SECTION II - SUMMARY OF THE OFFER DOCUMENT

Overview of the Industry

The Indian analytics market has seen considerable growth over the past years. The financial year of 2020-21 was not like any other since the world faced the Covid-19 pandemic, and India enforced one of the strictest lockdowns. Like every other industry, the analytics and data science industry was no exception and faced the brunt of the pandemic.

Post-pandemic world presented the analytics industry with favourable conditions that have ensured significant growth. The main factor was the increased digitisation that led to massive data resources among companies. As enterprises tracked digital transactions, consumer behaviour could be observed and analysed. Also, the need to avoid human intervention/contact amid the pandemic led to the accelerated adoption of intelligent automation or AI. This happened across every sector and for all business sizes. Suddenly, there was a surge in demand for an analytics workforce that could help enterprises grow in such difficult times.

The Indian analytics and data science industry will continue to grow and play a key role in decision-making across every sector and industry. The industry will also develop sophisticated and intelligent autonomous systems to help achieve tasks with greater precision, speed, and efficiency than their human counterparts

SECTION III – RISK FACTORS

An investment in equity shares involves a high degree of risk. Prospective investors should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. The risks and uncertainties described below are not the only ones relevant to us or our Equity Shares, the industry in which we operate or to India. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition. If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment. To the extent the COVID-19 pandemic adversely affects our business and financial results, it may also have the effect of heightening many of the other risks described in this section.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. To obtain a complete understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page 85, “Our Industry” beginning on page 75 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 162 respectively, of this Prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on 2 of this Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

INTERNAL RISK FACTORS

Business Risks/Company Specific Risk:

- 1) A significant portion of our revenue is generated from key clients, and if our key clients do not renew their agreements, issue statement of work, or expand the scope of services, we provide to them, or if our long-term relationships with our key clients are impaired or terminated, our business, financial condition and results of operations could be adversely impacted.**

We derive a significant portion of our revenue from certain key clients, and accordingly, a significant percentage of our future revenues will be dependent upon the successful continuation of our relationships with these clients. In Fiscals 2019, 2020 and 2021, revenue generated from our top five clients amounted to Rs. 272.73 Lakhs, 257.05 Lakhs and Rs. 420.61 Lakhs respectively, accounting for 18.31%, 16.45% and 25.35%, respectively, of our revenue from operations in the same periods. Our ability to maintain close relationships with these and other major clients is essential to the growth and profitability of our business. The services we provide to our clients, and the revenues from those services, may decline or vary, as the type and quantity of services the clients require changes over time.

In most cases, we enter into master service agreements with our key clients as well as project specific contracts or purchase orders or statements of work that are valid until the completion of that specific project, or for the duration of the client's fiscal year. Our agreements allow us to provide multiple solutions and Services to our clients on an on-going basis and cover terms such as scope of services, confidentiality, data protection and privacy, obligations, representations and warranties, security and privacy measures, intellectual property rights, audit/inspection, insurance, indemnity, term and termination, and compliance with applicable laws and regulations. Our master service agreements are typically valid for periods ranging from one year to five years and are subject to renewal based on mutually agreed terms as well as automatic renewal in certain cases, while certain agreements do not provide a defined term and are valid until terminated in accordance with the specified terms. However, our clients typically have no obligation to renew or expand such agreements with us after the expiration of their existing agreements or issue purchase orders or statement of work as part of such agreements. Further, certain of our agreements with clients, may be terminated by the clients without causes by providing specified written notice.

Additionally, our agreements typically provide that all the services delivered by us during the term of our agreement/ purchase order/ statement of work and all the deliverables developed or prepared for the client shall be the sole and exclusive property of the client.

The loss of any of our key clients, due to our inability to renew our agreements with them or failure to secure project specific contracts, purchase orders or statement of work with them, or a decision by any one of them to reduce the services we provide to them would result in a decline in our revenues. The renewal or expansion of client relationships may decrease or vary as a result of a number of factors, including our clients' satisfaction or dissatisfaction with our solutions and Services, reliability of our solutions and Services, our pricing, the effects of general economic conditions, competitive offerings or alternatives, substantial turnover of the client personnel responsible for procurement and use of our services or reductions in our clients' spending levels. There can be no assurance that the terms of our agreements/ purchase orders/ statements of work will be favourable to us or that we will be able to find new clients of appropriate size or at all in the future to compensate for any of our key clients that we lose or that renew their agreements/ purchase orders/ statements of work on less favorable terms. Moreover, we also provide services to certain clients which are not governed by any master service agreement or contract and as a result, we face the risk of, amongst others, such services being terminated at short notice and/ or lack of legal recourse in case of any dispute. Further, if the financial condition of any of our key clients were to deteriorate in the future, our revenues could be significantly affected and we may fail to collect or recover any or all receivables from such clients for services already rendered by us.

Moreover, we are also dependent on the continued market acceptance and demand of our clients' services and any negative impact on the client's business and operations could adversely affect the amount of services they avail from us. Our clients' decisions to expand the scope of services we offer to them depends on a number of factors, including general economic conditions, the budget of our clients, quality and accuracy of our solutions, our ability to assist our clients in appropriately identifying challenges faced, mapping out a feasible framework, achieving success with data-driven initiatives, and our clients' satisfaction with our solutions. If our efforts to expand the services we offer within our existing client base are not successful, our business, results of operations and financial condition may be adversely impacted.

2) Our failure to manage our growth and scalability or adapt to technological developments or industry trends could affect the performance and features of our services and reduce our attractiveness to users and paid advertisers.

During the past few years, we have experienced high growth in our business operations, which has placed, and will continue to place, significant demands and stress on our managerial, operational, and financial infrastructure. As our operations grow in scope and size, whether through offering of new products or expansion into new markets in India, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our users and paid advertisers enhanced services, features and

functionality ahead of rapidly evolving consumer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner.

