SECTION III: RISK FACTORS

RISK FACTOR

*Any investment in equity securities involves a high degree of risk. Investor should carefully consider all the information in this prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. To obtain a more complete understanding, you should read this section together with Sections titled, **Our Business**, and **Management's Discussion and Analysis of Financial Condition and Results of Operations** beginning on page no. 73 and 124 respectively, as well as the other financial and statistical information contained in this prospectus.*

Any of the following risks, as well as the other risks and uncertainties discussed in this prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

This prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including the considerations described below and elsewhere in this prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. You should not invest in this Issuing unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Restated Financial Statements prepared in accordance with Indian AS, as per the requirements of the Companies Act, 2013, and SEBI (ICDR) Regulations.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. *Some risks may not be material individually but may be material when considered collectively.*
2. *Some risks may have material impact qualitatively instead of quantitatively.*
3. *Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTOR:

1. ***We are dependent on our ability to develop new services and products and enhance our existing services and products. If our products and services do not gain market acceptance, our operating results may be negatively affected.***

Rapid technological advances, changing delivery models and evolving standards in software development and communications infrastructure, changing and increasingly sophisticated customer needs and frequent new product introductions and enhancements characterize the industry in which we operate. Digitization is driving major changes in the global business software market, with IT leaders looking to adopt new technologies and software platforms to meet business needs, including revenue growth driven through new products and services, better customer experience and delivery mechanisms, and growth in revenue and profits. Our success depends upon our ability to anticipate, design, develop, test, market, license and support new software products, services, and enhancements of current products and services in response to evolving industry requirements.

To effectively meet customer demand, it is important that we continue to enhance our products and service offerings. We have developed progressive web apps and data services. The markets for our offerings are rapidly evolving due to which the level of acceptance of such products and services is not certain.

The software industry is increasingly focused on cloud computing, mobility, social media and platform as a service among other continually evolving trends. In addition, our products, services, and enhancements must remain compatible with standard platforms and file formats. Often, we must integrate software licensed or acquired from third parties with our proprietary software to create or improve our products. If we are unable to successfully integrate third party software to develop new software products, services, and enhancements to existing products and services, or to complete the development of new products and services which we license or acquire from third parties, our operating results will materially suffer.

If we are unable to develop new or sufficiently differentiated products and services, enhance our product offerings and support services in a timely manner or position and price our products and services to meet demand including in

response to new industry standards, customers may not purchase or subscribe to our software products or cloud offerings or renew software support or cloud subscription contracts. Renewals of these contracts are important to the growth of our business.

If the markets for our services fail to develop, develop slower than expected or experience increased competition, our business may suffer. As a result, we may be unable to successfully market our existing services and products, develop and successfully launch new products and services and enhancements to existing products and services, complete customer implementations on a timely basis, or complete products and services currently under development. If our services are not accepted by our customers or by associated businesses in our target verticals and markets, our business, operating results and financial condition will be materially adversely affected.

2. *The business practices of our customers with respect to the collection, use and management of personal information could give rise to operational interruption, liabilities or reputational harm as a result of governmental regulation, legal requirements or industry standards relating to consumer privacy and data protection.*

As regulatory focus on privacy issues continues to increase and global laws and regulations concerning the handling of personal information expand and become more complex, potential risks related to data collection and use within our and our customers' business will intensify. In addition, many governments have enacted or are considering enacting legislation or regulations, or may in the near future interpret existing legislation or regulations, in a manner that could significantly impact our ability and that of our customers and data partners to collect, augment, analyse, use, transfer and share personal and other information that is integral to certain services we provide. This could be true particularly in those jurisdictions where privacy laws or regulators take a broader view of how personal information is defined, therefore subjecting the handling of such data to heightened restrictions that may be obstructive to our operations of that of our customers and data providers. For instance, Directive 95/46/EC or the Data Protection Directive in the European Union has been replaced by the European General Data Protection Regulation in May 2018, which imposes additional obligations and risks upon our business with respect to processing of personal data and on the free movement of such data.

