Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “**Definitions and Abbreviations**” beginning on page 4 of this Red Herring Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as Internal and External for clarity and better understanding.

- Our business predominantly focuses on blankets, which makes us particularly susceptible to fluctuations in demand. Any shifts in consumer preferences have the potential to significantly impact our business, as well as influence our operational outcomes and financial standing. Our business is highly concentrated on the sale of a single product, i.e., blankets. The details of the contribution of the sales of our products to our total revenue from operations are as under:*

We specifically cater to the market of blankets and its sales are dependent on a number of factors such as increased competition, pricing pressures or fluctuations in the demand for or supply of our products, and other factors outside our control. The number of customers demanding bedsheets may decline or not continue to increase. If we are unable to anticipate and gauge customer preferences, or if we are unable to adapt to such changes in a timely basis or at all, we may lose or fail to attract customers, our inventory may become obsolete, and we may be subject to pricing pressure to sell our inventory at a discount.

3. A majority of our supplies for our operations are obtained from a limited number of suppliers

We had sourced our raw materials from various suppliers. Our business operations require a sufficient and stable supply of fabrics. We also obtain certain slightly imperfect fabric, for merchandising from third-party Contract Manufacturers in India. Our financial performance depends largely on our ability to purchase from the sellers of such fabrics in sufficient quantities at competitive prices. We are not assured of continued provision or adequate pricing of fabrics. Our purchases of fabrics are concentrated from a few suppliers. The details of this concentration are provided in the following table:

Our ability to remain competitive, and maintain costs and profitability depends, in part, on our ability to source and maintain a stable and sufficient supply of raw material at acceptable prices. Our raw materials include yarns, colour chemicals and elastic. *For further information, see “Our Business” beginning on page 123 of this Red Herring Prospectus.* We depend on external suppliers for all the raw materials required and typically purchase raw materials on a purchase order basis and place such orders with them in advance based on our projected requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our raw material suppliers. The absence of long-term supply contracts subjects us to risks such as price volatility caused by various factors viz. commodity market fluctuations, currency fluctuations, climatic and environmental conditions, transportation cost, changes in domestic regulatory changes and trade sanctions. If we cannot fully offset the increase in raw material prices with an increase in the prices for our products, we will experience lower profit margins, which in turn may have a material adverse effect on our results of operations, and financial condition and ultimately lead to a liquidity crunch. In the absence of such contracts, we are also exposed to the risk of unavailability of raw materials in desired quantities and qualities, in a timely manner.

Further, as we generally receive purchase orders for the supply of our products to customers, we rely on historical trends and other indicators to purchase the required quantities of raw materials. We, therefore, run the risk of purchasing more raw materials than necessary, which could expose us to risks associated with prolonged storage of some of these materials, and materially affect our results of operations. Conversely, if our customers place orders for greater quantities of products compared to their historical requirements, we may not be able to adequately source the necessary raw materials in a timely manner and may not have the required processing capacity to meet such demand. In addition, if all or a significant number of our suppliers for any particular raw material are unable or unwilling to meet our requirements or if our estimates fall short of the demand, we could suffer shortages or significant cost increases. Continued supply disruptions could exert pressure on our costs, and we cannot assure you that all or part of any increased costs can be passed along to our customers in a timely manner or at all, which could negatively affect our business, overall profitability, and financial performance.

4. We are dependent on a few customers for a major part of our revenues. Further, we do not enter into long-term arrangements with our customers could adversely affect our business and the results of operations.

Our majority of sales are concentrated on a few customers and our revenue from operations from our top 1 customer, top 3 customers, top 5 customers, and 10 customers for ten months period January 31, 2025, Financial years 2023-24, 2022-23, and 2022-21 are set out below:

We presently do not have any long-term or exclusive arrangements with any of our customers and we cannot assure you that we will be able to sell the quantities we have historically supplied to such customers. In the event our competitors' products offer better margins to such customers or otherwise incentivize them, there can be no assurance that our customers will continue to place orders with us. Most of our transactions with our customers are typically on a purchase-order basis without any commitment to a fixed volume of business. There can also be no assurance that our customers will place their orders with us on current or similar terms, or at all. Further, our customers could change their business practices or seek to modify the terms that we have customarily followed with them, including in relation to their payment terms. While we negotiate product prices and payment terms with our customers, in the event our customers alter their requirements, it could have a material adverse effect on our business growth and prospects, financial condition, results of operations, and cash flows. In addition, our customers may also cancel purchase orders at short notice or without notice, which could have an impact on our inventory management. In the event of frequent cancellations of purchase orders, the same could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

5. Our Company has a negative cash flow in its operating activities for the financial year ended on March 31, 2024, investing activities for the ten months period ended January 31, 2025 and financial year ended March 31, 2024, March 31, 2023 and March 31, 2022 and Financing Activity for the ten months period ended January 31, 2025 and the financial year ended March 31, 2023 details of which are given below. There was a net decrease in Cash and Cash Equivalent for ten months period ended January 31, 2025 and all the three years. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(₹ in lakhs)

Particulars	For ten months period ended	For the year ended March 31		
	January 31, 2025	2024	2023	2022
Net cash (used in)/ generated from Operating Activities	685.33	(10.42)	362.41	80.80
Net cash (used in)/ generated from Investing Activities	(31.83)	(9.75)	(14.46)	(569.93)
Net cash (used in)/ generated from Financing Activities	(653.60)	4.52	(368.21)	488.32
Net increase/ (decrease) in cash and cash Equivalents	(0.10)	(15.65)	(20.27)	(0.81)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

6. Our business is subject to significant seasonal fluctuations, which could materially impact our financial results.

Our company's major sales come from the sale of blankets, i.e. 64.63% of total sales as on financial year ended on March 31, 2024. The sale of blankets is higher in winters, in India the winters starts from late October and continues till early march. Our company realizes major sales in these months. These seasonal fluctuations can be influenced by various factors, including Weather conditions, Industry-specific events which often vary throughout the year, with increased spending during certain seasons or holidays. If we are unable to effectively manage these seasonal fluctuations, our revenue and profitability may experience significant volatility. This could negatively impact on our ability to generate cash flow, invest in our business, and meet our financial obligations.

7. *We have only one production unit that is located in Panipat and any localized social unrest, natural disaster breakdown of services, or any other natural disaster in and around Panipat or any disruption in production at, or shutdown of, our production unit could have material adverse effect on our business and financial condition.*

As of the date of this Red Herring Prospectus, our production unit is located in the state of Haryana, India. Our processing operations and consequently our business is dependent upon our ability to manage this unit, which is subject to operating risks, including those beyond our control. In the event of any disruptions at our unit, due to natural or man-made disasters, workforce disruptions, delay in regulatory approvals, fire, failure of machinery, lack of continued access to assured supply of electrical power and water at reasonable costs, changes in the policies of the states or local government or authorities or any significant social, political or economic disturbances or civil disruptions in and around Panipat, Haryana our ability to produce our products may be adversely affected.

Disruptions in and around our unit could delay production or require us to shut down the unit. Any contravention of or non-compliance with the terms of various regulatory approvals applicable to the unit may also require us to cease or limit production until such noncompliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

Further, any materially adverse social, political, or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our processing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuous operations at our processing facility could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows, and future business prospects. Further, the spiraling cost of living around our processing facility may push our manpower costs higher, which may reduce our margin and cost competitiveness.

However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

8. *If we are unable to maintain an optimal level of inventory, our business, results of operations and financial condition may be adversely affected.*

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in our forecast could result in either surplus stock, which we may not be able to sell in a timely manner, or at all, or understocking, which could affect our ability to meet customer demand. In the event of overstocking, there exists a potential risk of inventory damage arising from the surplus quantities, as excessive stockpiling may lead to unfavourable storage conditions, deterioration, or depreciation of the goods. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively and to maintain a full range of products at our stores. We plan our inventory and estimate our sales based on the forecast, demand, and requirements for the forthcoming seasons. We have inventory stored at our stores ahead of an upcoming season.

For further information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Changes in Inventories of Finished Goods & Work-in-Progress” on page 196.

While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we under-stock inventory, our ability to meet customer demand may be impaired. If we overstock inventory, our capital requirements may increase, and we may incur additional financing and storage costs. Any unsold inventory may have to be sold at a cost price or lower than the cost price or discarded, potentially leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations, and financial condition.

However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company

9. *Risk of Unsustainability of PAT Margin Increase in FY 24*

The Company's increase in its Profit After Tax (PAT) margin in FY 24 may not be sustainable in the future. The improvement in PAT margin achieved during this period may have been influenced by a combination of favourable, non-recurring factors, such as temporary reductions in operational costs, one-time gains, or shifts in market conditions that may not persist in the long term. Furthermore, the Company operates in a dynamic industry environment, where fluctuations in raw material prices, labour costs, and currency exchange rates could adversely affect its profitability.

The Company may also face increased competitive pressures, changes in consumer demand, or evolving regulatory requirements that could erode its ability to maintain these margin levels. Moreover, any reliance on external factors, such as economic stimulus measures, that may have contributed to the positive expansion in FY 24, could diminish in the future. Consequently, there is no assurance that the current PAT margin will be replicable in future fiscal periods, and the Company may experience volatility in its profitability, making the sustainability of the current margin levels uncertain

Below table is the comparison for three financial year:

⁽⁴⁾ 'PAT Margin' is calculated as PAT for the period/year divided by revenue from operations.

10. Our registered office is located on rental premises and consequently, we are required to comply with certain requirements given under leave and license agreements.

Our registered office is currently situated on leave and licensed premises, it is contingent upon compliance with specific regulations; failure to meet these requirements may grant the licensor the right to terminate the leave and license agreement. We cannot guarantee the uninterrupted renewal of the leave and license agreement in the future, and there exists a possibility that our Company may face challenges in securing alternate locations promptly if termination occurs. Further, we may be required to renegotiate the terms and conditions of such premises during their tenure. In the event of termination, we may be compelled to vacate the premises on short notice, further complicating our ability to find suitable alternatives swiftly. The occurrence of any of the above events may have a material adverse effect on our business, results of operations, and financial condition.