The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. We currently offer our services through Internet, and we cannot anticipate which other forms of media will become relevant to the kind of services provided by us in the future and there can be no assurance that we will be able to adapt our systems to such media. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. As some of our systems are customized or developed internally, considerable internal resources and expenses are required to maintain and upgrade these systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all. We may also not be able to attract talent (in-house or external) to continue with the required upgrades and improvements to our systems.

Our new systems, infrastructure and technologies may not perform satisfactorily, or be used effectively and we may also fail to adapt our service platforms to our increased size and scale, user requirements or emerging trends and industry standards. Further, there is no assurance that we will be able to downsize and scale back our systems and platforms quickly and efficiently enough to reduce unnecessary costs and expenses in the event that user demand falls below our expectations.

If we do not effectively manage our growth or appropriately expand and upgrade or downsize and scale back our systems and platforms, as the case may be, in a timely manner or at a reasonable cost, or both, we may lose market opportunities or damage our attractiveness and reputation with our users and paid advertisers, which may adversely affect our business, financial condition and results of operations.

3) The proper functioning of our website is essential to our business.

The satisfactory performance, reliability and availability of our website and our network infrastructure are critical to our success and our ability to attract and retain users and maintain adequate user service levels. Our website and servers are vulnerable to telecommunications failures, computer viruses, hacking, defacement, physical or electronic break-ins and similar disruptions, which could lead to accessing difficulties, service interruptions, delays, loss of data, inability to accept and/or fulfil user requests or inaccurate data being processed or displayed. We may also experience interruptions caused by reasons beyond our control.

Any inability to accommodate increased user traffic, due to various factors, including systems or technology failure or obsolescence, on our website may cause unanticipated system disruptions, slower response time and degradation in quality of our service, which could have a material adverse effect on our business, reputation, financial condition and results of operations.

4) Our Company and its Promoter are involved in certain legal proceeding(s). Any adverse decision in such proceeding(s) may render us/them liable to liabilities/penalties and may adversely affect our business and results of operations.

Our Company and its Promoter are involved in certain legal proceedings and claims in relation to certain civil matters incidental to our business and operations. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. Any adverse decision may render us/them liable to liabilities/penalties and may adversely affect our business and results of operations. A summary of such legal proceedings are provided in the following tables:

- 5) **We are dependent on a number of key personnel, including our Promoter and senior management team, and on our sales team and the loss of, or our inability to hire, retain, train, and motivate such qualified and skilled personnel could adversely affect our business, financial condition and results of operations.**

We are highly dependent on our Promoter, senior management and other key personnel for formulating our business strategies, managing our business and developing and maintaining client relationships. In particular, we are dependent on the continued service of our existing IT team owing to the industry and functional expertise involved in our offerings. As of January 31, 2022, we had 212 full-time employees.

The market for skilled personnel is extremely competitive, and the process of hiring employees with the necessary skills requires the diversion of significant time and resources. We incur costs related to attracting, relocating, and retaining qualified personnel in these highly competitive markets, including leasing real estate in prime areas in these locations. Further, many of the companies with which we compete for qualified personnel have greater resources than we have. We seek to retain and motivate existing personnel through our compensation practices, company culture, and career development opportunities. If we fail to attract new personnel or to retain our current personnel, or have to pay higher compensation to current and new employees, our business and operations could be harmed.

- 6) **We face intense and increasing competition for users.**

Our business faces intense and increasing competition for users, from both local and international competitors that seek to provide search services. There are generic Internet search services providers as well as a number of local search services providers that provide local information in India.

Our present and future competitors may range from large and established companies to emerging start-ups. Our competitors may have one or more of the following advantages compared to us - greater financial and other resources, advanced technology, larger sales and marketing networks, greater knowledge of the target markets, more extensive research and development and technical capabilities, greater pricing flexibility, longer operating histories and/or strong branding and reputation. These advantages may assist them in attracting users and paid advertisers. Our present and future competitors with requisite financial and other resources may be able to innovate and provide products and services faster than we can. If our competitors leverage on these qualities to provide comparable or better services and products, and we are unable to respond successfully to such competitive pressures, our user traffic and number of paid advertisers could significantly decline, which would have a material adverse effect on our business, financial condition and results of operations.

A substantial part of the contents of our database, which comprises of details and information of real estate, is provided by through various sources. Such sources are not bound by any exclusivity Agreement with us and providing their information to many search providers is beneficial for such businesses. As the same information may be available to our competitors, we may not be able to maintain our competitive edge. Our competitors may be able to develop a unique and comprehensive database of business listings. In the event

that we are unable to provide better services than our competitors, including value added and user friendly search services, we may not be able to attract users to us, which could have material adverse effect on our business, results of operations and financial condition.

7) We rely on telecommunications and information technology systems, networks and infrastructure to operate our business and any interruption or breakdown and glitches in such systems, networks or infrastructure or our technical systems could impair our ability to effectively provide our products and services.

We are in the business of providing proprietary Real Estate Business Intelligence and Analytics platform services through technology-driven media, and we rely on information technology and telecommunications systems and networks and related infrastructure, some of which have been customized and developed internally. As such, our business operations and quality of our service depend on the efficient and uninterrupted operation and reliability of our telecommunications and information technology systems and networks and related infrastructure, both internal and external.

Our systems are vulnerable to damage or interruption as a result of natural disasters, power loss, telecommunications failure, technical failures or glitches, undetected errors or viruses in our software, computer viruses, corruption or loss of electronically stored data, disruption in communications access or infrastructure, electronic intrusion attempts, break-ins, sabotage, vandalism and other similar events. We cannot assure that our back-up and disaster recovery measures and business continuity planning would effectively eliminate or alleviate the risks arising from the above contingencies. In addition, as most of our systems and software are developed internally, it may contain undetected errors, defects or bugs, which we may not be able to detect and repair, in time or in a cost-effective manner, or at all. In such circumstances, we may be liable for all costs and damages, as we would not be entitled to any indemnification or warranty which we may have been provided if we had obtained such systems or software from third party professional providers. Any damage to or failure of our systems could lead to loss of data or interruptions or delays, thereby impairing our ability to effectively provide our services, which could result in our paid advertisers not using us to advertise their products and services.

