INDIAN CHEMICAL INDUSTRY

Source: <https://www.ibef.org/industry/chemical-industry-india>

INTRODUCTION

Covering, more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers and fertilisers.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for ~16% of the world production of dyestuffs and dye intermediates. Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for few hazardous chemicals. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals).

The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals.

India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

EXECUTIVE SUMMARY

Source: IBEF, Chemicals, June 2022

2. HIGHLY DIVERSIFIED

- The Indian chemicals industry is highly diversified, covering >80,000 products and employing >2 million people.
- A network of 200 national laboratories and 1,300 R&D centres provides a strong base to the Indian chemical industry to drive innovations.
- The chemical industry is expected to contribute US\$ 300 billion to India's GDP by 2025.

1. GLOBAL POSITION

- Globally, India is the third-largest consumer of polymers, fourth-largest producer of agrochemicals and sixth-largest producer of chemicals.
- The Indian chemicals industry makes up 3.4% of the global chemicals industry.
- In 2019, the Indian chemicals market stood at US\$ 178 billion and is forecast to reach US\$ 304 billion by 2025.

3. STRONG GROWTH IN SPECIALTY CHEMICALS

- The Indian specialty chemicals sector is expected to increase at a CAGR of 12.4%, from US\$ 32 billion in 2019 to an estimated US\$ 64 billion by 2025.
- Also, ICRA's ratings indicate improved exports and a positive outlook for agrochemicals and surfactants.

4. LARGEST GLOBAL DYE SUPPLIER

- India is the world leader in dye manufacturing, accounting for 16%-18% of global dyestuff exports.

INDIAN PAINT INDUSTRY

Source: <https://www.paintindia.in/india-paint-industry>

The Indian Paint Industry is today worth over INR 62,000 crores (USD 8 billion), and is the fastest-growing major paint economy the world over, with a consistent double-digit growth over the last 2 decades. It has over 3,000 paint manufacturers, with nearly all global majors present in the country. It has a near-75% share of architectural paints and a 25% share of industrial paints, with an equitable fast-paced growth across all segments, from Architectural to Powder, from Automotive to Coil, from High-Performance to General Industrial, from Refinish to Wood, and from Packaging to Plastic.

Allied Industry Segments

Besides the core Paint/Coatings segment, Paint India also represents the interests of the Printing Inks, Construction Chemicals and Adhesives-Sealants segments from a sourcing and manufacturing viewpoint, since the raw materials, production equipment and supply channels have a significant overlap, and none of these segments have dedicated world-class events for themselves. Similarly, large and important industry segments like Pigments, Resins, Plastic Master batches and Composites also find valuable sourcing avenues at the show, extending the benefits and customer engagement on offer.

The dyes and pigments market was valued at approximately USD 33030 million in 2020, and it is estimated to grow at a CAGR of more than 4% during the forecast period (2021-2026).

COVID-19 had critical repercussions on the market. As a result of the pandemic simulation, several countries went into lockdown, causing outages and shutdowns. This had a major implication for a variety of industries, including paints and coatings, textiles, and others. However, conditions are intended to elevate in 2020, reclaiming the market's growth trajectory studied during the forecast period.

Our customers generally do not enter into any long term contracts with us. Our ability to maintain close and satisfactory relationships with our customers and to consistently manufacture products that meet their requirements is therefore important to our business. There is no assurance that these customers will continue to purchase our products from us or in the years to come. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

3. *Substantial portion of our revenues has been dependent upon limited number of customers.*

Revenue from our top 5 customers constituted 85.80%, 79.90% and 81.53% of our revenue from operations for the 6 months period ended September 30, 2022, and financial years March 31, 2022 and March 31, 2021 respectively. We do not have firm commitment supply agreements with most of our customers and instead rely on purchase orders to govern the volume and other terms of our sales of products. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. While we are constantly striving to increase our customer base and reduce dependence on any customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

4. *Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.*

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. We will be applying for certain approvals relating to our business. If we fail to maintain such registrations and licenses or comply with applicable conditions, or a regulatory authority claims we have not complied, with these conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition, and results of operations. We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For more information about the licenses required in our business and the licenses and approvals applied for, please refer “*Government and Other Approvals*” on page 154 of this Prospectus, respectively.

5. *The loss resulting from shutdown of operations at any of our plants could have an adverse effect on us.*

Our plants are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents. Our plants use complex equipment and machinery, and the breakdown or failure of equipment or machinery may result in us having to make repairs or procure replacements which may require considerable time and expense. Although we have not had such incident in the past and we take precautions to minimize the risk of any significant operational problems at our plants, we cant assure that any such incident will not occur and it could have adverse effect on our financial performance.

6. *We may not be able to maintain the pace of growth as exhibited historically. Our inability to efficiently handle the abovementioned challenges may affect our business prospects, results of operations and financial condition*

We have experienced significant growth in recent years and expect our business to grow further. Our ability to sustain our growth depends, in a large part, on our ability:

- To augment financial resources for additional capacities at competitive terms and conditions;
- To complete capacity expansion / new projects without time and cost overrun;
- To employ and retain key management personnel;
- To design and implement strong internal control systems; and
- To control costs.

Our inability to efficiently handle the abovementioned challenges may affect our business prospects, results of operations and financial condition.

7. Our Company is dependent on third party transportation providers for the supply of raw materials and delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations

Our Company uses third party transportation providers for the supply of most of our raw materials and delivery of our products to our domestic customers. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on the supplies from our suppliers and deliveries to our customers. These transportation facilities may not be adequate to support our existing and future operations. In addition, raw materials and products maybe lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials and products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our products to our customers may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure and port facilities, or other events could impair our ability to supply our products to our customers. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

8. Our Company had negative cash flows in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

(₹ in lakhs)

Cash flow from	September 30, 2022	March 31, 2022	March 31, 2021	March 31, 2020
Investing activities	(174.89)	(327.06)	(68.56)	(123.74)
Financing activities	(769.79)	37.15	(930.60)	(160.45)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details please refer to the section titled 'Financial Information' and chapter titled 'Management's Discussion and Analysis of Financial Condition and Results of Operations as reflected in the Financial Statements' beginning on pages 108 and 137 respectively, of the Prospectus.

9. Our operations are subject to environmental, workers' health and safety and employee laws and regulations. We may incur material costs to comply with, or suffer material liabilities or other adverse consequences as a result of, environmental laws and regulations which may have a material adverse affect on our business, financial condition and results of operations.