11. The Logo which is being used by us is yet not registered with the Trademarks.

The Logo is being used by us as our brand name. The logo is not yet registered with the Trade Marks. We have applied for registration of the same with the Trademarks Authority under Class 24 of the Trade Mark Act, 1999 and the current status of the same is "Accepted and Advertised". We are carrying out our business using our above referred logo and our customers are well versed with our logo with our Company and its operations, where name and reputation has much more value, we have created our image and reputation and recognition among Leading corporate houses and High Net worth class of our society, which is a significant element of our business strategy and success. Currently, our logo is not Registered with the Authority. In absence of our Registered Logo or Trademark our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future against its misuse, in such situation, there are chances of getting damage to our business prospects, reputation and goodwill and misuse of our designs by the competitors also. If our intellectual property rights are inadequate or if we otherwise fail to sufficiently protect our intellectual property, our business, financial condition and results of operations could be adversely affected.

12. If our Company is unable to continue being creative in our designs or if we are unable to keep up to the changing fashion trends, our sales could be affected.

Our results of operations depend upon the continued demand by consumers for our products. We operate in an industry that is highly competitive and where customers' purchases are highly subjective and sensitive to trends and tastes. Creativity and keeping in line with the latest trends are one of the key attributes for success in this industry. For our Company to remain competitive in respect of appealing designs, our designers must keep themselves updated with the latest global trends and demands and more importantly understand the requirements of the customers. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to modify our products on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. A part of our production is for those products where we may not have an order in hand and the quantities are produced based on feedback received from merchandisers and management estimates. If we are not able to anticipate the demand, or misjudge the quantity, inter alia, this could lead to lower sales, higher inventories and higher discounts, each of which could have a material adverse effect on our brand, reputation, results of operations and financial condition.

13. There have been instances in the past where we have not made certain regulatory filings with the RoC and there were certain instances of discrepancies in relation to certain statutory filings and corporate records of our Company.

There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent. There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the E-forms filed by our Company with the ROC in past years.

The following discrepancies have been mentioned in the forms filed by the Company with the Registrar of Companies under the provisions of Companies Act, 2013:

- Form ADT 1 Company has not filed e-form ADT-1 for the appointment of M/S. Virendra & Associates, Chartered Accountants for the Financial Year 01.04.2021 to 31.03.2026 in the AGM held on September 29, 2021. The period of non-compliance is FY 21-22. However, we had found an e-form ADT-1 in which the appointment of M/S. Virendra & Associates, Chartered Accountants have been made w.e.f. September 30, 2022. However, the Company has since filed the form, paying the required additional fees as per the Companies Act, 2013.
- E-form MGT-7 for financial year 2017-18 was filed twice since the company has already filed revised Form MGT-7 for FY 2017-18, there is no non-compliance in this regard as on today However, company shall make all endeavors to file correct form at the first instance itself to avoid any refiling.
- As per MGT-8 and Directors Report Board Meeting held on July 13, 2018, but the same is not reported in MGT-7 filed for Financial Year 2018-19. However, after identifying this non-compliance, the Company is making sure to capture all the dates of Board and General meetings in future filings. The company has prepared minutes of the Board meeting held on 13th July 2018 and the same has been signed and circulated to all Board members. All the Board members have taken cognizance of missing date of Board meeting in Form MGT-7 for FY 2018-19 and has hence hired professionals to avoid clerical errors.
- Annual General Meeting held on October 27, 2020, and radio button for extension granted is selected as "NO" in Annual Filing forms for Financial Year 2019-20. However, for that period the Ministry of Corporate affairs had provided general extension of 3 months for all the entities to conduct AGM for FY 2019-20 due to COVID. However, the company ensures that such clerical errors don't occur in future filings.
- Due date of Annual General Meeting is mentioned as November 30, 2021, in Annual Filing forms for Financial Year 2020-21 instead of September 30, 2021. However, the Ministry had provided a general extension of 2 months for FY 20-21 to conduct AGM due to COVID. However, the company ensures that such clerical errors don't occur in future filings
- Non-compliance was observed on 22nd August 2016 for which Alteration was not noted in the MOA attached in the E-form MGT-14 & Form SH-7 as per section 15 of Companies Act, 2013. However, in the subsequent filing of Form MGT-14 vide SRN AA9695701 dated 10th August 2024, the alteration has been noted both in MOA and filed with ROC. The company shall ensure to comply with the provisions in the future with better compliance mechanism.

- The company has drafted minutes of the Extra Ordinary General Meeting held on 2nd June 2018 and the same has been signed and circulated to all Board members. Merely not mentioning the date of EGM in Form MGT-7 for that particular year is merely a clerical error and the company has steps proactive steps in this regard to avoid in future.
- Amount Received from Proprietorship Firm of Mr. Akshay Aggarwal instead from his personal account for right issue dated December 18, 2023. Though the amount transferred from Proprietorship Firm is as good as received from the individual himself. However, subscribers shall be careful and sensitive during any fund-raising process to avoid such errors. The Board of directors of the company has taken all steps in all future fund-raising processes either through private placement or rights issues or any other means wherein checklist and procedures are thoroughly checked to minimize such errors. However, such errors in no way have bearing in the proposed IPO of the company
- In form INC-27, Para-3 of Main object of the company was not reported. The non-compliance observed on 19th October 2023 has been regularized by filing Form MGT-14 vide SRN AA9538523 dated 7th August 2024 for this clerical error by paying the required form fees as per the Companies Act, 2013.
- During the process of conversion of Private limited company to Public Limited company, Company inadvertently mentioned the name of the newly appointed directors in Articles of Association instead of First directors. After identification of the non-compliance observed on 19th October 2023 has been regularized by Filing of Form MGT-14 vide SRN AA9538523 dated 7th August 2024, with additional fees and would be very careful henceforth to avoid such minor errors.

Our company has missed to comply with certain statutory provisions in the past including but not limited to the details as mentioned in this risk factor. There are few discrepancies noticed in some of our corporate records relating to adhering with the provisions of SS-1 and SS-2 of the Companies Act, 2013 which inter alia includes non-stamped and unsigned documents attached in the forms, time of conclusion of the meeting not included in the certified true copy of resolution, date of the Board Meeting mentioned in the resolution was incorrect. Other errors in the forms, such as wrong date of meeting, requisite attachments were not attached, late filing of forms, etc. However, as there was no error on the MCA master data, no major action was taken for the same. Some forms were filed after the due date of the respective forms. Supporting documents attached in some of the Forms are not signed and stamped by the requisite authority. Though the Company is ensuring to comply with all the shortcomings, however any penalty or action taken by any regulatory authority in future for non-compliance with provisions of corporate and other law could impact financial position of the company to that extent. Although no notices have been issued upon our Company yet but there may be instances whereby notices may be issued to our company and fines or penalties may also be imposed upon our Company, which may adversely affect our administration from compliance perspective. There can be no assurance that no penal action will be taken against us by the regulatory authorities with respect to non-compliance. If any adverse actions are taken against us, our financial results could be affected. Additionally, we have strengthened our internal compliance system by introducing the 'Maker Checker' System and have undertaken steps to update the internal database with latest circulars and amendments to ensure future compliance. In the event the Company fails to submit the requisite disclosures to the regulators in the future, then the Company may be penalized by the regulators and the same may affect our results of operations.

14. There have been some instances of delays in the filing of statutory and regulatory dues in the past with the various government authorities.

In the past, there have been certain instances of delays in filling statutory & regulatory dues with respect to GSTR 1, GSTR 3B, TDS, Tax Liabilities, ESIC, and EPF. These delays were majorly due to the following reasons:

As a result, the Company has filed returns and payments with delay penalty. However, the Board of Directors of our company has taken note of these delays in fulfilling our statutory and regulatory obligations. There can be no assurance

that delays or default with respect to payment of statutory and regulatory dues will not occur in the future which in turn may affect our reputation and financial results.

2	Bank Guarantees / Corporate Guarantees	-

17. Our company have had high Debt-to-Equity Ratio in past.

Over the past two financial years, our Company maintained a high Debt to Equity ratio, which was 8.63 on FY 22 and improved to 6.25 in FY 23. This ratio reflects significant reliance on debt financing, the ratio was primarily driven by negative reserves and surplus of ₹ (26.38) Lakhs and the Long-term Borrowings of ₹ 692.50 lakhs on FY 22. While the ratio improved due to the repayment of long-term borrowings amounting to ₹ 191.73 Lakhs and decrease in Utilization of Overdraft shown under short-term borrowings of ₹ 28.23 Lakhs, along with a positive reserve and surplus of ₹ 75.09 Lakhs in FY 23.

The high Debt to Equity ratio indicated that a substantial portion of our financing came from debt, which can increase our risk of interest rate change and repayment obligations. A continued high Debt to Equity ratio in future may increase our cost of capital and may affect our ability to invest in growth opportunities. Further, if our earnings do not cover our debt obligations sufficiently, it could lead to liquidity challenges and affect our overall financial stability

21. Our business involves usage of manpower and any unavailability of our employees or shortage of contract labour or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations.

Our business involves usage of manpower and we are dependent on the availability of our permanent employees and the supply of a sufficient pool of labourers. Unavailability or shortage of such a pool of workmen or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations. We may not be able to secure the required number of labourers required for the timely execution of our functions for a variety of reasons including, but not limited to, possibility of disputes with sub-contractors, strikes, less competitive rates. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities. Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations.

However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

22. Our Promoters have provided a personal guarantee for loans availed by us.

In the event of default of the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoter’s ability to manage the affairs of our Company and our Company’s profitability and consequently, this may impact our business, prospects, financial condition, and results of operations. Our Company has availed loans in business. Our Promoters have provided a personal guarantee in relation to certain loans availed by our Company, *for details please see “Financial Indebtedness” on page 216.* In the event of default in repayment of the loans by the Company, the personal guarantee extended by our Promoters may be invoked by our lenders thereby adversely affecting our Promoter’s ability to manage the affairs of our Company and this, in turn, could adversely affect our business, prospects, financial condition and results of operations.

23. We have not identified any alternate source of financing the ‘Objects of the Issue’. If we fail to mobilize resources as per our plans, our growth plans may be affected.

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue may delay in the implementation schedule and could adversely affect our growth plans. *For further details of object of Issue and schedule of implementation please refer to the chapter titled “Objects of the Issue” on page 87 of this Red Herring Prospectus.*

24. We are subject to various government regulations and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business, results of operations and cash flows may be adversely affected.