In addition, to perform reliably, the fixed telecommunications networks and Internet infrastructure in India, and in any other locations that we may operate in, requires maintenance and periodic upgrading of the appropriate networks and infrastructure which are beyond our control. Our success will depend upon third parties maintaining and improving the Internet infrastructure to provide a reliable network with speed and adequate data capacity and telecommunication networks with good clarity and lower congestion. Continued disruption in the telecommunication networks in the markets where we operate may lead to a reduction in the number of users who approach us for information and may adversely affect the number of advertisers who agree to become our customers.

In particular, the Internet has experienced, and is likely to continue to experience, significant growth in the number of users and amount of traffic, and our Internet and mobile Internet services are designed to leverage on such growth. The existing Internet infrastructure may not be able to support such continued growth in users and traffic, and the increasing number of users, bandwidth requirements, problems caused by computer viruses and bugs may affect the performance of the Internet, leading to a variety of outages and other delays. These outages and delays could reduce the level of Internet usage generally. We may not have any access to alternative telecommunication networks other than those we currently use, in the event of disruptions, failures or any other problems in the network or infrastructure of our current telecommunications service providers. In addition, we cannot assure that a more technologically sophisticated and reliable fixed telecommunications network or Internet infrastructure will be developed in India or any other region that we may operate in, that will ensure our ability to deliver smooth and reliable provision of our products and services to our users.

- 8) **We obtain survey data and other forms of data and primary intelligence for our clients from third parties and public sources and require access to data to enhance our offerings. If we are not able to obtain accurate, comprehensive or reliable data and broaden data access, we could experience reduced demand for our solutions and products, which could materially and adversely affect our business, results of operations and financial condition.**

Our ability to provide effective solutions depends on our ability to source reliable, accurate and comprehensive data. As part of our marketing and customer analytics and insights initiatives, there is a requirement, based on the program outcomes and/ or objectives, to obtain third party data from surveys and other sources for the client to understand the represented market or segment behaviors, attitudes or perceptions regarding a particular topic or theme. Data and software cost is a significant component of our total expenses and includes the cost incurred towards procurement of consumer/ market/ social/ digital data for analyzing the market trends and attitudes and provide effective outputs and decision making solutions for clients, the cost for acquiring primary intelligence data and the cost of specific software for meeting client needs. We primarily rely on third parties and there is no assurance that the data provided therein or by them is accurate or reliable. In particular, the data we procure from various sources is often without checks on accuracy of the content posted. The data procured/collected may also result in risks regarding privacy such as disclosure of proprietary information and exposure of personally identifiable information along with fraud or malicious exposure of false information. Moreover, in certain cases, our teams may represent the data acquisition methodology and sources incorrectly to clients and may interpret the data inaccurately. If the data we obtain or have obtained from such parties/ sources and our data extraction, duration, and insights, are not current, accurate, comprehensive, or reliable, it would increase the likelihood of ineffective insights, which in turn would reduce the likelihood of clients availing our services and harm our reputation, making it more difficult to obtain new clients as well as result in loss of clients. These occurrences may also open subject us to liability claims from clients. We cannot assure you that clients will continue to avail our products and solutions in future as a result of failure to provide meaningful analytics and insights due to inaccurate or insufficient data. In addition, if we are no longer able to maintain acceptable levels of analytics and insights solutions, we may face situations where our clients terminate their existing arrangements or do not avail additional services which could have an adverse effect on our business, results of operations, and financial condition. While we obtain primary intelligence and client data, we are required to comply with corresponding regulatory and ethical norms and may be subject to additional procedure and adherence, and our teams/ contractors may fail to comply with these norms. In addition, through our services to our clients, we gain access to large amounts data from various sources. In certain cases, we use these data to enhance our current data analytical products and services and develop new ones. However, we may not be able to maintain and continuously grow our client base, and our clients may limit our access to the data of their clients, both of which may hinder our ability to gain access to the data necessary for our development of data analytical products and services. In addition, interruptions, failures or defects in our data access and processing systems, as well as privacy concerns could also limit our ability to analyze data. Further, our accessibility to data may be restricted by new laws and regulations. Our collaborations with third parties are not exclusive. If we are not able to continue to maintain a good relationship with our third parties or continue to gain access to extensive data in the future, we may not be able to maintain our competitive strength and effectively offer and improve our existing data products and services or develop new ones that respond to the needs of our clients. .

- 9) **If the market for our services develops more slowly than we expect, it may hamper our ability to grow as anticipated, and our business, financial condition, and results of operations could be adversely affected.**

The market for our tech based Data Analytics for Real Estate Services is rapidly evolving. Our future success will depend in large part on the growth and expansion of this market, which is difficult to predict and relies on a number of factors, including client adoption, client demand, changing client needs, the entry of competitive products, the success of existing competitive products, potential clients willingness to adopt an alternative approach to data collection, storage, and analytics and their willingness to invest in business improvements after significant prior investments in legacy data collection, storage, and processing software. The estimates and assumptions that are used to calculate our market opportunity are subject to change over

time, and there is no guarantee that the organizations covered by our market opportunity estimates will pay for our services at all or generate any particular level of revenue for us. Further, if we or other data management and analytics providers experience security incidents, loss of or unauthorized access to client data, disruptions in delivery, or other problems, this market as a whole, may be negatively affected. If software for the challenges that we address does not achieve widespread adoption, or there is a reduction in demand caused by a lack of client acceptance, technological challenges, weakening economic conditions (including due to the COVID- 19 pandemic), security or privacy concerns, competing technologies and products, decreases in corporate spending, or otherwise, or, alternatively, if the market develops but we are unable to continue to penetrate it due to the cost, performance, or other factors, it could result in decreased revenue and our business, financial condition, and results of operations could be adversely affected.

