### INTERNAL RISKS

#### **1. Concentrated customer base of the Company as Top 5 customers provides 96.72% contribution to Company’s revenue and Top 10 customers provide 99.29% contribution to Company’s revenue.**

For the Financial year 2020-21, our revenue from operations is 99.29% from Top 10 customers. Among these top customers, we have a single largest customer constituting almost 91% of our total revenue. The loss of significant client or clients would have material adverse effect on our financial results.

If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivables from that client would increase and may be written off, adversely impacting our income and financial conditions.

However, our top ten customers may vary from period to period as the time progress.

#### **2. There are outstanding legal proceedings involving our Company and our Promoters and Directors, which may adversely affect our business, financial condition and results of operations.**

There are proceedings pending at different levels of adjudication before various courts, enquiry officers and appellate forums. Such proceedings could divert management’s time, attention and

consume financial resources in their defence. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. For details in relation to certain material litigation, please see the section entitled "Outstanding Litigation and Material Developments" beginning on page no. 171. A summary of the outstanding proceedings involving our Company and our Promoters and Directors as disclosed in this Prospectus, to the extent quantifiable, have been set out below:

	Ms. Anita Manoj Agarwal	1	20.46
	Mrs. Parameshwari Sitaram Agarwal	1	6.59

Orders passed in such proceedings adverse to our interests may affect our reputation and standing and may have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to section titled "Outstanding Litigation and Material Developments" beginning on page no. 171 of this Prospectus

If we fail to obtain or renew any applicable approvals, licenses, registrations and permits in a timely manner, our ability to undertake our businesses may be adversely impacted, which could adversely affect our operations.**

We require a number of approvals, licenses, registrations and permits for operating our businesses and operations. Moreover, we may need to apply for additional approvals in the future. Further, we may need to renew some of the approvals, which may expire, from time to time, in the ordinary course. There can be no assurance that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of noncompliance or alleged non-compliance with any term or condition thereof, or pursuant to any regulatory action. While our Company has endeavoured to obtain or apply for all applicable governmental, statutory and regulatory permits, licenses and approvals, including renewals thereof, to operate its business, certain governmental or statutory approvals and/or licenses may have expired or applications for the same (or renewals thereof) are still pending before the concerned authorities. We cannot assure that we would be granted such licenses in a timely manner. Further, if we fail to obtain or renew any applicable approvals, licenses, registrations and permits in a timely manner, our ability to undertake our businesses may be adversely impacted, which could adversely affect our results of operations and cash flows. Furthermore, government approvals and licenses may be subject to numerous conditions, some of which could be onerous.

#### 4. High dependency of Company's revenue on watch industry.

Our Revenue from Top 10 customers during the year ended March 31, 2021 is consisting of the Wrist Watches and Corporate Gifting and the summary of the same is given hereunder: -

Particulars	% of Revenue
1) Revenue from Wrist Watches:	
c) Other Brands (Institutional Customers)	90.67
d) Foce Brand (Institutional Customers)	4.21%
<b>Sub-Total</b>	<b>94.88%</b>
2) Revenue from Corporate Gifting	4.41%
<b>Total</b>	<b>99.29%</b>

From the above table, it may be observed that the revenue from wrist watches segments from Top 10 Customers aggregates to 94.88% (say around 95.00%). Further, the revenue for corporate gifting from top 10 customers aggregates to 4.41%.. Thus, we are highly dependent on watch industry for the consistent growth of our Company. Any slowdown in the watch industry or any other factors adversely affecting the sale of watches may adversely affect our business

While we believe that all such transactions have been conducted on an arm's length basis and in the ordinary course of business, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. These transactions, inter-alia includes unsecured loan, advance for expenses, purchase of goods, etc.

<b>Total</b>			<b>3994.07</b>

Furthermore, it is likely that our Company may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to our chapter titled "SECTION VII – FINANCIAL INFORMATION- Related Party Transactions" beginning on page 133 of this Prospectus. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, including specific compliance requirements such as obtaining prior approval from audit committee, the Board of Directors and shareholders for certain related party transactions.

