2. **Our Registered Office is located on leased premises and there can be no assurance that this lease agreement will be renewed upon termination or that we will be able to obtain other premise on lease on same or similar commercial terms. Any interference with our entitlements as the licensee/lessee or the cancellation of contracts with our licensors/lessors could have a negative effect on our activities and, as a result, our overall business.**

For further details regarding our properties, please refer to the Section titled “Our Business” on page 117 of this Prospectus.

3. **Our business is working capital intensive. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on the results of our operations and financial condition.**

Our working capital requirements for Financial Year 2025 are estimated at Rs. 4000 lakhs. An amount of Rs. 4000 lakhs in Financial Year 2025 towards working capital requirements will be funded out of the Issue Proceeds,

whereas the balance, if any, would be arranged from our internal accruals and/or loan funds. Our anticipated growth and expansion, if realized, could necessitate an increase in our current assets. However, our inability to secure and maintain sufficient cash flow, credit facilities, and other financing sources in a timely or consistent manner could adversely impact our financial health and operational performance. This could specifically impede our ability to meet working capital requirements and fulfill our debt obligations. We have availed loans and borrowings from banks and financial institutions – secured and unsecured to meet our capital - working capital requirements. Inability to renew such financing would adversely affect our growth prospects and financial condition.

Our trade receivable may possess a potential credit risk in the event of non-payment by debtors. Any such defaults could negatively impact our business operations and financial performance.

Furthermore, there is inherent uncertainty in our ability to effectively manage working capital. Failure to implement robust internal controls and management systems could lead to insufficient capital for sustaining and expanding our business.

For details, please see “Objects of the Issue” on page 86 of Prospectus.

4. Failure of customers to make timely payments could necessitate increased working capital investment and/or reduced profits, thereby impacting our operational and financial performance.

Our business model exposes us to the risk of customer payment delays or defaults. Our financial position and performance are heavily reliant on the creditworthiness of our customers. As we supply our products directly to customers without requiring advance payments or security deposits, payment delays may necessitate increased working capital investments.

We cannot guarantee the timely receipt of payments from all customers, or the full amount owed. If a customer defaults on a significant order, or if such an order is delayed, canceled, or fails to materialize, it could have a material adverse impact on our financial condition and operating results.

Set out below are details of our total trade receivables (current and non-current) for the periods indicated:

Based on Consolidated Restated Financial Statements:

FY	Trade Receivables (current and non-current)	% of total Income
March 31, 2024	7626.66	26.67%
March 31, 2023	6726.76	31.94%
March 31, 2022	6675.05	36.03%

Based on Standalone Restated Financial Statements:

FY	Trade Receivables (current and non-current)	% of total Income
March 31, 2024	3721.84	17.19%
March 31, 2023	3685.76	24.87%
March 31, 2022	2188.57	21.49%

5. A significant portion of our operational revenue is derived from a select group of top ten suppliers. The loss of business from any or all of these suppliers could negatively impact our financial performance.

As per standalone restated financial statements, our top ten suppliers contributed 44%, 27.23%, 53.43% and 41.94% of our purchases for the periods September 30, 2023, March 31, 2023, March 31, 2022, and March 31, 2021, respectively. However, supplier composition and revenue generation are subject to change based on ongoing demand fluctuations and our acquisition of new clients. While we maintain good long-term

relationships with these clients, their continued patronage cannot be assured. Consequently, we cannot guarantee the timely or complete payment of receivables from them. Failure to fulfill their obligations by any significant customer would adversely impact our business, financial condition, and operating results.

Projects executed through a joint venture may experience delays due to various factors, including the non- performance of any of the JV partner.

When entering into joint ventures for project undertakings, our completion of contracts for clients is contingent, in part, upon the performance of our joint venture partners. Where a joint venture partner fails to meet its obligations within the specified timeframe as outlined in the agreement, this could result in delayed payments or breach of contract. In such instances, we may incur penalties, liquidated damages, or have our performance bond invoked by the client. Furthermore, joint venture partners are jointly and severally liable, meaning we would bear responsibility for completing the entire project in the event of a partners default. Failure to adequately mitigate these risks could lead to significant costs and material losses, adversely impacting our business, financial conditions, and result of operations.

Our Ongoing project of State Water & Sanitation Mission projects at Farrukhabad and Rampur districts of Uttar Pradesh have been allotted to M/s GVPR Engineers Limited and OMIL-JWIL JV as a Principal Contractor and the Company is working as Sub-Contractor in these Contracts. Work Experience Certificate will be issued to the Principal Contractor Only i.e. GVPR Engineers Limited and OMIL – JWIL JV respectively for benefit of further tenders.

The Company undertakes government Infrastructure development work, civil works and Operation & Maintenance tenders in the state of Uttar Pradesh as one of the main objects. In this the Company is planning to raise the funds for meeting its working capital requirement of INR 40.00 Crores and Capital Expenditure of INR 10.49 Crores for its ongoing projects at Kasganj & Etawah (Total Project Cost Rs. 187.50 Crore; Company's Share 49%- INR 93.75Crore), at Farukabad (Total Project Cost Rs. 555.44 Crores; Company's share 35%- Rs. 199.96Crores), at Rampur (Total Project Cost Rs. 494.00 Crores; Company's share 35%- Rs. 172.90 Crores) and at Shahjahanpur (Total Project Cost Rs. 248 Crores; Company's share 49% Rs. 124 Crores) and for upcoming projects as well.

Out of the aforesaid four tenders the Company is not a direct party in tender for Farrukabad and Rampur location. These tenders were allotted to M/s GVPR Engineers Limited and OMIL-JWIL JV, but this work has been further sublet to the Company by the aforesaid parties. The total contract value indirectly delegated to the Company is INR 372.86 Crores. Audited financials of the stub period Sept'23 and for F.Y. 2022-23 are as follows:

Particulars	As on Sept, 2023	F.Y. 2022-23
Total Income	121.96 Crore	210.56 Crores
P.A.T	12.62 Crores	11.70 Crores

Further, in the aforesaid tender documents the sublet of the work is not permitted without the permission of Chief Engineer. And if, the work has been sublet without his permission, then the tender may be rescinded by the Chief Engineer and further payments will not be made to the Company even if the work is completed.

The Company is not able to locate the aforesaid sanction letter from the Chief Engineer for the tender work sublet to it for Farrukabad and Rampur location which may have financial implications like cancellation of contacts in future.

6. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Issue which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters and Promoter Group will collectively own **67.99%** of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

7. As on date of this Prospectus, no purchase orders have been placed for the acquisition of plant and machinery, part of whose financing is intended to be achieved through the Issue.

We've chosen the machinery for expansion, but haven't placed all orders yet. This equipment, costing Rs. 1049.78 lakhs, represents 17.14 % of the IPO proceeds. Delaying access to these funds could slow down orders and the whole expansion plan. Inflation also poses a risk, potentially driving up costs at purchase. Our Company has identified specific machinery for acquisition and received supplier quotes. However, final orders for all equipment and utilities totaling Rs. 1049.78 lakhs, approximately 17.14 % of the Issue proceeds, are still pending. We are subject to potential risks like price inflation for plant and machinery, and any delay in accessing IPO proceeds could further postpone order placements and impact the expansion timeline. The purchase decision will consider factors like pricing, delivery schedules, and after-sales maintenance. Supplier delays in delivering equipment could also hamper the expansion plan's implementation. Additionally, the validity of the quotes used to estimate the total cost has time limitations, and their expiration could lead to cost increases at the actual purchase time, potentially exceeding the project budget and impacting profitability. For further details, please refer to the "**Objects of the Issue**" section on page 86 of the Prospectus.

The following table sets forth certain information relating to our cash flows for the periods indicated, based on the Restated Summary Statements of our Company:

For more details, please refer —Management's Discussion and Analysis of Financial Conditions and Results of Operations of our company on page 279 of this Prospectus.

9. We are dependent on our sub-contractors to perform various portions of the contracts awarded to us. Such dependency exposes us to certain risks such as availability and performance of our sub-contractors.

Our Company provides construction work of our projects on contractual basis and is performed by labour provided by third party labour contractors. The timely and quality construction of our projects depends on availability and skill of such labourers, as well as contingencies affecting them, including labour shortages. Though in many projects which we undertake as sub- contractors the supply of contract labour is the responsibility of the primary contractor, our operations and timelines may be affected by any shortage, delay or incompetence of the contract labour force. Further, since in many cases, we do not directly hire the contract labour, we may face issues with authority and the ability to direct such labourers for a particular work, over time or change in any work schedule.