10) Our business depends on a strong brand and corporate reputation and if we are not able to maintain and enhance our brand, our ability to grow our business and our results of operations and financial condition may be adversely affected.

Since many of our specific client engagements involve highly tailored solutions, our corporate reputation is a significant factor in our clients' and prospective clients' determination of whether to continue engaging us or hire us for prospective services. We believe that our brand name and reputation are important corporate assets that help distinguish our services from those of our competitors and also contribute to our efforts to recruit and retain talented professionals. However, our corporate reputation is susceptible to damage by various factors such as actions or statements made by current or former employees or clients, competitors, vendors and adversaries in legal proceedings, as well as members of the investment community and the media.

There is a risk that negative information about our Company, even if based on false rumours or misunderstandings, could adversely affect our business. Any negative news affecting us might also affect our reputation and brand value. In particular, damage to our reputation could be difficult and time-consuming to repair, especially due to the competitiveness in our industry, which could make potential or existing clients reluctant to select us for new engagements, resulting in a loss of business, and could adversely affect our employee recruitment and retention efforts. Damage to our reputation could also reduce the value and effectiveness of our brand name, could reduce investor confidence in us, affect the price of our Equity Shares and adversely affect our ability to grow our business and our results of operations and financial condition.

11) Intellectual property rights are important to our business, and we may be unable to protect them from being infringed by others, including our current or future competitors.

Our Company's business is a tech based data analytical for Real Estate and Analytics platform is largely dependent on our maintaining and developing an extensive and accurate database of business listings. In addition, we have in-house customization and enhancement of third-party technology to develop and provide higher-quality products and services. All our trademarks, trade secrets, copyrights and other intellectual property rights are our material assets and are crucial to our business operations. We depend on a combination of copyright, trademark laws, trade secret protection, non-competition and confidentiality agreements with our employees, contractors and third party service providers to protect our logo, brand name, domain names, data base and customized information technology.

Even with such precautions, we cannot assure that our data or proprietary technology will not be copied or obtained by third parties. All our business listings are available on our website, and our competitors could collate these listings and other information, to produce competing products and services. In addition, we do not have any exclusive arrangements with our data providers to prevent them from providing data to our competitors. Proving that a competitor had violated our intellectual property rights and obtaining recourse against them, is subject to litigation in court. Further, there may be irreparable damage to our business in the event that our trade secrets are known to our competitors, in which case an award of damages may not be an adequate remedy.

12) Our inability to modify our pricing models to retain existing clients and attract prospective clients may have an adverse impact on our business, financial condition and results of operations.

We expect that we may change our pricing model from time to time, including as a result of competition, global economic conditions, general reductions in our clients spending levels, pricing studies, or changes in how our offerings are broadly consumed. Similarly, as we introduce new services, or further customize existing services, we may have difficulty determining the appropriate price structure for our offerings. In addition, as new and existing competitors introduce new services that compete with ours, or revise their pricing structures, we may be unable to attract new clients at the same price or based on the same pricing model as we have used historically. Moreover, as we continue to target selling our services to larger organizations, these larger organizations may demand substantial price concessions. If we are unable to modify or develop pricing models and strategies that are attractive to existing and prospective clients, while enabling us to significantly grow our sales and revenue relative to our associated costs and expenses in a reasonable period of time, our business, financial condition, and results of operations may be adversely impacted.

13) If we are unable to establish and maintain an effective internal controls and compliance system, our business and reputation could be adversely affected.

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances. We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. Maintaining such internal controls requires human diligence and compliance and is therefore subject to lapses in judgment and failures that result from human error. Any lapses in judgment or failures that result from human error can affect the accuracy of our financial reporting, resulting in a loss of investor confidence and a decline in the price of our Equity Shares.

Further, our operations are subject to anti-corruption laws and regulations. These laws generally prohibit us and our employees and intermediaries from bribing, being bribed or making other prohibited payments to government officials or other persons to obtain or retain business or gain some other business advantage. We participate in collaborations and relationships with third parties whose actions could potentially subject us to liability under these laws or other local anti-corruption laws. While our code of conduct requires our employees and intermediaries to comply with all applicable laws, and we continue to enhance our policies and procedures in an effort to ensure compliance with applicable anti-corruption laws and regulations, these measures may not prevent the breach of such anti-corruption laws, as there are risks of such breaches in emerging markets, such as India, including within the travel and hospitality industry. If we are not in compliance with applicable anti-corruption laws, we may be subject to criminal and civil penalties, disgorgement and other sanctions and remedial measures, and legal expenses, which could have an adverse impact on our business, financial condition, results of operations and liquidity. Likewise, any investigation of any potential violations of anti-corruption laws by the relevant authorities could also have an adverse impact on our business and reputation.

14) Our ability to design and implement solutions depends in part on our ability to operate with third-party products and services, and if we are not successful in maintaining and expanding the capability of our workforce in using such third party products and services, business, financial condition, and results of operations could be adversely impacted.

Our ability to design and implement digital solutions depends in part on our ability to operate with products and services of third parties, software services, and infrastructure. As such, we must continuously invest in building our capabilities to adapt to changes in hardware, software, networking, browser, and database technologies, and to remain empaneled with our partners through various certified personnel. In the future, one or more technology companies may choose not to support the operation of their hardware, software, or infrastructure, or we may not possess the capabilities needed to operate with such hardware, software, or infrastructure. In addition, to the extent that a third-party were to develop software or services that compete with ours, that provider may choose not to support one or more of our solutions. We intend to facilitate the compatibility of our solutions with various third-party hardware, software, an infrastructure by maintaining and expanding our business and technical relationships. If we are not successful in achieving this goal, our business, financial condition, and results of operations could be adversely impacted.

15) Our profitability will suffer if we are not able to maintain resource utilisation levels and productivity levels.