Our operations are subject to extensive environmental and hazardous waste management laws and regulations in India, including the Environmental Protection Act, 1986, as amended (the "Environment Act"), the Air (Prevention and Control of Pollution) Act, 1981, as amended (the "Air Act"), the Water (Prevention and Control of Pollution) Act, 1974, as amended (the "Water Act") and other regulations promulgated by the MoEF and various statutory and regulatory authorities and agencies in India. The chemical industry is subject to strict regulations with respect to a range of environmental matters including limitations on land use, including forest land, licensing requirements; management of materials used in manufacturing activities; the storage of inflammable and hazardous substances and associated risks; the storage, treatment and disposal of wastes; remediation of contaminated soil and groundwater; air quality standards; water pollution; and discharge of hazardous materials into the environment. The discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liabilities towards the government and third parties, and may result in our incurring costs to remedy any such discharge or emissions.

The impact of these laws and regulations, or any changes to such laws or regulations, may be significant and may delay the commencement of, or cause interruptions to, our operations. We may not have complied with all such applicable environmental laws and regulations in the past and in the future may not comply with applicable laws and regulations due to some lapse or error.

Further, our company had undertaken various measures like rationalization of operational processes, upgradation/shifting of facilities including infrastructures with the assistance of external experts to ensure that the company's current three locations are compliant with environmental laws of the land. Our manufacturing units are

being inspected on regular basis by the Maharashtra Pollution Control Board. We have been issued various show cause notices by Maharashtra Pollution Control Board from time to time for our manufacturing units. Our Company earlier was issued show cause notices in the past and we had replied to those and there has been no further queries on the same and there are no outstanding notices as on date:

The details of these show cause notices are as under:

UNIT II: NIL

Note:

To streamline dedicated wet dispersion operation at Unit 1 at Talaja Plot No. 22/2, dry dispersion activities were shifted in 2012 for 5 years to a sub - leased facility at Talaja Plot No. G/7. This facility was served a letter from MPCB (MPCB/SRO NM-III/TB/1966) dated 16.08.2017 for non - compliance of Consent Conditions. The same was complied on 29.08.2017 by closing down this operation as per advise of MPCB. Subsequently, dry dispersion activities were shifted to Unit 2 at Talaja Plot No.T - 5/1.

Environmental laws and regulations in India have become increasingly stringent, and it is possible that they will become significantly more stringent in the future. If any of our units or the operations of such units are shut down, we may continue to incur costs in complying with regulations, appealing any decision to close our facilities, maintaining production at our existing facilities and continuing to pay labour and other costs which may continue even if the facility is closed. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations may impose new liabilities on us or result in the need for additional compliance requirements and additional investment in environmental protection equipment, either of which could adversely affect our business, financial condition or prospects.

10. Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and / or surplus of products, which could harm our business.

We monitor our inventory levels based on our own projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we must make production decisions well in advance of

sales. An inaccurate forecast of demand for any product can result in the unavailability / surplus of products. This unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially and ultimately create write-offs of inventory. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

11. *Quality concerns and negative publicity, if any, would adversely affect the value of our brand, and our sales.*

Our business is dependent on the trust our customers have in the quality of our products as well as on our ability to protect our brand value. Any negative publicity regarding our Company, brands or products, including those arising from a drop in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our brand value, our operations and our results from operations.

12. *We operate in an unorganized industry and face significant competition. Our inability to compete effectively, market our products relative to our competitors may lead to lower market share and adversely affect our operations and profitability.*

Our Company sells its products in highly competitive markets and faces competition; however it is not possible to compute the present market share of our Company since the Indian pigments and dyes industry is largely an unorganised industry and there are no reliable source / report which carries this data on market share. Further, the competition in these markets is based primarily on demand creation and as a result, to remain competitive in our markets, we must continuously strive to effectively market our products. In each of our markets, we face competition primarily from the unorganized market, Indian corporates and MNCs. In the event of price competition from our competitors, we may be required to reduce the price of our products while maintaining quality standards and our Company may not always be able to do so. Some of our competitors may have greater financial resources, generate higher revenues, and therefore, be able to better respond to market changes and shifts in consumer spending patterns and changes in consumer sentiments and tastes. They also may be in a better position than us to sustain losses in revenue due to pricing pressures. Accordingly, we cannot be certain that we will be able to compete effectively with these competitors or that we will not lose customers to these competitors. If we are not able to compete effectively, our business, results of operations and financial condition could be adversely affected.

13. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.*

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising, or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our board. In addition, schedule of implementation as described herein are based on management's current expectations and are subject to change due to various factors some of which may not be in our control.

14. *Fluctuations in the availability and quality of raw materials could cause delay and increase costs.*

The availability of raw materials may fluctuate significantly, depending on many factors including transportation and weather patterns. For details of raw materials used by us please refer to paragraph titled "Raw Materials" under chapters titled 'Our Business' beginning on page 72 respectively of the Prospectus. Though we cover purchases on a monthly basis, we are still exposed to and will have to absorb any fluctuations in the prices including that of crude oil. We do not and will not have control over the factors affecting prices for crude oil. Historically, international prices for crude oil have been volatile and have fluctuated widely in response to changes in many factors. Such fluctuations in the prices of crude oil may result in fluctuations in the cost of our raw materials which in turn may have a material adverse effect on our results of operations.

Any material shortage or interruption in the supply or decrease in the quality of raw materials due to natural causes or other factors could result in increased production costs that we may not be able to pass on to our customers, which in turn would have a material adverse effect on our margins and results of operations.

Further, our suppliers of other raw materials may allocate their resources to service other clients ahead of us. While we believe that we could find additional vendors to procure other raw materials, any failure of our suppliers to deliver such raw materials in the necessary quantities or to adhere to delivery schedules or specified quality standards and technical specifications would adversely affect our production processes and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers, which could have a material adverse effect on our business, financial condition and results of operations.

15. Raw materials constitute a significant percentage of our Company's total expenses. Any increase in prices and any decrease in the supply would materially adversely affect our Company's business.

Raw materials constitute a significant percentage of the total expenses of our Company. The cost of materials consumed accounted for 62.17%, 56.86% and 64.64% of total income in each of the Financial Years 2022, 2021 and 2020 respectively. Any increase in the price of raw materials, which our Company is unable to pass on the impact of, would have a material adverse effect on our Company's business. We are exposed to the price risk associated with purchasing our raw materials, which form the highest component of our expenses. We typically do not enter into formal arrangements with our vendors. Therefore, fluctuations in the price and availability of raw materials may affect our business and results of operations. We do not currently engage in any hedging activities against commodity price risk. Any material shortage or interruption in the domestic and international supply or decrease in the quality of raw materials due to natural causes or other factors could result in increased production costs that our Company may not successfully be able to pass on to customers, which in turn would have a material adverse effect on our Company's business.

16. We are a labour intensive industry and hence may face labour disruptions and other planned and unplanned outages that would interfere with our operations.