We may expand our operations to countries which have passed or are considering passing legislation that requires data to remain localised "in country," as this imposes financial costs on any service provider that is required to store data in jurisdictions not of its choosing and non-standard operational processes that are difficult and costly to integrate with global processes. Changes in laws or regulations associated with the enhanced protection of certain types of sensitive data could greatly increase our cost of providing our products and services or even prevent us from offering certain of our products and services in jurisdictions that we operate.

Regulators globally are also imposing greater monetary fines for privacy violations and some regulators may pass legislation that would impose fines for privacy violations based on a percentage of global revenues. Responding to an investigation or enforcement action could divert attention and resources of our management, which would cause us to incur investigation, compliance and defence costs and other professional fees, and adversely affect our business, operating results, financial condition and cash flows.

Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

Additionally, public perception and standards related to the privacy of personal information can shift rapidly, in ways that may affect our business operations or influence regulators to enact regulations and laws that may limit our ability to provide certain products and services. Any failure or perceived failure by us to comply with Indian or foreign laws and regulations, including laws and regulations regulating privacy, data security, or consumer protection, or other policies, public perception, standards, self-regulatory requirements or legal obligations, could result in lost or restricted business, proceedings, actions or fines brought against us or levied by governmental entities or could adversely affect our business and our reputation.

Further, the costs of compliance with, and other conditions imposed by laws, regulations and policies that are applicable to the businesses of our customers may limit the use and adoption of, and reduce the overall demand for, our products and services. Privacy and personal information security concerns may inhibit market adoption of our products and services, particularly in certain industries and foreign countries. Any such changes in the laws of any of the markets in which we operate or intend to in the future may adversely affect our results of operations and business prospects.

3. *Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.*

Our continued growth depends in part on the ability of our existing and potential customers to access our solutions at any time. Although there have not been instances in the past where interruptions or problems with our technology and infrastructure have caused performance issues, we may in future experience disruptions, data loss, outages and other

performance problems with our technology infrastructure due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service attacks or other security-related incidents. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times and as our products and websites of our customers become more complex and user traffic increases. If our products and websites of our customers are unavailable or if users of such products and websites are unable to access products and websites within a reasonable amount of time, or at all, our business would also be harmed. Any disruptions in these services, including as a result of actions outside of our control, would significantly impact the continued performance of our products. Any loss of the right to use any of these services could result in decreased functionality of our products until equivalent technology is either developed by us or, if available from another provider, is identified, obtained and integrated into our infrastructure. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

4. *The length of our sales cycle may fluctuate significantly and depends on several external factors which may result in significant fluctuations in our revenues.*

A customer's decision to purchase our services or products often involves a comprehensive implementation process across the customer's network(s) which includes customer education, evaluation by a number of employees in our customers' organisations and, often, a significant strategic or operational decision by our customers. Our sales efforts involve educating our customers about the use and benefits of our products and solutions, including any potential cost savings achievable by organisations that partner with us.

Customers typically undertake a significantly long evaluation process which also involves evaluation of our competitors' services and can result in a lengthy sales cycle. Moreover, a purchase decision by a potential customer typically requires extended evaluation, testing and the approval of senior decision makers, including the boards of directors of our customers. We spend substantial time, effort and money on our sales efforts without any assurance that our efforts will produce any sales. Additionally, licensing and implementing our products and any related services may entail a significant commitment of resources by prospective customers, accompanied by the risks and delays frequently associated with significant technology implementation projects. Such delays and fluctuations could cause our revenues and results of operation to fluctuate significantly across time periods, and we may not be able to adjust our costs quickly enough to offset such lower revenues, potentially adversely impacting our business, operating results and financial condition.

5. *Our business and results of operations are dependent on the contracts, including certain short-term contracts that we enter into with our customers. Any breach of the conditions under these contracts may adversely affect our business and results of operations.*

We have entered into short-term as well as long-term contracts/ master service agreements with our customers which, depending on the customer, may contain terms and conditions which typically include: (i) the nature and specification of services to be provided by us, (ii) customisation and integration of the software with our customers' pre-existing systems, (iii) manner of inspection, testing and acceptance of software provided by us, (iv) assignment of the work and non – compete (v) representations, warranties and disclaimers made by us in relation to the services provided by us, (vi) delays, corrective steps and damages, (viii) undertakings in relation to protection of intellectual property of our customers, (ix) indemnification of our customers due to our negligence or breach of any term of the agreement, and (x) limitation of liability.