Our profitability is significantly impacted by our utilisation levels of fixed-cost resources, including human resources as well as other resources such as office space, and our ability to increase our productivity levels. We have expanded our operations significantly in recent years, which has resulted in a significant increase in our headcount and fixed overhead costs. Some of our personnel have been specially trained to work for specific clients or on specific engagements. Our ability to manage our utilisation levels depends significantly on our ability to hire and train high-performing personnel and to staff projects appropriately and on the general economy and its effect on our clients and their business decisions regarding the use of our services. If we experience a slowdown or stoppage of work for any client for which we have dedicated personnel or capabilities, we may not be able to efficiently reallocate these personnel to other clients and projects to keep their utilisation and productivity levels high. If we are not able to maintain high resource utilisation levels without corresponding cost reductions or price increases, our profitability will suffer. In the event of a slowdown due to external factors, or if the number of our clients reduce, we may be over-staffed and required to carry excess employee-related expenses which could affect our financial condition. Our profitability and the cost of providing our services are affected by the utilisation rates of our employees in our delivery locations. If we are not able to maintain appropriate utilisation rates for our employees involved in delivery of our services, our profit margin and our profitability may suffer. Our utilisation rates are affected by a number of factors, including our ability to: promptly transition our employees between client assignments; forecast demand for our services and thereby maintain an appropriate number of employees in each of our delivery locations; deploy employees with appropriate skills and seniority to assignments; manage the attrition of our employees and to hire and integrate new employees; and devote time and resources to training, professional development and other activities that cannot be billed to our clients. Employee shortages could prevent us from completing our contractual commitments in a timely manner, taking up new contracts and cause us to lose contracts or clients. Further, to the extent that we lack sufficient employees with lower levels of seniority and daily or hourly rates, we may be required to deploy more senior employees with higher rates on projects without the ability to pass such higher rates to our clients, which could adversely affect our profit margin and profitability.

16) Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in some of the previous year(s):

Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in some of the previous year(s) as per the Restated Audited Financial Statements and the same are summarized as under:

(Rs .in Lakhs)

Particulars	September 30, 2021	March 31, 2021	March 31, 2020	March 31, 2019

17) All of our offices, including our Registered Office are located on leased premises. If these leases are terminated or not renewed on terms acceptable to us, it could have a material adverse effect on our business, financial condition and results of operations.

As of September 30, 2021, we have two (02) offices including our Registered Office, all of which are currently held on a lease basis. We typically enter into term lease agreements with an option to renew such term. We may not be able to renew or extend these agreements at commercially acceptable terms, or at all. Further, we may be required to re-negotiate rent or other terms and conditions of such agreements during their currency. We may also be required to vacate the premises at short notice period prescribed in the lease agreements, and we may not be able to obtain alternate location, in a short span of time. In addition, lease agreements are required to be duly registered and adequately stamped under Indian law and if one of our lease agreements is not duly registered and adequately stamped, we may face challenges in enforcing them and they may be inadmissible as evidence in a court in India subject to penalties along with the requisite stamp duty prescribed under applicable Indian law being paid. We may also face similar issues with jurisdictions we operate in outside of India. Occurrence of any of the above events may have a material adverse effect on our business, results of operations and financial condition. Further, any adverse impact on the ownership rights of our landlords may impede our effective future operations.

18) If we fail to effectively manage our growth, our business and results of operations could be harmed.

We have experienced, and may continue to experience, rapid growth and organizational change, which has placed, and may continue to place, significant demands on our management, operational and financial resources. We plan to continue to expand our international operations in the future, which will place additional demands on our resources and operations. We have also experienced significant growth in the number of clients and types of services we provide, over the years. We had 141 active clients as of June 30, 2021. While we have been profitable in the past, we expect to make investments in growing our business and may undertake acquisitions of other synergistic companies, which could reduce our profitability compared to past periods. In addition, as a public company, we will incur significant accounting, legal and other expenses that we did not incur as a private company. As a result of these increased expenditures, our profitability could decline in future periods. In future periods, our revenue could decline or grow more slowly than we expect. We also may incur significant losses in the future for a number of reasons including due to the other risks described in this Prospectus, and we may encounter unforeseen expenses, difficulties, complications, delays and other unknown factors.

Further, in order to successfully manage our growth, our organizational structure has become, and may continue to become, more complex. We may need to scale and adapt our operational, financial and management controls further, as well as our reporting systems and procedures to manage this complexity and our increased responsibilities as a public company. This will require us to invest in and commit significant financial, operational and management resources to grow and change in these areas without undermining the corporate culture that has been critical to our growth so far. These investments will require significant expenditures, and any investments we make will occur in advance of the benefits from such investments, making it difficult to determine in a timely manner if we are efficiently allocating our

resources. If we do not achieve the benefits anticipated from these investments, if the achievement of these benefits is delayed, or if we are unable to achieve a high level of efficiency as our organization grows, in a manner that preserves the key aspects of our culture, our business, results of operations and financial condition may be adversely affected.

19) We rely on third-party data centers and cloud computing providers, and any interruption or delay in service from these facilities could impair the delivery of our products and adversely impact our business and results of operations.

We currently serve our clients from third-party data centers and cloud computing providers located around the world. Some of these facilities may be located in areas prone to natural disasters and may experience events such as earthquakes, floods, fires, severe weather events, power loss, computer or telecommunication failures, service outages or losses, and similar events. They may also be subject to break-ins, sabotage, intentional acts of vandalism and similar misconduct or cyber security issues, human error, terrorism, improper operation, unauthorized entry and data loss. In the event of significant physical damage to one of these data centers, it may take a significant period of time to achieve full resumption of our services, and our disaster recovery planning may not account for all eventualities. We may also incur significant costs for using alternative equipment or taking other actions in preparation for, or in reaction to, events that damage the data centers that we use. Although we carry business interruption insurance, it may not be sufficient to compensate us for the potentially significant losses, including the potential harm to the future growth of our business that may result from interruptions in our services or products.