10. Our Company has availed unsecured loan from our Directors which is repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.

Our Company, as per the standalone restated audited financial statement as on March 31, 2024 has availed total sum of ₹ 3137.00 lakhs as unsecured loan including Rs. 50.00 lakhs of unsecured loans from our related parties, which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund.

For further details, please refer to the section —Unsecured Loans under —Restated Financial Information beginning on page no. 171 of this Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

11. In the past, our corporate records have encountered occasional delays in submitting statutory forms to the Registrar of Companies (RoC).

Historically, our company has delays in submitting statutory forms to the Registrar of Companies (RoC). Instances of such delays necessitated subsequent filings, accompanied by the payment of additional fees as mandated by the RoC.

Our Company delayed in filing ROC E forms such as AOC 4 XBRL for Financial Year 2023, ADT 1 for auditor appointments for Financial Year 2022, INC 27 for the conversion from a private to a public company dated 27.12.2023, DPT 3 dated 07.11.2023. The delay in such filings, additional fees was imposed on us at the time.

A continued pattern of such delays may cumulatively impact meeting reporting requirements, potentially resulting in penalties or fines imposed by regulatory authorities. Further, if the concerned authorities take cognizance of these delays, potential actions against our company and its directors may occur. Such actions could have repercussions on the financial standing of both our company and our directors.

- 12. We are partially reliant on government contracts for our business, and any shifts in government policies, especially regarding the environment and water treatment, could pose significant risks to our business, finances, and operations. Moreover, delays in securing government approvals could exacerbate these challenges.**

Our business model operates on projects sourced through government or semi-government tenders. This singular focus creates a high degree of dependence on working with government entities or agencies. This reliance necessitates strict adherence to additional regulations and heightened scrutiny often associated with commercial transactions involving government-owned or controlled entities.

- 13. A substantial number of our business agreements including joint ventures encompass clauses specifically designed to manage the risk of project delays. These clauses, known as fine, penalty or damages clauses, serve to motivate timely completion and provide a framework for addressing any unforeseen delays that might arise.**

Our projects are subject to stringent completion orders outlined in customer contracts. Non-adherence to these deadlines, excluding mutually agreed-upon force majeure events, could result in the imposition of liquidated damages, typically calculated as a percentage of the total project cost. Additionally, it could lead to the forfeiture of security deposits or the invocation of performance guarantees.

Any change in terms or covenants of the Joint Venture agreements or any change related to Statutory amendments in the law in regard to rules, regulations or government policies, it may impact the working of our company for the completion of our projects.

- 14. Our projects are exposed to various implementation and other risks, including risks of time and cost overruns, and uncertainties, which may adversely affect our business, financial condition, results of operations, and prospects.**

Our projects are typically subject to a completion schedule, as specified under the relevant EPC contracts. We provide our clients with performance guarantees for completion of the construction of our projects within a stipulated time frame and quality specifications.

Due to delay in project implementations, we may suffer significant cost overruns or time overruns, which may lead to losses in such projects, materially and adversely impacting the profits and results of operations of our Company. Such failures to complete projects could also have an impact on the reputation of our Company. Further, we may not be able to obtain extensions for projects on which we face delays or time overruns

- 15. Our projects are based on competitive tender method by government authorities. We may not be able to qualify and accomplish future projects, which could adversely affect our business and results of operations.**

Our company has completed projects w.r.t Sewer Treatment Plant and Sewer Lines, Storm Water Drainage, Electrical (Distribution and Sub Station Work) and Sector Development Work, and is undergoing to work on projects related to Sewer Treatment Plant and Sewer Lines under which Construction of 40 mld average capacity S.T.P, 55 mld average capacity M.P.S., Rising Main & Trunk Sewer/Branch Sewer including all Civil, E&M works, Testing Commissioning, trial run, situated at Shahjahanpur, U.P is to be done, alongwith it, execution of Jal Jeewan Mission having description of Implementation of Various rural water supply projects including O&M at Rampur, U.P, Implementation of Various rural water supply projects including O&M at Farrukhabad, U.P, Implementation of Various rural water supply projects including O&M at Kasganj, U.P.

We may not be able to qualify and accomplish future projects, which could adversely affect our business and results of operations. For further details, please refer to Section titled “Our Business” on page 117 of this Prospectus.

- 16. Our Order Book may not be representative of our future results and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.**

While our Order Book provides a snapshot of anticipated future revenues from signed contracts and contracts with received letters of intent, it does not necessarily guarantee future earnings. The Order Book represents business considered firm, but it is subject to potential deferrals, withdrawals, cancellations, and unanticipated variations in scope or schedule. These uncertainties make it difficult to predict with certainty when or if the Order Book will be fully realized.

Furthermore, even projects that proceed as planned are exposed to the risk of customer default and non-payment. Therefore, we cannot guarantee either the realization of anticipated Order Book income or its timing, nor can we assure the generation of profits.

Any project cancellation or scope adjustment, which may occur from time to time, could reduce both the size of our Order Book and the ultimately realized income and profits. Additionally, delays, cancellations, and payment defaults could have a material adverse effect on our business, operating results, and financial health.

17. There may be some delays attributable obtaining government and statutory approvals, unanticipated increase in cost, force majeure events, cost overruns or disputes with our joint venture partners.

Construction of Sewer, Sewer Treatment Plants, Water Tanks, Water Treatment Plants, Sector Development work, Electrical Distribution and Sub Stations etc. involves various implementation risks including delays attributable to construction, supply of materials, obtaining government and statutory approvals, unanticipated increase in cost, force majeure events, cost overruns or disputes with our joint venture partners. Further, we are subject to various risks associated with regulatory approvals and financial requirements for the execution of these projects, which may render the projects unprofitable.

18. Our Company has previously engaged in related party transactions and may do so in the future.

We have in past entered into several related party transactions with our Promoter, Promoter Group, and Key Managerial Personnels. For further details, please refer to the chapter titled — “Financial Information” at page 171. We confirm that all our related party transactions have been conducted in compliance with relevant provisions of the Companies Act and other applicable laws, we cannot guarantee that we might not have secured more favourable terms if these transactions had involved unrelated parties. The possibility exists that these transactions, whether individually or collectively, could negatively impact our business, prospects, financial results, and overall financial condition, potentially due to conflicts of interest or other factors. Furthermore, the future success of our business and growth prospects may be at risk if we cannot capitalize on our relationships with related parties. The related party transactions entered into by our company is in compliance with the Companies Act, 2013 and all other applicable laws.

19. Covid-19 or the outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.

The emergence of COVID-19, and the potential for future outbreaks of severe communicable diseases, pose significant risks to the overall business environment, particularly if such outbreaks are not effectively controlled. The spread of such diseases could adversely impact the operations of our clients and material suppliers, which could in turn negatively affect our business, financial condition, and operating results.

The COVID-19 pandemic has resulted in the implementation of various measures by authorities, such as travel restrictions, quarantines, and lockdowns. These measures have impacted our workforce and operations, and may continue to do so in the future. A rapid increase in severe cases of infection and subsequent deaths, particularly if government measures fail or are prematurely lifted, could cause significant economic disruption in India and globally. The scope, duration, and frequency of such measures and the overall impact of COVID-19 remain uncertain and could be severe.

Despite our best efforts, our ability to meet ongoing disclosure obligations may be adversely affected. Additionally, the potential for employee exposure to COVID-19 or other epidemic diseases could necessitate the quarantine of affected individuals or the disinfection of our operational facilities.

20. Our profitability will suffer if we are not able to maintain our pricing, control costs or continue to grow our business through higher client engagements.

Our profit margin, and therefore our profitability, is largely a function of our level of activity and the rates we are able to charge for our services. If we are unable to maintain the pricing for our services without corresponding

cost reductions, our profitability will suffer. The pricing and levels of activity we are able to achieve are affected by a number of factors, including our clients' perceptions of our ability to add value through our services, the length of time it takes to on-board new employees on any new or current client engagements, the volume of work for new clients or new engagements with current clients, competition, the introduction of new services by us or our competitors, our ability to accurately estimate, attain and sustain revenue from client contracts and general economic conditions.

21. No agreements have yet been finalized with suppliers or consultants for the proposed purchase of Capital Equipment outlined in the Issue's objectives. Delays in securing these agreements could impact the implementation schedule, potentially leading to increased equipment costs in the future, which could negatively affect our costs, revenue, and profitability.