At times, we may have to agree with certain onerous terms laid down by our customers. Our customers may require us to furnish a service guarantee pursuant to the issuance of a statement of work. For instance, some of our customers are also entitled to terminate their contracts with us unilaterally, and in most cases, without cause and by providing a notice. Further, certain customers prohibit us from deploying any employees, agents or subcontractors to provide services to competitors of our existing customers. These onerous terms may affect our future growth and expansion of our customer base.

In addition, our agreements with customers and other third parties include indemnification or other provisions under which we agree to indemnify or otherwise be liable to them for losses suffered or incurred as a result of claims of intellectual property infringement, or any default, breach or omission by us in relation to the agreements. The term of these contractual provisions often survives termination or expiration of the applicable agreement. Large indemnity payments or damage claims from contractual breach could harm our business, results of operations and financial condition. Although we normally contractually limit our liability with respect to such obligations, we may still incur substantial liability related to them. Any dispute with a customer with respect to such obligations could have adverse effects on our relationship with that customer and other current and prospective customers, reduce demand for our products, damage our reputation and harm our business, results of operations and financial condition.

While we internally consider all such factors prior to entering into these contracts, we cannot assure you that we will be able to continue to enter into similar such contracts in the future, which are not more onerous than the contracts we enter into currently. Additionally, non-compliance with the terms of our contracts, including breach of confidentiality

provisions, may subject us to damages or penalties, lead to termination of the contracts and also result in us being unable to attract further business in the future.

6. *We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service. We may also be liable in the event of misuse of our services or platforms.*

We deliver technology as a service, and errors or defects in the software applications underlying our services, or a failure of our hosting infrastructure, may make our services unavailable to our customers. Majority of our contracts or master service agreements involve projects that are critical to the operations of our clients' businesses. Any failure in a client's system and any direct damages, expenses, costs, obligations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day operation of our services, upgrades or otherwise, could damage our customers' businesses.

If we have any errors, defects, disruptions in service or other performance problems with our services, our customers could elect not to renew our contract, or delay or withhold payments to us and we could lose future sales. Further, our customers may make claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or litigation costs. We may in the future, experience, misuse of our services or platforms. The occurrence of any such events in the future could lead to user dissatisfaction and discourage the use of our products and services. Such events may also give rise to complaints and actions against us. All these factors could adversely affect our business and results of operation.

7. *Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.*

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

(Rs. in Lakhs)		
Particulars	31-03-2019	31-03-2018
Net cash from operating activities	244.04	48.90
Net Cash (used in) / from investing activities	(294.99)	84.81
Net Cash used in financing activities	95.33	(137.70)
Net increase/(decrease) in cash and cash equivalents	44.38	(3.99)

8. *Our failure to adapt to technological developments or industry trends could affect the performance and features of our products and services and reduce our attractiveness to our customers.*

As our operations grow in scope and size, whether through offering of new services or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced services, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition.

Further, we may also not be able to attract talent to continue with the required upgrades and improvements to our systems. Our new systems, infrastructure and technologies may not perform satisfactorily, or be used effectively and we may also fail to adapt our products and services to our increased size and scale, customer requirements or emerging trends and industry standards. Further, there is no assurance that we will be able to downsize and scale back our systems and platforms quickly and efficiently enough to reduce unnecessary costs and expenses in the event that user demand falls below our expectations. In addition, to effectively manage our growth, we will also need to continue to improve our operational, financial and management controls, and our reporting systems and procedures.

Continued growth increases the challenges involved in, amongst others, continuous training and development of skilled and competent personnel and employees and developing and improving internal administrative infrastructure. These systems, enhancements and improvements will require significant capital expenditures and management resources. Failure to implement these improvements could adversely affect our ability to manage our growth. If we do not effectively manage our growth or appropriately expand and upgrade or downsize and scale back our systems and platforms, as the case may be, in a timely manner or at a reasonable cost, or both, or at all, we may lose market opportunities or damage our attractiveness and reputation with our customers, which may adversely affect our business, financial condition and results of operations.