Our operations are subject to government regulation and we are required to obtain and maintain a number of statutory and regulatory permits and approvals under central, state and local government rules in India and in respective regions that we have operations, generally for carrying out our business, producing and marketing our Products and for our production unit. *For details of applicable regulations and approvals relating to our business and operations, see “Government and Other Key Approvals” on beginning on page 222.*

Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have an adverse effect on our business, financial condition and results of operations. Failure to obtain or validly maintain such approvals could materially and adversely affect our business, results of operations and financial condition. *For further details, see “Government and Other Key Approvals” on beginning on page 222.*

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

If we fail to comply with applicable statutory or regulatory requirements or fail to complete production of our Products in compliance with applicable standards, there could be a delay in the submission or grant of approval for sale of new products. In many of the international markets where our Products are ultimately sold, the approval process for a new product can be complex, lengthy and expensive. The time taken to obtain regulatory approvals varies by country but generally takes between several weeks and several years from the date of application. If we fail to obtain such approvals, licenses, registrations and permissions, in a timely manner or at all, our business, results of operations, cash flows and financial condition may be adversely affected.

However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

25. Potential Challenges Arising from Independent Directors' Limited Experience in Listed Companies.

Our company's independent directors lack experience of being an Independent Director in listed companies. However, one of Independent Director is independent director in a company which got listed recently. There might be a potential inadequacy in navigating the complexities of corporate governance and regulatory compliance specific to public entities. Without a solid understanding of the intricacies involved in managing a publicly traded company, these directors may struggle to fulfil their fiduciary responsibilities effectively. This lack of experience can hinder their ability to provide meaningful oversight of management, assess risks appropriately, and engage in strategic decision-making. Consequently, the board may face challenges in addressing issues related to financial reporting, regulatory obligations, and shareholder communications. Such deficiencies could lead to mismanagement, compliance breaches, and reputational harm, ultimately undermining investor confidence and adversely impacting the company's performance and market valuation.

26. Our Company's processing activities are labor intensive and depend on availability of skilled and unskilled employee in large numbers.

In case of unavailability of such employees and / or inability to retain such personnel, our business operations could be affected. Our Company has employed 133 employees. The above includes employees in the top and middle management and also employees who are part of processing unit and office staff. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled employees. In case such employees are unavailable or we are unable to identify and retain such employees, our business could be adversely affected. In order to retain flexibility and control costs, we also appoint independent contractors who in turn engage on-site contract labour for performing certain of our ancillary operations. Any failure to hire the appropriate contract labour may impact the operations, production and revenue.

27. Our business strategies and expansion plans may be subject to various unfamiliar risks and may not be successful.

While the company's growth strategies present significant opportunities, they are accompanied by various risks that could impact overall performance. The reliance on the expanding e-commerce market in India exposes the company to potential challenges such as market saturation, increased competition, and changing consumer preferences, which could lead to rising costs in digital marketing and logistics as well as issues with maintaining product quality and timely deliveries. Product diversification, including the introduction of new lines like bedding essentials and home decor, may dilute focus and resources, creating uncertainties around consumer acceptance and increasing competition, which could result in overstock or underperformance of certain items. Additionally, expanding the sales network into new domestic regions might encounter obstacles related to varying regional consumer behaviors, logistical challenges, regulatory compliance, and heightened operational costs, potentially affecting profitability. Finally, international expansion carries risks associated with currency fluctuations, geopolitical uncertainties, and diverse regulatory environments, along with the

challenge of understanding local market demands and competition. Collectively, these factors pose risks that could adversely impact the company's growth prospects and financial stability if not effectively managed.

28. *Dependence on key customers, financial constraints, and challenges in establishing a foothold in new market segments may impact the company's growth and stability.*

The company faces risks associated with a significant reliance on a limited number of key customers, which could materially impact revenue if these relationships are disrupted or if market conditions change. Additionally, the company's ambitious domestic and international expansion plans require substantial financial investments, and limited access to adequate resources may hinder growth initiatives or strain existing operations. Furthermore, diversification into new product segments, such as bedsheets and curtains, presents challenges in establishing a competitive market presence. The combined effect of these factors could adversely affect the company's financial performance and long-term growth prospects.

29. *Changing regulations, supply chain disruptions, intense competition, and economic fluctuations pose significant risks to the company's operation and growth.*

The company operates in an environment subject to potential regulatory changes, where alterations in government policies or compliance requirements could adversely impact operations and increase costs. Additionally, reliance on suppliers poses risks of supply chain disruptions, which may affect production schedules and delivery timelines. The bedding and home decor market is highly competitive, with established players exerting significant pressure on pricing, innovation, and market share. Moreover, economic fluctuations, including periods of instability, can weaken consumer purchasing power, reducing demand for non-essential items such as the company's products. These factors collectively pose a threat to the company's operational efficiency, market position, and financial performance.

30. *There have been instances of delay / default in payments to MSME registered vendors in the last three Financial Years. Any Continued delay / default may negatively impact our relationships, profitability, and cash flow.*

In the financial year 2023-24, our Company has delayed payments to various Micro, Small, and Medium Enterprises (MSME) vendors. There were 2 instances of delay in payment to vendors, VIRENDRA & ASSOCIATES & B.D GUPTA & ASSOCIATES for which the amount due is ₹216,331 & ₹ 215,000 respectively and the delay was due to unforeseen circumstances. Our company has recorded applicable interest on such delay payment in the books of accounts and the same was paid along with requisite interest before the date of filing of Red Herring Prospectus.

In compliance with applicable laws regarding delayed payments to MSME vendors, we have made payments to such vendors along with requisite interest on these overdue amounts. While this is a necessary step to adhere to legal requirements, it can significantly affect our cash flow and overall profitability. The interest paid to MSME vendors due to these delays may increase our operating expenses, further straining our financial resources. Additionally, delayed payments can lead to strained relationships with suppliers, resulting in disruptions in the supply chain and potential difficulties in obtaining necessary materials or services in the future. Furthermore, consistently late payments may compel vendors to impose stricter payment terms or, in some cases, refuse to continue business with us. This could adversely affect our operational efficiency and ability to meet customer demands.

31. *Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition, and results of operation.*

The Company has its own brand name "Rian Décor" under which it sells its products to the customers. Brand recognition is important to the success of our business. Establishing and maintaining our brand "Rian Décor" in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

32. *Our success depends in large part upon our qualified personnel, including our senior management, directors and key personnel and our ability to attract and retain them when necessary.*

Our operations are dependent on our ability to attract and retain qualified personnel. While we believe that we currently have adequate qualified personnel, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. The loss of the services of our qualified personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train

replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the qualified employees that our business requires. Furthermore, our senior management team is integral to the success of our business.

The attrition rate of last three Year is 2.31%, 2.13% & 2.37% for the year 2021-22, 2022-23 & 2023-24 respectively pertains to overall employees of the Company for that respective financial year. However, there has been no recent instance where any person from the senior management team or KMP has left the organization. But we cannot assure you that in future we will be able to retain any or all of our management team. Any loss of our senior management or key personnel or our inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of ongoing and planned projects and our ability to develop, maintain and expand customer relationships.”

33. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements of our company and of our subsidiaries and joint ventures. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

34. In the past, there were instances when our Company had not made any provision for payment of gratuity to our employees

As per the provisions of the Payment of Gratuity Act, 1972 (the "Act"), a scheme for the payment of gratuity to employees becomes applicable when a company crosses the threshold limit of employees stipulated by the Act. Our company failed to initially determine the applicability of the Act, despite the fact that the number of employees exceeded the prescribed limit. Consequently, the company did not maintain any provisions for gratuity in its financial statements for previous years.

Upon identifying this non-compliance, the company took the following corrective steps:

Assessment of Applicability: The company conducted a thorough review of its employee count and the applicability of the Act, confirming that it indeed surpassed the threshold limit.

Actuarial Valuation: Upon determination of the liability, the company sought Actuarial Valuation from a registered Actuarial Valuer and made required provision as per their report.

Accounting of Gratuity Provision: The provisions are recorded in the Profit and Loss account every year and requisite liability is created in the Balance Sheet. This liability will ensure that the company has enough funds for Gratuity payment as and when it becomes due. This ensured compliance with accounting standards and provided a transparent financial position.

The same can be referred on page F-12 of the Red Herring Prospectus as below:

(₹ in lakhs)

Details of provision	Long Term Provision				Short Term Provision			
	January 31, 2025	March 24	March 23	March 22	January 31, 2025	March 24	March 23	March 22
Provision for Gratuity	56.93	28.69	30.50	13.28	12.45	9.65	6.76	4.50

Gratuity Expenses have also been expensed out under Employee Benefit Expenses on page F-17 of the Red Herring Prospectus as below:

(₹ in lakhs)

Details of Employee Benefit Expenses	January 31, 2025	March-24	March-23	March-22
Gratuity	31.04	1.09	19.48	8.43

Our Company has implemented the corrective actions at this time; however, there is no assurance that the same will not be repeated in the future.

Additionally, we have strengthened our internal compliance system by introducing the ‘Maker Checker’ System and have undertaken steps to update the internal database with latest circulars and amendments to ensure future compliance. In the event the Company fails to submit the requisite disclosures to the regulators in the future, then the Company may be penalised by the regulators and the same may affect our results of operations.

35. We may face competition from local and Favorable markets.

Our company operates in the manufacturing sector of blankets, curtains, bedsheet etc, a market characterized by intense competition. One of the significant risks we face is the competition from both local and unauthorized markets. Local competitors often have the advantage of lower operational costs and established customer bases within their regions. Additionally, unauthorized market participants, who may not adhere to regulatory standards and quality controls, can offer products at significantly lower prices. This can lead to price undercutting and can adversely affect our market share and profitability. To mitigate this risk, we continuously focus on enhancing our product quality, maintaining competitive pricing, and strengthening our brand reputation through effective marketing strategies.

36. As we continue to grow, we may not be able to effectively manage our growth and the increased complexity of our business, which could negatively impact our brand and financial performance.

The success of our business will depend greatly on our ability to effectively implement our operational and growth strategies. As a part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including expansion in product base, focus on consistently meeting quality standards, deepen and expand our geographical presence, strengthening up our business through effective branding, promotional and digital activities. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion and diversification plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, or fail to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

37. Major fraud, lapses of internal control or system failures could adversely impact the company’s business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

38. We continue to explore the diversification of our business and the implementation of new products. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations, and/or starting new products. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new products or modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial, and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

39. Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions, and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance, and results of operations.