As we grow and continue to add new third-party data centers and cloud computing providers and expand the capacity of our existing third-party data centers and cloud computing providers, we may move or transfer our data and our clients' data. Despite precautions taken during this process, any unsuccessful data transfers may impair the delivery of our products. Any damage to, or failure of, our systems, or those of our third-party data centers or cloud computing providers, could result in interruptions to our services or damage to, or loss or compromise of, our data and our clients' data. Any impairment of our or our clients data or interruptions in the functioning of our offerings, whether due to damage to, or failure of, third-party data centers and cloud computing providers or unsuccessful data transfers, may reduce our revenue, result in significant fines, cause us to issue credits or pay penalties, subject us to claims for indemnification and other claims, litigation or disputes, result in regulatory investigations or other inquiries, cause our clients to terminate their subscriptions and adversely affect our reputation, renewal rates and our ability to attract new clients. Our business will also be harmed if our existing and potential clients believe our products are unreliable or not secure.

20) Significant disruptions of information technology systems or breaches of data security could adversely affect our business.

As our business involves processing of high volumes of data, we are significantly dependent on information technology systems, including internet-based systems, to support our business processes. The complexity of our computer systems may make them potentially vulnerable to breakdown, malicious intrusion and computer viruses. We cannot assure you that we will not encounter disruptions to our information technology systems in the future and any such disruption may result in the loss of key information or disruption of our business processes, which could adversely affect our business and results of operations. In addition, our systems are potentially vulnerable to data security breaches, whether by employees or others that may expose sensitive data to unauthorized persons. Such data security breaches could lead to the loss of trade secrets or other intellectual property, or could lead to the public exposure of personal information (including sensitive personal information) of our employees, clients and others. Any such security breaches could have an adverse effect on our business and reputation our offerings involve the transmission and processing of data, and security breaches and incidents could result in the loss of this information, litigation, indemnity obligations, fines, penalties and other liability. We may become the target of cyber-attacks by third-parties seeking unauthorized access to our data or our client's data or to disrupt our ability to provide services. There is also a danger of industrial espionage, misuse, theft of information or assets (including source code), or damage to assets by people who have gained unauthorized access to our facilities, systems

or information. As there are many different techniques used to obtain unauthorized access to systems and data, and such techniques continue to evolve, we may be unable to anticipate attempted security breaches and incidents and proactively implement adequate preventative measures. Additionally, with so many of our employees now working remotely due to the COVID-19 pandemic, we may face an increased risk of attempted security breaches and incidents. While we have taken steps to protect the confidential information that we have access to, including confidential information we may obtain through our client support services or client usage of our cloud services, our security measures or those of our third-party service providers could be breached or otherwise fail to prevent unauthorized access to or disclosure, modification, misuse, loss or destruction of such information. Computer malware, viruses, social engineering (phishing attacks), and increasingly sophisticated network attacks have become more prevalent in our industry, particularly against cloud services. We may also face cyber threats such as (i) phishing and trojans - targeting our clients, wherein fraudsters send unsolicited mails to our clients seeking account sensitive information or to infect client machines to search and attempt ex-filtration of account sensitive information; (ii) hacking wherein attackers seek to hack into our website with the primary intention of causing reputational damage to us by disrupting services; (iii) data theft –where in cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and (iv) advanced persistent threat –a network attack in which an unauthorized person gains access to our network and remains undetected for a long period of time with an intention to steal our data or information rather than to cause damage to our network or organization.

Any security breach or other security incident, or the perception that one has occurred, could result in a loss of client confidence in the security of our offerings and damage to our brand, reduce the demand for our offerings, disrupt normal business operations, require us to spend material resources to investigate or correct the breach and to prevent future security breaches and incidents, expose us to legal liabilities, including litigation, regulatory enforcement, and indemnity obligations, and adversely affect our revenues and operating results. These risks may increase as we continue to grow the number and scale of our offerings, and process, store, and transmit increasing amounts of data. Third parties may also conduct attacks designed to deny clients access to our services. A significant disruption in access to, or ability to use, our services could damage our reputation with current and potential clients, expose us to liability, cause us to lose clients or otherwise negatively affect our business. Further, our financial, accounting, or other data processing systems may fail to operate adequately, or at all, because of events that are beyond our control, including a disruption of electrical or communications services in the markets in which we operate. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis.

- 21) Within the parameters as mentioned in the chapter titled “Objects of the Offer” beginning on page 65 of this Prospectus, our Company’s management will have flexibility in applying the proceeds of this Offer. The fund requirement and deployment mentioned in the Objects of this Offer have not been appraised by any bank or financial institution.**

We intend to use our entire Net Offer Proceeds towards Technological upgradation, Retail Initiative (B2C Expansion plan) and general corporate purpose. We intend to deploy the Net Offer Proceeds in financial year 2021-22 and next years and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Offer may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Offer Proceeds, please refer chapter titled “Objects of the Offer” beginning on page 65 of this Prospectus. The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “Objects of the Offer” beginning on page 65 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Offer. Our Board of Directors will monitor the proceeds of this Offer.

22) Our promoter and promoter group will continue to retain significant control over our Company after the Public Issue

Upon completion of the Public Issue, our Promoter and Promoter Group will continue to own majority of our Equity Shares. As a result, our Promoter and Promoter Group will be in a position to influence any shareholder action or approval requiring a majority vote, except where it is required otherwise by applicable laws or where they abstain from voting. They will also have the ability to control our business including matters relating any sale of all or substantially all its assets, the timing and distribution of dividends and the election or termination or appointment of its officers and directors. Further, the extent of their shareholding in the Company may result in the delay or prevention of a change of management or control of the Company, even if such a transaction may be beneficial to the other shareholders of the Company.

23) Our success depends largely upon the services of our Promoter and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain them may adversely affect the operations of our Company.