#### 6. Our intellectual property rights may not be adequately protected against third party infringement.

We are the registered owners of trademark 'HTC Agro' in class 14. Further, we may not be able to protect our intellectual property rights against third party infringement and unauthorised use of our intellectual property including our brand on products which we do not manufacture

The use of trade names or trademarks by third parties which are like our trade names or trademarks may result in confusion among customers and loss of business. In addition, any adverse experience of customers of such third-party products, or negative publicity attracted by such third-party products could adversely affect our reputation and brand and business prospects. We may also be susceptible to claims from third parties asserting infringement and other related claims relating to trademarks and brands under which we sell our products. Any such claim could adversely affect our relationship with existing or potential customers, result in costly litigation and divert management's attention and resources. Our Company had reported certain negative cash flows from its investing and financing activities in the previous years and as per the Restated standalone financial statements and the same are summarized as under:

(₹ in Lacs)

Particulars	For the First Quarter ended June 30,	Restated Standalone for the Year Ended March 31

For details, please see “Management’s Discussion and Analysis of Financial Conditions and Results of Operations of Our Company” on page no.163 of this Prospectus. Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

**11. The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.**

In the first half of 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID19 pandemic has had, and may continue to have, repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for 2020 downward in response to the economic slowdown caused by the spread of COVID-19, and it is possible that the COVID-19 pandemic will cause a prolonged global economic crisis or recession. In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-day lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. Whilst the lockdown required private, commercial and industrial establishments to remain closed, manufacturing units of essential commodities were permitted to be functional. Since we are engaged in manufacturing of automotive components, our products were not categorized under the ‘essential goods’ and hence our manufacturing facilities were shut down during this pandemic. During the initial stages of the lockdown our business operations were disrupted.

Since then, we have resumed operations in a phased manner as per the Government of India and state government’s directives. We have resumed our trading and marketing activities after making arrangements to meet the government’s requirements on sanitization, people movement and social distancing. However, due to limited availability of labour, raw material suppliers, logistics and supply chain constraints, our plant is operating at sub-optimal capacity utilization. We also faced limitation on transportation of our products and the operation of our offices was also adversely affected amidst the lockdown and public transport restrictions. Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if

additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, financial condition and results of operations.

Further, our ability to ensure the safety of our workforce and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire manufacturing facility or our offices and branches, as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, offices, loss of life, injuries and impact the well-being of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control.

These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India or in the regions in which we operate, and the impact of any actions taken by governmental bodies or health organisations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. To the extent that the COVID- 19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this “Risk Factors” section.

**13. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends on our key managerial personnel and our ability to attract and retain them. Any loss of our key person could adversely affect our business, operations and financial condition.**

The success of our business operations is attributable to our Promoters, Directors and the technical team. We believe that our relation with our Promoters, who have rich experience in markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. Our Promoters have been actively involved in the day to day operations and management since the incorporation of the Company. Further, our Promoters have also promoted other companies/ firms/ ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. We also depend significantly on the expertise, experience and continued efforts of our technical and servicing team, hence, our performance and success substantially depends on the ability to attract and retain our key employees, including our management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could seriously impair our ability to continue to manage and expand our business. Competition for personnel in our industry is intense, and the availability of suitable and qualified candidates is limited. If we fail to hire and retain our employees, the loss of their services could harm our business operations and financial condition could be adversely affected.

**14. In addition to normal remuneration, other benefits and reimbursement of expenses of our Promoters (including our Directors) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.**

Some of our Promoters (including our Directors) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors/ Promoters or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors and Promoters will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. Further, there has been one instance for delayed filing with the RoCs i.e AOC4 for the year 2019 had been filed on 25.02.2021 and company paid penalty of ₹48,600.00 and has already impacted to that extent on the financial statements for FY 2020-21.

#### **17. Impact of Technological Advancement.**

Our Company has a risk with respect to Technological Advancement in wrist watches such as Analog Watch, Digital Watch, and Automatic Watch and so on. Hence, we must regularly update existing technology and acquire new technology for our products and services. In addition, rapid and frequent technology and market demand changes can often render existing technologies and equipment obsolete, requiring capital expenditures. Our future success will depend in part on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. Our failure to anticipate or to respond adequately to changing technical, market demands could adversely affect our business and results of operations

#### **18. Effect of high competition in the market.**

We operate in highly competitive market and there exists competition from other domestic as well as international watch players. We face competition from other retailers of domestic and international brands of watches and manufacturers of watch components in the markets in which we currently operate. A number of different competitive factors could have a material adverse effect on our operational results, cash flow and financial condition including:

- i) anticipating and responding to changing customers' demands;
- ii) providing post sell services in relation to the product bought by the customer
- iii) maintaining our reputation in the markets in which we operate;
- iv) increasing our presence at different platform including e –retailing;

may have an adverse effect on our results of operations and financial condition.”