40. Delay in delivery of the products due to breakdown of machinery.

Any breakdown or defect in the machinery and / or the equipment used for the purpose of our manufacturing process may delay the production process as a whole and result in missing deadlines in delivery of product if we are able to repair the machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company

However, there have been no such occurrence or instances of the disclosed event since the incorporation of the company. The risk mentioned above shows the risks which may or may not occur in future which could impact the business of our Company.

41. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions, and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions, and/or projections, including with respect to future earnings and performance will prove to be correct or that any of our expectations, estimates, or projections will be achieved.

42. Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups, or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands, and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships, or joint ventures across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include the integration of product and service offerings, coordination of R&D and marketing functions, and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

43. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Financial turmoil in Asia, Europe, and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations, and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. For example, the full-scale military invasion of Russia into Ukraine and the subsequent sanctions placed on Russia by various countries have substantially affected the economic stability of the world and such volatility could impact our Company’s growth. In addition, the market price of oil has risen sharply since the commencement of hostilities in Ukraine, which may have an inflationary effect in India and other countries. A prolonged war or a protracted period of hostilities in Ukraine may lead to global economic disturbances.

In addition, the USA is one of India’s major trading partners and any possible slowdown in the American economy could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, results of operation, and cash flows. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of the Equity Shares.

64. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Red Herring Prospectus.

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. *These facts and other statistics include the facts and statistics included in the chapter titled “Our Industry” beginning on page 107 of this Red Herring Prospectus.* Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

65. Challenges that affect the soft home furnishing industry will have an effect on our operations.

As we are engaged in the soft home furnishing industry, we are impacted by challenges that affect the industry in general. These include general economic conditions and outlook, improvements in technologies, increases in operating costs, government regulation and policy, and importantly, our competitive position in the market in general. These factors will impact us and our business on an ongoing basis. We will be constrained to respond to changes adequately to remain profitable, including bringing about changes to operations, cutting down on costs, and reassessing growth plans and strategies. We are unable to predict these challenges and cannot assure you that we will continue to maintain our current levels of financial performance.

66. Any adverse revision to India’s debt rating by a domestic or international rating agency could adversely affect our business.

India’s sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, which are outside our control. Any adverse revisions to India’s credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures, and the price of the Equity Shares.

67. Compliance with applicable health, safety, environmental, and other governmental regulations may be costly and adversely affect our results of operations.

Compliance with applicable health, safety, environmental, and other governmental regulations is time-consuming, costly, and requires a number of dedicated personnel. We are subjected to payment of fees and levies on an ongoing basis with respect to a number of licenses, approvals, consents, and permissions we are required to obtain from governmental authorities. We are required to periodically maintain a number of records and registers and file a number of returns. Ensuring compliance requires that we hire trained personnel across our locations. Our compliance costs may adversely affect our revenue.

68. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows, and financial condition. Hostilities, terrorist attacks, civil unrest, and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease, and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows, or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic, or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

69. The rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholders of a corporation in another jurisdiction.

70. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

71. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

72. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

73. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, that are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. *For further information, see "Restrictions on Foreign Ownership of Indian Securities" on page 280 of Red Herring Prospectus.*

74. Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such a custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced.

75. Malpractices by some players in the industry affect the overall performance of emerging Companies

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regard to the safety and efficacy of the product, etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving the way for regulators for stricter entry barriers and the introduction of a code of conduct; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affect the overall performance of emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

76. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

77. Our business and activities are regulated by the Competition Act.

The Competition Act, 2002 (the "Competition Act") was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the Competition Commission of India (the "CCI") to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to adversely affect competition in India is void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or types of goods or services or number of clients in the relevant market or any other similar way, is presumed to adversely affect competition in the relevant market in India and shall be void. The Competition Act also prohibits the abuse of dominant position by any enterprise. Further, if it is proved that any contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished.

Consequently, all agreements entered into by us may fall within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination adversely affects competition in India. The applicability of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, may adversely affect our business, results of operations and prospects.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 3,000 Equity Shares, and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1000	23.00	1500	50.00%
1500	22.00	3000	100.00%
2000	21.00	5000	166.67%
2500	20.00	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Utilization of Net Fresh Issue Proceeds

The Net Fresh Issue Proceeds are proposed to be used in the manner set out in the following table:

(₹ in lakhs)

Sr. No.	Particulars	Total Estimated Expenditure	Amount to be financed from Internal Accruals/ Borrowings	Amount to be financed and deployed from Net IPO Proceeds by the Financial Year ended March 31, 2025
1	Setting up of Additional Storage Facility	429.96	-	429.96

	Total	●		●

Means of Finance:

The above-mentioned fund requirement will be met from the proceeds of the Issue. We intend to fund the shortfall, if any, from internal accruals.

Since the fund requirements set out for the aforesaid Objects of the Issue are proposed to be met entirely from the Net Proceeds and internal accruals. Accordingly, we confirm that we are in compliance with the requirement to make firm arrangements of finance under Regulation 230(1)(e) of the SEBI (ICDR) Regulations, 2018 through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the Net Proceeds and existing identifiable internal accruals.

The fund requirements are based on internal management estimates and have not been verified by the lead managers or appraised by any bank or financial institution or any other independent agency. These are based on current conditions and are subject to change in the light of changes in external circumstances or costs or other financial conditions and other external factors.

In case of any increase in the actual utilization of funds earmarked for the Objects, such additional funds for a particular activity will be met by way of means available to our Company, including from internal accruals. If the actual utilization towards any of the Objects is lower than the proposed deployment such balance will be used for future growth opportunities including funding existing objects, if required. In case of delays in raising funds from the Issue, our Company may deploy certain amounts towards any of the above-mentioned Objects through a combination of Internal Accruals or Unsecured Loans.

As we operate in competitive environment, our Company may have to revise its business plan from time to time and consequently our fund requirements may also change. Our Company's historical expenditure may not be reflective of our future expenditure plans. Our Company may have to revise its estimated costs, fund allocation and fund requirements owing to various factors such as economic and business conditions, increased competition and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose at the discretion of the Company's management.

For further details on the risks involved in our business plans and executing our business strategies, please see the chapter titled "Risk Factors" beginning on page 34 of this Red Herring Prospectus.

1) Setting up of Additional Storage Facility

We are seeking to raise capital for the construction of a new state-of-the-art warehouse facility. This investment is crucial to addressing our current operational challenges and positioning our company for sustainable growth.

Our existing warehouse capacity is insufficient to meet the demands of our production cycles. During peak seasons, we struggle to manage the volume of stock efficiently, and during off-seasons, a significant portion of our inventory remains idle. This imbalance leads to operational inefficiencies and increased costs.

The warehouses in West Bengal and Gurugram are dedicated exclusively to supporting commercial operations, such as storing and trading goods for e-commerce platforms. These facilities are leased by Instakart Services Private Limited, a unit of Flipkart, to aid in fulfilling orders placed through Flipkart.com. *This is outlined on page 148 of the Red Herring Prospectus.*

Currently, the company is ordering raw material as per the production requirement only, thereby losing on competitive pricing. The entire raw-material is being delivered at the factory where production is done. This leads to disruption of the production process and wastage of raw materials due to lack of proper handling.

The new storage facility, funded by the IPO proceeds, will store competitively priced raw materials, which will be utilized for manufacturing as needed. Its strategically chosen location will allow for efficient inventory management and minimize handling costs. This warehouse will accommodate both raw materials and finished or semi-finished goods, ready for dispatch, ensuring seamless logistics for our products.

The Additional storage facility shall be constructed at our current manufacturing facility situated at "Killa No. 17//17/2, 18, 19/1, 22/2, 23, 24/1, 36//2/2, 3, 4/1/Village- Jawahara, Pardhana Road, Tehsil- Khanpur, District- Sonipat". This land owned by the company via sale deed dated July 08, 2016. The said land is of an area of around 3 Acres.

The funds raised will be allocated to the development of a modern warehouse facility designed to enhance our storage capacity and optimize inventory management. This new warehouse will be equipped with advanced logistics and storage solutions, including:

- **Increased Storage Capacity:** Accommodating higher volumes of stock, reducing idle inventory, and minimizing overflow issues.
- **Efficient Inventory Management:** Implementing cutting-edge technologies for real-time tracking and better stock rotation.
- **Enhanced Operational Efficiency:** Streamlining storage processes to reduce handling times and operational costs.

1. We have considered the above quotations for the budgetary estimate purpose and have not placed orders for them. The actual cost of procurement and actual supplier/dealer may vary as per the best possible offer available with us.
2. All quotations received from the vendors mentioned above are valid as on the date of this Red Herring Prospectus. However, we have not entered into any definitive agreements with any of these vendors and there can be no assurance that the same vendors would be engaged to eventually render the services or at the same costs.
3. The construction service and quantity to be purchased are based on the present estimates of our management. The Management shall have the flexibility to revise such estimates (including but not limited to change of vendor or any modification/addition/deletion of supply or equipment) at the time of actual placement of the order. In such case, the Management can utilize the surplus of proceeds, if any, arising at the time of actual placement of the order, to meet the cost of such other service, equipment or utilities, as required. Furthermore, if any surplus from the proceeds remains after meeting the total cost of construction service, equipment and utilities for the aforesaid purpose, the same will be used for our general corporate purposes, subject to limit of 25% of the amount raised by our Company through this Issue.
4. We are not acquiring any second-hand machinery.
5. The quotations relied upon by us in arriving at the above cost are valid for a specific period of time and may lapse after the expiry of the said period. Consequent upon which, there could be a possible escalation in the cost of services proposed to be acquired by us at the actual time of provision of service, resulting in increase in the estimated cost. Further, cost will be escalated on account of freight expenses, installation charges, packaging & forwarding, custom duty etc. Such cost escalation would be met out of our internal accruals.

Proposed Schedule of Implementation

The proposed schedule of implementation for installation of Manufacturing facilities is as follows:

Particulars	Estimated Month of
	Completion*
Commencement of construction service	July 2025
Completion of Project	January 2026
Put to use	January 2026

*Assuming we receive the IPO Proceeds in the month of July 2025.

2) Repayment/Pre-payment of Certain Debt facilities

Our Company has entered into various financing arrangements with bank. The loan facilities entered into by our Company include borrowings in the form of term loans and fund-based facilities. *For further details, including indicative terms and conditions of such loan facilities, see “Statement of Financial Indebtedness” beginning on page 216 of this Red Herring Prospectus.* Our Company proposes to utilise an aggregate amount of ₹ 300.00 Lakhs from the Net Proceeds towards full or partial repayment or prepayment of certain borrowing availed by our Company from bank.