Our Company's activities are labour intensive. Strikes and other labour actions may have an adverse impact on our operations, though we have not experienced any such labour disruption in the past. We cannot guarantee that we will not experience any strike, work stoppage or other industrial action in the future. Also, the third-party suppliers of raw materials which we use may experience strikes or other industrial action. Any such event could disrupt our operations, possibly for a significant period of time, result in increased wages and other costs and otherwise have a material adverse effect on our business, results of operations or financial condition. For further details, please refer to the paragraph titled 'Manpower' under chapter titled 'Our Business' beginning on page 72 of the Prospectus. In addition, work stoppages, refurbishments, installation of new plants, accidents or sustained bad weather at our operations could result in production losses and delays in delivery of our products, which may adversely affect our operations and profitability. Production may also fall below historic or estimated levels as a result of unplanned outages.

17. The loss resulting from the shutdown of operations at any of our units could have an adverse effect on our Company.

Our units are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents. Our units use complex equipment and machinery, and the breakdown or failure of equipment or machinery may result in us having to make repairs or procure replacements which may require considerable time and expense. Although our Company have not had such incident in the past and while we have insurance cover for both our facilities, including for loss of profit due to accidental shut down, the same may not be adequate to cover the loss in business. Although we take precautions to minimise the risk of any significant operational problems at our units, they could have an adverse effect on our financial performance.

18. Increasing employee compensation in India may reduce our Company's profit margins.

Increase in compensation levels in India may negatively affect our profit margins. Employee compensation in India is currently increasing which could result in increased costs of production. Our Company may need to continue to increase levels of employee compensation to manage attrition. Any increases in the amount of compensation paid to our Company's employees could have a significant effect on our costs, which may affect our position in our industry and have a material adverse effect on our business and financial operations.

19. Our business is dependent on our manufacturing facilities, the majority of which are geographically located in one area, Maharashtra. Any loss or shutdown of operations at any of our manufacturing facilities in Maharashtra may have an adverse effect on our business and the results of operations.

All our manufacturing facilities are based near Mumbai in Maharashtra. As a result, if there is any localised social unrest, natural disaster or breakdown of services and utilities in Maharashtra, it may affect our business adversely. Further our manufacturing activities are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes, lockouts, continued availability of services of our external contractors, earthquakes and other natural disasters, industrial accidents etc. We have not experienced any of these operating risks in the past. Although we have contingency plans to meet most of our operating risks, we cannot assure you about the adequacy of such plans will be adequate to meet all of our operating risks.

20. Product innovation and research and development (R&D) activities are an integral part of our business model. If our research and product development efforts are not successful, our business may be restricted which may in turn have an adverse effect on our business and financial condition.

Product Innovation and Research and Development (R&D) activities are an integral part of our business model. Our Company needs to introduce new products and further expand into additional areas to remain successful in the future. Our Company's plans to introduce new products into markets and diversify the areas in which it operates may not be successful. Any material adverse developments with respect to the sale or use of our products, failure to successfully introduce new products or implement our expansion strategies, could have a material adverse effect on the business and financial condition of our Company. Further, new products currently under development, if and when fully developed and tested, may not perform as per our expectations and our Company may not be able to successfully and profitably produce and market such products, which may consequently restrict our business and affect our financial condition.

21. We are subject to risks arising from foreign exchange rate movements.

Our exchange rate risk primarily arises from our foreign currency revenues, receivables, payables etc. We have significant revenues in foreign currencies especially US\$. The foreign exchange fluctuation affects both the revenues and expenditures in absolute terms when converted into Indian rupees. To this extent, the revenues and expenditures will be higher or lower depending on the depreciation or appreciation of Indian Rupee in foreign currency terms.

The exchange rate between the Indian Rupee and the United States Dollar has been volatile in recent years and may fluctuate in the future. Therefore, changes in the exchange rate between the Indian Rupee and the US\$ may have a material adverse effect on our revenues, other income, operating costs and net income, which may in turn have a negative impact on our business, operating results and financial condition.

For further details please refer to the paragraph titled 'Foreign Exchange Risk' under the chapter titled 'Management's Discussion and Analysis of Financial Condition and Results of Operations' beginning on page 137 of the Prospectus.

22. We have limited knowledge and records of documents relating to corporate actions undertaken by our Company prior to March 2001.

Our Company was incorporated on June 16, 1994. We have been unable to trace some of documents pertaining to corporate, accounting and other statutory records, including any supporting documents such as share transfer forms, ROC records pertaining to increase in authorised capital or paid up capital. and/or RoC filings for the period from incorporation in June 1994 up to March 1996. All this data has been derived from the statutory registers and share transfer register maintained by our company. We cannot assure you that these form filings and corporate records will be available in the future or that we will not be subject to any penalty imposed by the competent regulatory authorities in this respect or incur additional expenses arising from our inability to furnish correct particulars in respect of the RoC filings or other corporate records or for any misrepresentation of facts which may occur as a result of the non-availability of relevant documents.

23. Our Company have in the past entered into related party transactions with our Promoters and Promoter Group Entities and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

Our Company has entered into related party transactions with our Promoters and Promoter Group Entities in the past. While our Company believes that all such transactions have been conducted on an arm's length basis are in compliance with applicable provisions of Companies Act, 2013 and other applicable laws and are accounted as per Accounting Standard 18, however there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

For further details please refer to the section titled '*Financial Information*' beginning on page 108 of the Prospectus.

24. *Our Company has availed certain unsecured loans from the Promoters and Promoter Group that are recallable by the lenders at any time.*

As on September 30, 2022, our Company has availed certain unsecured loans from Promoters and Promoter Group that are recallable on demand by our lenders. The total amount of outstanding as on September 30, 2022 is ₹ 6.91 Lakhs. For further details of these unsecured loans, refer "*Financial Indebtedness*" on page [●]. In case of any demand from our lenders for repayment of such unsecured loans, the resultant cash outgo, may adversely affect our business operations and financial position of our Company.

25. *Our success depends largely upon the services of our Promoters, Executive Directors and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our Managing Director, Aamer Ahmed Farid and our Whole-time Director, Hani Ahmed Farid have over the years built relations with suppliers, customers and other persons who are connected with us. Our Key Managerial Personnel have also substantially contributed for our growth. Our success is substantially dependent on the expertise and services of our Directors and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

26. *Our agreements with various financial institutions for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for short term and long term borrowings with certain financial institutions. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as to obtain either the prior written consent of such financial institutions or require us to give prior written intimation to such lenders, prior to, amongst other circumstances, creating further encumbrances on our assets, disposing of assets outside the ordinary course of business, paying dividends to our shareholders, undertaking guarantee obligations, alteration of our capital structure, raising of additional equity or debt capital, incurrence of indebtedness, undertaking any merger, amalgamation, restructuring or changes in management. Our ability to execute business plans, including our ability to obtain additional financing on terms and conditions acceptable to us, could be negatively impacted as a result of these restrictions and limitations. In the event that we breach a restrictive covenant, our lenders could deem us to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives. Although we have received consents from our lenders for the Issue, we cannot assure you that we will be able to receive such consents in future.

