SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

Rise of the Indian e-commerce sector

India has been witnessing a surge in its e-commerce sector over the last 5-6 years. The Indian e-commerce market is projected to grow to US\$ 200 billion by 2026 from US\$ 38.5 billion in 2017. This growth is likely to be propelled by an increase in internet and smartphone penetration and the ongoing digital transformation in the country. After India locked down in March this year, the e-commerce segment witnessed a momentary decline for a few weeks; however, re-opening of markets led to recovery and subsequently, an upsurge. Marketplaces as well as direct brand websites witnessed an overall 130% spike in online orders.

Since June, the sector has recorded massive sales events such as Myntra's End of Reason Sale, Flipkart's Independence Day Sale and Amazon's Prime Day Sales, boosting order volumes. In fact, recently, Walmart declared (in its latest earnings report) that Flipkart's GMV (Gross Merchandising Volume) has exceeded the pre-COVID 19 levels.

Another driving factor for this surge in e-commerce transactions is the emergence of first-time shoppers and the digital-first approach. Social distancing has led to significant growth of first-time online shoppers. While India's top 5 metropolitan cities continue to dominate the e-commerce sector, Tier II and III cities have also joined the race with a rising share of online shoppers. Amazon and Flipkart have gone a step further in supporting this growth in smaller cities by offering their platform content in local languages.

Surge in e-commerce to continue post pandemic

The post-lockdown numbers indicate a systemic shift in consumer purchasing preferences from offline to online. Customers are increasingly getting used to the comforts of online shopping.

Local retail outlets (Kirana shops) are also digitising and starting to deliver online to keep up with changing customer preferences and not lose business to large marketplaces such as Amazon and Flipkart. This is largely adding to the convenience of customers—in having everything delivered to their doorstep and saving time.

In a post-pandemic scenario, whether consumers go back to their old ways of purchasing or will the comfort, ease and discounts of online shopping continue to lure them remains a question. Nonetheless, it can be assumed that not all consumers will switch back to in-store shopping and continue buying online in the near future.

Another point to note is the change towards hygienic living—sanitisation, personal hygiene, social distancing or using healthy products—as this is expected to have a lasting impact on consumers even after the pandemic.

Mixed impact of e-commerce on the packaging sector

Amid the e-commerce surge, the Indian packaging industry is witnessing steep growth and is one of the strongest growing segments. According to the Indian Institute of Packaging (IIP), packaging consumption in India increased 200% in the past decade, from 4.3 kgs per person per annum (pppa) to 8.6 kgs pppa.

The industry is expected to reach US\$ 204.81 billion by 2025 from US\$ 50.5 billion in 2019 at 26.7% annually. The e-commerce segment of the packaging market was estimated at US\$ 451.4 million in 2019 and is forecast to reach US\$ 975.4 million by 2025 at 13.8% annually.

The packaging sector is categorised into two major segments (by type)—rigid and flexible packaging, with rigid packaging accounting for 64% market share. In terms of packaging materials, 55% of the sector is dominated by plastics, followed by paper & cardboard (20%) and glass (10%).

Food processing is the largest consumer of packaging at 45%, followed by pharmaceuticals (25%) and personal care products (10%). Increasing demand from these end-user segments is creating a huge potential for expansion.

The continued efforts of the senior members of our management team and other skilled professionals are critical to our success. Our ability to execute engagements and to obtain new clients depends in large part on our ability to attract, train, motivate and retain skilled professionals, especially senior management personnel, senior technical personnel, project managers etc. If we cannot hire and retain additional qualified personnel, our ability to obtain new projects and to continue to expand our business will be impaired and our revenue could decline. We believe that there is significant competition within our industry for professionals with the skills necessary for better performance, particularly in the locations in which we have operations. We may not be able to hire and retain enough skilled and experienced employees to replace those who leave. Increasing competition for technology professionals may also impact our ability to retain personnel. Changes in government policies may also affect our ability to attract hire and retain personnel. If we are unable to offer them higher compensation, we may be unable to attract or retain them. Our business, financial condition and results of operations could be adversely affected if we are unable to manage employee hiring and attrition to achieve a stable and efficient workforce structure.