As outlined in the "Objects of the Issue" section on page 86 of this Prospectus, orders for plant, machinery, and equipment required for our proposed purchase of Capital Equipment have not yet been placed. Any delay in procurement of these essential items could impact the implementation schedule. Moreover, we may face price inflation risks associated with plant, machinery, and other equipment, potentially leading to project time and cost overruns that could negatively impact our operations.

Furthermore, we have not yet finalized agreements with consultants for the civil works required for the proposed expansion. Any delay in appointing these parties could adversely affect our business operations. Negotiations regarding specifications with suppliers and the architect for the civil works have commenced, and agreements will be entered into due course upon completion of negotiations and the receipt of Issue proceeds.

22. Any delay or failure to obtain or renew necessary licenses, approvals, and registrations could lead to the interruption of our Company's operations.

The operation of project sites relies on obtaining and maintaining certain statutory and regulatory approvals, licenses, registrations, and permissions. Some of these have been granted for a fixed period and require periodic renewal. While no legal actions are currently pending against us by the statutory authorities as of the date of this Prospectus, we cannot guarantee that this will remain the case in the future. Additionally, these licenses and approvals are subject to specific conditions, and our Company cannot assure its continued ability to meet or demonstrably comply with them to the satisfaction of the authorities. This could lead to the cancellation, revocation, or suspension of relevant licenses, approvals, and registrations.

Failure to renew, maintain, or obtain required licenses or approvals, or the cancellation, suspension, or revocation of any existing licenses, approvals, and registrations, could result in the interruption of our Company's operations and adversely affect our business. For detailed information on the licenses obtained by our Company, please refer to the chapter titled "Government and Other Statutory Approvals" on page 299 of this Prospectus.

23. Several potential liabilities, known as contingent liabilities, exist for our company. If these liabilities become actual obligations, they could significantly affect our financial health and operating performance.

Our contingent liabilities as per restated consolidated financial statements as of March 31, 2024 were as follows:

Particulars	As at March 31, 2024
A. Contingent Liabilities	
Claim against the company not acknowledged as debt	-
Bank Guarantees	4286.92
B. Commitments	
Estimated Value of Contracts remaining to be executed on capital account and not provided for (net of advances)	-
Total (A +B)	4286.92

For further details of the contingent liabilities and commitments of our Company as on March 31, 2024, see “Restated Financial Information on page 171 of this Prospectus.

24. Our success depends on our ability to develop and maintain successful relationships with merchants. Misconduct by our employees or failure of our internal processes could harm us by impairing our ability to attract and retain customers.

Employee misconduct or the failure of our internal processes and procedures has the potential to negatively impact us by compromising our ability to attract and retain customers, exposing us to significant legal liability, and causing reputational harm. Our business is inherently susceptible to the risks associated with employee misconduct or the breakdown of internal processes and procedures. Examples of employee misconduct include the improper use or disclosure of confidential information, leading to potential legal battles and severe damage to our reputation or financial standing.

Despite our efforts to monitor, detect, and prevent fraud or misappropriation by employees through various internal control measures, internal policies, and insurance coverage, these precautions may not be universally effective. It is possible that we may be unable to fully prevent or deter such activities in all cases. While we have successfully identified and addressed issues of this nature in the past, with no material impact, instances of fraud and misconduct by employees may go unnoticed for certain periods before corrective action is taken.

25. Our ability to meet production goals is directly tied to the availability of a qualified workforce, including both skilled and unskilled personnel.

Our manufacturing activities are dependent upon a reliable workforce, both on-roll employees and contractual workers as needed. While past operations haven't faced disruptions due to labor availability or disputes, future concerns remain. Any labor issues could impact production schedules, timely deliveries, and ultimately, our business and results of operations.

Our ability to attract, train, and retain skilled personnel is crucial for future growth. High employee attrition or stiff competition in the labor market could limit our talent pool, hindering our ability to meet future workforce needs. We cannot guarantee the sustained availability of skilled workers aligned with our requirements or consistent workforce growth matching our ambitious expansion plans. This potential limitation could affect our business, financial condition, operational results, and future prospects. For further details about business of our Company, please refer chapter titled “**Our Business**” beginning on page 117 of this Prospectus.

26. Bidding for a tender necessitates a comprehensive approach, including thorough project analysis and precise cost estimations. Inaccuracies in cost projections can significantly diminish anticipated returns and profitability assessments. Therefore, meticulous project study is imperative for understanding the project's scope and requirements, facilitating the preparation of a competitive yet profitable bid.

Every project initiates with the issuance of a Notice for Invitation of Tender, inviting participation from interested infrastructure companies, contractors, and other relevant entities. Evaluating a project tender involves a series of management discussions, project feasibility studies, site surveys, cost estimations, and assessments of material and equipment suppliers, among other activities. These efforts culminate in the calculation of the estimated project cost, to which our margin is added. This margin varies depending on the project, resulting in the tender amount we propose for each project.

As the majority of our projects are long-term in nature, cost escalations present a frequent challenge in our industry. While our agreements often include clauses addressing cost escalations, any fluctuations in costs, material availability, or unforeseen expenses can have a substantial impact on our business operations, cash flows, and financial condition.

28. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.

Our Company's success largely depends on our brand name and brand image and our trademark is important for differentiating our Company's products from that of our competitors. Our company has applied for trademark application and logo under the provisions of the Trademarks Act, 1999. Our trademark and logo which is under process for approval may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs. There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition.

30. The weighted average cost of acquisition of our Promoters may be less than the Issue Price.

The weighted average acquisition cost per Equity Share held by Selling Shareholders might be lower than the issue price. Consequently, investors purchasing the Equity Shares may incur a cost higher than the weighted average acquisition cost of Promoters.

31. Certain of our client contracts can be terminated by our clients without cause and with limited or no notice or penalty, which could negatively impact our revenue and profitability.

Our client engagements operate on a non-exclusive, project-by-project basis, with termination possible at any time with or without cause. Contracts lack penalties for termination, often limited to discrete projects without volume commitments. Revenues depend on meeting performance levels and service guarantees, with potential penalties impacting cash flow. Despite force majeure carve-outs, events like delay in services may hinder service level

agreements. Client decisions beyond our control, such as financial troubles or strategic shifts, pose termination risks, impacting our business if contracts end abruptly.

32. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

33. We have not commissioned an industry report for the disclosures made in the section titled 'Industry Overview' and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.

We have not commissioned an industry report for the disclosures made in the chapter titled *Industry Overview* beginning of page 103 and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have been obtained. Further, the industry data mentioned in this Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Prospectus in this context.

34. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

35. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "*Objects of the Issue*" beginning on page 86 of this Prospectus.

36. We cannot assure payment of dividends on the Equity Shares in the future and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.

Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements and other factors considered relevant by our directors and shareholders. Our ability to pay dividends may also be restricted under

certain financing arrangements that we may enter into. We cannot assure you that we will be able to pay dividends on the Equity Shares at any point in the future. For details, see “Dividend Policy” on page 170.

The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. Accordingly, realization of a gain on the Shareholders’ investments will depend on the appreciation of the price of our Equity Shares. 37. Insurance coverage obtained by us may not adequately protect us against unforeseen losses.

We maintain general, building, car and machine insurance with various covers for our office premises which we consider adequate. We may not have identified every risk and further may not be insured against every risk because such risks are either uninsurable or not insurable on commercially acceptable terms, including operational risk that may occur and the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events or risks not covered by insurance policies such as COVID-19 and other pandemics, or due to the same being inadequate, could materially harm our cash flows, financial condition and future results of operations. However, we cannot provide any assurance that our insurance will be sufficient or effective under all circumstances and against all hazards or liabilities to which we may be subject. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all.

38. Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

39. Third party industry and statistical data in this Prospectus may be incomplete, incorrect or unreliable.

40. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public-listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which requires us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required.

As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no certainty that we will consistently meet our reporting requirements or promptly identify and report changes in our operational performance as swiftly as other listed companies.

In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

52. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

53. A slowdown in economic growth in India and globally could cause our business to suffer.

We are highly dependent on prevailing economic conditions in India and globally and our results of operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;
- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

54. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. 1. Economic Outlook

1.1. Global economy outlook

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions.

The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a “global health emergency.” Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. But forces that hindered growth in 2022 persist. Inflation remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments. As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations.

Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post-pandemic rotation of consumption back toward services is approaching completion in advanced economies (including in tourism-dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter (Figure 1). However, as mobility returns to pre-pandemic levels, the scope for further acceleration appears more limited.