Our Company and our Promoter have built relations with suppliers, clients and other persons who are connected with our business. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our clients. Accordingly, our Company's performance is dependent upon the services of our Promoter and other Key Managerial Personnel. Our future performance will, therefore, depend upon the continued services of these persons. It is possible that we may lose our skilled and trained staff to our competitors and high attrition rates in particular, could result in a loss of domain and process knowledge. Demand for key managerial personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

24) We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We have in the course of our business entered into, and will continue to enter into, several transactions with our related parties. For details, please refer to the Statement of Related Party Transactions under chapter "Financial Statement" beginning on page 136 of this Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. We cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. The transactions we have entered into and any further transactions with our related parties have involved or could potentially involve conflicts of interest which may be detrimental to our Company. Though the Companies Act, 2013 has brought into effect significant changes to the Indian company law framework including specific compliance requirements such as obtaining prior approval from the audit committee, board of directors and shareholders for certain related party transactions, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on business and financial results, including because of potential conflicts of interest or otherwise.

25) We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

26) Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

27) Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.

The economic environment, pricing pressure and decreased employee utilization rates could negatively impact our revenues and operating results. In the event that the Government of India or the government of another country changes its tax policies in a manner that is adverse to us, our tax expense may materially increase, reducing our profitability.

28) We have not independently verified certain industry data in this Prospectus.

We have not independently verified data from the industry and related data contained in this Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

29) Our Company may in the future avail, unsecured loans that may be recalled by the lenders at any time.

Our Company may in the future avail, unsecured loans which may be recalled by the lenders at any time. In the event that any lender seeks a repayment of any such loan, then Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Moreover, our Company may not have adequate working capital to continue our operations. As a result, any such demand may affect our business, and in turn may affect our cash flows and results of operations. For further details please refer chapter titled “Financial Information” beginning on Page 136 of this Prospectus.

Issue Related Risks

30) Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

31) Our ability to pay any dividends in the future will depend upon future earnings, financial condition,

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

32) There is no guarantee that the Equity Shares issued pursuant to this Issue will be listed on NSE EMERGE in a timely manner.

In terms of Chapter IX of the SEBI (ICDR) Regulations, 2018, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to NSE to use its name as the Stock Exchange in this offer document for listing our shares on the NSE EMERGE. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the NSE EMERGE. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

33) There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily "Circuit Breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

34) Future sales of Equity Shares by our Promoter may adversely affect the market price of the Equity Shares.

After the completion of the Offer, our Promoter will own, directly, more than 70.20 % of our outstanding Equity Shares. Upon expiry of the lock-in period provided under the SEBI ICDR Regulations, our Promoter will be eligible to sell part or all of the Equity Shares held by it. Future sales of a large number of the Equity Shares by our Promoter, either in one sale or over a series of sales, could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoter will not dispose of, pledge or encumber their Equity Shares in the future, or that the market price of the Equity Shares will not be adversely affected by any such disposal, pledge or encumbrance of their Equity Shares.

EXTERNAL RISK FACTORS

35) The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and

fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or vaccine is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the corona virus and the actions taken globally to contain the corona virus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers'

ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

36) A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

37) Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

38) Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

39) You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India.

40) Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

41) Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as "systemic risk," may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

42) Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of

the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

43) Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

44) Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

45) A third party could be prevented from acquiring control of us post this Offer, because of anti-takeover provisions under Indian law.

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Offer. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

Introduction:

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.34 billion people, and the most populous democracy in the world. India boasts of an immensely rich cultural heritage including numerous languages, traditions, and people. The country holds its uniqueness in its diversity, and hence has adapted itself to international changes with poise and comfort. While the economy has welcomed international companies to invest in it with open arms since liberalisation in the 1990s, Indians have been prudent and pro-active in adopting global approach and skills. Indian villagers have proudly taken up farming, advanced agriculture and unique handicrafts as their profession on one hand, while modern industries and professional services sectors are coming up in a big way on the other.

The economy of India is characterised as a middle income developing market economy. It is the world's fifth-largest economy by nominal GDP and the third-largest by purchasing power parity (PPP). According to the International Monetary Fund (IMF), on a per capita income basis, India ranked 142nd in terms of Nominal GDP and 124th rank in GDP in terms of Purchasing Power Parity in 2020.

Global Economic Outlook

COVID 19 had adversely impacted the global economy and human life severely. Lockdowns implemented across the globe from time to time had impacted the business activity and earning capacity, it has created the large unemployment due to shut downs and migration. There was complete meltdown till the first half of the year 2020. Recovery across the globe is witnessed post the lifting of lockdowns and industrial activity has started picking up but there is again, the concern of new COVID spread in various part of the world.

New Omicron variant has emerged as the fast spreading virus and has shocked the countries like US, Germany, France, Hong Kong and many more by surge in daily new cases, though it is considered to be less infectious compared to the previous variants. However, there has been full or partial lockdowns, travel ban implemented by many countries posing new threat to the global economic recovery and global supply chain. This has resulted in sharp surge in inflation across the globe and interest rate hike is very likely sooner or later.

Vaccination rollout is running at good pace in Western countries and Asian countries have also on strong footing. In India more than 91cr of population has received at least one dose of the vaccine and total doses count is 157 cr. Economic activity across the globe is picking up very fast amid the detection of new variants of the COVID in Europe and in other parts of the world, which is a bit troublesome.

Growth Outlook

Global growth is expected to moderate from 5.9% in 2021 to 4.4% in 2022 half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two

largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8% in 2023.

Introduction to the Data Analytics

The Indian analytics market has seen considerable growth over the past years. The financial year of 2020-21 was not like any other since the world faced the Covid-19 pandemic, and India enforced one of the strictest lockdowns. Like every other industry, the analytics and data science industry was no exception and faced the brunt of the pandemic.