**20. Our Company will not receive any proceeds from the Offer for Sale portion.**

This Issue comprises of an offer for sale of 3,90,000 Equity Shares by our Promoter selling Shareholder, Mrs. Parmeshwari Sitaram Agrawal. For further details, please refer the Chapter titled “Objects of the Issue” on page no. 73 of this Prospectus.

**21. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and there can be no assurance that we will be able to pay dividends in the future.**

We currently intend to invest our future earnings, if any, to fund our growth. The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Hence, there can be no assurance that we will be able to pay dividends in the future.

**22. Our Promoters and members of the Promoter Group will continue to jointly retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.**

After the completion of this IPO, our Promoter and promoter group will beneficially own approximately 73.63% of our post-Issue equity share capital. As a result, the Promoters and Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company’s best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that lead as an adverse interest of our shareholders and may take positions with which our other shareholders do not agree.

**23. The requirements of being a listed company may strain our resources.**

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company. As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013 as amended. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant

resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

## **RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE**

### **24. Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.**

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

### **25. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.**

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investor's shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

### **26. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.**

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**27. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.**

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

**28. Non appraisal of funding requirements and proposed deployment of net proceeds by any bank or financial institution.**

“Since, the Issue size is less than Rs.100 Crores, there is no mandatory requirement of appointing an independent Monitoring Agency for overseeing the deployment of utilisation of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilise the Issue proceeds could adversely affect our financials.”

**29. Possible inability to sustain historical growth rates.**

Our company growth is depending upon various government policies, incentives and other regulatory factors. However, our past year growth rate is marginal decrease due to COVID-19. Further our management did not assure you that will maintain growth rate in future of the company.

## **EXTERNAL RISK FACTORS**

**30. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.**

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

**31. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.**

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels,

unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**32. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.**

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and neighboring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

**33. A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.**

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India 's sovereign debt rating or a decline in India 's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations. Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

**34. We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.**

We are incorporated in and our operations are in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include: political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries: -

- Occurrence of natural or man-made disasters;
- Any increase in Indian interest rates or inflation;
- Any exchange rate fluctuations;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- changes in India's tax, trade, fiscal or monetary policies;
- Prevailing regional conditions,
- any downgrading of India's debt rating by a domestic or international rating agency;
- Financial instability in financial markets; and
- Other significant regulatory or economic developments in or affecting India.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

**35. If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.**

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditure incurred. Our business and financial performance may be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations. To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see "Statement of Special Tax Benefits" on page no. 81 of this Prospectus for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to

governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

**36. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.**

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

**37. The ability of Indian companies to raise foreign capital may be constrained by Indian law.**

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

**38. *Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges*.**

There has been no public market for our Equity Shares prior to the Issue. The price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. You may not be able to re-sell your Equity Shares at or above the Issue price and may as a result lose all or part of your investment. Our Equity Shares are expected to trade on EMERGE Platform of NSE after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares. The price at which our Equity Shares will trade at after the Issue will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- An assessment of our management, our past and present operations and the prospects for as well as timing of our future revenues and cost structures;
- The valuation of publicly traded companies that are engaged in similar business activities to ours;
- Periodic variations in our results of operations;
- Results of operations that vary from the expectations of securities analysts and investors;
- Results of operations that vary from those of our competitors;
- Changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;

- A change in research analysts 'recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- Announcements of significant claims or proceedings against us;
- New laws and government regulations that directly or indirectly affect our business;
- Additions or departures of Key Management Personnel;
- Changes in the interest rates;
- Fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.”

## SECTION VI – ABOUT THE COMPANY

### INDUSTRY OVERVIEW

#### **India GDP**

In 2020, the global economic sky was overcast with COVID-19 - a virus of the size of 0.12 microns. By end-March 2021, the virus had resulted in over 128 million infections and over 2.8 million mortalities worldwide. The year 2021 has commenced with both hope and fear - several parts of the world are locking down and bracing against new waves of infections and speedily communicable mutations. At the same time, the approval of several vaccines has spurred vaccination drives worldwide, albeit at different speeds. Nearly 600 millions of vaccine doses have already been administered (March 31, 2021), even as vaccine producers struggle to tweak vaccines to keep pace with mutations. In the event, 2020 has gone down in human history as the year of the 'Great Lockdown'<sup>1</sup>, with output losses dwarfing those suffered during the global financial crisis (GFC) of 2008-09. World trade declined by around 8.5 per cent, with the contraction in services trade outpacing the fall in merchandise trade.