At the same time, non services sectors, including manufacturing, have shown weakness, and high-frequency indicators for the second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geoeconomic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

Economy list uses International Organization for Standardization (ISO) country codes. AEs = advanced economies; EMDEs = emerging market and developing economies.

1.1.2. Global Growth

Global growth is projected to fall from 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024 on an annual average basis. Compared with projections in the April 2023 WEO, growth has been upgraded by 0.2 percentage point for 2023, with no change for 2024. The forecast for 2023–24 remains well below the historical (2000–19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms. Advanced economies continue to drive the decline in growth from 2022 to 2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging market and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions. On a year-over-year basis, global growth bottomed out in the fourth quarter of 2022. However, in some major economies, it is not expected to bottom out before the second half of 2023.

World trade growth is expected to decline from 5.2 percent in 2022 to 2.0 percent in 2023, before rising to 3.7 percent in 2024, well below the 2000–19 average of 4.9 percent. The decline in 2023 reflects not only the path of global demand, but also shifts in its composition toward domestic services, lagged effects of US dollar appreciation—which slows trade owing to the widespread invoicing of products in US dollars—and rising trade barriers.

1.1.3. Water and Wastewater Treatment Industry

The Water and Wastewater Treatment Technologies Market size is expected to grow from USD 61.46 billion in 2023 to USD 85.28 billion by 2028, at a CAGR of 6.77% during the forecast period (2023-2028).

The market was negatively impacted by the COVID-19 pandemic in 2020, but it has since observed growth to reach the pre-pandemic levels. Over the short term, one of the major driving factors of the market is the rapidly diminishing freshwater resources across the world. Increasing demand from shale gas exploration activities and growing wastewater complexities in developing economies are likely to boost the market growth. However, the lack of awareness of optimum utilization of water treatment techniques is likely to restrain the market. Active research on water treatment technologies may provide opportunities for market growth in the future.

Wastewater treatment is necessary and used across the world in different cities. The major applications of treatment technologies include preliminary treatment, primary and secondary treatment, tertiary treatment, biological nutrient removal (BNR), resource recovery, energy generation, etc.

The global water consumption rate has been increasing by 100% every twenty years. The rising scarcity of potable water and the growing population and water demand are the major concerns driving the demand in the market.

North America and Europe are adopting the latest technologies in wastewater treatment at a faster rate than other regions. The developed regions of North America and Europe are expected to continue the momentum of adoption of the latest technologies.

With an estimated USD 23 billion investment in wastewater treatment and reuse-related capital improvement projects over the next 20 years, the demand in the market studied is expected to rise in the coming years.

Hence, the municipal water and wastewater treatment industry is likely to dominate the market during the forecast period.

Asia-Pacific is Likely to Dominate the Market

Asia-Pacific accounted for the major share of the water and wastewater treatment technologies market due to high demand from countries like China and Japan.

China has been discharging more wastewater than industrial wastewater in recent times. Adding to the issue is the huge problem of pollution, especially in the major industrial locations of the country.

Due to the increase in the urban population throughout the country, 70% of the nation's population is expected to reside in cities by 2030. As the urban population increases, it may also face an influx of wastewater and sludge.

Currently, 80% of sludge in China is improperly dumped, an increasingly controversial environmental issue that has urban centers scrambling to decrease pollution by improving their wastewater treatment plants (WWTPs).

The sewage penetration rate in Japan is ~76%, with the country generating more than 2.2 million ton of sewage sludge on a dry basis. Sewage sludge contains 60-80% organic matter and constitutes a stable source of energy.

Nearly 80% of sewage sludge is recycled and reused, with material recycling in the form of ingredients for cement. In the basic act for the promotion of biomass utilization from 2009, the government had aimed to recycle and reuse 85% of this by 2020 by promoting the use of energies derived from sewage sludge such as biogas.

Hence, Asia-Pacific is likely to dominate the market during the forecast period.

Water and Wastewater Treatment Technologies Market - Growth Rate by Region, 2022-2027

1.1.4. Global Road and Highway Industry

The global roads and highways market size is expected to grow from \$674.98 billion in 2022 to \$716.74 billion in 2023 at a compound annual growth rate (CAGR) of 6.2%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, causing inflation across goods and services and affecting many markets across the globe. The global roads and highways market size is expected to reach \$871.36 billion in 2027 at a CAGR of 5.0%.

The increasing production of vehicles is expected to propel the growth of the roads and highways market going forward. The term vehicle production refers to the mass manufacturing of identical models that are offered for sale to the public. Most of the drivers prefer traveling on highways, as they are the long, straight roadways that connect places with one another, making it simpler to travel on them. Moreover, highway travel allows for fuel savings because it shortens the distance between cities. For instance, in March 2022, according to a report published by the European Automobile Manufacturers' Association (ACEA), a Belgium-based main lobbying and standards group for the automobile industry in the European Union, sales of passenger cars in the US increased by 5.5% from 2020 to 11.9 million units in 2021. Over 6.3 million passenger cars were produced in US auto facilities in 2021, an increase of 3.1% from 2020. Chinese automakers produced 20.7 million vehicles in 2021, an increase of 7.1%. In 2021, the total number of cars produced worldwide climbed by 2.7% to 63.2 million. Therefore, the increasing production of vehicles is driving the growth of the roads and highways market.

1.2. Indian Economy Outlook

1.2.1 Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices in the second quarter of 2022–23 is estimated at US\$ 1.94 trillion (Rs. 160.06 trillion), showing a growth of 7.2% as compared to the First Revised Estimates of GDP for the year 2021-22 of US\$ 1.81 trillion (Rs. 149.26 trillion), indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In FY22, India's service exports stood at US\$ 254.4 billion. Furthermore, India's overall exports (services and merchandise) was estimated at US\$ 770.18 billion in FY23. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

1.2.2. Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at US\$ 3.31 trillion (Rs. 272.41 trillion) in FY22. Additionally, the Nominal GDP at current prices in Q3 of 2022-23 was US\$ 874.84 billion (Rs. 71.82 trillion), as against US\$ 792.3 billion (Rs. 65.05 trillion) in 2021-22, estimating a growth of 10.4%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of FY23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

1.2.3. Road Ahead

In the second quarter of FY23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In June 2023 (Provisional), CPI-C inflation was 4.81%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

1.2.4. India remains a bright spot, likely to grow 6.7% in 2024: UNDESA report

According to the United Nations Department of Economic and Social Affairs (UNDESA), domestic demand will drive India's economic growth in 2023, while higher interest rates and lower external demand will continue to weigh on investment and exports during the calendar year.

In its mid-year update to its World Economic Situation and Prospects report, the UNDESA maintained its growth predictions for India at 5.8% and 6.7% for the calendar years 2023 and 2024, respectively.

"India's economy, the largest in the (South Asian) region, is expected to grow by 5.8% in 2023 and 6.7% in 2024, driven by resilient domestic demand." Potential droughts and floods also represent a serious risk to the economic outlook because the (South Asian) region is extremely prone to harsh climatic conditions, the study indicated.

The UN arm raised its global economic growth forecast for 2023 to 2.3%, up from 1.9% previously, but reduced its forecast for 2024 to 2.5%, down from 2.7%.

Furthermore, the report notes that the Reserve Bank of India's rate-hiking spree, which has resulted in a cumulative increase of 250 basis points in the repo rate since May 2022, will finally bear fruit, as headline inflation is expected to remain well below the central bank's upper tolerance limit of 6% in 2023.

The study stated, "Inflation in India is expected to decelerate to 5.5% in 2023 as global commodity prices moderate and slower currency depreciation reduces imported inflation".

According to the report, the labour markets in developed economies have shown to be remarkably resilient, with employment rates at record high levels helping to sustain strong household spending that results in pay increases and making it more difficult for central banks to control inflation.

Fitch Ratings reiterated its lowest investment grade rating with a stable outlook for India's long-term sovereign debt, stating that growth prospects in India have improved as the private sector appears to be prepared for better investment growth.

According to the rating agency, India will be one of the world's fastest-growing sovereigns, with a 6% GDP growth prediction for 2023-24, supported by solid investment prospects.