For further details, please refer to the section '*Financial Indebtedness*' beginning on page 147 of the Prospectus.

27. *Our Promoters and Directors have provided personal guarantees for our loans, and any failure or default by us to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations, which may adversely affect our Promoters' ability to manage our affairs.*

We have obtained loans in the ordinary course of business for the purposes of working capital and other business requirements. Our Promoters and our Executive Directors have given personal guarantees in relation to certain of our

loans. For details, see “Financial Indebtedness” on page 147. In the event of default on the loans, the guarantees may be invoked by our lenders thereby adversely affecting our Promoters’ ability to manage our affairs and this, in turn, could adversely affect our business, prospects, financial condition and results of operations. Further, if any of these guarantees are revoked by our Promoters, our lenders may require alternate security or guarantees and may seek early repayment or terminate such facilities. We may not be successful in providing alternate guarantees satisfactory to the lenders, and as a result may be required to repay outstanding amounts or seek additional sources of capital. Any such event could adversely affect our financial condition and results of operations.

28. Our operations are subject to high working capital requirements. Our inability to obtain and / or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our requirement of working capital or pay our debts, could adversely affect our operations.

Our business requires significant amount of working capital. In many cases, significant amount of our working capital is required for purchasing and maintaining of stock of goods. Most of these materials are purchased locally or are imported. Though, presently we have sanctioned working capital limits from the existing bankers and one of the objects of the Issue is to meet our future working capital requirements, we may need to incur additional indebtedness in the future to satisfy our working capital needs. All these factors may result in increase in the quantum of our current assets and short-term borrowings. Our inability to obtain and / or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our requirement of working capital or pay our debts, could adversely affect our financial condition and results of operations.

30. Members of our Promoter Group will continue to retain significant control in our Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.

After the completion of this Issue, our Promoters and Promoter Group will continue to hold 57.38% of the post issue paid up Equity Share capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting, and our other shareholders will be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders, such as actions which delay, defer or cause a change of our control or a change in our capital structure, merger, consolidation, takeover or other business combination involving us, or which discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. We cannot assure you that our Promoter and members of our Promoter Group will act in our interest while exercising their rights in such entities, which may in turn materially and adversely affect our business and results of operations. We cannot assure you that our Promoter will act to resolve any conflicts of interest in our favour. If our Promoter sells a substantial number of the Equity Shares in the public market, or if there is a perception that such sale or distribution could occur, the market price of the Equity Shares could be adversely affected. No assurance can be given that such Equity Shares that are held by the Promoter will not be sold any time after the Issue, which could cause the price of the Equity Shares to decline.

31. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and are also prohibited by the terms of our financing arrangements.

Our Company paid dividend aggregating to ₹ 30.00 lakhs for the FY 2022. The amount of our future dividend payments, if any, will depend upon factors that our Board deems relevant, including among others, our results of future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

32. Our insurance cover may not adequately protect us against all material hazards.

Our Company has various insurance policies covering stocks, building, furniture, plant and machinery, etc. We believe that we have insured ourselves against the majority of the risks associated with our business. Our significant insurance

policies provide cover for risks relating to physical loss, theft or damage to our assets, as well as business interruption losses. While we believe that the policies that we maintain would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have obtained sufficient insurance (either in amount or in terms of risks covered) to cover all material losses. To the extent that we suffer loss or damage for events for which we are not insured or for which our insurance is inadequate, the loss would have to be borne by us, and, as a result, our results of operations and financial condition could be adversely affected.

33. Any changes in regulations or applicable government incentives would materially adversely affect our Company's operations and growth prospects.

Our Company is subject to regulations in India. Our Company's business and prospects could be adversely affected by changes in any of these regulations and policies, or if any or all of the incentives currently available cease to be, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which would have a material adverse affect on our Company's operations and financial results.

34. In the event of abnormal / exceptional circumstances, our Company may experience significant or material losses on account of bad debts, which would have a material adverse impact on our business, results of operations and financial condition.

Normally, we deliver a significant portion of our products against future payment. The bad debts written off for the Fiscal 2022 were ₹ 50.65 lakhs. In the event of certain abnormal / exceptional circumstances, there may be significant or material losses on account of bad debts, which would have a material adverse impact on our business, results of operations and financial condition.

35. Our Audit Report for FY 2021 and FY 2020 includes following remarks as "Emphasis of Matter".

Our Auditor's report for the FY 2021 contains certain observations as "Emphasis of Matter" as highlighted by the earlier Auditor, A P & Co., Chartered Accountants:

1. We draw your attention to the fact the company accounts for gratuity dues not in accordance with revised Accounting Standard - 15 on "Employee Benefits". Since the company has not ascertained gratuity liability based on actuarial valuation and has also not determined leave encashment benefit, the quantum of the said liability and its impact on profit/reserves cannot be ascertained'.
2. We would also like to draw your attention to the fact that the company discloses sale inclusive of Goods and Service Tax. As on 31st March, 2021, the amount of GST included in sales turnover is Rs 12,76,33,454.
3. Included in debtors shown in the balance sheet is an amount of 50,64,546/- due from two debtors which though the company claims to be good and recoverable' in our opinion recovery of the same is doubtful, and no payment has been received in respect of these two debts. In our opinion, the Company should make a full provision doubtful debt which will further decrease the profit during the year by the said amount of Rs 50,64,546/- and impact the reserves of the Company.
4. The company has advanced Rs 20,00,000/- towards purchase of an immovable property which is classified by the company as doubtful but no provision for the same has been made. In our opinion, the company should make a full provision for the amount so advanced which will further decrease the profit during the year by the said amount of Rs. 20,00,000/- and impact the reserves of the Company.

The opinion of the auditor is not modified in respect of aforesaid matters.

During the audit of FY 2022, our statutory auditor M/s. R.H. Modi & Co. made all the necessary adjustments and the same have been adequately reflected in our Restated Financial Statements.

36. We have referred to the data derived from internal Company reports and industry and government publications, publicly available information, and sources.

Unless stated otherwise, industry and market data used throughout this Prospectus has been obtained or derived from internal Company reports and industry and government publications, publicly available information, and sources. Industry publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed, and their reliability cannot be assured. Although, our Company believes that industry data used in this Prospectus is reliable, it has not been independently verified. Further, the extent to which the industry and market data presented in this Prospectus is meaningful depends on the reader's familiarity with and understanding of, the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which we conduct our business, and methodologies and assumptions may vary widely among different industry sources.

37. *The recent outbreak of the novel coronavirus could have a significant effect on our results of operations, and could negatively impact our business, revenues, financial condition, and results of operations.*

An outbreak of COVID-19 was recognised as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Due to a government mandated lockdown in India, we had to temporarily shut down our operations from mid-March 2020 to June 2020. We saw a decline in our business during first half of Fiscal 2021. We have resumed operations in July 2020. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition, and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

38. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "Objects of the Issue" beginning on page 58 of the Prospectus.