***(Source: Economic Review - Annual Report May 27, 2021)***

For the year 2020, global output sank into its steepest contraction since the Great Depression at (-) 3.3 per cent, with advanced countries' GDP down by 4.7 per cent and that of emerging and developing countries (EMDEs) by 2.2 per cent. World trade volume of goods and services shrank by 8.5 per cent. Consumer price inflation halved in advanced economies but remained broadly unchanged year-on-year in EMDEs, reflecting the firming up of non-fuel commodity prices. Crude prices, on the other hand, declined by close to 33 per cent during the year.

***(Source: Economic Review - Annual Report May 27, 2021)***

The Index of Industrial Production (IIP), one of the core economic indicators, is a short-term indicator for measuring growth of industrial production in the country. Based on the production data sourced from various Ministries / Departments including DPIIT, present series of IIP with base year 2011-12 is released by National Statistical Office, Ministry of Statistics & Programme Implementation every month. DPIIT collects production data of more than seventy percent of total item-groups from industrial establishments.

***(Source: Department for Promotion of Industry & Internal Trade, Ministry of Commerce & Industry, Government of India – Annual Report 2020-21)***

As per the IIP growth indicated in Table 2.1, it can be seen that annual industrial growth hovered between 3.3 and 4.6 percent during 2012-13 to 2018-19. Industrial output decelerated abruptly by 0.8 percent in 2019-20 and by 17.5 percent during the period April 2020 to October 2020. The contraction in industrial growth was due to disruption caused by the COVID-19 pandemic in the country.

### **India riding against the COVID-19 wave**

The agglutination of supply disruptions, the health crisis, an unparalleled mass migration and a hostile global environment took a heavy toll on the Indian economy. A cyclical slowdown had preceded the pandemic, causing real gross domestic product (GDP) growth to register a sequential deceleration since 2017-18, which slumped into contraction under the onslaught of COVID-19. Within two weeks of the World Health Organisation (WHO) declaring it a pandemic, India imposed a strict lockdown. The combination of demand compression and supply disruption that took hold in its wake caused severe debilitating effects on the economy in Q1:2020-21. By mid-September, the total number of COVID-19 cases crossed 50 lakh - the second highest caseload in the world, with over 0.8 lakh fatalities. It was a turning point, however; thereon, India bent the COVID-19 curve, with the seven-day rolling average of new confirmed cases dropping from 93,199 on September 16, 2020 to 11,145 on February 11, 2021 before rising sharply thereafter (62,019 on March 31, 2021). By the end of March 2021, the recovery rate was around 94 per cent and the number of active cases had surged to 5.8 lakh.

**(Source: Economic Review - Annual Report May 27, 2021)**

On the domestic front, the Indian economy is showing signs of revival from the impact of the COVID-19 second wave on the back of targeted fiscal relief, monetary policy measures, and a rapid vaccination drive. The broad-based economic relief package, extended to mitigate the second wave, amounted to Rs. 6.29 lakh crore. RBI continues with its efforts to calm the nerves of the market and revive sectors with both backward and forward linkages and multiplier effects on growth. With rapid and focused COVID-19 vaccination efforts, India's average daily vaccination rate in June 2021 has doubled to 41.3 lakh doses compared to 19.3 lakh in May, crossing the 36 crore mark in its cumulative vaccination coverage. By June end, 78 per cent of districts achieved COVID-19 test positivity rate below 5 per cent, thereby fostering conditions conducive for easing of restrictions and restoration of economic activities. Going forward, further expansion of vaccination and strict adherence to COVID-appropriate behavior will be a critical safeguard against emergence of a possible third wave.

**(Source: Monthly Economic Review - June 2021)**

As daily COVID-19 cases and deaths have ebbed since the second half of May 2021, the recovery momentum in several high frequency indicators has accelerated. India is on the move again with total volume of e-way bills rising by 37.1 per cent in June 2021 over May 2021 and 26 per cent YoY. This augurs well for GST collections in subsequent months. This is also mirrored in google mobility indicators with grocery activity returning to pre-COVID levels and retail and recreation activity showing sequential uptick. Power consumption growth improved to 4.5 per cent sequentially in June 2021 over May and 8.4 per cent YoY, albeit staying slightly below pre-COVID 2019 levels. Rail freight continues to sustain its momentum with freight loading higher by 11 per cent in June 2021 compared to June 2019 and 20 per cent higher compared to June 2020.