1.2.5. The key highlights of the Economic Survey 2022-23 are as follows:

India's Medium-Term Growth Outlook

- Indian economy underwent wide-ranging structural and governance reforms that strengthened the economy's fundamentals by enhancing its overall efficiency during 2014-2022.
- With an underlying emphasis on improving the ease of living and doing business, the reforms after 2014 were based on the broad principles of creating public goods, adopting trust-based governance, co-partnering with the private sector for development, and improving agricultural productivity.
- The period of 2014-2022 also witnessed balance sheet stress caused by the credit boom in the previous years and one-off global shocks that adversely impacted the key macroeconomic variables such as credit growth, capital formation, and hence economic growth during this period.
- This situation is analogous to the period 1998-2002 when transformative reforms undertaken by the government had lagged growth returns due to temporary shocks in the economy. Once these shocks faded, the structural reforms paid growth dividends from 2003.
- Similarly, the Indian economy is well placed to grow faster in the coming decade once the global shocks of the pandemic and the spike in commodity prices in 2022 fade away.
- With improved and healthier balance sheets of the banking, non-banking and corporate sectors, a fresh credit cycle has already begun, evident from the double-digit growth in bank credit over the past months.
- Indian economy has also started benefiting from the efficiency gains resulting from greater formalisation, higher financial inclusion, and economic opportunities created by digital technology-based economic reforms.
- India's growth outlook seems better than in the pre-pandemic years and the Indian economy is prepared to grow at its potential in the medium term.

Social Infrastructure and Employment: Big Tent

- Social Sector witnessed significant increase in government spending.
- Central and State Government's budgeted expenditure on health sector touched 2.1% of GDP in FY23 (BE) and 2.2% in FY22 (RE) against 1.6% in FY21.
- Social sector expenditure increases to Rs. 21.3 lakh crore (US\$ 260.3 billion) in FY23 (BE) from Rs. 9.1 lakh crore (US\$ 111.2 billion) in FY16.
- Survey highlights the findings of the 2022 report of the UNDP on Multidimensional Poverty Index which says that 41.5 crore people exit poverty in India between 2005-06 and 2019-20.
- The Aspirational Districts Programme has emerged as a template for good governance, especially in remote and difficult areas.
- eShram portal developed for creating a National database of unorganised workers, which is verified with Aadhaar. As on 31 December 2022, a total of over 28.5 crore unorganised workers have been registered on eShram portal.
- JAM (Jan-Dhan, Aadhaar, and Mobile) trinity, combined with the power of DBT, has brought the marginalised sections of society into the formal financial system, revolutionising the path of transparent and accountable governance by empowering the people.
- Aadhaar played a vital role in developing the Co-WIN platform and in the transparent administration of over 2 billion vaccine doses.
- Labour markets have recovered beyond pre-Covid levels, in both urban and rural areas, with unemployment rates falling from 5.8% in 2018-19 to 4.2% in 2020-21.
- The year FY22 saw improvement in Gross Enrolment Ratios (GER) in schools and improvement in gender parity. GER in the primary enrolment in class I to V as a percentage of the population in age 6 to 10 years - for girls as well as boys, have improved in FY22.
- Due to several steps taken by the government on health, out-of-pocket expenditure as a percentage of total health expenditure declined from 64.2% in FY14 to 48.2% in FY19.

- Infant Mortality Rate (IMR), Under Five mortality rate (U5MR) and neonatal Mortality Rate (NMR) have shown a steady decline.

1.3. Infrastructure Sector

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress. Infrastructure is a key enabler in helping India become a US \$26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway. Infrastructure support to nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The "Smart Cities Mission" and "Housing for All" programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining.

Market Size

In Budget 2023-24, capital investment outlay for infrastructure is being increased by 33% to Rs.10 lakh crore (US\$ 122 billion), which would be 3.3 per cent of GDP. As per the Union Budget 2023-24, a capital outlay of Rs. 2.40 lakh crore (US\$ 29 billion) has been provided for the Railways, which is the highest ever outlay and about 9 times the outlay made in 2013-14. Started with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 in the roads and bridges sub-sector.

The Indian Railways expects to complete total revenue from traffic of Rs. 2,64,600 crore (US\$ 32.17 billion) for FY24.

India's logistics market is estimated to reach US\$ 410.75 billion in 2022 and is expected to reach US\$ 556.97 billion by 2027, growing at a CAGR of 6.28%. India intends to raise its ranking in the Logistics Performance Index to 25 and bring down the logistics

cost from 14% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years.

In December 2022, AAI and other Airport Developers have targeted capital outlay of approximately Rs. 98,000 crore (US\$ 11.8 billion) in airport sector in the next five years for expansion and modification of existing terminals, new terminals and strengthening of runways, among other activities.

India currently has the fifth-largest metro network in the world and will soon overtake advanced economies such as Japan and South Korea to become the third-largest network. Metro rail network reached 810 kms and is operational in 20 cities as of September 2022. At almost 20 kms, Mumbai monorail is the third largest route in the world after China with 98 kms and Japan with 28 kms.

India plans to spend US\$ 1.4 trillion on infrastructure through 'National Infrastructure Pipeline' in the next five years. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion. India will need to construct 43,000 houses every day until 2022 to achieve the vision of Housing for All by 2022. As of August 22, 2022, 122.69 lakh houses have been sanctioned, 103.01 lakh houses have been grounded, and 62.21 lakh houses have been completed, under the Pradhan Mantri Awas Yojna scheme (PMAY-Urban).

Hundreds of new cities need to be developed over the next decade. Over the next 10 years, demand for urban freight is predicted to increase by 140%. Final-mile freight transit in Indian cities accounts for 50% of the total logistics expenditures in the country's increasing e-commerce supply chains. India is expected to become the third-largest construction market globally by 2022. Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over 2021-26 driven by spending on water supply, transport, and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

Sewage and Water Treatment Industry Outlook

The term sewage treatment plant (STP) (or sewage treatment works) is nowadays often replaced with the term wastewater treatment plant (WWTP). Sewage treatment (or domestic wastewater treatment, municipal wastewater treatment) is a type of wastewater treatment which aims to remove contaminants from sewage to produce an effluent that is suitable to discharge to the surrounding environment or an intended reuse application, thereby preventing water pollution from raw sewage discharges.

Sewerage (or sewage system) is the infrastructure that conveys sewage or surface runoff (stormwater, meltwater, rainwater) using sewers. It encompasses components such as receiving drains, manholes, pumping stations, storm overflows, and screening chambers of the combined sewer or sanitary sewer. Sewerage ends at the entry to a sewage treatment plant or at the point of discharge into the environment. It is the system of pipes, chambers, manholes, etc. that conveys the sewage or storm water.

1.3.1. India Water & Wastewater Treatment Market Analysis

The India Water and Wastewater Treatment Technologies Market size is expected to grow from USD 0.92 billion in 2023 to USD 1.54 billion by 2028, at a CAGR of 10.78% during the forecast period (2023-2028).

The COVID-19 outbreak negatively affected the Indian economy and the operations of several end-user industries of the market studied. It reduced the outflow of industrial wastewater. The COVID-19 pandemic resulted in a massive drop in oil demand. As a result, the industry's need for water treatment technologies declined. In the food and beverage industry, labor shortages and the shutdown of plants reduced the food production levels in 2020. Furthermore, in the pulp and paper industry, major consumers' reduced imports of packaging material resulted in a domestic oversupply of pulp and paper products in the manufacturing countries. This oversupply issue is negatively affecting the growth of the industry.

In the medium term, the rapidly diminishing freshwater resources and growing wastewater complexities will likely drive the demand for water and wastewater treatment technologies in India.

The high cost of water treatment plants is expected to hinder the growth of the market studied.

Innovations in water treatment technologies are anticipated to act as an opportunity for the market studied.

1.3.2. India Water & Wastewater Treatment Market Trends

Treatment Equipment to Dominate the Market:

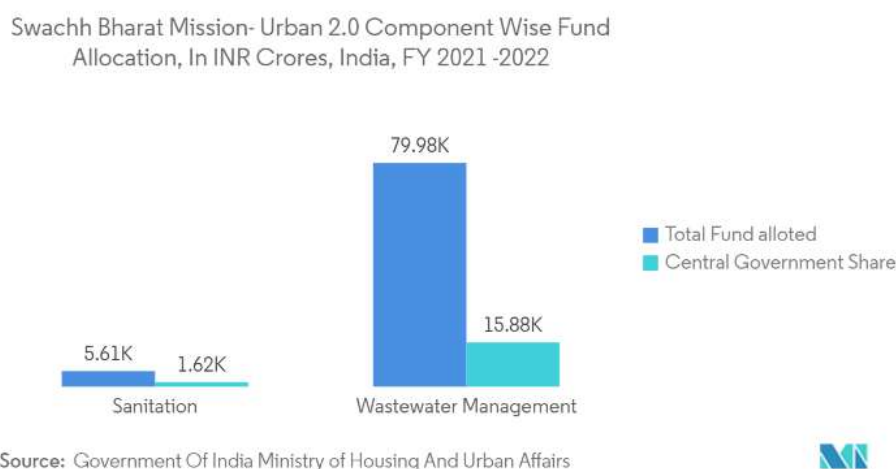

Treatment Equipment technology includes oil/water separation, suspended solids removal, dissolved solids removal, biological treatment/nutrient and metals recovery, disinfection/oxidation, and other treatment equipment.