39. *We do not own our Registered Office and back office from which we operate.*

We do not own the premises on which our Registered Office and back office is situated. Our Company has taken the registered office on leave & license basis. Our Company has formally taken the back office situated at 15, Old Bangalipura Street, Masjid West, Mumbai – 400003, Maharashtra, India, from M/s MA Bagash an entity forming part of our Promoter group on a yearly lease rent of ₹ 15.58 Lakh. If the owner of the premises, revoke this agreement or impose terms and conditions that are unfavorable to us, we may suffer a disruption in our operations or have to pay increased rent, which could have a material adverse effect on our business, prospects, results of operations and financial condition. For further details of our office premises please refer to the section titled "Our Business" on pages 72 of the Prospectus.

40. *Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.*

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders

would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

41. Our Company's management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

42. Our Company has not registered the trademark. Our ability to use the trademark may be impaired if the same is not registered under our name.

We have not registered the trademark and logo of our Company which we use. The registration for the said trademark in our name is important to retain our brand equity. If we do not register our trademark, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. We are unable to assure that the future viability or value of any of our intellectual. Our Company's business may be affected due to our inability to protect our existing and future intellectual property rights. Currently, we do not enjoy the statutory protections accorded to a trademark registered in India and may not prohibit the use of such name and logo by anybody by means of statutory protection until it is registered.

43. The requirements of being a listed company may strain our resources.

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI (LODR) Regulations, which require us to file audited / unaudited reports periodically with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all.

EXTERNAL RISKS

44. Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations, cash flows and financial condition.

India is our key market. For Fiscal 2021, entire of our Company's revenue from operations was from India. In addition, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations, cash flows and financial condition.

45. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.*

Our business is subject to various laws and regulations, which are evolving and subject to change. For details, see “Key Industrial Regulations and Policies in India” on page 76. We are also subject to corporate, taxation and other laws in effect in India, which require continued monitoring and compliance. These laws and regulations and the way in which they are implemented and enforced may change. There can be no assurance that future legislative or regulatory changes will not have any adverse effect on our business, results of operations, cash flows and financial condition.

46. *Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

47. *Significant differences exist between Ind AS and Indian GAAP and other accounting principles, such as IFRS and US GAAP, which may be material to investors’ assessments of our financial condition, result of operations and cash flows.*

Our financial statements for Fiscals 2019, 2018 and 2017 included in this Prospectus are prepared and presented in conformity with Indian GAAP and restated in accordance with the requirements the SEBI (ICDR) Regulations and the Guidance Note on “Reports in Company Prospectuses (Revised 2016)” issued by the ICAI. Ind AS differs from Indian GAAP and other accounting principles with which prospective investors may be familiar in other countries, such as IFRS and U.S. GAAP. Accordingly, the degree to which the Financial Statements included in this Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices should limit their reliance on the financial disclosures presented in this Prospectus.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

48. *Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.*

There has been no public market for our Equity Shares prior to the Issue. The price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. You may not be able to re-sell your Equity Shares at or above the Issue price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on SME Platform of NSE after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Issue will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;
- An assessment of our management, our past and present operations, and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;

- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

49. Any future issuance of Equity Shares by us or sales of Equity Shares by the Promoters could adversely affect the trading price of our Equity Shares and in the case of the issuance of Equity Shares by us result in the dilution of our then current shareholders.

As disclosed in “Capital Structure” on page 46, an aggregate of 20% of our fully diluted post-Issue capital held by our Promoters shall be considered as minimum Promoters’ contribution and locked in for a period of three years and the balance Equity Shares held by the Promoters will be locked-in for one year from the date of Allotment. Except for the customary lock-in on our ability to issue equity or equity-linked securities discussed in “Capital Structure” on page 46, there is no restriction on our ability to issue Equity Shares. As such, there can be no assurance that our Company will not issue additional Equity Shares after the lock-in period expires or that the Promoters will not sell, pledge or encumber their Equity Shares after the lock-in periods expire. Future issuances of Equity Shares or convertible securities and the sale of the underlying Equity Shares could dilute the holdings of our Shareholders and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the then trading price of our Equity Shares or the Issue Price. Sales of Equity Shares by the Promoters could also adversely affect the trading price of our Equity Shares.

50. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ₹ 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

51. QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their applications (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting an application. Retail Individual Bidders can revise their applications during the Issue Period and withdraw their applications until Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within six Working Days from the Issue Closing Date, events affecting the Bidders’ decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity

Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

52. Political, economic, or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity, and the price of our Equity Shares.

Our performance, growth and market price of our Equity Shares are and will be dependent on the health of the Indian economy. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional, and global economies. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

53. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of corporate and tax laws, may adversely affect our business and financial results.

Our business and financial performance could be adversely affected by any change in laws or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business including those relating to the industry in which we operate. There can be no assurance that the Government of India or state governments will not introduce new laws, regulations and policies which will require us to obtain additional approvals and licenses or impose onerous requirements on our business.

For example, the new Companies Act, 2013 contains significant changes to Indian company law, including in relation to the issue of capital by companies, disclosures in offer documents, related party transactions, corporate governance, audit matters, internal controls, shareholder class actions, restrictions on the number of layers of subsidiaries, prohibitions on loans to directors, insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Moreover, effective April 1, 2014, companies exceeding certain net worth, revenue or profit thresholds are required to spend at least 2% of average net profits from the immediately preceding three financial years on corporate social responsibility projects, failing which an explanation is required to be provided in such companies' annual reports.

The Ministry of Finance has issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. Subsequently, the Ministry of Finance, through a press release dated July 6, 2016, deferred the applicability of ICDS from April 1, 2015 to April 1, 2016 and is applicable from FY 2017 onwards and will have impact on computation of taxable income for FY 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. Such specific standards for computation of income taxes in India are relatively new, and the impact of the ICDS on our results of operations and financial condition is uncertain. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition going forward.