### **Global Watch Market**

It has been just over a year the world awoke to the enormity of the pandemic and how it affected life the world over. For Swiss watchmakers, 2020 was one of the worst years on record as export numbers plummeted to 2010 levels. As per the latest FH report, the decline in exports in the world's top 10 markets is gradually slowing down. Hong Kong, the Swiss powerhouse for exports till 2019, has now been replaced by China in the top spot. Currently the world's largest market for Swiss watches, China has once again taken the lead in exports in January 2021 with a 58.2 percent growth. US was the second-best market in terms of total export value though it still posted a negative 11 percent growth. Although Hong Kong is holding its place amongst the top three markets globally, its performance has further deteriorated to a negative 8.5 percent growth. "Strict measures to combat the pandemic had a sharply negative impact on watch exports to Japan (-20.9 percent) and the United Kingdom (-20.2 percent). Singapore, on the other hand, (-1.6 percent) showed almost no change," noted the FH. "Europe remained more heavily affected than other regions, with exports plummeting by 26.9 percent in January.

Asia-Pacific holds the Largest Share in Watch Market. China is one of the most competitive markets in the world, as it offers huge potential for manufacturers of luxury watches to acquire and compete. Rolex, Omega, Patek Philippe, Cartier, Channel, Longines, Tissot, Rado, Blancpain, and Piaget are some of the prominent luxury watch manufacturers. According to estimates released by the Federation of the Swiss Watch Industry, in January 2019, showed that China is now the third biggest export watch market, seeing a growth of 11.7 % from 2016. Similarly, the exports of Japanese watches increased in units by 5% amounting to 58 million units in 2019. It increased in value by 18%, amounting to CNY 163.7 billion, in relation to the previous year.

Moreover, the Indian watch market was initially targeted solely at men. However, with the

increasing rate of female participation in the workforce, the demand for female and unisex watches increased. Sensing the demand and the growing market, in 2017, the Switzerland-based watch manufacturer, Frederique Constant, introduced the newest addition to the most feminine collection of the brand, Art Déco, in India.

## **Global Watch Markets**

As in the period from June to September, the less steep decline at the global level in November was mainly due to the very strong performance posted by China (+69.5%), following a temporary lull in October (though still with +15.1% growth). Over a third of the main direct markets for watch exports also saw an upswing, however, helping to soften the downward trend to some extent. Among them, the United Kingdom (+21.8%), Taiwan (+18.5%) and Russia (+36.3%) were notable for steady growth. Conversely, other key markets continued to see more or less sharp declines, including the United States (-2.8%), Hong Kong (-14.0% in spite of a highly favourable base effect), Germany (-1.1%), Singapore (-31.9%), the United Arab Emirates (-3.7%), Italy (-27.8%) and France (-29.0%). (Source: Swiss Watchmaking in November 2020)

Asia's share of Swiss watch exports decreased slightly, because of the negative impact of Hong Kong. Nonetheless, Asia still accounted for more than half (53%) of the export turnover generated by Swiss watches in 2019. Europe represented 30% and America 15%. Overall, watch exports to Asia increased by 2.3% compared with 2018. Not all the main markets were close to the average, however. Hong Kong was heavily penalised by the protests that have been taking place there since June, finishing the year with a fall of -11.4% (-25.9% during the fourth quarter). Conversely, China regularly increased its pace of growth, ending on +16.1%, while exports to Japan grew by +19.9%. Singapore (+14.6%) was the third market to achieve strong growth, thanks to an excellent second half. Growth in South Korea (+4.9%) was more moderate.

## **GLOBAL ECONOMIC OUTLOOK**

Although recent vaccine approvals have raised hopes of a turnaround in the pandemic later this year, renewed waves and new variants of the virus pose concerns for the outlook. Amid exceptional uncertainty, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022. The 2021 forecast is revised up 0.3 percentage point relative to the previous forecast, reflecting expectations of a vaccine-powered strengthening of activity later in the year and additional policy support in a few large economies.