9. *Our business is dependent on developing and maintaining continuing relationships with our clients and customers. The loss of any significant client or customer could have a material adverse effect on our business, financial condition and results of operations.*

Although, we generally do not enter into long-term supply contracts with our customers, our business is dependent on developing and maintaining a continuing relationship with our key clients and customers. In the event of a significant decline in the demand for our products or services by our key clients, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these clients and customers or that we will be able to replace these clients in case we lose any of them.

10. *Our Registered Office and other premises from where we operate are not owned by us*

Our Registered Office premise is situated at 405, Pride Icon, Near Columbia Asia Hospital, Kharadi Bypass Road, Pune, Maharashtra-411014, India. which is owned by Mr. Anshu Goel. We are occupying the premises on basis of Leave and License agreement dated 28/05/2019 signed between Mr. Anshu Goel and our Company. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. For further details, see section “Our Business” on page 73 of this prospectus. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

11. *Our Company’s insurance coverage may not be adequate to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work.*

Our Company has not covered itself against business or operational risks.

12. *We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.*

Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

13. *We have entered into certain related party transactions and may continue to do so.*

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on arms length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this prospectus and, also see the section “Related Party Transactions” on page no. 120 of this prospectus.

14. *Our Company has made application for registration of trademark, which is under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.*

We have made an application with ‘The Registrar of Trademarks, Trademarks Registry’ for registration of trademark

of our logo  under class 9 and 42. The registration for the said trademark in our name is important to retain our brand equity. If our application for registration is not accepted or if the oppositions filed against our trademark application if any, are successful, we may lose the statutory protection available to us under the Trademarks Act, 1999 for such trademark. Further, we cannot assure that our pending application would be granted registration or will not be challenged or if granted registration, will not be invalidated or circumvented or will offer us any meaningful protection. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate. For further details of our trademarks, please see “Government and Other Approvals” on page 132 of this prospectus.

15. *We are dependent on a number of key managerial personnel, including our senior management, and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.*

Our performance depends largely on the efforts and abilities of our senior management and other key managerial personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our Company does not maintain any director’s and officer’s insurance policy or any key man insurance policy. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

16. Upon completion of the Issue, our Promoters / Promoter Group may continue to retain significant control, which will allow them to influence the outcome of matters submitted to the shareholders for approval.

After completion of the Issue, our Promoters and Promoter Group will collectively own 73.49% of the total post issue Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

17. Our Promoters and certain of our Directors hold Equity Shares in our Company and are therefore interested in our performance in addition to their remuneration and reimbursement of expenses.

Certain of our Directors including our Promoters are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see the sections titled “Our Management” and “Our Promoters and Promoter Group” on pages 87 and 98 respectively of this prospectus.

18. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

19. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

We operate in an industry, which faces intense competition from established as well as unorganized players. Our competition depends on several factors, which include quality, price and our pace in keeping up with the changing trends. Competition emerges from both organized as well as unorganized sector.

20. We may need to change our pricing models to compete successfully.

The competition we face in the sales of our products and services and general economic and business conditions as well as changes in the IT industry standards and landscape, can put pressure on us to change our pricing models. If our competitors offer deep discounts on certain products or services or develop products that the marketplace considers more valuable, we may need to lower prices or offer other favourable terms in order to compete successfully. Any such changes may reduce our sales or margins and could adversely affect our business and operating results. The increased availability and adoption of open source software may also cause us to change our pricing models in the short term as we transition to increase our presence in the cloud platform.

Our competitors may offer lower pricing on their offerings, which could put pressure on us to further discount our products and services. Any broad-based change to our prices and pricing policies could cause our revenues to decline or be delayed as our sales force implements and our customers adjust to the new pricing policies. Some of our competitors may bundle products for promotional purposes or as a long-term pricing strategy or provide guarantees of prices and product implementations. These practices could, over time, significantly constrain the prices that we can charge for some of our products. If we do not adapt our pricing models to reflect changes in customer use of our products or changes in customer demand, our revenues could decrease.

21. Product development is a long, expensive and uncertain process and our current expenditure in product development may not provide a sufficient or timely return.