The delay/shortfall in receiving these proceeds may require us to borrow the funds on unfavorable terms; such scenarios may affect the business operation and financial performance of the company.

- 20. Our operations may be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other industrial unrest or dispute.**

While we have not experienced any unrest or dispute in our company in the past, we cannot be certain that we will not suffer any disruption to our operations due to strikes, work stoppages or increased salary demands in the future. Further, if our work force in our unit unionizes in the future, collective bargaining efforts by employee unions may divert our

management's attention and result in increased costs. We may be unable to negotiate acceptable collective wage settlement agreements with those workers who have chosen to be represented by unions, which may lead to union-initiated strikes or work stoppages. Any shortage of skilled and experienced workers caused by such industrial unrest or disputes may adversely affect our business, results of operations and financial condition. Further, under Indian law, we may be held liable for wage payments or benefits and amenities made available to "daily wage" workers. Any requirement to discharge such payment obligations, benefits or amenities or to absorb a significant portion of the salary on our own rolls may adversely affect our business, results of operations and financial condition.

21. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities.

Our Promoters – Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years, please refer to the "Annexure – J" and Annexure J - "RELATED PARTY TRANSACTION" of Restated Financial Statements under the Chapter titled "RESTATED FINANCIAL INFORMATION" beginning on Page No. 166 and 196 of this Prospectus.

22. Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.

We have estimated fund raising to the extent of ₹ 799.20 Lakh to finance the 'Objects of the Issue' (including Issue Expenses). The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. There is no guarantee that our estimates will prove to be accurate and any significant deviation in the project cost could adversely impact our operations and sustainability in the absence of any independent monitoring agency. For details of the "OBJECT OF THE ISSUE", please refer Page no. 63 of this Prospectus.

23. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject to and this may have a material adverse effect on our business.

While we believe that we maintain insurance coverage in amounts consistent with industry norms. If any or all of our facilities are damaged in whole or in part and our operations are interrupted for a sustained period, there can be no assurance that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption or the cost of repairing or replacing the damaged facilities. If we suffer a large uninsured loss or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and result of operations may be materially and adversely affected.

24. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have over the years built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their

services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

25. Our Company has entered into related party transactions and may continue to do so in the future.

Our Company has entered into related party transactions with our Promoters, Directors, Promoter Group, Group companies/entities, subsidiary company during the last two Financial Years. While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to the "Annexure – J" and "Annexure – J" "RELATED PARTY TRANSACTION" of Restated Financial Statements on standalone and consolidated basis under the Chapter titled "RESTATED FINANCIAL INFORMATION" beginning on Page No. 166 and 199 of this Prospectus.

26. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoter and Promoter Group will collectively own 73.30% of our post issue equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

27. Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer chapter titled "OBJECTS OF THE ISSUE" on Page no. 63 of this Prospectus.

28. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The issue proceeds is entirely at the discretion of the issuer/management. As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only if Issue size exceeds ₹ 10,000 Lakh. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

29. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

30. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

31. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

32. Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

33. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

34. Certain data mentioned in this Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

35. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition,

we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

EXTERNAL RISK FACTORS

1. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

2. Any changes in the regulatory framework could adversely affect our operations and growth prospects

Our Company is subject to various regulations and policies. For details see section titled “KEY INDUSTRY REGULATIONS” beginning on Page no. 104 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

3. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

4. Our 100% Revenue is not derived from India and a decrease in economic growth in respective countries could cause our business to suffer.