India is the third-largest producer of coal. Coal production requires plenty of water, and there is a need for extensive wastewater treatment. Clarifiers and disposable filtration equipment are primarily used to treat suspended solids in the mining sector in the country. The COVID-19 pandemic led to mining production and expansion disruptions in 2020, which affected newer equipment adoption for solid treatments.

According to Financial Express, by 2030, India's water demand will exceed supply by two times, indicating severe water scarcity in the country. This water shortage for industrial and residential use is expected to increase the need for such water treatment systems in the long run.

Major end-user industries using anaerobic biological treatment in India include municipal wastewater treatment, food and beverage manufacturing, chemical effluent, and agricultural waste. The growing awareness is driving the demand for anaerobic biological treatment equipment in India.

In the fiscal year 2021-2022, it is estimated that the total implementation cost of Swachh Bharat Mission-Urban 2.0 for its various components is INR 1,41,600 crores (~USD 18.998 billion). Out of which, the Government of India's share will be INR 36,465 crores (~USD 4.892 billion), while the rest will be from other sources of funds, including CSR from the public/ private sector, external assistance, etc. It includes the fund allocation for water and wastewater treatment in the country.

India's zinc production witnessed growth in recent years with increasing consumer demand. According to the Economic Times, India consumes over 850,000-900,000 tons of zinc yearly, with an annual growth rate of 7-8%. However, increasingly stringent environmental regulations on zinc production are estimated to hamper the growth of water treatment technologies in recent times.

Due to the abovementioned factors, treatment equipment is expected to dominate the studied market.

1.3.3. Summary

- The market for sewage and wastewater treatment in India is still evolving. About 50-60 per cent of the wastewater generated in the country gets treated.
- The government has launched various programmes such as the Atal Mission for Rejuvenation and Urban Transformation (AMRUT), Namami Gange, and Smart Cities Mission with a focus on enhancing the sewage/wastewater treatment infrastructure. Many new projects are being undertaken to increase sewerage capacity.

- The repair and rehabilitation of STPs is emerging as a notable trend, resulting in the extension of life of treatment plant infrastructure. Under the Namami Gange programme, the government has taken up more than 170 sewage infrastructure projects for the creation and rehabilitation of around 5,300 mld of STP capacity and the laying of over 5,200 km of sewerage network. So far, more than 50 per cent of these projects have been completed.
- To address the possibility of an acute water shortage in the future, industries are making concerted efforts to utilise water judiciously. The installation of captive zero liquid discharge (ZLD) plants is gaining traction. Wastewater reuse projects for industrial and non-potable applications have reduced the dependence on fresh water for purposes where treated water can be used. There has been a perceptible increase in the use of recycled water for power plants.
- There is also a growing focus on technology solutions and new-age equipment for effective treatment of sewage/wastewater. Advanced solutions such as SCADA, IoT, GIS systems, satellite surveillance and remote sensors are being deployed for monitoring, collection and treatment systems. Many city corporations are making increased use of these digital and technology solutions to optimise and improve the wastewater treatment network in their respective cities.
- The Hybrid Annuity Model (HAM) is emerging as a key means of project implementation in the wastewater treatment sector. A number of projects have been taken up on this model under the National Mission for Clean Ganga, paving the way for greater private participation.

1.4. Indian Road and Highway Industry Outlook

- India has the second largest road network in the world, spanning about 63.73 lakh kilometres, which includes national highways, state highways, district roads, and rural roads. This extensive network ensures connectivity across various regions of the country.
- National Highways (NH) play a very important role in the economic and social development of the country by enabling efficient movement of freight and passengers and improving access to market. They account for 2% of the total road network and carry over 40% of total traffic. The pace of NH construction has increased consistently due to the systematic push through corridor-based National Highway development approach, from about 12 km/ day in 2014-15 to about 29 km/ day in 2021-22.
- The Indian Government has been actively investing in the development of road infrastructure. Major initiatives like the Bharatmala Pariyojana aim to upgrade and expand the road network, including the construction of expressways, economic corridors, and feeder routes. The first phase of the programme will develop 34,800 km of highways, including 27 Greenfield corridors and India's largest expressway (a 1,386 km long Delhi-Mumbai Expressway). Under the Pariyojana, 60% projects have been envisaged on Hybrid Annuity Mode (HAM), 10% projects on BOT (Toll) Mode, and 30% projects on EPC mode.
- The roads and highways sector has pioneered several innovative public-private partnership (PPP) models besides having a strong contractual framework compared with other sectors. These factors have led to significant investments from private players in the sector. Several incentives have also been announced by the Government to attract private sector participation and foreign direct investment, which include Government bearing the cost of project feasibility study, land for the right of way and way side amenities, shifting of utilities, environment clearances, etc.
- 100% FDI in roads and highways is allowed under automatic route.

1.4.1. Industry Scenario

- The market for roads and highways in India is projected to exhibit a CAGR of 36.16% during 2016-2025, on account of growing government initiatives to improve transportation infrastructure in the country.
- The highways sector in India has been at the forefront of performance and innovation. The government has successfully rolled out over 60 road projects in India worth over \$10 bn based on the Hybrid Annuity Model (HAM). HAM has balanced risk appropriately between private and public partners and boosted PPP activity in the sector.
- Asset recycling, through the toll-operate-transfer (ToT) model has been taken up by the National Highways Authority of India (NHAI) for 100 highways. The first two bundles of 9 highways each were monetized successfully for an investment of over \$2 bn.
- NHAI has created Guinness World Record by constructing 75 km continuous Single Lane Bituminous Concrete Road in record time of 105 hours 33 minutes, between Amravati and Akola on NH 53 in Maharashtra.

- NHAI along with Maha Metro achieved the Guinness World Record by constructing longest Double Decker Viaduct (3.14 km) with Highway Flyover & Metro Rail supported on single column in between 3 metro stations in Nagpur
- As one of the biggest reforms in the road transportation industry in India, the NHAI has gone 'Fully Digital', with the launch of a unique cloud-based and Artificial Intelligence-powered Big Data Analytics platform – Data Lake and Project Management Software. The entire project management work flow of NHAI is transformed from manual to online portal based, wherein the complete project execution operations including 'workflow with time lines' and 'alert mechanism' have been configured. All project documentation, contractual decisions and approvals are now being done through portal only.

1.5.1 Indian Power Industry Outlook

India is the third-largest producer and consumer of electricity worldwide, with an installed power capacity of 416.59 GW as of April 30, 2023.

As of April 30, 2023, India's installed renewable energy capacity (including hydro) stood at 172.54 GW, representing 41.4% of the overall installed power capacity. Solar energy contributed 67.07 GW, followed by 42.86 GW from wind power, 10.24 GW from biomass, 4.94 GW from small hydropower, 0.55 from waste to energy, and 46.85 GW from hydropower.

The non-hydro renewable energy capacity addition stood at 4.2 GW for the first three months of FY23 against 2.6 GW for the first three months of FY22.

India's power generation witnessed its highest growth rate in over 30 years in FY23. Power generation in India increased by 8.87% to 1,624.15 billion kilowatt-hours (kWh) in FY23. According to data from the Ministry of Power, India's power consumption stood at 130.57 BU in April, 2023.

The peak power demand in the country stood at 226.87 GW in April, 2023.

The coal plants registered a PLF of 73.7% for the first nine-months period in FY23 compared to 68.5% in FY22 for the same period.

Thermal power plant load is estimated to improve by 63% in FY24, fuelled by strong demand growth along with subdued capacity addition in the sector.

Total generation in India FY22 (including renewable sources) (BU)

1.5.2. Road Ahead

In the current decade (2020-29), the Indian electricity sector is likely to witness a major transformation with respect to demand growth, energy mix and market operations. India wants to ensure that everyone has reliable access to sufficient electricity at all times, while also accelerating the clean energy transition by lowering its reliance on dirty fossil fuels and moving toward more environmentally friendly, renewable sources of energy. Future investments will benefit from strong demand fundamentals, policy support and increasing government focus on infrastructure.