The development of our products is a costly, complex and time-consuming process, and the investment in their development often involves a long wait until a return is achieved on such an investment. We have made, and will continue to make, significant investments in product development and related product opportunities. Investments in new technology and processes are inherently speculative. Commercial success depends on many factors, including the degree of innovation of the software products and services developed and effective distribution and marketing. Such expenditure may adversely affect our operating results if they are not offset by corresponding and timely revenue increases. We must continue to dedicate a significant amount of resources to our research and development efforts in order to maintain our competitive position. However, significant revenues from new software product and service

investments may not be achieved for a number of years, or at all. Moreover, new software products and services may not be profitable, and even if they are profitable, operating margins for new software products and services may not be in line with the margins we have experienced for our existing or historical software products and services.

Moreover, we may determine that certain products or services do not have sufficient potential to warrant the continued allocation of resources and accordingly, we may elect to terminate the development of such products. If we terminate a product in development in which we have invested significant resources, our prospects may suffer, as we will have expended resources on a project that will not provide any return on our investment and also may have missed the opportunity to have allocated those resources to potentially more productive uses. In turn, this may adversely impact our business, operating results and financial condition.

22. *If security measures implemented by us are compromised or if our products and services are perceived as vulnerable, our operations could be materially adversely affected.*

Our products and services store, retrieve and manage our customers' information and data, external data, as well as our own data. Third parties may identify and exploit product and service vulnerabilities, penetrate or bypass our security measures, and gain unauthorised access to our or our customers', partners' and suppliers' software and cloud offerings, networks and systems, any of which could lead to the compromise of personal information or the confidential information or our data or that of our customers. Data may be accessed or modified improperly as a result of customer, partner, employee or supplier error or misconduct and third parties may attempt to fraudulently induce customers, partners, employees or suppliers into disclosing sensitive information such as user names, passwords or other information in order to gain access to our data, our customers', suppliers' or partners' data or our IT systems, customers, suppliers or partners.

High-profile security breaches at companies have increased in recent years, and security industry experts and government officials have warned about the risks of hackers and cyber-attacks targeting IT products and businesses. These risks will increase as we continue to grow our offerings and store and process increasingly large amounts of data, including personal information and our customers' confidential information and data and other external data, especially in customer sectors involving particularly sensitive data such as healthcare, financial services and the government.

Further, as privacy and data protection become more sensitive issues in India, we may also become exposed to potential liabilities. For instance, under the Information Technology Act, 2000, as amended, we are subject to civil liability for wrongful loss or gain arising from any negligence by us in implementing and maintaining reasonable security practices and procedures with respect to sensitive personal data or information on our computer systems, networks, databases and software. India has also implemented privacy laws, including the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011, which impose limitations and restrictions on the collection, use and disclosure of personal information. Any systems failure or security breach or lapse on our part or on the part of our employees that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability.

We could suffer significant damage to our brand and reputation if a cyber-attack or other security incident were to allow unauthorised access to or modification of our customers' or suppliers' data, other external data, or our own data or our IT systems or if the services we provide to our customers were disrupted, or if our products or services are perceived as having security vulnerabilities. Customers could lose confidence in the security and reliability of our products and services, and this could lead to fewer customers using our products and services and result in reduced revenue and earnings. The costs we may incur to address and fix these security incidents would increase our expenses. These types of security incidents could also lead to breach of contracts with customers, lawsuits, regulatory investigations and claims and increased legal liability, including contractual costs related to customer notification and fraud monitoring, all of which could materially adversely affect us.

23. *Our industry is highly competitive, and we may not be able to compete effectively with competitors.*

Our industry is highly fragmented and intensely competitive. Our competitors are numerous, ranging from small private firms to multi-billion-dollar public companies. Contract awards are based primarily on quality of service, relevant experience, staffing capabilities, reputation, geographic presence, stability and price. In addition, the technical and professional aspects of our services generally do not require large upfront capital expenditures and provide limited barriers against new competitors. Many of our competitors have achieved greater market penetration in some of the markets in which we compete and have more personnel, technical, marketing and financial resources or financial flexibility than we do. If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to offer services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer. These competitive forces could force us to make price concessions or otherwise reduce prices for our services. If we are unable to maintain our competitiveness, our market share, revenue, and profits could decline.