We do not derive 100% of revenue from our operations in India and consequently, our performance and the quality and growth of our business are dependent on the health of the economy of respective countries from where we derive income. In addition, the Indian and exporting countries economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

5. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

6. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager appointed Designated Market maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

7. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

8. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹ 40. This price is based on numerous factors (For further information, please refer chapter titled “BASIS FOR ISSUE PRICE” beginning on Page no. 72 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following;

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

9. You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

10. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

11. The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing

restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations subsequent to the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

Further, the Market Maker(s) shall inform the exchange in advance for each and every black out period when the quotes are not being offered by the Market Maker(s).
- 2) The minimum depth of the quote shall be ₹ 1,00,000. However, the investors with holdings of value less than ₹ 1,00,000 shall be allowed to offer their holding to the Market Maker(s) (individually or jointly) in that scrip provided that he/she sells his/her entire holding in that scrip in one lot along with a declaration to the effect to the selling broker.
- 3) Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.
- 4) After a period of three (3) months from the market making period, the market maker would be exempted to provide quote if the Shares of market maker in our Company reaches to 25% of Issue Size (Including the 56000 Equity Shares ought to be allotted under this Issue.) Any Equity Shares allotted to Market Maker under this Issue over and above 56000 Equity Shares would not be taken in to consideration of computing the threshold of 25% of Issue Size. As soon as the Shares of market maker in our Company reduce to 24% of Issue Size, the market maker will resume providing 2-way quotes.
- 5) There shall be no exemption/threshold on downside. However, in the event the Market Maker exhausts his inventory through market making process, NSE may intimate the same to SEBI after due verification.
- 6) There would not be more than five Market Makers for a script at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investors.
- 7) On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction. In case equilibrium price is not discovered the price band in the normal trading session shall be based on issue price.
- 8) The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
- 9) There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.
- 10) The Market Maker(s) shall have the right to terminate said arrangement by giving a three months' notice or on mutually acceptable terms to the Merchant Banker, who shall then be responsible to appoint a replacement Market Maker(s).

In case of termination of the Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Lead Manager to arrange for another Market Maker in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of regulation 261 of the SEBI (ICDR) Regulations, 2018. Further our Company and the Lead Manager reserve the right to appoint other Market Makers either as a replacement of the current Market Maker or as an additional Market Maker subject to the total number of Designated Market Makers does not exceed five or as specified by the relevant laws and regulations applicable at that particular point of time. - 12) Punitive Action in case of default by Market Makers: Emerge Platform of NSE will monitor the obligations on a real time basis and punitive action will be initiated for any exceptions and/or non-compliances. Penalties / fines may be imposed by the Exchange on the Market Maker, in case he is not able to provide the desired liquidity in a particular security as per the specified guidelines. These penalties / fines will be set by the Exchange from time to time. The Exchange will impose a penalty on the Market Maker in case he is not present in the market (offering two way quotes) for at least 75% of the time. The nature of the penalty will be monetary as well as suspension in market making activities / trading membership.

The Department of Surveillance and Supervision of the Exchange would decide and publish the penalties / fines / suspension for any type of misconduct/ manipulation/ other irregularities by the Market Maker from time to time.

- 13) Price Band and Spreads: SEBI Circular bearing reference no: CIR/MRD/DP/ 02/2012 dated January 20, 2012, has laid down that for issue size up to ₹ 250 crores, the applicable price bands for the first day shall be:

GLOBAL ECONOMY

COVID-19 caused a global recession whose depth was surpassed only by the two World Wars and the Great Depression over the past century and a half. Although global economic activity is growing again, it is not likely to return to business as usual for the foreseeable future. The pandemic has caused a severe loss of life, is tipping millions into extreme poverty, and is expected to inflict lasting scars that push activity and income well below their pre-pandemic trend for a prolonged period.

The incipient recovery was initially supported by a partial easing of stringent lockdowns. Various restrictive measures have been reintroduced, however, as COVID-19 has continued to spread around the world. Some areas have experienced a sharp resurgence of infections, and daily new cases remain high. That said, there has been substantial progress in the development of effective vaccines, and inoculation has begun in some countries. A more general rollout in advanced economies and major emerging market and developing economies (EMDEs) is expected to proceed early this year. Most other EMDEs, however, face greater constraints in vaccine procurement and distribution. Until vaccines are widely distributed, effective containment strategies to limit the spread of COVID-19 remain critical.