The Government of India has recently approved the adoption of a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure, with effect from July 1, 2017. Given the limited availability of information in the public domain concerning the GST, we cannot provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments,

which may create uncertainty. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, because of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

We have not determined the effect of such legislations on our business. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

54. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the SME Platform of NSE may not develop or be sustained after the Issue. Our Company and the Lead Manager have appointed BHH Securities Private Limited as Designated Market Maker for the Equity Shares of our Company. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the SME Platform of BSE, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

The working capital projections made by the Company are based on certain key assumptions, as set out below:

Sr. No.	Particulars	Assumptions
Current Assets		
1	Inventories	We maintain inventories at levels to achieve cost competitiveness and shorter lead times. We need to maintain inventory at efficient levels. In Fiscal 2020, Fiscal 2021 and Fiscal 2022 our inventory days were 166 days, 143 days and 124 days respectively. We have estimated 130 days of inventory for the Fiscal ended March 31, 2023 and 133 days of inventory for the Fiscal ended March 31, 2024, to ensure adequate availability of the raw material at a more competitive price. Furthermore, with the commercial production starting at our Unit III we will require additional inventory levels and hence the inventory levels have also increased in absolute terms.
2	Trade Receivables	In Fiscal 2020, 2021 and 2022 our receivable days were 50 days, 46 days and 42 days respectively. Due to business growth and the need for increasing the sales volume we estimate the receivable levels at 41 days for Fiscal 2023 and 45 days for Fiscal 2024. We don't expect much increase in receivable levels due to the long-term relationships with our customers and already existing business with them.
3	Short Term Loans & Advances	The key items under this head are advance to staff, other advances, prepaid expenses, advance to with statutory authorities, advance to suppliers etc.
4	Other Current Assets	This mainly include Miscellaneous Expenditure to the extent not written off
Current Liabilities		
5	Trade Payables	Our trade payables have been for 153 days, 165 days and 117 days for fiscal 2020, 2021 and 2022 respectively. However, going forward we estimate to maintain payables at 110 days for Fiscal 2023 to avail best pricing and buy from large suppliers. Further since we will maintain inventories at higher levels, due to commencement of operations at our Unit III, we estimate a slight decline in payable days to get better term from our suppliers.
6	Other Current Liabilities	Other current liabilities include statutory dues, advance from customers and other liabilities etc.
7	Short Term Provisions	It includes provision for taxes and provision for employee benefit.

INDIAN ECONOMY OVERVIEW

Source: <https://www.ibef.org/economy/indian-economy-overview>

INTRODUCTION

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

- India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.
- According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.
- Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over the recent decade, India's rapid economic growth has led to a substantial increase in demand for exports. Moreover, many of the government's flagship programmes, including Make

in India, Start-up India, Digital India, the Smart City Mission and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India.

ROAD AHEAD

Despite continuing geopolitical concerns, rising interest rates in the US and India and high prices of crude oil and few other commodities, economic activity in India is holding up better than anticipated. Electricity consumption, manufacturing PMI, exports, power supply and other high-frequency indicators indicate that the pace of economic activity has fully recovered from the COVID-19 pandemic shock. Economic growth is anticipated to be fueled by the effective implementation of PLI schemes, development of renewable energy sources while diversifying import dependence on crude oil and bolstering of the banking sector. Recent government initiatives to boost revenue will aid in containing the rise in the current account deficit and ensure that any potential fiscal slippage is adequately contained. Overall, the first ten days of July and June were better than the first two months of FY 2022–23, which is a cause for comfort and even cautious optimism in these testing times. According to a Boston Consulting Group (BCG) analysis, India is expected to be the third-largest consumer economy as its consumption may quadruple to US\$ 4 trillion by 2025 due to changes in consumer behaviour and spending patterns. By 2040, India is anticipated to overtake the US to become the second-largest economy in terms of purchasing power parity (PPP), according to a report by PricewaterhouseCoopers.

INDIAN CHEMICAL INDUSTRY

Source: <https://www.ibef.org/industry/chemical-industry-india>

INTRODUCTION

Covering, more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers and fertilisers.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for ~16% of the world production of dyestuffs and dye intermediates. Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for few hazardous chemicals. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals).

The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals.

India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

MARKETS SIZE

The Indian chemicals industry stood at US\$ 178 billion in 2019 and is expected to reach US\$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 300 billion to India's GDP by 2025.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. The specialty chemicals constitute 22% of the total chemicals and petrochemicals market in India. The demand for specialty chemicals is expected to rise at a 12% CAGR in 2019-22.

Indian manufacturers have recorded a CAGR of 11% in revenue between FY15 and FY21, increasing India's share in the global specialty chemicals market to 4% from 3%, according to the Crisil report. A revival in domestic demand and robust exports will spur a 50% YoY increase in the CAPEX of specialty chemicals manufacturers in FY22 to Rs. 6,000-6,200 crore (US\$ 815-842 million). Revenue growth is likely to be 19-20% YoY in FY22, up from 9-10% in FY21, driven by recovery in domestic demand and higher realisations owing to rising crude oil prices and better exports.

ROAD AHEAD

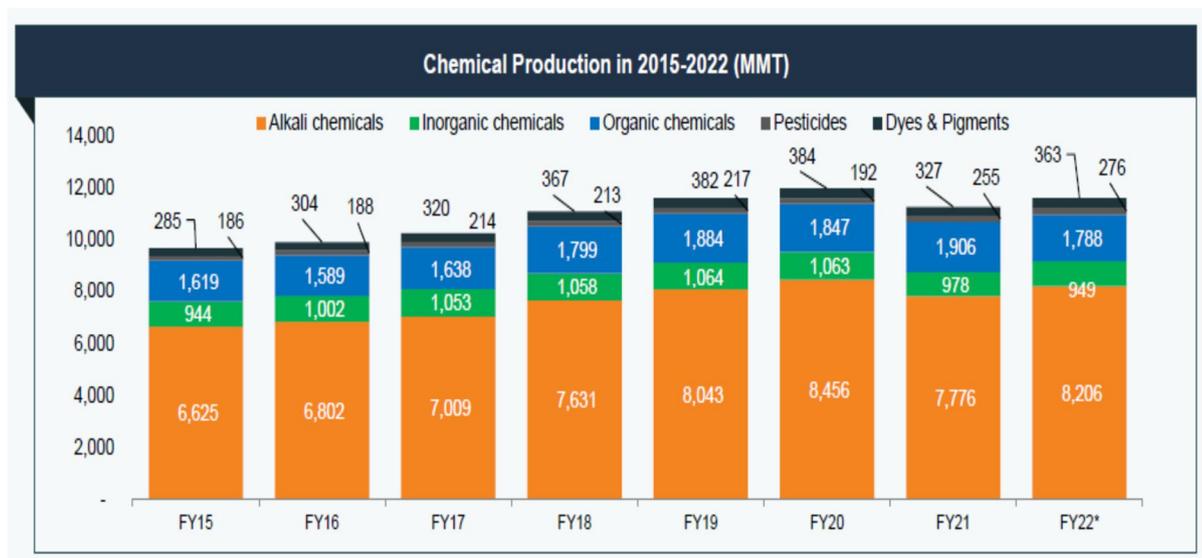

Despite the current pandemic situation, the Indian chemical industry has numerous opportunities considering the supply chain disruption in China and trade conflict among the US, Europe and China. Anti-pollution measures in China will also create opportunities for the Indian chemical industry in specific segments.