The selection and extent of loans proposed to be repaid from our Company’s borrowings mentioned below will be based on various commercial considerations including, among others, the costs, expenses and charges relating to the facility including interest rate of the relevant loan, the amount of the loan outstanding, the remaining tenor of the loan, presence of onerous terms and conditions under the facility, levy of any prepayment penalties and the quantum thereof, provisions of any law, rules, regulations governing such borrowings, terms of prepayment to lenders, if any and mix of credit facilities provided by lenders.

Given the nature of these borrowings and the terms of repayment, the aggregate outstanding amounts under these loans may vary from time to time and our Company may, in accordance with the relevant repayment schedule, repay or refinance some of its existing borrowings prior to Allotment. Accordingly, our Company may utilise the Net Proceeds for part prepayment of any such refinanced loans or repayment of any additional loan facilities obtained by it. However, the aggregate amount to be utilised from the Net Proceeds towards prepayment or repayment of loans (including refinanced or additional loans availed, if any), in part or full, would not exceed ₹ 300.00 Lakh.

The prepayment or repayment will help reduce our outstanding indebtedness and debt servicing costs, assist us in maintaining a favourable debt to equity ratio and enable utilisation of our internal accruals for further investment in business growth and expansion. In addition, we believe that the leverage capacity of our Company will improve our ability to raise further resources in the future to fund potential business development opportunities and plans to grow and expand our business in the future. The following table provides details of loan availed by our Company as on October 31, 2023 which is proposed to be prepaid or repaid, in full or in part, from the Net Proceeds to the extent of an aggregate amount of ₹ 300.00 Lakhs:

Name of Lender	Date of Sanction	Purpose	Fixed Rate of Interest	Outstanding as on January 31, 2025 (₹ in Lakhs)

Justification for Holding Period Levels

Particulars	Detail
Inventories	Our holding period for inventories increased from 49 days in FY 2022 to 66 days in FY 2023 and to 95 days in FY 2024, indicating a significant slowdown in inventory turnover. This rise is attributable to overstocking as the company starts holding inventories for more days to get seasonal benefit and changes in inventory management practices. It further reduced to 55 days in ten months period ended January 31, 2025 and it is expected to be maintained at 58 days in FY 2025 and 57 days in FY 2026 due to improvements in inventory management and better sales strategies, though the level remains relatively high compared to previous years.
Trade Receivables	We improved our trade receivables holding period from 57 days in FY 2022 to 49 days in FY 2023, showcasing our efforts to enhance collection efficiency. However, there was a slight increase to 50 days in FY 2024 which further increased to 63 days in ten months period ended January 31, 2025, which is attributed to extended credit terms or slower customer payments. Looking forward, we expect holding period to be 52 days in FY 2025 and 60 days in FY 2026 as we continue to refine our receivables management and collection practices.
Short Term Loans & Advances	We reduced our holding period for short-term loans and advances from 19 days in FY 2022 to 8 days in FY 2023, indicating faster turnover or recovery of these assets. However, we experienced a significant increase to 34 days in FY 2024 which increased to 72 days in ten months period ended January 31, 2025 and expect it to reduce at 45 days in FY 2025 and 56 days in FY 2026 as they majorly include advance to suppliers and balance with Government Authorities, on year-on-year basis we increase our advance to suppliers to get the benefit of seasonal price.
Other Current Assets	The holding period for our other current assets remained at 0 days from FY 2022 to ten months period ended January 31, 2025, showing stability in this area. We anticipate to maintain the same level in FY 2025 and 2026.
Short-term Borrowings	Our holding period for short-term borrowings slightly decreased from 72 days in FY 2022 to 71 days in FY 2023. However, it rose to 88 days in FY 2024, due to increase in current maturities and Cash credit limit utilisation. In ten months period ended January 31, 2025 the holding days reduced to 50 days and the same level is maintained in FY 2026. The loans will be repaid using IPO Proceeds which will reduce the current maturities and hence the holding days is expected to reduce to 39 days in FY 2026.
Trade Payables	We saw an increase in our trade payables holding period from 5 days in FY 2022 to 14 days in FY 2023 to 32 days in FY 2024 and 42 days in ten months period ended January 31, 2025 which is due to company's better negotiation strategy during this period to get addition credit period with better prices. We expect this period to decrease to 24 days in FY 2025, suggesting that we are managing our cash flow better and improving our terms with suppliers.
Other Current Liabilities	The holding period for our other current liabilities increased from 6 days in FY 2022 to 12 days in FY 2023 and remained stable at 13 days in FY 2024 which is due to increase in advance from customers. We anticipate it to 50 days in FY 2025 and 54 days in FY 2026.
Short-term Provisions	Our short-term provisions, which cover income tax, gratuity, and other expenses, have increased from 1 day in FY 2023 to 8 days in FY 2024 and further to 10 days in ten months period ended January 31, 2025. The same is maintained at 10 days in FY 2025 and company expects it to rise slightly to 14 days in FY 2026. This rise reflects our growing need to account for larger anticipated liabilities, including higher income tax and increased gratuity and other provisions for expenses. The adjustment indicates a more accurate and comprehensive approach to managing our short-term financial obligations, ensuring we are well-prepared for these expenses.

Pursuant to the certificate dated June 23, 2024, M/s. Manish Pandey & Associates, Chartered Accountants, have verified the working capital requirements for the ten months period ended January 31, 2025 and financial year ended on March 31, 2024, 2023 and 2022 from the Restated Financial Information and working capital estimates for the FY 2025 and 2026 as approved by the Board pursuant to its resolution dated June 23, 2025.

Reason for increase in working capital in past 3 financial years and projected period :

FY 2022 to 2023

The working capital position rose from ₹ (7.21) Crores in FY 2022 to ₹ (5.73) Crores in FY 2023. There was a net increase of ₹ 1.48 Crores. The increase was in line with past trends and there was no sudden spurt in any particular item. The inventories rose from ₹ 9.38 Crores to ₹ 12.99 Crores from FY 2022 to FY 2023 due to better inventory management by the company which enabled the company to increase its turnover by approximately 35%.

FY 2023 to 2024

The working capital stood at ₹ (5.73) Crores in FY 2023 and it rose to ₹ 10.56 Crores in FY 2024. The increase of approximately ₹ 16.29 crores was mainly due to change in two items, increase in short-term loans and advances and decrease in short-term borrowings:

1. Increase in Short-Term Loans & Advances: -

During the FY 2023-24, the company raised a capital of ₹ 5 Crores which was partly utilized for making advanced payment towards followings things:

(₹ In Lakhs)

Particulars	March 31, 2024	March 31, 2023	Difference	Reason
Loans and advances to employees	8.19	6.45	1.74	In normal course of business
Advances to suppliers	894.64	44.18	850.46	As mentioned below**
Balances with Government Authorities	91.76	131.27	-39.51	In normal course of business
Advance Income Tax	110.97	-	110.97	Payment of Advance Tax on the profits made during the year in order to comply with the Income Tax Regulations within due date. There was no advance tax paid in earlier years as the profits were less.
Prepaid expenses	10.95	6.65	4.31	In normal course of business
Total	1,116.51	188.54	927.96	

**There was a strategic move made by the management by making advance payment to suppliers for raw materials. This enabled the company to:

- Significantly increase the turnover during the period ended October 31, 2024. The company crossed a turnover of over ₹ 81 Crores during the period ended 31st October 2024 which is more than the turnover of entire financial year 2023-24. The corresponding turnover of FY 2022-23 for the same period was ₹ 32 Crores approximately.
- Make purchases at a competitively lower price due to off season of the goods thereby increasing margins

2. Decrease in Short-Term Borrowings: -

The balance amount of Issue Proceeds was utilized towards payment of unsecured debts, thereby reducing the short-term borrowings and increasing the working capital position. There was a net repayment of ₹ 6.90 Crores during the FY 2023-24.

FY 2024 to 2025

Working Capital Requirement for March 2025 is estimated to be around ₹ 35.50 Crores as against ₹ 10.56 Crores for March 2024 showing a net increase of ₹ 24.94 crores. Following the success in multiplying turnover by double from period ended 31st October 2023 to 2024, the management plans and proposes to follow similar strategy in the current year as well by making advance payments to suppliers for raw materials during off season to gain competitive edge over prices thereby assuming an increased short-term loans & advances.

The major challenge faced in the current year in purchasing bulk raw-material and manufacturing throughout the year is the limited storage facility available with the company. In order to overcome that, the company has proposed to construct an additional storage facility from the IPO proceeds. This storage facility will enable the company to buy raw materials in bulk and use it for manufacture as per the requirement. Also, currently the company is not able to manufacture throughout the year due to shortage of space to store the finished/semi-finished goods. With the construction of this storage facility, both raw materials and finished/ semi-finished goods can be stored effectively thereby smoothening the supply-chain management for their products. Therefore, inventory is projected to be on a higher side for FY 2025.

The trade receivable is expected to be in line with the expected increase in revenue during the year. The trade payable is expected to rise from ₹ 9.09 Crores in FY 2024 to ₹ 14.27 Crores in FY 2025 which shows stability in credit period of around 45 days given to the debtors.

The trade payables are expected to decrease from ₹ 6.39 Crores in FY 2024 to ₹ 4.00 Crores in FY 2025 to make optimum utilization of resources and take advantage of trade discounts given by suppliers on early payments. We assume to pay off creditors in 25-30 days approximately.

The purchase orders available with the company justifies the projections of turnover and eventually the inventories and trade-receivables associated with it.