Post-pandemic world presented the analytics industry with favourable conditions that have ensured significant growth. The main factor was the increased digitisation that led to massive data resources among companies. As

enterprises tracked digital transactions, consumer behaviour could be observed and analysed. Also, the need to avoid human intervention/contact amid the pandemic led to the accelerated adoption of intelligent automation or AI. This happened across every sector and for all business sizes. Suddenly, there was a surge in demand for an analytics workforce that could help enterprises grow in such difficult times.

The Indian analytics and data science industry will continue to grow and play a key role in decision-making across every sector and industry. The industry will also develop sophisticated and intelligent autonomous systems to help achieve tasks with greater precision, speed, and efficiency than their human counterparts.

Market Size

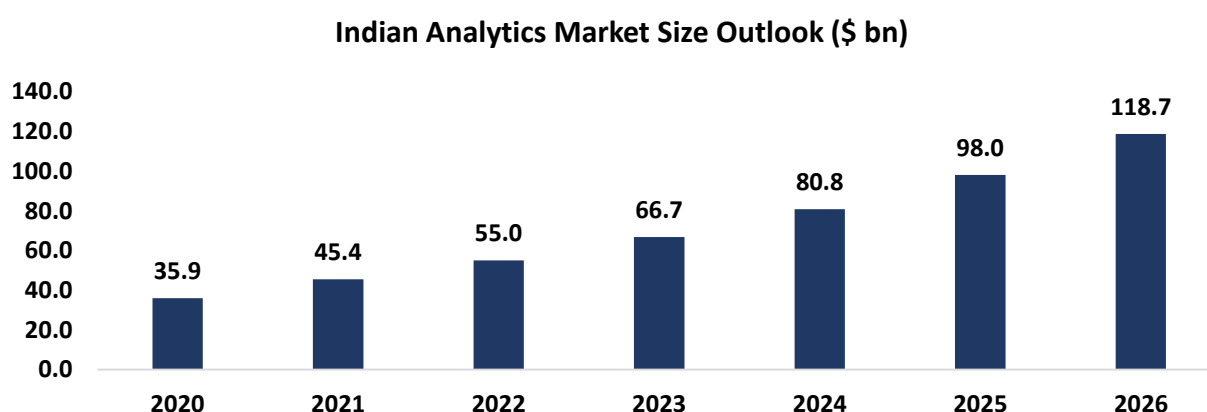

Development of the data science domain in India, it is evident that the analytics and data science function has experienced significant growth over the last year, despite the pandemic. The rising trend in salaries across almost all parameters, the maturing of the analytics market in terms of experienced hiring and salaries offered, the significance of gender diversity in the Indian analytics function, and the \$836.3 Mn investment in Indian AI and analytics start-ups in 2020, are self-explanatory in terms of the development and global standing of the Indian Analytics market.

This development has facilitated the increase in the current market size of the Indian analytics industry to \$45.4 Bn. This signifies a growth of 26.5% in the market size y-o-y. Last year, the analytics function garnered \$35.9 Bn in size. The analytics function experienced growth across almost all companies, industry types, services rendered, and geographies.

Sector Wise Market Distribution

The IT sector remains the top contributor (43.0%) to the analytics industry market in 2021. However, this is a considerable drop from the contribution in 2020. This drop can be mainly attributed to the increase in the analytics market share of other sectors. As domain-specific enterprises realise the significance of AI and data science, they have increased their investments to hire analytics talent.

Within the IT sector, Tata Consultancy Services is the leading contributor to the analytics market in 2021, as it was the year before. This is followed by Accenture, Infosys, Cognizant, Wipro, IBM, Capgemini, Oracle, Microsoft, and Fractal. Together, these ten firms contribute to 41.3% of the analytics market share generated by the IT sector. The analytics industry's market share is seeing a rising shift towards Indian start-ups or stand-alone firms that provide analytics-as-a-service.

After IT, the BFSI sector had the second-highest analytics market share at 13.9%, highlighting the continued investment in analytics capability, personnel, and technology in this sector. This was followed by the Engineering & Manufacturing sector at 6.9% and Retail & E-commerce at 5.9%.

The Information Technology Act, 2000 (The “It Act”) and The Rules Made Thereunder

The IT Act seeks to: (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information; (ii) facilitate electronic filing of documents; and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The IT Act provides for extraterritorial jurisdiction over any offence or contravention under the IT Act committed outside India by any person, irrespective of their nationality, if the act or conduct constituting the offence or contravention involves a computer, computer system or computer network located in India. Additionally, the IT Act empowers the Government of India to direct any of its agencies to intercept, monitor or decrypt any information in the interest of sovereignty, integrity, defence and security of India, among other things. The Information Technology (Procedure and Safeguards for Blocking for Access of Information by Public) Rules, 2009 specifically permit the Government of India to block access of any information generated, transmitted, received, stored or hosted in any computer resource by the public, the reasons for which are required to be recorded by it in writing. The IT Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third-party information liability and creates liability for failure to protect sensitive personal data. The IT Act also prescribes civil and criminal liability including fines and imprisonment for computer related offences including those relating to unauthorized access to computer systems, tampering with or unauthorised manipulation of any computer, computer system or computer network and damaging computer systems, and creates liability for negligence in dealing with or handling any sensitive personal data or information in a computer resource and in maintaining reasonable security practices and procedures in relation thereto, among others. The IT Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. In exercise of this power, the Department of Information Technology, (“DoIT”) Ministry of Electronics and Information Technology, Government of India, in April 2011, notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 (“IT Security Rules”) which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected, and any third party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law. The DoIT also notified the Information Technology (Intermediaries Guidelines and Digital Media Ethics Code) Rules, 2021 (“IT Intermediary Rules”) requiring intermediaries receiving, storing, transmitting, or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the IT Intermediaries Rules, to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it, as well as specifying the due diligence to be observed by intermediaries

These enactments provide for the protection of intellectual property by imposing civil and criminal liability for infringement. The remedies available in the event of infringement of a copyright under the Copyright Act include civil proceedings for damages, account of profits, injunction and the delivery of the infringing copies to the copyright owner.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI

payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Offer.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.