Following the initial rebound in mid-2020, the global economic recovery has slowed. Whereas activity and trade in the goods sector have improved, the services sector remains anemic, with international tourism, in particular, still depressed. The fall in global investment has been pronounced, particularly for EMDEs excluding China. Even though financial conditions remain very loose, reflecting exceptional monetary policy accommodation, underlying financial fragilities are mounting. Most commodity prices rebounded from their mid-2020 lows as strict lockdowns were gradually lifted and demand firmed, especially from China; however, the recovery in oil prices was more modest amid concerns over the pandemic's lasting impact on oil demand.

In all, the global economy is estimated to have contracted 4.3 percent in 2020—a 0.9 percentage point smaller collapse than was expected in June forecasts. In advanced economies, the initial contraction was less severe than anticipated, but the ensuing recovery has been dampened by a substantial resurgence of COVID-19 cases. Meanwhile, output in China is estimated to have rebounded last year at a faster-than-expected clip, with particular support from infrastructure spending. China's strength was an exception, however, and disruptions from the pandemic in the majority of other EMDEs were more severe than previously envisioned, resulting in deeper recessions and slower recoveries, especially in countries with recent large COVID-19 outbreaks.

Advanced economies are projected to recover, with growth reaching 3.3 percent and 3.5 percent in 2021 and 2022, respectively, on the back of pandemic containment aided by widespread vaccination and sustained monetary policy accommodation, which is expected to more than offset the partial unwinding of fiscal support. Although aggregate EMDE growth is envisioned to firm to 5 percent in 2021 and to moderate to 4.2 percent in 2022, the improvement largely reflects China's expected rebound. Absent China, the recovery across EMDEs is anticipated to be far more muted, averaging 3.5 percent in 2021-22, as the pandemic's lingering effects continue to weigh on consumption and investment. Despite the recovery, aggregate EMDE output in 2022 is expected to remain 6 percent below its pre-pandemic projection.

The pandemic has caused per capita incomes to fall in more than 90 percent of EMDEs, tipping millions back into poverty. For more than a quarter of EMDEs, the pandemic is expected to erase at least 10 years of per capita income gains—and, in about two-thirds of EMDEs, per capita incomes are projected to be lower in 2022 than they were in 2019. After more than two decades of steady global poverty reduction, the crisis is projected to push poverty rates back up to levels last seen in 2017. The pandemic has also impeded future prospects for poverty reduction by adversely affecting longer-term productivity growth—the deterioration in confidence has dampened investment, and the loss in learning-adjusted school years and prolonged spells of unemployment have eroded earlier gains in human capital. In low-income countries (LICs), activity in 2020 shrank 0.9 percent—the first aggregate contraction in a generation. Growth is forecast to resume at a moderate pace in 2021-22, averaging 4.3 percent. Nonetheless, output in LICs is expected to remain 5.2 percent below its pre-pandemic projections by 2022. The pandemic has hit fragile and conflict-affected LICs particularly hard, and their recovery is set to be even more sluggish, in part because the large-scale rollout of vaccines among these economies is expected to lag that of advanced economies and major EMDEs. The materialization of a number of downside risks could derail the projected global economic recovery, however. The pandemic could accelerate, and delays in vaccine procurement and distribution could limit the scope for achieving durable containment. Even if the pandemic is brought under control,

its effect on potential growth could be longer lasting than expected. Debt has surged above already-high levels and, although banking systems are generally well capitalized, a wave of bankruptcies could erode bank buffers, putting some countries at increased risk of financial crisis. In contrast, stronger-than-expected growth outcomes could result from improved pandemic management, aided by the rapid rollout of highly effective vaccines, which could trigger a sharp rise in consumer confidence and unleash pent-up demand.

In light of these risks, there are various possible scenarios for the ultimate path for global growth. In particular, in a downside scenario, new cases of COVID-19 would remain persistently higher than in the baseline in many parts of the world, and the vaccine rollout process would be slowed by logistical impediments and general reluctance to be immunized. Activity and financial conditions would deteriorate as a result. In these circumstances, global growth would be much more subdued, only recovering to 1.6 percent in 2021 and 2.5 percent in 2022. In a more severe downside scenario including widespread financial stress, global growth could even be negative in 2021.