The working capital requirements have increased over the years in line with the expansion of business and increase in turnover. Item wise increase in elements of current assets and current liabilities are mentioned below

Item	Reason for change
Trade Receivables	We successfully reduced our trade receivables holding period from 57 days in FY 2022 to 49 days in FY 2023, reflecting notable improvements in our collection efficiency. This reduction underscores our focus on tightening credit control, streamlining collections, and optimizing cash flow. The slight uptick to 50 days in FY 2024 is primarily due to extended credit terms or delayed payments from a few customers, which temporarily impacted the overall period. However, this modest increase is a short-term adjustment, and we are confident in our ability to enhance receivables management going forward. With ongoing efforts to strengthen credit policies and adopt more proactive collection strategies, we project a further reduction to 43 days in FY 2025, reinforcing our commitment to maintaining a healthier cash cycle and stronger financial discipline.
Inventories	<p>The increase in our holding period for inventories, from 49 days in FY 2022 to 66 days in FY 2023 and further to 95 days in FY 2024, reflects a marked deceleration in inventory turnover. This upward trend can be attributed to strategic overstocking, as the company sought to take advantage of seasonal demand fluctuations, coupled with shifts in inventory management practices. The longer holding period allowed us to meet seasonal surges in demand more effectively, but it also led to higher inventory levels.</p> <p>The slight reduction to 93 days in FY 2025 indicates early signs of improvement in managing inventory, possibly driven by refined inventory management techniques or more effective sales strategies. However, despite this modest progress, the holding period remains considerably elevated compared to earlier years, underscoring the need for further adjustments to optimize inventory efficiency and reduce carrying costs..</p>
Cash & Cash Equivalent	Our holding period for cash and cash equivalents has been strategically reduced from 3 days in FY 2022 to 0 days in FY 2025. This reduction reflects our improved cash flow management and operational efficiency. By FY 2025, we aim to utilize all available cash effectively, relying on advanced liquidity management to meet operational needs dynamically. This approach ensures optimal cash utilization and supports our growth strategy.
Short Term Loans & Advances	our holding period for short-term loans and advances reduced from 19 days in FY 2022 to 8 days in FY 2023, indicating a marked improvement in the turnover and recovery of these assets. This faster turnover reflects our focus on streamlining operations and ensuring timely recoveries. However, in FY 2024, the holding period increased significantly to 34 days, and we expect it to rise further to 44 days in FY 2025. This increase is largely driven by advances to suppliers and balances with Government Authorities. We have intentionally increased advances to suppliers on a year-on-year basis to capitalize on favorable seasonal pricing, ensuring cost savings in procurement. While this results in a longer holding period, it is a strategic decision to secure long-term benefits in terms of reduced input costs and improved supplier relationships.
Other Current Assets	The holding period for our other current assets remained stable at 0 days from FY 2022 to FY 2024, reflecting consistent management and a lack of significant fluctuations in this area. Looking ahead, we anticipate a slight increase to 1 day in FY 2025. This minor change suggests a small addition or adjustment in the composition of these assets, such as Accrued interest. .
Short Term Borrowings	Our holding period for short-term borrowings saw a slight improvement, decreasing from 72 days in FY 2022 to 71 days in FY 2023, reflecting marginal progress in managing our short-term debt. However, this trend reversed in FY 2024, with the holding period increasing to 88 days. This rise was primarily driven by higher current maturities and increased utilization of our cash credit limits, which led to elevated short-term borrowing levels. Looking ahead, we are projecting a significant decrease to 60 days in FY 2025. This forecast reflects our concerted efforts to optimize debt management, reduce reliance on short-term borrowing, and improve cash flow discipline. By focusing on better credit control, enhanced financial planning, and more efficient use of credit facilities, we aim to bring our borrowing levels down and improve our overall financial health.
Trade Payables	We experienced an increase in our trade payables holding period from 5 days in FY 2022 to 14 days in FY 2023, and further to 32 days in FY 2024. This increase reflects the success of our improved negotiation strategies, allowing us to secure extended credit terms. However, we anticipate a decrease to 24 days in FY 2025, signaling our intention to balance cash flow management with maintaining strong relationships with our suppliers by giving advance for the purchase of Raw Material which is part of our strategic buying planning.
Other Current Liabilities	The holding period for our other current liabilities increased from 6 days in FY 2022 to 12 days in FY 2023, and remained steady at 12 days in FY 2024. This rise was primarily

	driven by an increase in customer advances and expenses payable, which temporarily extended our liability settlement cycle, Looking ahead, we anticipate a significant decrease to 4 days in FY 2025, reflecting our commitment to quicker settlement of liabilities and a reduction in outstanding obligations.
Short Term Provisions	Our short-term provisions, which cover income tax, gratuity, and other expenses, have increased from 1 day in FY 2022-23 to 9 days in FY 2023-24, and further to 14 days in FY 2024-25. This rise reflects our growing need to account for larger anticipated liabilities, including higher income tax and increased gratuity and other provisions for expenses. The adjustment indicates a more accurate and comprehensive approach to managing our short-term financial obligations, ensuring we are well-prepared for these expenses.

- 2) The ratios have been computed as below:
 - i) Basic EPS is calculated as Profit/(loss) for the year/period attributable to owners of parent divided by the adjusted weighted average number basic equity shares outstanding during the year/period.
 - ii) Diluted EPS is calculated as Profit/(loss) for the year/period attributable to owners of parent divided by the adjusted weighted average number of adjusted diluted equity shares outstanding during the year/period.
- 3) Weighted average number of equity shares is the number of equity shares outstanding at the beginning of the year/period adjusted by the number of equity shares issued during the year/period multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the year/period.
- 4) Weighted average is aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. {(EPS x Weight) for each year} / {Total of weights}.

GLOBAL ECONOMY AT LARGE

Forces Shaping the Outlook

The global economy is holding steady, although the degree of grip varies widely across countries. Global GDP growth in the third quarter of 2024 was 0.1 percentage point below that predicted in the October 2024 WEO, after disappointing data releases in some Asian and European economies. Growth in China, at 4.7 percent in year-over-year terms, was below expectations. Faster-than-expected net export growth only partly offset a faster-than-expected slowdown in consumption amid delayed stabilization in the property market and persistently low consumer confidence. Growth in India also slowed more than expected, led by a sharper-than-expected deceleration in industrial activity. Growth continued to be subdued in the euro area (with Germany’s performance lagging that of other euro area countries), largely reflecting continued weakness in manufacturing and goods exports even as consumption picked up in line with the recovery in real incomes. In Japan, output contracted mildly owing to temporary supply disruptions. By contrast, momentum in the United States remained robust, with the economy expanding at a rate of 2.7 percent in year-over-year terms in the third quarter, powered by strong consumption.

Global disinflation continues, but there are signs that progress is stalling in some countries and that elevated inflation is persistent in a few cases. The global median of sequential core inflation has been just slightly above 2 percent for the past few months. Nominal wage growth is showing signs of moderation, alongside indications of continuing normalization in labor markets. Although core goods price inflation has fallen back to or below trend, services price inflation is still running above pre-COVID-19 averages in many economies, most notably the United States and the euro area. Pockets of elevated inflation, reflecting a range of idiosyncratic factors, also persist in some emerging market and developing economies in Europe and Latin America.

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions (see Box 1). Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries (Figure 1). Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

The Outlook

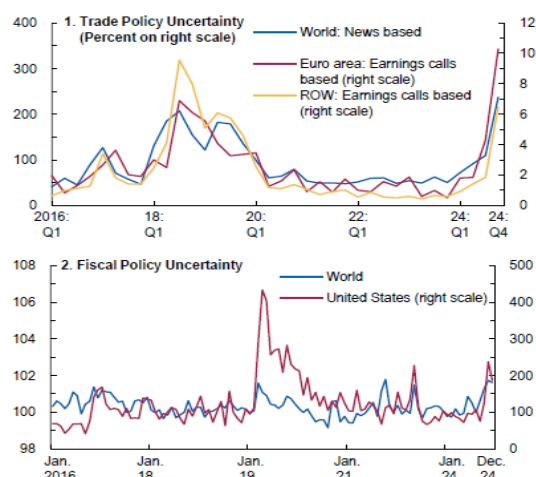

IMF staff projections assume current policies in place at the time of publication. They incorporate recent market developments and the impact of heightened trade policy uncertainty, which is assumed to be temporary, with the effects unwinding after about a year, but refrain from making any assumptions about potential policy changes that are currently under public debate. Energy commodity prices are expected to decline by 2.6 percent in 2025, more than assumed in October. This reflects a decline in oil prices driven by weak Chinese demand and strong supply from countries outside of OPEC+ (Organization of the Petroleum Exporting Countries plus selected non-member countries, including Russia), partly offset by increases in gas prices as a result of colder-than-expected weather and supply disruptions, including the ongoing conflict in the Middle East and outages in gas fields. Nonfuel commodity prices are expected to increase by 2.5 percent in 2025, on account of upward revisions to food and beverage prices relative to the October 2024 WEO, driven by bad weather affecting large producers. Monetary policy rates of major central banks are expected to continue to decline, though at different paces, reflecting variations in growth and inflation outlooks. The fiscal policy stance is expected to tighten during 2025–26 in advanced economies including the United States and, to a lesser extent, in emerging market and developing economies.

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October (Table 1; see also Annex Table 1). The overall picture, however, hides divergent paths across economies and a precarious global growth profile (Figure 2).

Among **advanced economies**, growth forecast revisions go in different directions. In the **United States**, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labor markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.

In the **euro area**, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2 percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat.

Note: The uncertainty measures are news-based indices that quantify media attention to news related to an issue, in which a value of 100 corresponds to 1 percent of news articles that reference the issue. In panel 1, the euro area and the rest of the world (ROW) are based on the earnings-calls-based indicators, representing the proportion of firms that mention trade policy uncertainty (TPU) in their earnings calls. This measure reflects companies' concerns regarding TPU, based on the dictionary developed by Caldara and others (2020), <https://doi.org/10.1016/j.jmoneco.2019.11.002>. The ROW encompasses 22 countries, including the US. In panel 2, US fiscal policy uncertainty is a subcomponent of the Economic Policy Uncertainty Index developed by Baker, Bloom, and Davis (2016, <https://doi.org/10.1093/qje/qjw024>), whereas the indicator for the world is based on Hong, Ke, and Nguyen (2024, <https://doi.org/10.5089/9798400288128.001>).

(Percent)

Note: The x-axis shows the months the World Economic Outlook is published. AEs = advanced economies; EMEs = emerging market and developing economies.

In *other advanced economies*, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds—including the sharp uptick in trade policy uncertainty—are expected to keep investment subdued.

In *emerging market and developing economies*, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for *China* is marginally revised upward by 0.1 percentage point to 4.6 percent. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty and property market drag. In 2026, growth is projected mostly to remain stable at 4.5 percent, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labor supply. In *India*, growth is projected to be solid at 6.5 percent in 2025 and 2026, as projected in October and in line with potential.

