Further, the contracting parties are required to pool the acquired land with the land owned by a company and deliver possession of the same to our Company for the purpose of developing the project. Typically, a company is free to develop the land at its discretion and is also authorised to develop, market and sell the project at its own cost, risk and expense, if the land is freehold and free from encumbrances.
- Sole development agreements – A company enters into development agreements (“DA”) with the title holders of land for acquiring sole development rights. Typically, under the terms of the DA, whilst the title owner may continue to own the land, the company is entitled to sole development rights in the project and can sell units in the project and appropriate the receipt of the same at its sole discretion. For acquiring the sole development rights, generally a lump sum consideration is paid to the title

holders of land.

- Joint development agreements - Another mode of acquiring land used by a company is to enter into joint development agreements (the “JDA”) with the title holders of land for joint development or development by the company of the real estate projects. The JDA may be in the form of a memorandum of understanding or a joint venture agreement. Under the terms of a JDA, a company may be authorised to develop, construct, finance and market the project on the relevant land.
- Public auctions and Government allotment - Various State Governments undertake large real estate development projects, for the purposes of which bids satisfying certain eligibility criteria (such as technical and financial criteria) are invited. After evaluation of the bids submitted by a company, the Government through the various regional bodies and local development authorities, selects the most eligible company for the development of the project and undertakes to grant certain rights for the purposes of a project such as a perpetual lease of the project land in favour of the company, subject to satisfaction of certain conditions. The governmental authority may grant such an undertaking in the form of a reservation-cum-allotment letter, the salient terms of which usually include among other things, the nature of allotment (such as lease and conveyance), the period of grant, the consideration for allotment and the payment schedule.

Ornate Lifestyle claims it lost the original share transcripts and requested Gillanders Properties to issue duplicate share certificates. That apart, there are allegations of mismanagement of affairs of Gillanders Properties Private Limited against Jain Group of shareholders and Shrayans Jain Group of Shareholders, which is also being contested by Jain Group of shareholders on the ground that Ornate Lifestyle is not a shareholder and this petition is not maintainable by it.

C. LITIGATION INVOLVING PROMOTERS

I. LITIGATION AGAINST PROMOTERS

1. Litigation involving Criminal Matter:

There is a criminal complaint pending before the Learned Chief Judicial Magistrate at Alipore which the Directors are contesting, being as follows:

Sr. No	Cause Title	Amount in dispute/demanded (in ₹)	Summary
1.	Complaint Case No. 452/2016 (M/s Ornate Lifestyle Private Limited vs. Prem Lal Jain & Shrayans Jain & Rishi Jain)		<p>This is connected to the facts in CP No. 59/2013.</p> <p>Ornate Lifestyle Private Limited had filed a complaint being GR Case No. 1301/2014 before Chief Metropolitan Magistrate, Calcutta arising out of Shakespeare Sarani Police Station Case No. 197/2014 under Section 156(3) of the Criminal Procedure Code by Ornate Lifestyle Private Limited against (1) Prem Lal Jain (2) Shrayans Jain and (3) Rishi Jain alleging forgery against the said persons. In this matter, the police authorities after investigation submitted a final report that all the allegations against (1) Prem Lal Jain (2) Shrayans Jain and (3) Rishi Jain are incorrect. Ornate Lifestyle Private Limited then filed a petition challenging the findings of the police which is still pending.</p> <p>Gillanders Properties Private Limited had also filed a complaint giving rise to Hare Street Police Station Case No. 121/2015 against (1) Bijay Bothra (2) Sanjay Maloo and (3) Chandrasekhar Soni alleging that the said persons have made counterfeit seals of Bhawanipore police station, forgery etc. In this matter, the police authorities filed a</p>

			<p>chargesheet bearing No. 304/2015 against Bijay Bothra and (2) Sanjay Maloo under Sections 467, 468, 471, 473, 474, 475, 476, 379, 120B and 34 of the Indian Penal Code.</p> <p>It is also relevant to mention that Ornate Lifestyle filed a complaint under Section 156(3) of the Criminal Procedure Code before the Chief Judicial Magistrate at Alipore giving rise to Ballygunge Police Station Case No. 104/2016 under Section 406, 420, 465, 467, 468, 477A and 120B of Indian Penal Code, 1860 which was been stayed by the Hon'ble High Court in CRR/3257/2016.</p> <p>In background of the aforesaid facts, in July, 2016, (1) Prem Lal Jain (2) Shrayans Jain and (3) Rishi Jain received summons in Complaint Case No. 452/2016 pending before the Chief Judicial Magistrate, Alipore being a complaint under Section 200 of the Criminal Procedure Code filed under Sections 406 and 120B of the Indian Penal Code. From this said complaint, it appeared that the complaint has been filed in the same background of facts as of GR Case No. 1301/2014 before Chief Metropolitan Magistrate, Calcutta arising out of Shakespeare Sarani Police Station Case No. 197/2014 even though it alleged commission of offences under Sections 406 and 120B of the Indian Penal Code. However, it appeared that the Chief Judicial Magistrate, Alipore had taken cognizance of the matter under Section 406, 467, 468, 471 and 120B which is similar to the GR Case No. 1301/2014 before Chief Metropolitan Magistrate, Calcutta as also Ballygunge Police Station Case No. 104/2016. Therefore, (1) Prem Lal Jain (2) Shrayans Jain and (3) Rishi Jain filed a criminal revision petition</p>

			<p>being CRR No. 2536 of 2016 before the High Court at Calcutta which was disposed off with a direction to (1) Prem Lal Jain (2) Shrayans Jain and (3) Rishi Jain to agitate its case before the Chief Judicial Magistrate, Alipore.</p> <p>(1) Prem Lal Jain (2) Shrayans Jain and (3) Rishi Jain then filed a discharge petition in this complaint relying upon the fact that upon investigation in GR Case No. 1301/2014, nothing was found against (1) Prem Lal Jain (2) Shrayans Jain and (3) Rishi Jain., The discharge petition is pending consideration.</p>
2.	C.S. 0094357/2016 (Kohinoor Steel Private Limited vs. Dream Developers Private Limited & Rishi Jain & Shrayan Jain & Prem Lal Jain)		<p>Complaint was filed before the Learned Metropolitan Magistrate under Sections 500, 501 and 120B of the IPC by Messers Kohinoor Steel Private Limited filed a criminal complaint alleging that the petitioners wanted to destroy the reputation and goodwill of Kohinoor Steel Private Limited because of a personal dispute regarding a property situate at 67C, Ballygunge Circular Road, Kolkata- 700019.</p> <p>An order dated 17.04.2017 was passed by Justice Joymalya Bagchi staying the proceeding in case no.