24. *The proper functioning of our solutions may be impaired by fraudulent or malicious activity, including non-human traffic.*

It is possible that fraudulent or malicious activity, including non-human traffic, could impair the proper functioning of our solutions. For instance, the use of bots or other automated or manual mechanisms could adversely affect the performance of our services and solutions. It may be difficult to detect fraudulent or malicious activity, particularly because the perpetrators of such activity may have significant resources at their disposal, may frequently change their tactics and may become more sophisticated, requiring us to update, upgrade and improve our processes for detecting and controlling such activity. Such fraudulent or malicious activity could result in negative publicity and reputational harm and require significant additional management time and attention. Further, if we fail to detect or prevent fraudulent or malicious activity in a timely manner, or at all, our customers may experience or perceive a reduced return on their investment or heightened risk associated with the use of our products and services, resulting in refusals to pay, demands for refunds, loss of confidence, withdrawal of future business and potential legal claims.

25. *Our client's proprietary rights may be misappropriated by our employees in violation of applicable confidentiality and non-disclosure agreements and as a result, cause us to breach our contractual obligations in relation to such proprietary rights.*

We can give no assurance that the steps taken by us will be adequate to enforce our clients intellectual property rights or to adequately prevent the disclosure of confidential information by an employee or subcontractor or a subcontractor's employee. If our client's proprietary rights are misappropriated by our employees in violation of any applicable confidentiality agreements or otherwise, our clients may consider us liable for that act and seek damages and compensation from us. In addition, our client contracts may require us to comply with certain security obligations including maintenance of network security, back-up of data, ensuring our network is virus free and ensuring the credentials of our people that work with our clients. We cannot assure you that we will be able to comply with all such obligations and that we will not incur liability nor have a claim for substantial damages against us.

26. *Increases in wages for IT professionals could reduce our cash flows and profit margins.*

Historically, wage costs in the Indian IT services industry have been significantly lower than wage costs in developed countries for comparable skilled technical personnel, which has been one of India's competitive strengths. However, wage increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. In the long term, wage increases may make us less competitive unless we are able to continue increasing the efficiency and productivity of our professionals and the quality of our services and the prices we can charge for our products and services. Increases in wages, including an increase in the cash component of our compensation expenses, may reduce our cash flows and our profit margins and have a material adverse effect on our business, financial conditions and results of operations.

27. *The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price.*

Sl. No.	Name of the Promoter	No. of Equity Shares Held	Avg. Cost of Acquisition (In ₹ per Equity Share)
1	Anshu Goel	12,24,000	3.40
2	Dhananjay Subhash Goel	6,12,000	3.40

The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire, by way of fresh issuance or bonus issue and conversion of outstanding loan, the Equity Shares less amount received by them for the sale of Equity Shares through transfer, if any and the net cost of acquisition has been divided by total number of shares held as on date of the prospectus.

28. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

29. *Industry information included in this prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may

be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this prospectus.

- 30. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” beginning on page 51 of this prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

We intend to use entire Issue Proceeds towards meeting the working capital requirement and general corporate purpose. We intend to deploy the Net Issue Proceeds in financial year 2019-20 and next years and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled Objects of the Issue beginning on page 51 of this prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “Objects of the Issue” beginning on page 51 of this prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

- 31. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.***

Since the Issue size is less than Rs. 10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- 32. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see Dividend Policy on page 103 of this prospectus.

- 33. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

- 34. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue price is based on numerous factors. For further information, see the chapter titled *Basis for Issue Price* beginning on page no. 55 of this prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

- 35. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm our financial condition and operating results.***

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own,

or through tie-ups, acquisitions, strategic alliances, partnerships or joint ventures across countries and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and speaking to several potential partners, we have not entered into any definitive agreements in relation to this. Further, the identification of suitable acquisition can be difficult, time-consuming and costly, and we may not be able to successfully complete acquisitions that we target in the future. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and sales and marketing functions and the diversion of management time and focus from operating our business to addressing acquisition integration challenges. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could cause us to fail to realise the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

36. *Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.*

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

37. *Our customers may engage in certain transactions in or with countries or persons that are subject to U.S. and other sanctions.*