In the *Middle East and Central Asia*, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3 percentage point downward revision to 2025 growth in *Saudi Arabia*, mostly driven by the extension of OPEC+ production cuts. In *Latin America and the Caribbean*, overall growth is projected to accelerate slightly in 2025 to 2.5 percent, despite an expected slowdown in the largest economies of the region. Growth in *sub-Saharan Africa* is expected to pick up in 2025, while it is forecast to slow down in *emerging and developing Europe*.

World trade volume estimates are revised downward slightly for 2025 and 2026. The revision owes to the sharp increase in trade policy uncertainty, which is likely to hurt investment disproportionately among trade-intensive firms. That said, in the baseline, the impact of heightened uncertainty is expected to be transitory. Furthermore, the front-loading of some trade flows in view of elevated trade policy uncertainty, and in anticipation of tighter trade restrictions, provides some offset in the near term.

Progress on *disinflation* is expected to continue. Deviations from the October 2024 WEO forecasts are minimal. The gradual cooling of labor markets is expected to keep demand pressures at bay. Combined with the expected decline in energy prices, headline inflation is projected to continue its descent toward central bank targets. That said, inflation is projected to be close to, but above, the 2 percent target in 2025 in the United States, whereas inflationary dynamics are expected to be more subdued in the euro area. Low inflation is projected to persist in China. Consequently, the gap between anticipated policy rates in the United States and other countries becomes wider.

Risks to the Outlook

In the medium term, the balance of risks to the outlook is tilted to the downside, with global growth poised to be lower than its 2025–26 average and five-year-ahead forecasts at about 3 percent. Near-term risks, in contrast, could reinforce divergences across countries: they are tilted to the upside in the United States, whereas downside risks prevail in most other economies amid elevated policy uncertainty and headwinds from ongoing adjustments (in particular, energy in Europe and real estate in China).

An intensification of protectionist policies, for instance, in the form of a new wave of tariffs, could exacerbate trade tensions, lower investment, reduce market efficiency, distort trade flows, and again disrupt supply chains. Growth could suffer in both the near and medium term, but at varying degrees across economies.

A near-term boost for the US economy emanating from these factors would further underscore the divergent growth patterns across economies. If the adverse effects of tariffs and reduction in the labor force dominate, global activity as well as activity in the United States might be affected negatively in the medium term. Uncertainties are high: the effects of each factor would unfold differently across countries, influenced by trade and financial linkages; policy responses to actions taken by other countries could play out in a variety of ways, including an escalation of retaliatory tariffs; and the impacts of different policy combinations or different magnitudes of policy changes could be quite different.

Inflation dynamics could be shaped in opposite directions by these factors. The magnitude of the inflationary effect from tariffs is especially uncertain. While recent empirical studies find high pass-through to import prices, estimates of pass-through to consumer prices are lower and subject to significant uncertainty. Nevertheless, compared with what took place in earlier episodes of trade disputes, several factors suggest that upside risks to inflation from tariff hikes could be higher this time. First, the global economy is coming out of the most significant inflation surge in recent memory. Inflation expectations, especially in many advanced economies, are farther above the central bank target today than in 2017–21 (Figure 3). Second, the cyclical positions of many major economies are more conducive to higher inflation today than in 2016. Third, retaliation in the form of restrictions on specific, difficult-to-substitute materials or intermediate goods may have an outsized impact on aggregate inflation.

The whiskers show the maximum and minimum within a boundary of 1.5 times the interquartile range from the upper and lower quartiles, respectively. AEs = advanced economies; EMDEs = emerging market and developing economies.

On the upside, global economic activity may enjoy a bounce if incoming governments can renegotiate existing trade agreements and forge new deals. This could relieve uncertainty faster and be much less disruptive to growth and inflation. By boosting confidence, such cooperative outcomes could even support investment and medium-term growth prospects.

Momentum on other policy fronts could also lift growth. Many countries may embrace structural reforms to prevent divergence from their better-performing peers from becoming entrenched. Efforts to increase labor supply, reduce misallocation, enhance competition, and support innovation could raise medium-term growth.

INDIAN INDUSTRY OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at ₹ 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to ₹ 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at ₹ 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing.

In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

Real GDP for FY25 is estimated at ₹ 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to ₹ 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over ₹ 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD)

stood at ₹ 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to ₹ 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- The HSBC India Manufacturing PMI increased to 58.4 in April 2025, up from 58.1 in March 2025, based on preliminary estimates. This rise signifies improved operating conditions and represents the most rapid growth pace observed in the past year. Contributing factors include a notable surge in new export orders, which experienced their most significant increase in over fifteen years, alongside a faster expansion in overall new business activity.
- In Q1 CY25, private equity (PE) and venture capital (VC) investments stood at ₹ 1,16,861 crore (US\$ 13.7 billion) across 284 deals.
- India saw a robust 10.35% growth in passengers carried by domestic airlines at 431.98 lakh in FY25, from 391.46 lakh in FY24, according to the Directorate General of Civil Aviation (DGCA).
- As of April 18, 2025, India's foreign exchange reserves stood at ₹ 58,57,537 crore (US\$ 686.70 billion).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at ₹ 1.84 lakh crore (US\$ 21.57 billion) in February 2025.
- Between April 2000–December 2024, cumulative FDI equity inflows to India stood at ₹ 89.88 lakh crore (US\$ 1.05 trillion).
- In February 2025, the overall IIP (Index of Industrial Production) stood at 151.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 141.9, 148.6 and 194.0, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- Foreign Institutional Investors (FII) inflows in FY25 were close to ₹ 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought ₹ 6.00 lakh crore (US\$ 70.34 billion) in the same period.
- India's wheat procurement rose 34% YoY, reaching 22.36 MT as of April 28, 2025, with target of 31 MT in sight. Strong MSP, bonuses, and robust crop output boost sales to government agencies, ensuring food security and potential for open market intervention.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at ₹ 32.07 lakh crore (US\$ 383.93 billion) and ₹ 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at ₹ 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is ₹ 11,11,111 crore (US\$ 133.27 billion).

- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of ₹ 1,500 crore (US\$ 182.35 million).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

ROAD AHEAD

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to ₹ 11.21 lakh crore (US\$ 131.42 billion) over ₹ 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record ₹ 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to ₹ 65.8 lakh crore (US\$ 773.0 billion) in FY24.

With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

TEXTILES INDUSTRY IN INDIA

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk, and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country.

India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

According to Crisil Ratings, the organised retail apparel sector is projected to achieve revenue growth of 8-10% in FY25, driven by rising demand from a normal monsoon, easing inflation, and the festive and wedding seasons.

The increasing preference for affordable, trendy fashion clothing that mimics high-fashion designs is expected to be the primary revenue driver. In order to attract private equity and employee more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

MARKET SIZE

The market for Indian textiles and apparel is projected to grow at a 10% CAGR to reach US\$ 350 billion by 2030. Moreover, India is the world's 3rd largest exporter of Textiles and Apparel. India ranks among the top five global exporters in several textile categories, with exports expected to reach US\$100 billion.

The textiles and apparel industry contributes 2.3% to the country's GDP, 13% to industrial production and 12% to exports. The textile industry in India is predicted to double its contribution to the GDP, rising from 2.3% to approximately 5% by the end of this decade.

Textile manufacturing in India has been steadily recovering amid the pandemic. The manufacturing of textiles Index for the month of June 2024 is 106.

Global apparel market is expected to grow at a CAGR of around 8% to reach US\$ 2.37 trillion by 2030 and the Global Textile & Apparel trade is expected to grow at a CAGR of 4% to reach US\$ 1.2 trillion by 2030.

India's home textile industry is expected to expand at a CAGR of 8.9% during 2023-32 and reached US\$ 23.32 billion in 2032 from US\$ 10.78 billion in 2023.

The Indian Technical Textile market has a huge potential of a 10% growth rate, increased penetration level of 9-10% and is the 5th largest technical textiles market in the world. India's sportech industry is estimated around US\$ 1.17 million in 2022-23.

The Indian Medical Textiles market for drapes and gowns is around US\$ 9.71 million in 2022 and is expected to grow at 15% to reach US\$ 22.45 million by 2027.

The Indian composites market is expected to reach an estimated value of US\$ 1.9 billion by 2026 with a CAGR of 16.3% from 2021 to 2026 and the Indian consumption of composite materials will touch 7,68,200 tonnes in 2027.

India is the world's largest producer of cotton. In the first advances, the agriculture ministry projected cotton output for 2023-24 at 31.6 million bales. According to the Cotton Association of India (CAI), the total availability of cotton in the 2023-24 season has been pegged at 34.6 million bales, against 31.1 million bales of domestic demand, including 28 million bales for mills, 1.5 million for small-scale industries, and 1.6 million bales for non-mills. Cotton production in India is projected to reach 7.2 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers. It is expected to surpass US\$ 30 billion by 2027, with an estimated 4.6-4.9% share globally.

In 2022-23, the production of fibre in India stood at 2.15 million tonnes. While for yarn, the production stood at 5,185 million kgs during the same period. Natural fibres are regarded as the backbone of the Indian textile industry, which is expected to grow from US\$ 138 billion to US\$ 195 billion by 2025.

India's textile industry is on the brink of expansion, with total textile export projected to reach US\$ 65 billion by FY26. India saw a 36.4% increase in industrial design applications, particularly in textiles, accessories, tools, machines, health, and cosmetics.

According to ICRA, Indian apparel exporters are projected to achieve revenue growth of 9-11% in FY25, driven by the gradual reduction of retail inventory in key end markets and a shift in global sourcing towards India.

During FY24, the total exports of textiles (including handicrafts) stood at US\$ 35.9 billion. Exports of textiles (RMG of all textiles, cotton yarns/fabs/made-ups/handloom products, man-made yarns/fabs/made-ups, handicrafts excl. handmade carpets, carpets and jute mfg. including floor coverings) stood at US\$ 35.90 billion in FY24. In FY24, exports of readymade garments including accessories stood at US\$ 14.23 billion. India's textile and apparel exports to the US, its single largest market, stood at 32.7% of the total export value in FY24.

In FY25 (April- June) the total exports of textiles stood at US\$ 9.17 billion

In FY25 (April-June), exports of readymade garments including accessories stood at US\$ 2,244 million. India's textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

INDIAN MANUFACTURING INDUSTRY

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

India's manufacturing sector reached a 16-year high in March, with the HSBC Manufacturing Purchasing Managers' Index (PMI) rising to 59.1, driven by strong increases in output, new orders, and job creation across various goods sectors.