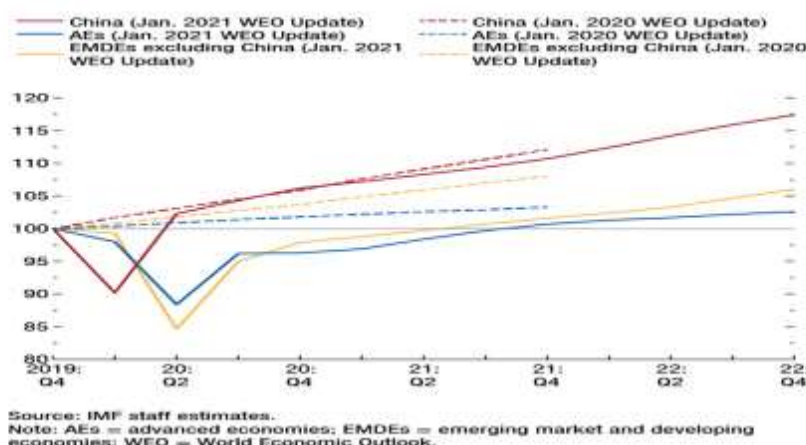

The projected growth recovery this year follows a severe collapse in 2020 that has had acute adverse impacts on women, youth, the poor, the informally employed, and those who work in contact-intensive sectors. The global growth contraction for 2020 is estimated at -3.5 percent, 0.9 percentage point higher than projected in the previous forecast (reflecting stronger-than-expected momentum in the second half of 2020).

The strength of the recovery is projected to vary significantly across countries, depending on access to medical interventions, effectiveness of policy support, exposure to cross-country spillovers, and structural characteristics entering the crisis (Figure 1).

**Figure 1. Divergent Recoveries: WEO Forecast for Advanced Economies and Emerging Market and Developing Economies**  
(Index, 2019:Q4 = 100)

Policy actions should ensure effective support until the recovery is firmly underway, with an emphasis on advancing key imperatives of raising potential output, ensuring participatory growth that benefits all, and accelerating the transition to lower carbon dependence. As noted in the October 2020 World Economic Outlook (WEO), a green investment push coupled with initially moderate but steadily rising carbon prices would yield needed emissions reductions while supporting the recovery from the pandemic recession.

Strong multilateral cooperation is required to bring the pandemic under control everywhere. Such efforts include bolstering funding for the COVAX facility to accelerate access to vaccines for all countries, ensuring universal distribution of vaccines, and facilitating access to therapeutics at affordable prices for all. Many countries, particularly low-income developing economies, entered the crisis with high debt that is set to rise further during the pandemic. The global community will need to continue working closely to ensure adequate access to international liquidity for these countries. Where sovereign debt is unsustainable, eligible countries should work with creditors to restructure their debt under the Common Framework agreed by the G20.

## Government Initiatives

The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term and long-term measures.

In the Union Budget 2021-22, capital expenditure for FY22 is likely to increase to increase by 34.5% at Rs. 5.5 lakh crore (US\$ 75.81 billion) over FY21 (BE) to boost the economy.

### Business Overview

Our Company shall be conducting following broad business marketing of various types of wrist watches such as Analog, Digital, Chronograph, Designer etc. which are either customer built or general in nature under the brand name "**FOCE**". We procure those watches from our group concern namely M/s Foce Industries a partnership firm, which is engaged in the business of assembling of watches at Guwahati, Assam.

### COVID-19 Pandemic

The current outbreak of COVID-19 pandemic and the preventative or protective actions that governments around the world have taken to counter the effects of the pandemic have resulted in a period of economic downturn and business disruption in India, as well as in countries where our customers and suppliers are located. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. Since we are engaged in manufacturing of automotive components, our products were not categorized under the 'essential goods' and hence our manufacturing facilities were shut down during this pandemic. During the initial stages of the lockdown our business operations were disrupted. Since then, we have resumed operations in a phased manner as per the Government of India and state government's directives. We have resumed our manufacturing activities after making arrangements to meet the government's requirements on sanitization, people movement and social distancing. However, due to limited availability of labour, raw material suppliers, logistics and supply chain constraints, our plant is operating at sub-optimal capacity utilization. For further impact of COVID-19 on our business, our Company and our industry, please see "Risk Factors" on page no. 28 of this Prospectus. We are

continuing to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I and will continue till March 31, 2020. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“**FDI**”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“**DPIIT**”), issued the Consolidated FDI Policy Circular of 2017 (“**FDI Policy**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 27, 2017. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For details, see “Issue Procedure” on page no. 200 of this Prospectus.