The Government of India is preparing a 'rent a roof' policy for supporting its target of generating 40 GW of power through solar rooftop projects by 2022. It also plans to set up 21 new nuclear power reactors with a total installed capacity of 15,700 MW by 2031.

The Central Electricity Authority (CEA) estimates India's power requirement to grow to reach 817 GW by 2030. Also, by 2029-30, CEA estimates that the share of renewable energy generation would increase from 18% to 44%, while that of thermal energy is expected to reduce from 78% to 52%.

The government plans to establish renewable energy capacity of 500 GW by 2030.

Our Offered Services:

1. **Common Effluent Treatment Plant-** The components under Common Effluent Treatment are divided into two parts:

A- **Primary Treatment-** A collection cum screening tank is the first course in effluent treatment which receives preliminary treated effluent as an inlet of CETP. The condensate from MEE and spray dryer are also pumped to collection tank. The treated effluent from Novel is also sent to GESCSL CETP for further treatment. From the collection tank the wastewater is flash mixed where coagulants and flocculants are mixed. The cationic and anionic coagulants are added through dosing pump from the chemical tanks and are thoroughly mixed in the Flash mixer.

After complete mixing of the coagulants like Cationic and Anionic polyelectrolytes with the effluent, the effluent is clarified in Clariflocculator with designed detention time of 3.45 hrs. The solids separated during clarification are collected in primary sludge holding tank from where it is pumped to centrifuge decanter for dewatering. The dewatered sludge is then transported to TSDF and the concentrate from decanter is transferred to equalization tank. The supernatant flows to equalization tank for homogenization. The equalization tank provides a detention time of 24.87 hrs under designed flow. In equalization tank the content is thoroughly mixed with the help of coarse bubble diffuser aeration supported by Turbo Aerator.

The equalized flow is sent to flash mixer where cationic polyelectrolyte and anionic polyelectrolyte are added. After complete mixing of the chemicals with effluent, it flows into flocculator tank where coagulation and flocculation of suspended solids, colloids and dissolved pollutants takes place. The overflow from flocculator goes to settling tank and flocs removed by scrapper in the form of sludge. DAF unit works on the principle of super saturation of the liquid with dissolved air. However, under the present circumstances, the functionality of DAF is in-effective and the unit is used just as a settling tank.

B- **Secondary Biological Treatment Activated Sludge Process-** The extended aeration model is employed for biological treatment. The effluent received from settling tank where the desired level of DO and MLSS is provided by root blowers with medium bubble diffused aeration grid and triton type Jet Aerators with 10 HP air blowers.

The treated sewage from STP, is added to aeration tank for bio augmentation. The organic matter and some nutrients in the form of nitrogen and phosphorous present in wastewater are degraded aerobically by the active micro-organisms contained in the activated sludge.

Two secondary clarifiers receive an effluent containing MLSS through the flow distribution chamber. Anionic poly-electrolyte & spent aluminium chloride are added to the effluents from aeration tank before clarification in the secondary clarifier. The spent aluminium chloride which is used as chemical aid for clarification is a by-product of CETP member units. The activated sludge mixed liquor is clarified by gravity in the clarifiers from where it is taken to the Sludge Sump.

A portion of this activated sludge (Recycled Activated Sludge) is recycled into the aeration tank to maintain F/M ratio. The excess sludge (Waste Activated Sludge) is taken into sludge holding tank from where it is pumped to Centrifuge/Decanter for dewatering. Again non-anionic polyelectrolytes are added to decanter. The supernatant/treated effluent from the secondary clarifiers is collected in Holding Tank from where it is pumped to river for discharge through a closed Mega pipeline. The treated effluent is pumped to mega line which carries effluent for ultimate discharge at downstream of river it is mixed with treated Sewage.

Sludge Treatment and Disposal

The sludge from primary and secondary tanks is collected in sludge holding tanks from where it is pumped to centrifuge decanter dewatering. The dewatered sludge is transferred to Storage facility and then disposed off. The Centrate from decanter is transferred to Equalization Tank. Leachate from sludge storage facility is also transferred to Equalization tank for treatment. The dewatered solids are sent to authorised TSDF site.

2. Surface Water Treatment Plant

The process of Surface Water Treatment Plant can be distinguished under a flow chart:

Description of Flow chart is:

1. Intake Pipe- Intake Crib Raw water from a surface water lake or reservoir is drawn into the plant through intake structures. Large debris like logs are prevented from entering and zebra mussel control is performed at the intake.
- 2 & 3. Primary Treatment- Protective Bar Screen and Travelling Water Screen are covered under this as Screens Smaller debris like fish, vegetation and garbage are removed from the raw water by protective bar and travelling screens before the water enters the low lift pumps.
4. Low Lift Pump Well- These pumps lift the water to flow through the treatment processes by gravity.
5. Pre-oxidation & Primary Disinfection Disinfectants or other oxidants are added to disinfect or control tastes and odours. The specific processes used are determined by the chemical and biological raw water characteristics.
6. Coagulation- Coagulation Coagulants, rapidly add electrochemical charges that attract the small particles in water to clump together as a "floc". This initial charge neutralization process allows the formed floc to agglomerate but remain suspended.
7. Flocculation- By slower mixing, turbulence causes the flocculated water to form larger floc particles that become cohesive and increase in mass. This visible floc is kept in suspension until large enough to settle under the influence of gravity.
8. Sedimentation- Flocculated water is applied to large volume tanks where the flow speed slows down and the dense floc settles. Settled floc is removed and treated as a waste product that is discharged to the sewer system.

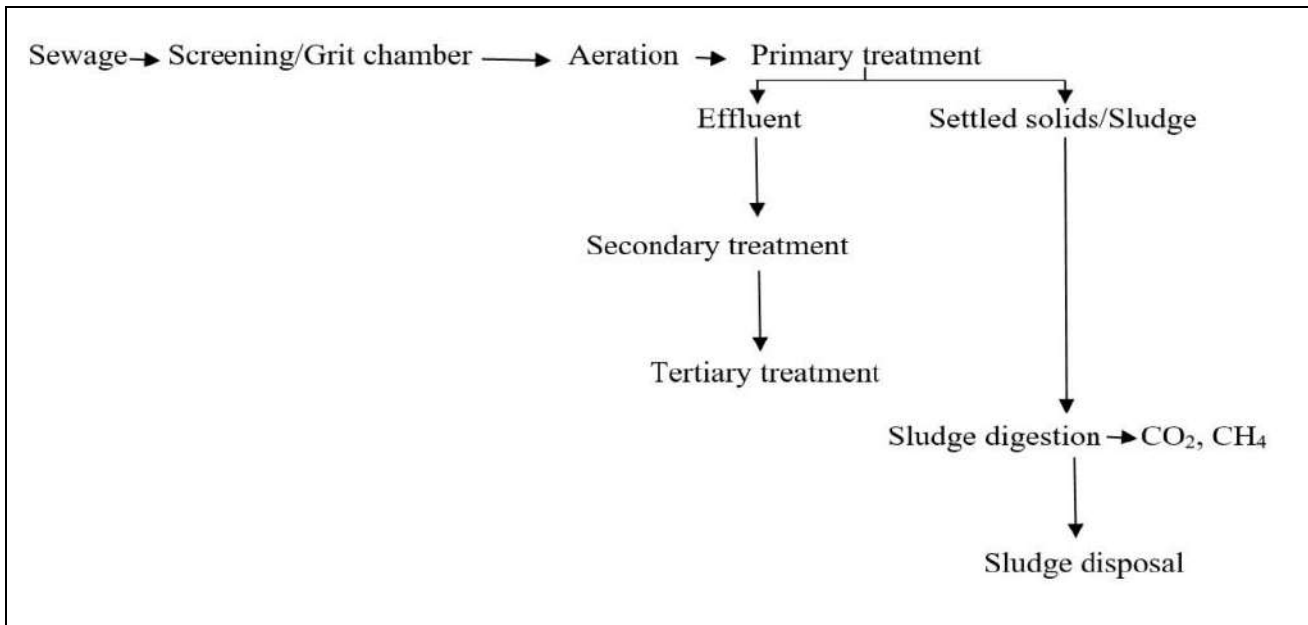

9. **Sand Filtration- Media Gravity Filtration** Relatively floc free, settled water flows through a media filter by gravity. Filter media are made from layers of anthracite or granular activated carbon and sand. Gravel or synthetic materials support the media. Physical straining removes the remaining floc. Filters are periodically backwashed to clean off accumulated floc and other trapped impurities.
10. **Clear Well-** Filtered water in the clear well is used to backwash filters and kept in storage to ensure that disinfectants are in contact with the water long enough to inactivate disease causing organisms.
11. **Post Chlorination- Secondary Disinfection** Supplemental chlorine is added to maintain disinfection concentrations while the water is pumped through the distribution system. The purpose is to ensure minimum residual disinfectant levels at the farthest points of the system.
12. **Fluoridation-** A process where silicofluoride compounds are added to treated drinking water to artificially raise the fluoride concentration to within a specified range; for example between 0.5 to 0.8 mg/L (ppm). Fluoridation is an optional public health dental policy.
13. **High Lift Pump Well-** Treat drinking water is pumped through large pressure pumps to other pumping stations, reservoirs or points of supply within the local distribution system.
14. **(a & b) Elevated Water Storage Towers and Ground Level Reservoirs-** Water distributed to water towers and storage reservoirs ensures stable water pressure. An adequate supply of water is maintained to meet peak water demands or emergencies such as fires, water main breaks, power outages and pump failures. Distribution System Distribution systems are comprised of large pipes known as trunk mains to deliver drinking water. Smaller diameter branch mains feed individual streets. Service connections to branch mains deliver water into residences. Pumping stations are used to increase pressure and to maintain adequate supply flows.