Additional support, in terms of fiscal incentives, such as tax breaks and special incentives through PCPIRs or SEZs to encourage downstream units will enhance production and development of the industry. The dedicated integrated manufacturing hubs under Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of Rs. 20 lakh crore (US\$ 276.46 billion) by 2035.

To bring about structural changes in the working of domestic chemical industry, future investments should not only focus on transportation of fuels such as petrol and diesel, but also on crude-to-chemicals complexes or refineries set up to cater to the production of chemicals.

CHEMICAL TRENDS IN INDIA

INDIAN PAINT INDUSTRY

Source: <https://www.paintindia.in/india-paint-industry>

The Indian Paint Industry is today worth over INR 62,000 crores (USD 8 billion), and is the fastest-growing major paint economy the world over, with a consistent double-digit growth over the last 2 decades. It has over 3,000 paint manufacturers, with nearly all global majors present in the country. It has a near-75% share of architectural paints and a 25% share of industrial paints, with an equitable fast-paced growth across all segments, from Architectural to Powder, from Automotive to Coil, from High-Performance to General Industrial, from Refinish to Wood, and from Packaging to Plastic.

Allied Industry Segments

Besides the core Paint/Coatings segment, Paint India also represents the interests of the Printing Inks, Construction Chemicals and Adhesives-Sealants segments from a sourcing and manufacturing viewpoint, since the raw materials, production equipment and supply channels have a significant overlap, and none of these segments have dedicated world-class events for themselves. Similarly, large and important industry segments like Pigments, Resins, Plastic Master batches and Composites also find valuable sourcing avenues at the show, extending the benefits and customer engagement on offer.

Paints & Coatings industry Outlook

Source: <https://www.indianchemicalnews.com/compendium/paints-coatings-industry-captains-lay-thrust-on-innovation-13844#:~:text=The%20per%20capita%20consumption%20of%20paints%20in%20the%20US%20is,China%20has%20around%207%20kg>

Currently at just 4 kg per capita paint consumption and US \$44 million worth exports, India presents a huge opportunity for its paints and coatings industry. Coupled with the fast changing scenarios, the market is set to unlock a huge potential for growth of both domestic and global players. To keep up with the pace of pent up domestic demand and compete globally, it would be highly prudent for the MSMEs to adopt innovation and niche product lines for their growth.

“The Indian paint and coating industry is growing rapidly at 13-14% and the big players are growing even at much faster pace. The entry of Grasim Industries into this segment has shaken the industry and led to the change in dynamics at stock market,” says Sagar Goel, President, Indian Paint & Coating Association.

The dyes and pigments market was valued at approximately USD 33030 million in 2020, and it is estimated to grow at a CAGR of more than 4% during the forecast period (2021-2026).

COVID-19 had critical repercussions on the market. As a result of the pandemic simulation, several countries went into lockdown, causing outages and shutdowns. This had a major implication for a variety of industries, including paints and coatings, textiles, and others. However, conditions are intended to elevate in 2020, reclaiming the market's growth trajectory studied during the forecast period.

- Rising costs from Asia-Pacific paints and coatings industries, as well as rising demand from the textile industry, are anticipated to propel the market in the medium term.
- On the other hand, the detrimental effect of the COVID-19 pandemic on the market, as well as environmental considerations about the use of dyes and pigments, are impeding market growth.
- The Asia-Pacific region is expected to drive the global market, with countries such as China and India consuming the most.

Trends in the Market

- **Paints and Coatings Demand.** Paints and coatings have the largest market share and are expected to be the largest and fastest-growing end-user industry.
- **Decorative and architectural coatings** use most pigments in their manufacturing. As a result, rising construction and infrastructure activities in Asia-Pacific are cruising the dye and pigment market.
- Furthermore, **Public-Private Partnership (PPP)** projects in the domestic construction sector have been increasing.
- In India, the shrewd urban objective is a major government project that will establish more than 100 smart cities across the country in order to attain urban sprawl. The smart cities mission has been allocated INR 6,450 crore in the 2021-22 budget, up from INR 3,400 crore in the revised estimates for 2020-21.
- In Germany, rising migration has boosted the country's prevailing demand for new residential construction. Around 3.6 million migrants are set to reach Germany by the end of 2020-2021, necessitating the construction of at least 350,000 new dwellings per year.
- Until 2019, the paints and coatings industry had been constantly developing. Regrettably, due to the pandemic situation, there has been a drop in the manufacturing of paints and coatings in 2020 as a result of the global construction industry stagnation. However, the situation is believed to have improved in 2021, stabilising the market's pace of growth.

It authorizes the government to formulate as well as announce the export and import policy and to keep amending the same on a timely basis. The government has also been given a wide power to prohibit, restrict and regulate the exports and imports in general as well as specified cases of foreign trade. The Foreign Trade Act provides for certain appointments especially that of the Director-General to advise the Central Government in formulating import and export policy and to implement the same. Further, the act commands every importer as well as exporter to obtain a code number called the Importer Exporter Code Number (IEC) from the Director-General or the authorized officer. Foreign Exchange Regulations

Foreign investment in Indian securities is governed by the provisions of the Foreign Exchange Management Act, 1999, as amended (“FEMA”) read with the applicable Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 as amended (“FEM Rules”). FEMA replaced the erstwhile Foreign Exchange Regulation Act, 1973. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the government approval route, depending upon the sector in which foreign investment is sought to be made. The DPIIT makes policy pronouncements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEM Rules. In case of any conflict, the FEM Rules prevail. Therefore, the regulatory framework, over a period of time consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DPIIT issued the FDI Policy which consolidates the policy framework on FDI issued by DPIIT, in force on October 15, 2020 and reflects the FDI policy as on October 15, 2020. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DPIIT. As per the FDI Policy, 100% FDI is permitted in our Company under the automatic route, subject to compliance with prescribed conditions. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion of our financial condition and results of operations together with our restated financial statements included in the Prospectus. You should also read the section entitled “Risk Factors” on page 16 which discusses a number of factors, risks and contingencies that could affect our financial condition and results of operations. The following discussion relates to our Company and is based on our restated financial statements, which have been prepared in accordance with Indian GAAP, the Companies Act and the SEBI Regulations. Portions of the following discussion are also based on internally prepared statistical information and on other sources.

Our financial statements have been prepared in accordance with Indian GAAP, the Companies Act and the ICDR Regulations and restated as described in the report of our auditor dated November 15, 2022 which is included in this Prospectus under “Financial Statements”. The Restated Financial Information has been prepared on a basis that differs in certain material respects from generally accepted accounting principles in other jurisdictions, including US GAAP and IFRS. Our financial year ends on March 31 of each year, and all references to a particular financial year are to the twelve-month period ended March 31 of that year.

Significant Developments Subsequent to the Last Financial Period

In the opinion of the Board of Directors of our Company, other than as mentioned below, since the date of the last financial statements disclosed in this Prospectus, there have not arisen any circumstance that materially or adversely affect or are likely to affect the business or profitability of our Company or the value of its assets or its ability to pay its material liabilities within the next twelve months.