India has the capacity to export goods worth US\$ 1 trillion by 2030 and is on the road to becoming a major global manufacturing hub.

With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains.

A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship.

Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity. Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry.

India is gradually progressing on the road to Industry 4.0 through the Government of India's initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards.

FDI in India's manufacturing sector has reached US\$ 165.1 billion, a 69% increase over the past decade, driven by production-linked incentive (PLI) schemes. In the last five years, total FDI inflows amounted to US\$ 383.5 billion.

India is planning to offer incentives of up to ₹ 18,000 crore (US\$ 2.2 billion) to spur local manufacturing in six new sectors including chemicals, shipping containers, and inputs for vaccines.

India ranked among the top five countries in services export growth in FY25 (April-November), rising to 12.8% from 5.7% in FY24, with computer and business services contributing around 70%. Major players like Apple and its contract manufacturers, along with Dixon Technologies, are expanding their workforce to meet growing production needs.

MANUFACTURING UNIT

We operate out of our manufacturing operations located at Village Jawahara, Pardhana Road, Tehsil Khanpur, Kalan, District Sonipat-131305. Our manufacturing unit is strategically located with the availability of transportation, which facilitates convenient transportation of our products. Our Unit is supported by an infrastructure for the storage of raw materials, manufacturing of our products, and storage of finished goods, together with quality control.

PROCUREMENT AND PROCESSING METHOD

We have the following products namely, blankets, baby blankets, comforters, bedsheets, and curtains. The process of blankets, baby blankets, comforters, bedsheets, and curtains are processed at our units, and other products are just

procured readily and sold after the process of thread cutting, final quality check, and packaging by us.

1 - Warping

Fully automated high-speed warpers that process 500+ individual threads and roll them into beams. Fully automated machines have the capability to sense even a single yarn breakage while running at a speed of 1000mtr/min, allowing the operator to spot exact fault and thus prevent any faults during blanket knitting.

2 - Knitting

Our fully automated high-speed warp knitting machine processes 10,000+ yarn threads at once. The machine is controlled by fully automated servo motors that ensure that proper synchronisation is maintained throughout these threads. The machine can sense even 1 breakage from these 10000+ yarn threads, to ensure that the blanket being knitted is flawless and feels as soft as the cloud.

3 - Pre-finishing

This stage comprises a highly sophisticated line of polisher and brushing machines. Processing the blanket at a temperature of 150+ degrees the stenter provides stability to lose blanket fabric that one needs for a seamless fall on bed. The brushing machine uses imported Japanese fillets that brush the fabric pile at high speed, opening up the yarn so that it caresses the skin upon touch. Each polisher processes the fabric at a temperature of 200+ degrees and the polishing cylinder's tangential touch ensures that the blanket shine would be enough to uplift your entire room

4 - Printing

No matter how shiny and soft the fabric, it acquires a personality only after being printed on a fully automated printing line. The Sophistry of the printing machine is supported by state-of-the-art in-house high-definition screen manufacturing machines. These two combines to impart even a fabric the sharpness that is otherwise only possible in digital prints

5 - Washing

Comprising multiple chambers, the fabric goes through the machine via multiple baths of different kinds - warm, cold, etc. This ensures that any chemicals of manufacturing are completely removed and what comes out is a blanket that is as close to a natural fabric as possible from a man-made fibre

6 - Final Finishing

This process is almost similar but even more sophisticated than the pre-finishing, except here the shearing machine is added. The shearing machine uses German precision blades to ensure the file of fabric is completely uniform. It is akin to using a robot to precision trim any inconsistencies in the fabric, thus making the blanket even more refined to touch

7 - Stitching & Inspection

After the final finishing, trained operators cut and sew the fabric into individual blankets. But not before a final check – this time manually done by experienced hands and focused eyes - so that only the finest goes into your bedroom.

- Towards the end for FY 2022-23 we have undergone the training program organized by Solidarid Regional Expertise Centre to optimize consumption of natural resources (Water & Energy), to further reduce consumption of hazardous chemicals in production activity and development of EMC (Environment Management Cell) which helped us to optimize our production processes which leads to optimum utilization of resources and optimization of cost of goods sold.

Additionally, we have undergone some more changes in our production process as follows:

We have installed following machineries and equipment's which leads to improvement in performance of machineries. All these items were installed in our polishing and finishing machines. These items helped in increasing the speed of our finishing machines which reduced production lead time and It further helped us to reduce the power and fuel consumption. All this developments lead to reduction in production cost.

The details of equipment's and machineries are as follows:

- Inovance 10 H.P. New Drive
- Ledger Blade
- Heater Rod 1700 Watt
- Washing Sensor
- Brushing Fillet Straight (94 meter)
- Brushing Fillet Angular (100 meter)

Also, we have requested for the chartered engineer certificate to analyze and certify the improved capacity due to installation of above machineries and equipment's. Earlier 4 rolls of 100 meters each were sent for drying (dryer machine runs on fuel) in one lot. Now, 4 rolls of 134 meters each are sent for drying. We designed a trolley system that could accommodate these 4 rolls of 134 meters in one lot. Now, 528 meters of fabric is dried at the same cost as compared to 400 meters of fabric earlier.

Qualitative Disclosure about Market Risk

Financial Market Risks

Market risk is the risk of loss related to adverse changes in market prices, including interest rate risk. We are exposed to interest rate risk, inflation and credit risk in the normal course of our business.

Interest Rate Risk

Our financial results are subject to changes in interest rates, which may affect our debt service obligations and our access to funds.

Effect of Inflation

We are affected by inflation as it has an impact on the raw material cost, wages, etc. In line with changing inflation rates, we rework our margins so as to absorb the inflationary impact.

Credit Risk

We are exposed to credit risk on monies owed to us by our customers. If our customers do not pay us promptly, or at all, we may have to make provisions for or write-off such amounts.

Reservations, Qualifications and Adverse Remarks

Except as disclosed in chapter titled “*Financial Statements as Restated*” beginning on page 195 of this Red Herring Prospectus, there have been no reservations, qualifications and adverse remarks.

Details of Default, if any, including therein the Amount Involved, Duration of Default and Present Status, in Repayment of Statutory Dues or Repayment of Deposits or Repayment of Loans from any Bank or Financial Institution.

Except as disclosed in chapter titled “*Financial Statements as Restated*” beginning on page 195 of this Red Herring Prospectus, there have been no defaults in payment of statutory dues and interest thereon or repayment of deposits and interest thereon or repayment of loans from any bank or financial institution and interest thereon by the Company.

FACTORS THAT MAY AFFECT THE RESULTS OF THE OPERATIONS

Unusual or infrequent events or transactions

There are no transactions or events, which in our best judgment, would be considered unusual or infrequent that have significantly affected operations of the Company.

Significant economic changes that materially affected or are likely to affect income from continuing operations

There are no significant economic changes that materially affected Company’s operations or are likely to affect income from continuing operations. Any slowdown in the growth of Indian economy or future volatility in global commodity prices, could affect the business including the future financial performance, shareholders’ funds and ability to implement strategy and the price of the Equity Shares.

Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations

Other than as disclosed in the chapter titled “*Risk Factors*” beginning on page 34 of this Red Herring Prospectus to our knowledge, there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on revenues or income of our Company from continuing operations.

Future changes in relationship between costs and revenues in case of events such as future increase in labour or material cost or prices that will cause material change

According to our knowledge, there are no future relationship between cost and income that would be expected to have a material adverse impact on our operations and revenues. However, increase in the cost of the goods in which the Company deals, will affect the profitability of the Company. Further, the Company may not be able to pass on the increase in prices of the services to the customers in full and this can be offset through cost reduction.

The extent to which material increases in net sales or revenue are due to increased sales volume, introduction of new products or services or increased prices

The increase in revenue is by and large linked to increase in volume of all the activities carried out by the Company.

Total turnover of each major industry segment in which the Issuer Company operates

Our Company is primarily engaged manufacturing and suppliers of bedding essentials, specializing in blankets, bed sheets, comforters, and more.

Relevant industry data, as available, has been included in the chapter titled “*Industry Overview*” beginning on page 107 of this Red Herring Prospectus.

Competitive Conditions

We have competition with domestic and international bedding essentials manufacturers who may vertically integrate their supply chains by acquiring or establishing their own distribution operation which reduces the need for independent distributors and create additional competition in the market. We expect competition to intensify due to possible new entrants in the market, existing competitors further expanding their operations and our entry into new markets where we may compete with well-established unorganized companies/ entities. This we believe may impact our financial condition and operations. For details, please refer to the chapter titled “**Risk Factors**” beginning on page 34 of this Red Herring Prospectus.

The extent to which business is seasonal:

The business of manufacturing blankets and comforters is highly seasonal, with demand peaking during the winter months. As temperatures drop, consumers actively seek warm bedding, leading to increased sales. Conversely, demand declines in warmer months when such products are less needed. This seasonality affects production planning, inventory management, and cash flow, necessitating strategic approaches to align with consumer purchasing behaviours.

Any significant dependence on a single or few suppliers or customers

We depend on external suppliers for all the raw materials required and typically purchase raw materials on a purchase order basis and place such orders with them in advance based on our projected requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our suppliers. The absence of long-term supply contracts subjects us to risks such as price volatility caused by various factors viz. commodity market fluctuations, currency fluctuations, climatic and environmental conditions, transportation cost, changes in domestic regulatory changes and trade sanctions. If we cannot fully offset the increase in raw material prices with an increase in the prices for our products, we will experience lower profit margins, which in turn may have a material adverse effect on our results of operations, and financial condition and ultimately lead to a liquidity crunch. In the absence of such contracts, we are also exposed to the risk of unavailability of raw materials in desired quantities and qualities, in a timely manner.

Increase in income

Increases in our income are due to the factors described above in in this chapter under “*Factors Affecting Our Results of Operations*” and chapter titled “**Risk Factors**” beginning on page 34 of this Red Herring Prospectus.

Status of any Publicly Announced New Business Segments

Except as disclosed elsewhere in the Red Herring Prospectus, we have not announced and do not expect to announce in the near future any new business segment

SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, has introduced an alternate payment mechanism using Unified Payments Interface (UPI) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIIs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days ("UPI Phase I"). The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later ("UPI Phase II"), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors ("UPI Phase III"), as may be prescribed by SEBI. Further, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, and circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Red Herring Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.