3. Sewage Treatment Plant (STP)- The principle of a Sewage Treatment Plant (STP) involves the treatment of wastewater through a series of physical, biological, and chemical processes to remove pollutants and contaminants. The primary principle is to mimic and enhance natural processes that occur in the environment to purify water.

This is achieved by promoting the growth of beneficial microorganisms that break down organic matter, settling out solids, and disinfecting the water to ensure it meets quality standards before being discharged or reused.

A. Primary Treatment- In a sewage treatment plant, sewage water is first allowed to pass through screens or grit chamber where large solids are removed. This step is followed by aeration/mixing in a tank and then primary sedimentation where suspended solids settle down. Primary treatment involves addition of a coagulant and aims at removing grits, coarse solids, oil and grease if any present. Preliminary treatment results in sedimentation of solids (sludge) and formation of an effluent that floats above sludge. Effluent from primary treatment consists of 45-50 % unstable organic matter. The effluent then undergoes secondary treatment where fine solids settle out by means of bacterial activities.

B. Secondary or Biological Treatment- This stage converts organic matter in sewage into stable forms through biological activities, resulting in secondary sedimentation. Common approaches are trickling filters and activated sludge method.

Trickling filters comprise an enclosed tank with a bed of bricks and a layer of microorganisms. The effluent enters the tank through an inlet and trickles over the bed layer by sprinklers. Microbial activities oxidize the organic matter in the effluent, resulting in the removal of fine solids, formation of sludge and an effluent with less organic solids.

Activated sludge method involves the addition of a mixture of active microorganisms to sewage, followed by aeration and agitation. The aerobic conditions and microbial actions oxidize the organic solids resulting in coagulation, flocculation and settling of solids. Activated sludge produces a clear liquid without foul odour.

C. Tertiary Treatment- The effluent then undergoes tertiary treatment/disinfection by incorporation of UV radiation or chlorination. Other methods such as sand filters and reverse osmosis may also be used instead for this stage of treatment, depending upon the nature of the sewage and the effluent from secondary treatment.

In the infrastructure business sector, tenders are commonly submitted to government departments based on their technical and financial parameters. In instances where tenders are too large for a single bidder to execute or specific qualification criteria are required, companies often establish Special Purpose Joint Ventures (SPJVs) with other entities to jointly pursue and submit tenders. Within these SPJVs, the main company assumes the role of the lead JV partner, and tenders are awarded based on the qualifications and capabilities of this primary entity. The execution of work under these arrangements is determined on a case-by-case basis.

These SPJVs are typically structured as Special Purpose Vehicles (SPVs) and are registered as Associations of Persons (AOPs) for taxation purposes, including Income Tax and GST. Despite their registration, these SPVs do not engage in operational activities; instead, they award work in its entirety to the JV partners on an "as is" basis. Profit margins in SPV JVs are generally kept minimal, primarily covering miscellaneous expenses.

This practice is widely recognized and accepted within the infrastructure business sector. Due to their nature as AOPs and SPVs, these joint ventures are considered as related party transactions only because our company is one of the partner.

The following are the details of Joint Venture Agreements Executed by VVIP with other entities to execute the tenders allotted to special purpose vehicles (SPV's):

Depreciation on new assets acquired during the year is provided at the rates applicable from the date of acquisition to the end of the financial year. In respect of the assets sold during the year, depreciation is provided from the beginning of the year till the date of its disposal.

An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. Reversal of impairment loss is recognised immediately as income in the profit and loss account.

A. Current Tax:

Provision for current tax is made in accordance with the provisions of the Income Tax Act, 1961.

B. Deferred Tax:

Deferred tax is recognised, subject to the consideration of prudence, as the tax effect of timing difference between the taxable income and accounting income computed for the current accounting year using the tax

rates and tax laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax assets are recognised and carried forward to the extent that there is a reasonable certainty, except arising from unabsorbed depreciation and carried forward losses, that sufficient future taxable income will be available against which such deferred tax assets can be realised.

(viii) Provisions and Contingent Liabilities:

A provision is recognised if, as a result of past event, the Group has a present legal obligation that can be estimated reliably and it is probable that an outflow of economic benefit will be required to settle the obligation. Provisions are determined by the best estimate of outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is possible obligation or present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

(ix) Earnings Per Share:

Basic Earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit after tax by the weighted average number of shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as at the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

Cash flows are reported using indirect method, whereby net profit/loss before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

(xiv) Investments:

The preparation of the financial statements in conformity with Generally Accepted Accounting Principles requires the Management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as at the date of the financial statements and the reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, income taxes, post - sales customer support and the useful lives of Property Plant and Equipments and intangible assets.

(i) Revenue recognition: The company derives its revenues primarily from Sewer, Sewer Treatment plants, Water Tanks, Water treatment plants, Road sector development, Electrification Development and its Transmission and Distribution Infrastructure Projects. Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured in accordance

with AS-9, Revenue Recognition. Sales are recognized on accrual basis, and only after transfer of services to the customer.

(a) **Sale of services**- Revenue from rendering of services is recognised over time as the customer receives the benefit of the Company's performance and the Company has an enforceable right to payment for services transferred.

(b) **Interest Income**: Revenue is recognized on the time proportion basis after taking into account the amount outstanding and the rate applicable.

(c) **Other Income**: Other items of income and expenditure are recognized on accrual basis and as a going concern basis, and the accounting policies are consistent with the generally accepted accounting policies.

(ii) **Property Plant and Equipment :**

Property Plant and Equipments are stated at cost, less accumulated depreciation. Cost includes cost of acquisition including material cost, freight, installation cost, duties and taxes, and other incidental expenses, incurred up to the installation stage, related to such acquisition

(iii) **Intangible Assets :**

Intangible assets that are acquired by the Company are measured initially at cost. After initial recognition, an intangible asset is carried at its cost less any accumulated amortisation and any accumulated impairment loss.

(iv) **Depreciation & Amortisation:**

The Company has applied the estimated useful lives as specified in Schedule II of the Companies Act 2013 and calculated the depreciation as per the Written Down Value (WDV) method. Depreciation on new assets acquired during the year is provided at the rates applicable from the date of acquisition to the end of the financial year. In respect of the assets sold during the year, depreciation is provided from the beginning of the year till the date of its disposal.

Intangible assets are amortised on a straight-line basis over the estimated useful life as specified in Schedule II of the Companies Act 2013. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss. In respect of the assets sold during the year, amortisation is provided from the beginning of the year till the date of its disposal.

The estimated useful lives of assets are as follows:

Useful life of Property, Plant and Equipments

Office Equipments	5 years
Plant & Machinery	15 years
Vehicles	8 years

(v) **Impairment of assets:**

The Management periodically assesses using, external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling

price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. Reversal of impairment loss is recognised immediately as income in the profit and loss account.

ANNEXURE 38 : EMPLOYMENT BENEFIT OBLIGATIONS

Gratuity & Leave Encashment - The Present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Interest cost: It is the increase in the Plan liability over the accounting period resulting from the operation of the actuarial assumption of the interest rate.

Current Service Cost: is the discounted present value of the benefits from the Plan's benefit formula attributable to the services rendered by employees during the accounting period.

Actuarial Gain or Loss: occurs when the experience of the Plan differs from that anticipated from the actuarial assumptions. It could also occur due to changes made in the actuarial assumptions.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue

closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

- (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and
- (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.