U.S. law generally prohibits U.S. persons from directly or indirectly investing or otherwise doing business in or with certain countries that are the subject of comprehensive sanctions and with certain persons or businesses that have been specially designated by the OFAC or other U.S. government agencies. Other governments and international or regional organizations also administer similar economic sanctions. We may provide services to our customers, who in-turn may be doing business with, or located in, countries to which certain OFAC-administered and other sanctions apply, such as Iran. Although we are currently not in violation of any applicable sanctions, if it were determined that transactions in which we participate violate U.S. or other sanctions, we could be subject to U.S. or other penalties, and our reputation and future business prospects in the United States or with U.S. persons, or in other jurisdictions, could be adversely affected. Further, investors in the Equity Shares could incur reputational or other risks as the result of our customers' dealings in or with countries or with persons that are the subject of U.S. sanctions.

EXTERNAL RISK FACTORS

1. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

2. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.*

Our Company currently prepares its annual financial statements under Indian AS. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the prospectus should accordingly be limited.

4. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

5. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

6. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and IT industry contained in the prospectus.*

While facts and other statistics in the prospectus relating to India, the Indian economy and the IT industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “Industry Overview” beginning on page 59 of this prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

7. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

10. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

11. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

12. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

COMPETITION: -

The market is highly competitive and fragmented. We compete with a variety of information technology companies, as well as service providers. Some of our competitors have great financial, workforce, marketing, sales and other resources. However, none of these companies is involved exclusively in a business similar to business of the Company and comparable to the scale of operations. We believe that the principal competitive factors include product quality, reliability, and price that are able to comprehensively address varying requirements of different customer segments and specific customer needs. We believe that our ability to compete effectively is primarily dependent on ensuring consistent product quality and timely delivery at competitive prices, thereby strengthening our brand over the years. We believe that our cost effective and integrated offerings, our focus on customer satisfaction and our reliability combined with our quality consciousness provides us with competitive advantage in our business.

In today's dynamic business environment which is filled with rapid change of technology, government policies, mounting competitive threats and constant new entrants into the market, makes it challenging to sustain and handle the intricacies and provide competitive solutions to the clients. We face competition from domestic and international Companies. We foresee this competition to continue to grow as the demand for software development solutions increases. Apart from that, clients may reduce their dependence on vendors in India and outsource work to other offshore destinations such as Ukraine, Philippines and other Eastern European countries. Further we believe that our competition also depends on several factors which include currency fluctuations, changing business framework, information technology policies, difficulty to retain skilled staff etc.

INDUSTRY RELATED LAW:

Information Technology Act, 2000

The Information Technology Act, 2000 (the “IT Act”) creates liability on a body corporate which is negligent in implementing and maintaining reasonable security practices and procedures, and thereby causing wrongful loss or wrongful gain to any person, while possessing, dealing with, or handling any sensitive personal data or information in a computer resource owned, controlled or operated by it but affords protection to intermediaries with respect to third party information liability. The IT Act also provides for civil and criminal liability including compensation, fines and imprisonment for various computer related offences. These include offences relating to unauthorized disclosure of confidential information and committing of fraudulent acts through computers, tampering with source code, unauthorised access, publication or transmission of obscene material etc. The IT Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. Additionally, the IT Act empowers the Government of India to direct any of its agencies to intercept, monitor or decrypt any information in the interest of sovereignty, integrity, defence and security of India, among other things.

In April 2011, the Department of Information Technology under the Ministry of Communications and Information Technology notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 under section 43A of the IT Act (the “IT Personal Data Protection Rules”) and the Information Technology (Intermediaries Guidelines) Rules, 2011 under Section 79(2) of the IT Act (the “IT Intermediaries Rules”). The IT Personal Data Protection Rules prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data, and require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Personal Data Protection Rules further require that all such personal data be used solely for the purposes for which it was collected and any third party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law. The IT Intermediaries Rules require persons receiving, storing, transmitting or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the Intermediaries Rules and to disable such information after obtaining knowledge of it.