This exceptional level of uncertainty around the near-term outlook also highlights the role of policy makers in raising the likelihood of better outcomes while warding off worse ones. Effective containment measures are key to avoid disruptive flare-ups of new cases. As such, the top near-term policy priority will continue to be pandemic control, such as sustaining compliance with social distancing and masking guidelines; increasing testing capacity; and, eventually, overcoming challenges in procuring and distributing vaccines, particularly in LICs. Timely and equitable access to vaccines across the world will necessitate global cooperation. Only once the pandemic is contained in all countries will each country be safe from a resurgence.

INDIAN ECONOMIC

The Indian economy was negatively impacted by an unprecedented health crisis in 2020-21 with the highly contagious corona virus (Covid-19) spreading across the country. In response to the pandemic, Government has taken several proactive preventive and mitigating measures starting with progressive tightening of international travel, issue of advisories for the members of the public, setting up quarantine facilities, contact tracing of persons infected by the virus and various social distancing measures. Government imposed a strict 21 days nationwide lockdown from 25th March, 2020, under the Disaster Management Act, 2005, with subsequent extensions and relaxations, to contain the spread of Covid-19 while ramping up the health infrastructure in the country. The lockdown measures, imposed to contain the spread of Covid-19 pandemic in India, ubiquitously affected employment, business, trade, manufacturing, and services activities. The real Gross Domestic Product (GDP) growth is projected to contract by 7.7 percent in 2020-21 as compared to a growth of 4.2 percent in 2019-20. GDP growth, however, is expected to rebound strongly in 2021-22 owing to the reform measures undertaken by the Government.

The Government announced a special economic and comprehensive package under Atmanirbhar Bharat of ₹ 20 lakh crore - equivalent to 10 percent of India's GDP - to fight the Covid-19 pandemic in India. Several structural reforms announced as part of the package, inter alia, include deregulation of the agricultural sector, change in definition of MSMEs, new PSU policy, commercialization of coal mining, higher FDI limits in defence and space sector, development of Industrial Land/Land Bank and Industrial Information System, Production Linked Incentive Schemes, revamp of Viability Gap Funding scheme for social infrastructure, new power tariff policy and incentivizing States to undertake sector reforms. Apart from this, various steps were taken to boost consumption which, inter alia, includes cash payment in lieu of the Leave Travel Concessions (LTC) scheme, One-time special Festival advance of ₹ 10,000 (interest-free) for central Government employees. Other steps such as Interest-free 50- year loan to states, additional capital expenditure budget for the central Government, launch of Emergency Credit Line Guarantee Scheme (ECLGS) 2.0, ₹ 1.46 lakh crore boost for manufacturing through Production-linked incentives for ten Champion Sectors, ₹ 18,000 crores additional outlay for PM Awaas Yojana (PMAY) -Urban, Equity infusion in National Investment and Infrastructure Fund (NIIF) Debt Platform, Demand booster for Residential Real Estate Income Tax relief for Developers & Home Buyers, Boost for Project Exports, Capital and Industrial Stimulus has been initiated to support economic growth.

As per the first Advance Estimates of annual national income released by the National Statistical Office (NSO), Real GDP is estimated to contract by 7.7 percent in 2020-21, as compared to a growth of 4.2 percent in 2019-20. This contraction in GDP growth is mainly attributed to the contraction in industry and services sector. The growth of Gross Value Added (GVA) at constant (2011-12) basic prices is estimated to contract by 7.2 percent in 2020-21, as compared to a growth of 3.9 percent achieved in 2019- 20. Positive growth in real GVA in agriculture & allied sectors at 3.4 percent in 2020- 21 against 4.0 percent in PE of 2019-20 indicates resilience of rural economic activity to the Covid-19 pandemic. From the demand side, private consumption expenditure is estimated to contract at 9.5 percent in 2020-21 as against a growth of 5.3 percent in 2019-20 and fixed investment is estimated to decline by 14.5 percent in 2020-21 as against 2.8 percent in 2019-20. Government consumption final expenditure is estimated to grow at 5.8 percent in 2020-21 as against 11.8 percent in

2019-20. Exports and imports of goods and services are estimated to contract at 8.3 percent and 20.5 percent (at constant prices) respectively in 2020-21.