Allotment of Equity Shares:

Following Equity Shares were issued by our Company after the date of last financial statements i.e. March 31, 2022:

Date of Allotment	No. of Equity Shares	Face Value (₹)	Issue Price (₹)	Nature / Reason of Allotment	Nature of Consideration
12-05-2022	75,00,000	10	Nil	Bonus Issue in the ratio of 5:2	Nil

COVID 19 Pandemic:

An outbreak of COVID-19 was recognised as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Due to a government mandated lockdown in India, we had to temporarily shut down our operations from mid-March 2020 to June 2020. We saw a decline in our business during first half of Fiscal 2021. We have resumed operations in July 2020. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition, and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

In view of the fluidity of the situation and lack of visibility on the timeline for containment of the global pandemic, the recovery trajectory remains uncertain. It is difficult for us to predict the impact that COVID-19 will have on us, our customers or suppliers in the future. We continue to closely monitor the effect that COVID-19 may have on our business and results of operations. To the extent, the COVID-19 pandemic adversely affects us, it may also significantly increase the effect of the aforementioned factors affecting our results of operations.

Key factors affecting the results of operation:

Our Company’s future results of operations could be affected potentially by the following factors:

Industry specific policies

We operate in highly regulated industry. Any changes in any regulation relating to our industry can affect our operations. Our operations are highly impacted by any changes in Chemical policies in India. We, as on date, have the requisite permission to conduct our business. We need to apply and get the requisite permission before we can launch a new product. Thus, our ability to introduce is dependent on the getting the requisite permission in time.

Economic conditions in the markets in which we operate

Our results of operations are dependent on the overall economic conditions in the markets in which we operate, including India. Any change in macro-economic conditions in these markets, including changes in interest rates, government policies or taxation and political, economic or other developments could affect our business and results of operations. The iron and steel market in India may perform differently and be subject to market and regulatory developments that are dissimilar to the markets in other parts of the world. While stronger macro-economic conditions tend to result into higher demand for our products, weaker macro-economic conditions tend to result into lower demand. Change in demand in the market segments we currently supply or improvement/deterioration in the market or a change in regulations, customs, taxes or other trade barriers or restrictions could affect our operations and financial condition.

Regulatory developments

Our Company is regulated by the Companies Act and some of its activities are subject to supervision and regulation by statutory and regulatory authorities. It is therefore subject to changes in Indian law, as well as to changes in regulation and government policies and accounting principles.

Reliance on major customers

Our Customer portfolio is concentrated with our top 5 customers representing 85.80%, 79.90% and 81.53%, respectively, of our total revenues from operations for 6 months period ended September 30, 2022, Fiscal 2022 and 2021, respectively. Any reduction in orders from our top 5 customers would adversely affect our income. The demand from our major customers, in particular our top 5 customers, determines our revenue levels and results of operations, and our sales are directly affected by their production and inventory levels. Over the years, we have developed strong relationships with our customers through whom we have been able to expand our product offerings and also our geographic reach. Our business depends on the continuity of business with these customers.

Our ability to source the critical raw material

Raw materials account for our major manufacturing cost. Our profitability is dependent on prices at which we procure these Technical products. Our sales are also dependent on our ability to procure these raw materials at the shortest possible notice.

Fluctuating foreign exchange rates

We are subject to currency exchange rate exposure as we transact a portion of our business in various foreign currencies, primarily, the US Dollars. Foreign exchange fluctuation affects both our revenues and expenditure. To this extent, the revenues and expenditures will be higher or lower depending on the prevalent foreign exchange rates. A depreciating Rupee against the foreign currencies may have an adverse effect on our expenses and an appreciating Rupee may adversely affect our external sales earnings. Our management typically monitors our foreign currency exposure periodically, however, there can be no assurance that the measures adopted by our management would always be adequate to cover us from any losses arising out of fluctuations in foreign exchange rates.

Capacity utilization and operating efficiencies

Our aggregate installed capacity and capacity utilisation is as under:

Details of manufacturing unit	Particulars	Fiscal		
		2022	2021	2020
Unit I	Installed Capacity (in MTPA)	3500	3500	3500
	Utilized Capacity (in MTPA)	2200	1750	1700
	Utilized Capacity (%)	62.86%	50.00%	48.57%
Unit II -Master Batches	Installed Capacity (in MTPA)	2000	2000	2000

	Utilized Capacity (in MTPA)	480	490	350
	Utilized Capacity (%)	24.00%	24.50%	17.50%
Unit II – Dry Dispersions	Installed Capacity (in MTPA)	10000	9000	8000
	Utilized Capacity (in MTPA)	8350	7107	6841
	Utilized Capacity (%)	83.50%	78.97%	85.51%

Higher capacity utilization results in greater production volumes and higher sales, and allows us to spread our fixed costs over a higher quantity of products sold, thereby increasing our profit margins. Our capacity utilization is affected by the product requirements of, and procurement practice followed by, our customers.

FACTORS THAT MAY AFFECT THE RESULTS OF THE OPERATIONS:

1. Unusual or infrequent events or transactions

An outbreak of COVID-19 was recognised as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Due to a government mandated lockdown in India, we had to temporarily shut down our operations from mid-March 2020 to June 2020. We saw a decline in our business during first half of Fiscal 2021. We have resumed operations in July 2020. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

Our business has been subject, and we expect it to continue to be subject, to significant economic changes arising from the trends identified above in ‘Factors Affecting our Results of Operations’ and the uncertainties described in the section entitled ‘Risk Factors’ beginning on page 16 of the Prospectus. To our knowledge, except as we have described in the Prospectus, there are no known factors which we expect to bring about significant economic changes.

3. Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue, or income from continuing operations.

Apart from the risks as disclosed under Section titled “*Risk Factors*” on page 16 in the Prospectus, in our opinion there are no other known trends or uncertainties that have had or are expected to have a material adverse impact on revenue or income from continuing operations.

4. Future changes in relationship between costs and revenues, in case of events such as future increase in labour or material costs or prices that will cause a material change are known.

Our Company’s future costs and revenues will be determined by demand/supply situation, government policies and prices quoted by service providers.

5. Extent to which material increases in net sales or revenue are due to increased sales volume, introduction of new products or services or increased sales prices.

Changes in revenues during the last three fiscal years are explained in “Management’s Discussion and Analysis of Financial Condition & Results of Operations” under the subsection “Comparison of Financial Years ended March 31, 2021, 2020 and 2019” under the respective paragraphs titled “Operating Revenue”.

Phased implementation of Unified Payments Interface

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹ 500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (*earlier known as Department of Industrial Policy and Promotion*) (“DPIIT”), issued the FDI Policy, which is effect from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non-Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.