Health Insurance Portability and Accountability Act of 1996 (HIPAA Standard)

In the year of 1996, a significant healthcare reform law was passed by Congress in the United States. The primary purpose of the Health Insurance Portability and Accountability Act of 1996 or HIPAA as it is popularly known is to tighten the laws around healthcare billing fraud and provide better access to health insurance. The other corollary sections of HIPAA include administrative simplification and the privacy of health information. HIPAA has successfully combated fraud in health insurance, promoted the use of medical savings accounts, simplified the administration of health insurance, improved the access to long-term services and increased the portability of health insurance coverage. Information security and the American Medical Billing Industry go hand in hand. With the advent of the HIPAA Omnibus, the security and privacy provisions of HIPAA have become more complex, making it necessary for stringent controls in information security. To comply with HIPAA, Indian healthcare providers use state-of-the-art network infrastructure along with high levels of security solutions. Employees in Indian healthcare BPOs are trained on the importance of information security and how to protect patients' information. To safeguard information and improve confidentiality, Indian BPOs are implementing policies in accordance with ISO 27001:2013 standards. Being HIPAA Compliant means that a country is ahead in Data Protection as and it adds value to the country's Health care information management if companies comply with HIPAA. Penalties that US entities are facing for non-compliance of HIPAA indicate that unless the Indian Business Associates are HIPAA compliant US Companies will not be able to use their services despite cost and skill considerations. If for the reason of HIPAA non-compliance US Companies hesitate to engage the services of Indian Companies, it would be a serious setback to the Indian IT industry. Again, if India is recognized as a HIPAA compliant country, there could be more business for India not only from US but may be from other countries as well.

3 Statement of significant accounting policies

a) Use of Estimates

In preparing the Restated Summary Statements in conformity with accounting principles generally accepted in India, the management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the Restated Summary Statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates. Any revision to accounting estimates is recognized in the period the same is determined. Examples of such estimates include estimated useful lives of fixed assets, provision for bad and doubtful debts, provision for discounts, income taxes, etc.

b) Tangible Fixed Assets

Fixed assets are stated at cost less accumulated depreciation and accumulated impairment losses, if any. The cost comprises the purchase price (net of CENVAT/GST credit availed), borrowing costs if capitalization criteria are met and any directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts

and rebates are deducted in arriving at the purchase price. Subsequent expenditure relating to fixed assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance. Gains or losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Restated Summary Statements of Profits and Losses when the asset is derecognized.

Where a group of fixed assets are purchased for a price, the consideration is apportioned to the various assets on a fair basis as determined by independent valuers.

c) Depreciation of Tangible Fixed Assets

Assets are depreciated to the residual values on a straight-line basis over the estimated useful lives based on technical estimates which are different from one specified in Schedule II of the Companies Act, 2013. Asset's depreciation methods, residual values and useful lives are reviewed at each financial year end considering the physical condition of the assets and benchmarking analysis or whenever there are indicators for review of residual value and useful life. Freehold land is not depreciated. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss on the date of disposal or retirement.

The Company has used the following useful lives to compute depreciation on its tangible fixed assets:

Description	Useful Lives (up to)
Furniture & Fixture	10
Computer	03
Office Equipment	05

d) Leases

Where the Company is the Lessee: Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term, are classified as operating leases. Operating lease payments are recognized as an expense in the Restated Summary Statement of Profits and Losses on a straight-line basis over the lease term.

e) Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

i) Sale of Services

Alphalogic Techsys Limited is a Technology Services Provider. It provides clients with Technology Consulting services, offering end-to-end technology solutions and support. Revenue from rendering of Services is recognized when the performance of agreed contractual risk has been completed.

ii) Interest:

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate

f) Borrowing Costs

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

g) Earnings/(loss) per share

Basic earnings/ (loss) per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares).

For the purpose of calculating diluted earnings/(loss) per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

h) Provisions, contingent liabilities and contingent assets

A provision is recognized when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made.

Provisions are not discounted to present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current

best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably.

Contingent assets are not recognized in the Restated Summary Statements.

i) Cash and cash equivalents

Cash and cash equivalents for Restated Summary Statement of Cash Flows comprises cash at bank and in hand and short-term investments with an original maturity of three months or less.

j) Income taxes

Tax expense comprises current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Current Tax expense has been restated for proprietorship and partnership firm.

k) Deferred taxes

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the entity has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each balance sheet date, the entity re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The entity writes- down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available. Deferred Tax impacts have been restated for proprietorship and partnership.