INDUSTRY

Packaging plays a pivotal role in consumers' experience with respect to the brand and the overall purchasing experience. There are four major functions of packaging—containment, protection, communication and utility—that are intended to maximise sales and profits while reducing losses and wastage; and all of them are critical for enhancing consumer experience. In a traditional brick-and-mortar commerce, packaging was used to create distinction and increase shelf presence through attractive and easy-to-spot colors, shapes and graphics. When damage is occurred in a brick-and-mortar store, it was easy for the consumer to keep the damaged product aside and pick an undamaged one placed right next to it. Loss of product was not necessarily compounded by the loss of sales or customer. In an e-commerce world, however, the effects of a damaged product are very different. A consumer makes a purchasing decision at the click of a button and to contend with a damaged product, after delivery wait time, can lead to a conclusive decision against the online retailer. As per eMarketer, 83% consumers are unlikely to purchase from an online retailer again after a poor experience.

Having realised the impact of their packaging decisions, companies are investing to enhance e-commerce packaging to meet consumer expectations and positively impact their perceptions and purchasing decisions.

Rise of the Indian e-commerce sector

India has been witnessing a surge in its [e-commerce sector](#) over the last 5-6 years. The Indian e-commerce market is projected to grow to US\$ 200 billion by 2026 from US\$ 38.5 billion in 2017. This growth is likely to be propelled by an increase in internet and smartphone penetration and the ongoing digital transformation in the country. After India locked down in March this year, the e-commerce segment witnessed a momentary decline for a few weeks; however, re-opening of markets led to recovery and subsequently, an upsurge. Marketplaces as well as direct brand websites witnessed an overall 130% spike in online orders.

Since June, the sector has recorded massive sales events such as Myntra's End of Reason Sale, Flipkart's Independence Day Sale and Amazon's Prime Day Sales, boosting order volumes. In fact, recently, Walmart declared (in its latest earnings report) that Flipkart's GMV (Gross Merchandising Volume) has exceeded the pre-COVID 19 levels.

Another driving factor for this surge in e-commerce transactions is the emergence of first-time shoppers and the digital-first approach. Social distancing has led to significant growth of first-time online shoppers. While India's top 5 metropolitan cities continue to dominate the [e-commerce sector](#), Tier II and III cities have also joined the race with a rising share of online shoppers. Amazon and Flipkart have gone a step further in supporting this growth in smaller cities by offering their platform content in local languages.

Surge in e-commerce to continue post pandemic

The post-lockdown numbers indicate a systemic shift in consumer purchasing preferences from offline to online. Customers are increasingly getting used to the comforts of online shopping.

Local retail outlets (Kirana shops) are also digitising and starting to deliver online to keep up with changing customer preferences and not lose business to large marketplaces such as Amazon and Flipkart. This is largely adding to the convenience of customers—in having everything delivered to their doorstep and saving time.

In a post-pandemic scenario, whether consumers go back to their old ways of purchasing or will the comfort, ease and discounts of online shopping continue to lure them remains a question. Nonetheless, it can be assumed that not all consumers will switch back to in-store shopping and continue buying online in the near future.

Another point to note is the change towards hygienic living—sanitisation, personal hygiene, social distancing or using healthy products—as this is expected to have a lasting impact on consumers even after the pandemic.

Mixed impact of e-commerce on the packaging sector

Amid the e-commerce surge, the Indian packaging industry is witnessing steep growth and is one of the strongest growing segments. According to the Indian Institute of Packaging (IIP), packaging consumption in India increased 200% in the past decade, from 4.3 kgs per person per annum (pppa) to 8.6 kgs pppa.

The industry is expected to reach US\$ 204.81 billion by 2025 from US\$ 50.5 billion in 2019 at 26.7% annually. The e-commerce segment of the packaging market was estimated at US\$ 451.4 million in 2019 and is forecast to reach US\$ 975.4 million by 2025 at 13.8% annually.

The packaging sector is categorised into two major segments (by type)—rigid and flexible packaging, with rigid packaging accounting for 64% market share. In terms of packaging materials, 55% of the sector is dominated by plastics, followed by paper & cardboard (20%) and glass (10%).

Food processing is the largest consumer of packaging at 45%, followed by pharmaceuticals (25%) and personal care products (10%). Increasing demand from these end-user segments is creating a huge potential for expansion.

Amid the pandemic, the demand for packaging for groceries, healthcare products and e-commerce transportation has increased exponentially; but, at the same, the demand for industrial, luxury and sections of B2B-transport packaging has declined. Some of the key end-user segments will witness mixed impact of the pandemic owing to a sharp increase in demand for some sub-segments and dip in others. For example:

- **Food and beverages packaging:** The packaged food and beverages segment is witnessing an upsurge due to a demand spike for essential food products and shelf-stable foods. Demand from the grocery and dairy product segments has subsequently fuelled the demand for vacuum packaging, trays and protective films including PVC film and shelf life-extending modified atmospheric packaging and others. However, demand from offline food chains including cafes and restaurants, which have been either entirely closed or operating partially, is negatively impacting the market.
- **Transit and Omni channel packaging:** Demand for this type of packaging has nosedived in the past few months due to reduced industrial activity. However, some of the negative impacts have been offset by the spike in demand from other end-user segments—such as disposable takeaway packaging for food and pharmaceuticals, and corrugated packaging for e-commerce and grocery deliveries.
- **Consumer packaging:** While the demand for packaging continues to be accentuated by the sharp increase in home deliveries for grocery purchases and other home care products, the demand for non-food, premium/luxury and non-essential purchases has been hit with stores remaining closed or consumer cut backs on spending.
- **Healthcare packaging:** Demand for all types of healthcare packaging and related substrates, including flexible blister foils, pumps, closures and rigid plastics, has soared. Similarly, the demand has also spiralled for packaging used in dietary supplements such as vitamins and essential supplies needed by consumers in a pandemic situation.

Packaging: A vital bridge for adapting to change and staying relevant

Since the pandemic, companies have been tweaking their products, marketing strategies and service offerings to cater to the evolving needs of consumers – highlighting what matters most today – safety, immunity and health. Swiggy, for instance, introduced a double-layered packaging that keeps food safe and fresh. Similarly, Nature's Basket switched from cloth bags to single-use paper bags that can be disposed of immediately after use. Packaged food product companies are focussing on packaging materials that support longer shelf-life. A few others are updating their packing designs to include communication around appropriate sanitisation. A few months back, the world was busy shunning single-use plastics; however, consumers have re-adopted it for better hygiene. Irrespective of the strategy adopted by the company or consumer, each of that strategy boils down to an impact on packaging.

Packaging is now seen as a key bridge between consumers and brands to effectively communicate that hygiene is maintained, safety is prioritised and product or service quality is not being compromised.

Packaging already had a pivotal role in consumer buying experience in the e-commerce world. And now, its impact has even grown bigger. This sector will continue to ride the e-commerce wave long into the future.

Corrugated Boxes

Boxes need to contain the product from manufacturing through distribution to sale and sometimes end-use. Boxes provide some measure of product protection by themselves but often require inner components such as cushioning, bracing and blocking to help protect fragile contents. One of the important functions of a corrugated box is to provide crush resistance (product protection) and adequate strength for stacking in warehouses

Corrugated Sleeve Rolls

Corrugated fiberboard is a material consisting of a fluted corrugated sheet and one or two flat linerboards. It is made on "flute lamination machines" or "corrugators" and is used for making cardboard boxes. The corrugated medium sheet and the linerboard(s) are made of kraft containerboard, a paperboard material usually over 0.01 inches (0.25 mm) thick. Corrugated fiberboard is sometimes called corrugated cardboard, although cardboard might be any heavy paper-pulp based board.

PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

Pursuant to the UPI Circular, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 and till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders into the UPI Mechanism.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications

- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.
